U.S. COIN AUCTION

SEPTEMBER 6-7 & 9, 2018 | LONG BEACH

3002

U.S. Coins

Featuring: The Lake Goodwin Collection • The Trifilio Family Collection • The Terry Brand Estate, Part XII • The Kentfield Collection, Part II

September 6-7 & 9, 2018 | Long Beach

FLOOR Signature® Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center, Room 103B
300 E. Ocean Avenue • Long Beach, CA 90802

Session 1-PREMIER

Thursday, September 6 • 6:00 PM PT • Lots 3001–3297

Session 2

Friday, September 7 • 1:00 PM PT • Lots 3298–3790

Session 3

Friday, September 7 • 6:00 PM PT • Lots 3791–4259

INTERNET Signature® Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4

Sunday, September 9 • 3:00 PM CT • Lots 7001-8064

LOT SETTLEMENT AND PICK-UP

Friday, September 7 • 10:00 AM – 1:00 PM PT

Saturday, September 8 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a 20% Buyer's Premium (minimum \$19) per lot.

Dear Bidder,

Southern California is a great place to buy and sell coins, and the Long Beach Expo always ranks among the preeminent coin shows not only in California, but nationwide. Once again, Heritage Auctions is proud to serve as Official Auctioneer for the Expo. Specialists and collectors of early half dollars, S-Mint double eagles, Colonials, and other rare U.S. coins will be well-rewarded by time spent at the show and bidding at Thursday night's Premier Session and Friday's two Signature® floor sessions. A Sunday Internet Signature® session concludes Heritage's Long Beach event.

THE LAKE GOODWIN COLLECTION

We are pleased to present an outstanding collection of 1795 Flowing Hair half dollars as the centerpiece of our Long Beach auction. The Lake Goodwin Collection is complete by Overton die marriage for the entire 1795 series, a total of 31 varieties, including most of the early and late die states that are of such great interest to early half dollar specialists. This collection encompasses all of the rare varieties, **including the singularly rare and unique O-132 die pair. Just this one example is confirmed, and it is the sole opportunity for a half dollar collector to complete the 1795 variety sequence.** Other scarce-to-rare varieties include the challenging O-101, O-106, O-114, O-120, O-123a, and O-127a die marriages. Leading off the half dollar segment of our Thursday evening Premier Session, The Lake Goodwin Collection also headlines the half dollar section in Friday afternoon's Floor Session 2. Overton enthusiasts and half dollar collectors of every interest level will not want to miss any of the lots that will cross the block during this important offering of early half dollars.

THE TRIFILIO FAMILY COLLECTION

Long Beach is the ideal venue for The Trifilio Family Collection. An excellent selection of San Francisco Mint Liberty Head and Saint-Gaudens double eagles makes up the entirety of this collector-friendly consignment, with attractive S-Mint twenties appearing in the Premier Session, Floor Session 3, and in the online Internet Signature® session. A few highlights include:

Liberty Head Double Eagles

- 1854-S MS60 PCGS. If not for recoveries from the *S.S. Yankee Blade*, few Mint State coins would exist.
- 1859-S AU58 NGC, scarce in full Uncirculated condition.
- 1861-S AU58 NGC, seldom seen so well-preserved.
- 1863-S AU58 NGC, bright and frosted, nearly Mint State.
- 1866-S No Motto AU50 NGC, scarce and almost always circulated. Original toning.
- 1880-S MS62 NGC, elusive Type Three twenty in this grade.

Saint-Gaudens Double Eagles

- 1908-S AU58 NGC. CAC, a low-mintage, early Saint-Gaudens key issue.
- 1922-S MS63 PCGS, a sharp and frosted S-Mint example.
- 1924-S MS63 NGC, challenging in Select Uncirculated condition.
- 1925-S MS63 NGC, just 25 pieces finer at NGC.
- 1927-S MS61 NGC, one of the challenging late-series Saints.

More than 60 lots provide multiple opportunities for collectors to upgrade or add to their twenty dollar sets from the historic San Francisco Mint, which struck double eagles that – at least to some extent – actually circulated and were used for the ordinary transactions of life.

THE TERRY BRAND ESTATE, PART XII

The many 1794 Flowing Hair half dollars assembled by Terry Brand yields an impressive “grading set” of 1794 halves, offered as separate lots in the Premier Session and Floor Session 2. These attractive examples are NGC certified in the sequential grades of VG8, VG10, Fine 12, Fine 15, VF20, VF25, VF30, VF35, XF40, and XF45. Some better varieties are represented, including O-104, O-105, and O-107.

THE KENTFIELD COLLECTION, PART II

Several nice Colonials come to Long Beach as additional selections from The Kentfield Collection. Part I of the collection was featured at the Philadelphia ANA, including several standout Platinum Night Colonial rarities. The Long Beach consignment features a Choice About Uncirculated Bar Copper cent with excellent eye appeal, a 1787 Immunis Columbia copper certified XF40 PCGS with the Eagle Reverse (W-5680), and a PROPRIETORS Carolina Elephant token.

For those who cannot attend the Long Beach Expo in person, Heritage makes it simple to place your bids either before or during the auction. Our live telephone bidding and interactive online bids through HERITAGE Live!® are safe, real-time ways to bid from your computer or mobile device, and provide a bidding platform that is second to none in the auction industry. Dependable mobile or computer bidding is available from anywhere in the world. Our well-trained staff is always happy to accept your bids via e-mail, fax, or regular mail before the auction, and to answer any questions you may have.

Good luck with your bids, and please accept our sincere thanks for your participation. We hope to greet you in Long Beach!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

HERITAGE
AUCTIONS

SESSION ONE

COLONIALS

1694 Elephant Token, VF Details
W-12120, CAROLINA, PROPRIETORS

- 3001** 1694 Carolina Elephant Token, PROPRIETORS — Environmental Damage — PCGS Genuine Secure. VF Details. Hodder 2-F, W-12120, R.6. The seldom-seen GOD PRESERVE CAROLINA variety with corrected spelling in PROPRIETORS. The surfaces are evenly microgranular but no marks are evident. The legends are bold with moderate distortion (as struck) on selected peripheral letters. Cleaned at one time but mostly retoned in gunmetal shades, though glimpses of rose-red remain. Listed on page 59 of the 2019 *Guide Book*.
From The Kentfield Collection, Part II.

1694 Elephant Token, VF20
GOD PRESERVE CAROLINA
PROPRIETORS, W-12120

- 3002** 1694 Carolina Elephant Token, PROPRIETORS, VF20 PCGS. Hodder 2-F, W-12120, R.6. The GOD PRESERVE LONDON elephant tokens are regularly encountered, but the three varieties of greatest interest to Early American collectors are each formidable rarities. There are only three known examples of Hodder 2-G, the GOD PRESERVE NEW ENGLAND variety. Two GOD PRESERVE CAROLINA varieties exist. The extremely rare Hodder 1-E refers to the LORDS PROPRIETORS. The very rare Hodder 2-F shares the same reverse die but was struck after the second E in PROPRIETORS was overpunched with the letter O. The present piece is the PROPRIETORS variety. The deep brown surfaces are evenly defined with all legends bold. Marks are limited to a few trivial ticks, though the surfaces are lightly to moderately porous. Listed on page 59 of the 2019 *Guide Book*. NGC ID# 2ATW, PCGS# 73

1787 Immunis Columbia Copper, XF40
Eagle Reverse, W-5680

1783 Chalmers Threepence, W-1760, XF40
Seldom-Encountered Denomination

- 3003** 1787 Immunis Columbia, Eagle Reverse, XF40 PCGS Secure. W-5680, High R.4. Plain edge. Most of the various Immunis Columbia varieties are great rarities, though W-5680 is merely very scarce. The issue was struck on slightly undersized flans, but the present piece is nicely centered with virtually intact legends. The ebony-brown surfaces are unmarked and show only a hint of granularity. Listed on page 67 of the 2019 *Guide Book*.
From The Kentfield Collection, Part II. NGC ID# BFJL, PCGS# 841

- 3004** 1783 Chalmers Threepence XF40 PCGS. Breen-1018, W-1760, R.5. Annapolis, Maryland silversmith John Chalmers issued small silver coins in 1783, denominated as threepence, sixpence, and shillings. His shillings are most frequently encountered today, and his sixpence are least as frequently seen. Although Chalmers earned a profit from his silver coins, they were well-respected and filled a void in commerce in the late 18th century. This attractive example has delicate rose and champagne toning on its pleasing blue-steel surfaces. A well-centered impression shows full border details on the obverse and partial border details on the reverse. Listed on page 63 of the 2019 *Guide Book*. Population: 3 in 40, 11 finer (7/18).
Ex: Long Beach Signature (Heritage, 1-2/2015), lot 3003, which realized \$17,625. NGC ID# 2AUP, PCGS# 592

Bar Copper 'Cent', AU55+
Excellent Eye Appeal

- 3005** (1785) Bar Copper AU55+ PCGS Secure. W-8520, R.4. The iconic "Bar cent" circulated in New York, as reported by the November 12, 1785 *New Jersey Gazette*. The designs were derived from buttons on the uniforms of Continental Army officers. This better-grade chocolate-brown example has pleasing surfaces. No marks are remotely worthy of comment. All well-known diagnostics are present, including the spur up from the left end of the second bar, the short vertical die crack at the reverse center, and the A over S over U obverse layout, which differs from the circa-1862 John Bolen copy. Listed on page 86 of the 2019 *Guide Book*. From *The Kentfield Collection, Part II*. NGC ID# 2B5J, PCGS# 599

HALF CENTS

1793 C-2, B-2 Half Cent, VG8

- 3006** 1793 C-2, B-2, R.3, VG8 PCGS. The Y is far from the pileus, and a pointed stem points to the left side of the U in UNITED, identifying the C-2, B-2 variety. The Liberty Head facing to the left appears only on the first-year 1793 half cents. Intermingled tan and olive-brown surfaces exhibit rich steel-brown toning around the devices. Minor corrosion on each side only slightly diminishes the eye appeal of this example. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

1804 Half Cent, MS64 Red and Brown
C-13, Plain 4, Stemless Reverse

- 3007** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS64 Red and Brown NGC. Manley Die State 2.0. This variety is characterized by a raised die line from the wreath through the E in UNITED. Crisply struck on the major devices, the obverse dentils are softly defined, characteristic of the later die state for the variety. Ample original orange-red color frequents the borders, while the devices have toned in medium brown hues. Essentially unabraded, though a single tiny spot is noted in the field near the chin. Our EAC grade AU55. Ex: *Andre Dawson Collection / Long Beach Signature (Heritage, 9/1998)*, lot 5572; *FUN Signature (Heritage, 1/2006)*, lot 519, which realized \$3,737.50. NGC ID# 222F, PCGS# 35177 Base PCGS# 1064

LARGE CENTS

1793 Wreath Cent, Fine 12
S-11b, B-16b, Lettered Edge

- 3008** 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4, Fine 12 PCGS Secure. Breen Die State IV. Two leaves after DOLLAR. The surfaces are uniformly chocolate-brown with scattered microscopic marks. On the obverse, several small rim bumps run from 6 to 8 o'clock and there is a small dig on the rim below the 93 in the date. The reverse has a lone rim bump about 9 o'clock. Detail is fairly strong, although ONE CENT is almost entirely worn away. The date, fraction, and peripheral legends are clear. Our EAC grade VG8. NGC ID# 223J, PCGS# 35474 Base PCGS# 1350

1807 S-276, B-6 Cent, AU58
Large Fraction, Satiny Surfaces

- 3009** 1807 Large Fraction, S-276, B-6, R.1, AU58 NGC. Breen Die State IV. The strike is sharp on the Liberty portrait but slightly weak on the lower-left wreath leaves. Both sides are smooth and satiny with no significant contact marks and only a slight brush of high-point friction. Chestnut-brown and olive-gold patina encompasses each side, with daubs of deeper burgundy-brown color behind Liberty's head and in the lower-left reverse quadrant. Our EAC grade XF40. NGC ID# 224M, PCGS# 36451 Base PCGS# 1516

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, Snow-3, PR62
Old Green Label Holder

3010 1856 Snow-3 PR62 PCGS. E.H. Adams, writing in the February-March 1908 volume of Thomas L. Elder's *The Elder Magazine*, stated:

"... though the flying eagle cent of 1856 is traditionally rare, it is by no means scarce, strictly speaking. Therein lies the most remarkable phase of this remarkable coin. Hundreds of 1856 cents are in existence, and there may be thousands. ... Yet the premium brought for a proof specimen of this cent at any of the auction sales held in recent years has rarely fallen below \$12, and there is a record price of \$16 given for a very fine specimen. Not satisfied with a single specimen, it has been the ambition of some collectors to obtain all they could."

The fervor that small cent collectors feel for the 1856 Flying Eagle remains strong today. The die varieties of this issue are among the most heavily studied of all small cents. This Snow-3 proof displays light recutting on the upright of the 5 in the date and has satiny surfaces with elements of gold and red emerging from overall tan-olive toning. The strike is sharp. Housed in an old green label holder. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

1856 Proof Flying Eagle Cent, VF Details
Accessible Example of This Famous Key
Snow-9 Die Pair

3011 1856 Snow-9 — Repaired — PCGS Genuine Secure. VF Details. Die lines above the I in UNITED and at the end of the left bow ribbon confirm the attribution for this usually-seen Snow-9 variety. While the 1856 Flying Eagle cent, a pattern rather than a regular issue but often collected as such, is out of reach for many enthusiasts, this VF Details example provides an opportunity some might not otherwise have. Each side displays wear over the motifs, though the rims remain broad and sharp. The surfaces are bright and show extensive signs of tooling, explaining the grade.

INDIAN CENTS

1867 Indian Head Cent, MS65 Red
Lustrous Fire-Orange Surfaces

3012 1867 MS65 Red PCGS. There may be a couple of hundred Uncirculated 1867 cents extant that qualify for the Red color category, usually seen in MS64 and occasionally offered in MS65 but nearly impossible to obtain in MS66. Lustrous fire-orange surfaces with speckled russet accents show strong detail despite evidence of lapping on the middle headdress feathers. Lapping did not fully efface clash marks in the obverse field. Population: 35 in 65 (3 in 65+) Red, 1 finer (7/18). NGC ID# 227R, PCGS# 2090

1872 Cent, MS64 Red
Eagle Eye Photo Seal

- 3013 1872 MS64 Red PCGS.** Eagle Eye Photo Seal. An attractive woodgrain pattern lightly covers both sides of this copper near-Gem. The design elements feature a bold impression, including all four diamonds and the feathertips. A couple of minute marks barely preclude full Gem classification. A pleasing, original coin. Population: 49 in 64 (1 in 64+) Red, 21 finer (7/18).
Ex: FUN Signature (Heritage, 1/2008), lot 304, where it brought \$9,832.50. NGC ID# 227W, PCGS# 2105

1876 Proof Cent, MS66 Red
Only One Coin Graded Higher

- 3014 1876 MS66 Red PCGS.** CAC. Both sides of this beautiful bronze cent display original copper-orange color with reddish-violet overtones. The diamonds on the ribbon are clear and the other elements are equally bold. From a mintage of 7.9 million coins, few examples compare, let alone exceed, the quality of this Premium Gem. Housed in a green label holder. Population: 13 in 66 (1 in 66+) Red, 1 finer. CAC: 4 in 66, 1 finer (7/18).
Ex: FUN Signature (Heritage, 1/2008), lot 314, where it realized \$8,625. NGC ID# 2283, PCGS# 2126

1877 Indian Cent, MS65 Red
Undisputed Key to the Series

- 3015 1877 MS65 Red PCGS.** Ex: Richard Collection. Struck from the Type One reverse with the N in ONE shallowly impressed. Small denomination coinage production was cut across the board in 1877, which resulted in a limited mintage of only 852,500 cents that year. The 1877 is universally regarded as the undisputed key to this widely collected series. This Gem is well-struck with trivial softness on the foremost feathertips. Lustrous surfaces display rich Red color over each side with a light speckling of violet in the left obverse field. An outstanding key date representative. Population: 26 in 65 (3 in 65+) Red, 8 finer (7/18).
Ex: FUN Signature (Heritage, 1/2004), lot 4291; Palm Beach Signature (Heritage, 11/2004), lot 5227; FUN Signature (Heritage, 1/2008), lot 2691, where it realized \$21,850. NGC ID# 2284, PCGS# 2129

1878 Cent, MS66 Red
A Single Coin is Graded Finer

- 3016 1878 MS66 Red PCGS.** This attractive Premium Gem boasts razor-sharp definition and impeccably preserved, lustrous surfaces. Each side exhibits deep copper-orange color and intermittent amber-gold accents along with infrequent flecks of carbon that assure the originality of this high-quality Indian cent. Population: 17 in 66 (1 in 66+) Red, 1 finer (8/18).
Ex: FUN Signature (Heritage, 1/2004), lot 4293; Central States Signature (Heritage, 5/2007), lot 1100; FUN Signature (Heritage, 1/2008), lot 321, where it realized \$6,842.50. NGC ID# 2285, PCGS# 2132

PROOF INDIAN CENT

1868 Cent, PR65 Red
Deep Mirrors, Noticeable Contrast

- 3017 1868 PR65 Red PCGS. CAC.** Beautiful copper-gold surfaces exhibit lime-green and rose accents in the fields, which, thanks to their deep mirrors, produce noticeable contrast against the motifs. The reverse is inverted nearly 180 degrees, as often seen on proofs from this year. A few tiny obverse flecks do not detract in the least. Population: 9 in 65 Red, 1 finer in non-Cameo. CAC: 2 in 65, 0 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 229; FUN Signature (Heritage, 1/2008), lot 384, where it brought \$4,644. NGC ID# 229L, PCGS# 2293

LINCOLN CENTS

1913-S Cent, MS65+ Red
Few Finer Pieces Known

- 3018 1913-S MS65+ Red PCGS Secure. CAC.** Luminous satin surfaces on this high-end Gem are devoid of carbon spotting and abrasions. Localized strike softness occurs on the O in ONE and the PLU in PLURIBUS, but the coin is otherwise well-defined. Original copper-red color engulfs each side, earning a CAC endorsement. The 1913-S Lincoln cent is scarce in Gem Red condition and rare finer. Population: 77 in 65 (22 in 65+) Red, 3 finer. CAC: 8 in 65, 1 finer (7/18). NGC ID# 22BF, PCGS# 2467

1914-D Cent, MS65 Red and Brown
Outstanding Original Color

- 3019 1914-D MS65 Red and Brown PCGS.** This key-date Lincoln cent showcases luminous satin surfaces with a faint mattelike texture. Original copper-red luster remains on each side, although burgundy and chestnut toning affects about 50% of the coin's surfaces. A few scattered flecks do not detract. Higher-graded Red and Brown coins are decidedly rare. Population: 70 in 65 (2 in 65+) Red and Brown, 4 finer; 73 in 65 (9 in 65+) Red, 7 finer (7/18). NGC ID# 22BH, PCGS# 2472

1983 Doubled Die Reverse Cent, MS68 Red
FS-801, Guide Book Variety

- 3020 1983 Doubled Die Reverse, FS-801 (revised number for FS-036), MS68 Red NGC.** Designated by NGC as FS-036, the prior *Cherrypickers'* attribution for FS-036. This popular *Guide Book* variety shows impressive die doubling on the reverse legends and the lines of the Lincoln Memorial. A desirable pumpkin-gold example that boasts exemplary preservation. The strike is full except on the STA in STATES. To see the most accurate results for comparable prices realized, click on the "Doubled Die Reverse Tab" in the Guide and Info area on the website. Census: 10 in 68 Red, 0 finer (7/18). NGC ID# 22HW, PCGS# 38063 Base PCGS# 3056

PROOF LINCOLN CENT

1990 No S Cent, PR69 Red Deep Cameo
Top-Grade Registry Coin

- 3021** 1990 No S, FS-101, PR69 Red Deep Cameo PCGS. Most 1990 No S proof Lincoln cents are Red with Deep or Ultra Cameo contrast. However, a minority of these pieces grade PR69, and none are in PR70. This top-grade example is essential for the Registry Set collector. Needle-sharp design elements with frosty copper-pink luster contrast dramatically against liquidlike mirroring in the fields, and the preservation is virtually flawless. PCGS has seen 53 submissions of the No S proof in this grade and none finer (8/18). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

PROOF TWO CENT PIECE

1866 Two Cent, PR66 Red and Brown
Woodgrain Patina, First-Generation Holder

- 3022** 1866 PR66 Red and Brown PCGS. CAC. The exact number of 1866 two cent proofs produced is unknown but reported to be in excess of 725 pieces. This woodgrain-toned example shows a moderate degree of contrast on the reverse and flashy, unmarked fields on each side. Encapsulated in a first-generation holder. Population: 26 in 66 (4 in 66+) Red and Brown, 0 finer in this category. CAC: 21 in 66, 0 finer (7/18). NGC ID# 274V, PCGS# 3631

THREE CENT NICKEL

1885 Three Cent Nickel, MS63
Lowest Mintage of the Series

- 3023** 1885 MS63 PCGS. Only 1,000 three cent nickels were struck for circulation in 1885, marking the lowest mintage in the series. Surviving examples of the date are scarce in all grades. This Select representative displays satiny luster and a sharp strike. Uniform olive-gold toning covers each side, masking a few light abrasions that determine the grade. Population: 8 in 63, 48 finer (7/18). NGC ID# 275G, PCGS# 3753

BUFFALO NICKELS

1916-D Nickel, Outstanding MS66
None Graded Higher

- 3024** 1916-D MS66 PCGS. Strike and luster are typically strong and vibrant on 1916-D Buffalo nickels, as they are on this Premium Gem. What sets this offering apart from most other examples is its outstanding, unsurpassed preservation. Each side shows a couple of generally well-hidden ticks and nothing else. Mostly brilliant surfaces yield occasional golden elements that further the appeal. An important Registry opportunity. Population: 23 in 66 (2 in 66+), 0 finer (7/18). NGC ID# 22RB, PCGS# 3932

1918-S Nickel, Strong MS65
Rose and Blue Patina, One Finer at PCGS

- 3025** 1918-S MS65 PCGS. Ex: ADM Collection. The 1918-S has long been recognized as one of the most challenging issues in the early Buffalo nickel series. Even when high-grade pieces are found, strike detail is often soft because the dies were spaced widely apart to reduce wear. This particular coin is much better-defined than usual. The reverse details are exceptionally sharp over the bison's head and tail. Beautifully toned with rich rose centers and a slight accent of blue around the margins. Strongly clashed with PLURIB visible below the chin. Population: 40 in 65 (4 in 65+), 1 finer (7/18). NGC ID# 22RK, PCGS# 3940

1919-D Nickel, Satiny Gem
Sharply Struck

- 3026** 1919-D MS65 PCGS. The 1919-D Buffalo nickels, along with their S-mint counterparts, rank among the condition rarities in the series. This example has unusually sharp design details and a curious rim break along the left obverse border. The surfaces display satiny luster with pleasing lilac and gold color. Population: 71 in 65 (5 in 65+), 20 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 699, where it brought \$6,440. NGC ID# 22RM, PCGS# 3942

1919-S Nickel, Well-Struck Gem

- 3027 1919-S MS65 PCGS.** The 1919-S is often struck from badly eroded dies and softly defined, but not this Gem. Strike is as strong as can reasonably be expected, just shy of full with a trace of incompleteness on the braid and bison's shoulder. However, the date and other legends are razor-sharp. Gold accents complement frosty, well-preserved surfaces. Die clashed under the chin. Population: 35 in 65 (3 in 65+), 3 finer (7/18). NGC ID# 22RN, PCGS# 3943

1921-S Nickel, MS65
Excellent Quality for the Issue

- 3028 1921-S MS65 PCGS.** The 1921-S nickel is a challenging coin to find in desirable condition. Many examples are subject to laminations and toning streaks, the result of poorly prepared planchet stock (David Lange, 2006). This radiantly lustrous specimen is devoid of any such afflictions. Soft violet and gold patina graces each side. The design elements are well brought-up, save for softness in the hair on the bison's head. Close examination reveals no mentionable marks. Population: 81 in 65 (7 in 65+), 9 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 714, where it realized \$8,050. NGC ID# 22RU, PCGS# 3948

1924-S Buffalo Nickel, MS65
Low-Mintage Key

- 3029 1924-S MS65 PCGS.** The 1924-S Buffalo nickel claims a small mintage of 1.4 million pieces, and few high-quality examples were saved by contemporary numismatists. The 1924-S suffered heavy wear and attrition at the time of issue and, although examples were enthusiastically pulled out of circulation in later years, it remains one of the most challenging issues of the series, even in circulated grades. Specimens are rare in MS65 condition, and virtually unobtainable any finer.

The present coin is a charming Gem, with well-detailed design elements that show a full horn detail on the bison and just a trace of softness on the hair above the braid. The well-preserved surfaces radiate satiny mint luster under attractive shades of emerald-green and ice-blue toning. Housed in a green label holder. Population: 46 in 65 (1 in 65+), 4 finer (7/18). NGC ID# 22RZ, PCGS# 3953

1924-S Nickel, MS65
Well-Struck Series Semikey

3030 1924-S MS65 PCGS. Ex: ADM Collection. Occasionally well-struck 1924-S nickels can be found, but the scarcity of such coins is not only related to poor production methods at the S-mint. It is also a reflection of the availability of this issue as a whole. Only 1.4 million pieces were struck, and only a few hundred coins survive in mint condition. This piece has a bright, frosty finish and rich golden-rose and lilac toning. The reverse is essentially fully struck, but there is a bit of the expected softness on the Indian's braid on the obverse. Population: 48 in 65 (1 in 65+), 4 finer (7/18).

Ex: Long Beach Signature (Heritage, 9/2007), lot 725, where it realized \$13,800. NGC ID# 22RZ, PCGS# 3953

1926-S Buffalo Nickel, MS64
Sought-After, Low-Mintage Key

3031 1926-S MS64 PCGS. The 1926-S Buffalo nickel claims the smallest regular-issue mintage of the series, at a meager 970,000 pieces. Despite being struck on good quality planchets, the 1926-S was not a well-made issue. The reverse dies were well-worn leftovers from earlier years and most examples seen show weakness on the bison's head and shoulder, as well as the peripheral legends. Although the 1926-S was heavily saved from circulation in later years, it remains a sought-after key to the series, especially in high grade.

The present coin is an attractive Choice specimen that shows a better-than-average strike, with just a touch of the usual softness on the bison's shoulder and the hair above the braid. The well-preserved surfaces are lustrous and appealing, with subtle highlights of greenish-gold and lavender toning. PCGS has graded 16 numerically finer examples (7/18). NGC ID# 22S7, PCGS# 3959

1926-S Nickel, MS64
Uncollectible Any Finer
Lowest Mintage in the Series

- 3032 1926-S MS64 PCGS. The lowest mintage among all regular issues in the Buffalo nickel series makes the 1926-S a popular coin in any grade level. It should not pose much of a problem through XF condition, but anything in Mint State is scarce. According to David Lange, "Worn reverse dies are the norm for the 1926-S." Such is the case with this near-Gem. Reverse detail is slightly soft despite having been well-struck, as evidenced by the sharp obverse. Iridescent gold and blue patina provides color to the frosty, largely nickel-gray surfaces. Ticks are minimal. PCGS reports 17 submissions graded finer (8/18). NGC ID# 22S7, PCGS# 3959

1937-D Three-Legged Nickel, MS64
FS-901, Famous *Guide Book* Variety

- 3033 1937-D Three-Legged, FS-901, MS64 NGC. The famous 1937-D Three-Legged nickel reflects a failed attempt to improve heavily worn and eroded dies that resulted in the bison's front right leg being effaced. Examples are most often found in XF and AU grades, while coins at this level are conditionally scarce. Attractive pastel iridescence colors the obverse in shades of peach-orange, rose-violet, blue, and green. That side is clean, while the nickel-gray reverse shows a couple of small abrasions. A typically defined key-date representative. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

BUST HALF DIMES

1830 Half Dime, V-4, LM-6, MS66
Exquisite Quality and Color

- 3034 1830 V-4, LM-6, R.5, MS66 PCGS. CAC. Diagnostics for the rare LM-6 variety include the 0 positioned left under the curl, star 13 southeast of the adjacent curl, and the second T in STATES over the space between the BU in PLURIBUS. This is likely among the finest examples for the die pair, if not the sole finest. Originally preserved surfaces feature violet and cobalt-blue patina over the centers that turns to lighter shades of green and gold color near the borders. Boldly struck with faint clash marks. Population (for the variety): 1 in 66, 0 finer (7/18). PCGS# 38644 Base PCGS# 4277

1831 Half Dime Type Coin, MS67
V-3, LM-7, Beautifully Lustrous

- 3035 1831 V-3, LM-7, R.2, MS67 PCGS Secure. The Capped Bust half dime as a type is scarce in MS67, and the 1831 date is a major rarity this fine. LM-7 is a plentiful variety. Frosty original mint luster illuminates sharp devices on this type coin, while each side displays lilac, champagne, yellow-gold, and sea-green toning. Eye appeal is remarkably strong. We have seen only a few different Superb Gem examples of this date in recent years. Population (all varieties included): 12 in 67 (1 in 67+), 1 finer (7/18). NGC ID# 232D, PCGS# 38662 Base PCGS# 4278

SEATED HALF DIME

1848-O Half Dime, Toned MS67
Tied for Finest at NGC

- 3036 1848-O MS67 NGC. This Superb Gem 1848-O half dime is tied for the finest at NGC and is well-within the Condition Census when PCGS coins are included. The strike is sharp on the obverse but is slightly weak on the reverse on the upper-left portion of the wreath and on the AL in HALF. Vivid multicolor toning over each side mainly clings to the margins, leaving the interiors with gold and pearl-gray hues. No abrasions are worthy of mention on this satiny, well-preserved New Orleans condition rarity. Census: 3 in 67, 0 finer (7/18). NGC ID# 233C, PCGS# 4340

PROOF SEATED DIMES

1866 Dime, Stunning PR68
One of Two Finest Known
Ex: Gardner

- 3037** 1866 F-102, R.3, PR68 NGC. This variety is attributed by a die defect between shield lines 6 and 7 at the bottom. The obverse offers swaths of lavender-gray, gold, and blue patina, while the reverse shows similar peripheral colors that surround an essentially untinted center. All design features exhibit razor-sharp definition, and both sides are immaculately preserved. Stunning eye appeal. The scarcity of business strikes, with its 8,000-piece mintage, places added pressure on the 725 proofs struck in 1866. Census: 2 in 68 (1 in 68 ★), 0 finer (7/18).

Ex: Long Beach Signature (Heritage, 9/2007), lot 993; ANA Signature (10/2012), lot 3970; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98294, where it realized \$8,225. NGC ID# 23CP, PCGS# 539017 Base PCGS# 4759

1874 Arrows Dime, PR66 Cameo
Among the Finest Cameos Certified

- 3038** 1874 Arrows, F-101, PR66 Cameo NGC. No Ultra Cameo proofs are reported at NGC, making this Premium Gem Cameo — one of the finest Cameos certified — an important Registry coin and a major condition rarity. Both sides are sharp and modestly contrasted with outstanding preservation and depth of mirroring. A hint of light golden toning warms the surfaces. Census: 3 in 66 Cameo, 0 finer (7/18). NGC ID# 23DJ, PCGS# 539481 Base PCGS# 84770

BARBER DIME

1904-S Barber Dime, Deeply Toned, MS66

- 3039** 1904-S MS66 PCGS. Ex: Lily Nicole Collection. The fields and peripheries of this vividly toned Premium Gem have speckles of lilac and sea-green patina, while the central devices show light champagne color. A well-struck representative with bright, satiny luster and pleasing surface preservation. Only 800,000 dimes were produced at the San Francisco Mint in 1904, and survivors are difficult to obtain in high grades. Population: 8 in 66 (2 in 66+), 1 finer (7/18).

Ex: Denver Signature (Heritage, 8/2006), lot 942; Central States Signature (Heritage, 4/2015), lot 3937. NGC ID# 23ES, PCGS# 4834

MERCURY DIMES

1916-D Mercury Dime, CAC-Endorsed XF40

- 3040** 1916-D XF40 NGC. CAC. Elements of champagne toning grace the slate-gray surfaces of this XF 1916-D Mercury dime. There is one small ebony spot on the W in WE, but the coin is otherwise free of distractions. Scattered light marks accompany the grade but are not bothersome. When tilted beneath a light, tiny remnants of luster emerge from the most protected peripheral regions. The CAC green label makes this piece stand out among its peers. Few 1916-D dimes are so-endorsed in this grade. CAC: 19 in 40, 67 finer (7/18). NGC ID# 23GY, PCGS# 4906

1926-S Dime, Golden-Toned MS65 Full Bands

- 3041** 1926-S MS65 Full Bands PCGS. Traces of low intensity powder-blue, rose, and beige-gold toning cover each side of this piece, joined on the reverse by occasional dapples of deeper olive-gold color. A sharp strike stretches from rim to rim and includes fully separated horizontal bands on the fasces. A minor tick or two define the grade. The 1926-S Mercury dime is a rarity in Gem Full Bands condition, and finer pieces are beyond the reach of most collectors. Population: 27 in 65 Full Bands, 14 finer (7/18).

Ex: Long Beach Signature (Heritage, 2/2007), lot 3026, which realized \$5,635; Long Beach Signature (Heritage, 6/2014), lot 4427, which realized \$7,343.75. NGC ID# 5LX7, PCGS# 4959

1942/1 Mercury Dime, MS65
Nearly Full Band Separation

- 3042** 1942/1 FS-101 MS65 PCGS. CAC. The 1942/1 Philadelphia overdate has been long branded in the minds of collectors as one of the most significant coins in the Mercury dime series. David Lange remarked in *The Complete Guide to Mercury Dimes* (1993):

“Also adding to the demand for this overdate is its notoriety over the past 60+ years, having been discovered and illustrated within months of its coining. The Philadelphia Mint overdate has been a fixture in the ‘Red Book’ since early editions, and this has further guaranteed its place in numismatic legend. Until recently it was also the only one of the two overdates to be included in coin albums.”

This is an outstanding Gem representative, strongly lustrous and slightly frosty with subtle yellow-gold peripheral tints around silver interiors. The strike is generally sharp. The horizontal fasces bands are separated save for slight merging at the far left end. Population: 8 in 65, 9 finer. CAC: 5 in 65, 4 finer (7/18).

Ex: *Chicago Signature* (Heritage, 8/2011), lot 7092, which realized \$13,800. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

TWENTY CENT PIECE

1875-S Twenty Cent, MS67
Brilliant and Frosty Type Coin
Only Two Examples Finer

- 3043** 1875-S MS67 PCGS. BF-9, R.2. The twenty cent denomination is one of the great failures in American numismatics. There was never any great need for it. Its use was limited to the West, where consumers would often pay a quarter for items worth a bit (one reale, or 12.5 cents) and receive a dime back in change. Copper did not circulate in the Pacific states, so consumers were often shortchanged by two cents. The twenty cent denomination was suggested by Nevada Senator John P. Jones as a way of solving that problem. It never caught on, and the denomination was abandoned for circulation in 1876, one year after it was first introduced. The 1875-S is the most plentiful issue in the short-lived series, claiming a mintage of 1.1 million coins.

This Superb Gem nearly ranks among the finest survivors, surpassed by one example each at PCGS and NGC. Both sides are totally brilliant and brightly frosted with just a couple of microscopic ticks and a few wisps of pale gold color. Some stars are razor-sharp, others less so, and while the eagle's talons are fully defined, the upper-left wing tip lacks detail. No matter, the overall quality is practically unimprovable. This variety features a die chip in the dentils below the 8. The mintmark is high and ever so slightly recut. Population: 5 in 67, 1 finer (7/18). NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

1876 Twenty Cent, PR64 Cameo
Sharp and Pleasing

- 3044** 1876 PR64 Cameo NGC. BF-1, R.4. Most surviving proof 1876 twenty cent pieces do not have significant cameo contrast. Only a few Ultra Cameos are reported at NGC, and Cameos are moderately elusive. This Choice Cameo displays sharp detail and modestly contrasted surfaces. A few traces of light golden color appear here and there, but the coin is primarily brilliant. Census: 19 in 64 Cameo, 33 finer; 1 in 64 Ultra Cameo, 3 finer (7/18). NGC ID# 27H3, PCGS# 85304

EARLY QUARTER

1804 B-1 Quarter, Fine 12
Lowest Mintage Heraldic Eagle Date

- 3045** 1804 B-1, R.3, Fine 12 PCGS. Tompkins Die State 2/2. The die gouge between stars 8 and 9 identifies B-1, the more available of the two 1804 quarter varieties. Both die pairs combined struck only 6,738 coins, making the 1804 quarter overall a highly sought-after key date. This is a nicely detailed tan-gray and slate example with relatively smooth surfaces. Minor adjustment marks (as made) are apparent on the reverse, below the central clouds.
Ex: FUN Signature (Heritage, 1/2008), lot 1085, which realized \$10,350; Los Angeles Signature (Heritage, 8/2009), lot 559, which realized \$8,050; ANA Signature (Heritage, 8/2015), lot 4595, which realized \$7,050. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

SEATED QUARTERS

1852-O Seated Quarter, MS61
Extremely Rare in Finer Grades

- 3046** 1852-O MS61 NGC. Briggs 1-A. From a small mintage of 96,000 pieces, the 1852-O Seated Liberty quarter is an elusive issue in all grades. Unfortunately, the 1852-O was not a well-produced issue and most examples seen are softly struck, with a rounded, beveled rim that did little to protect the surfaces of the coin from wear and abrasions. The coins were released into circulation and few were saved by contemporary collectors, making the 1852-O especially elusive in mint condition.

The present coin is an impressive Mint State representative, with well-detailed design elements that show a touch of the usual softness on the stars, Liberty's head, and the central reverse. The lightly marked, brilliant surfaces radiate satiny mint luster and the eye appeal is quite strong. Census: 1 in 61, 1 finer (7/18). NGC ID# 23T9, PCGS# 5420

1853/53 Quarter Dollar, MS63
FS-301, No Arrows

- 3047 1853/53 No Arrows, Briggs 1-A, FS-301, MS63 PCGS. The underlying 5 and 3 are clearly visible south of the final position on this repunched date variety that was sometimes called an 1853/2 overdate in older catalogs. This is the only known variety for the 1853 No Arrows quarter dollars. A lovely Select Mint State example, the surfaces exhibit satiny silver luster with delicate peripheral gold toning. Population: 3 in 63, 17 finer (7/18). NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

1853-O Arrows and Rays Quarter, MS63

- 3048 1853-O Arrows and Rays MS63 NGC. Briggs 1-B. The Seated Liberty design was modified to include arrows at the date and a halo of rays on the reverse to indicate a weight change in 1853. The rays were removed in 1854, creating a popular one-year subtype. This impressive MS63 example is sharply detailed, with faint die cracks through many of the obverse stars, the date, and the arrows. Some clash marks show in the field, near Liberty's right (facing) arm. Extensive evidence of die rust shows on the reverse. The surfaces are lustrous and lightly marked. Census: 8 in 63, 6 finer (7/18). NGC ID# 23U5, PCGS# 5428

1854-O Seated Quarter, XF45
Scarce 'Huge O' Variety, Ex: Gardner

- 3049 1854-O Arrows, Huge O, Briggs 1-A, FS-501, XF45 PCGS. A likely scenario for this distinctive and elusive variety would be that a die was shipped to New Orleans without a mintmark, and the "O" was engraved by hand. The 1854-O "Huge O" quarter is known for its many cracks and other die flaws, but its profound rarity in higher circulated grades drastically outweighs its circulated appearance. Balanced gunmetal and charcoal-gray surfaces complement well-detailed devices on this Choice XF example, while the characteristic die cracks are seen on the lower portion of the reverse.
Ex: Long Beach Signature (Heritage, 2/2005), lot 6544; Central States Signature (Heritage, 5/2005), lot 6858; purchased from Bill Nagle by Eugene Gardner (1/2006); Eugene H. Gardner Collection (Heritage, 10/2014), lot 98365; Central States Signature (Heritage, 4/2018), lot 3284. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

1859-S Quarter Dollar, XF45
Few Known This Fine

- 3050 1859-S XF45 NGC. Briggs 1-A. A mintage of 80,000 pieces was insufficient to ensure the widespread survival of the 1859-S quarter dollar. The issue is scarce in all grades and unknown in Mint State. This Choice XF coin is conditionally rare. The strike is sharp and wear is minimal. Both sides feature uniform olive-gray patina and are devoid of bothersome abrasions. Census: 3 in 45, 3 finer (7/18). NGC ID# 23TN, PCGS# 5450

1865-S Quarter Dollar, MS64
Mint State Rarity

- 3051 1865-S MS64 PCGS. The 1 and 8 in the date are repunched as always. Only a dozen examples of this rare issue are PCGS certified in all Mint State grades. Housed in a green-label PCGS holder, the present example ranks high in the census for this issue. This boldly defined Choice Mint State quarter dollar exhibits frosty mint luster and brilliant, untuned silver surfaces. Population: 4 in 64, 3 finer (7/18). NGC ID# 3KV6, PCGS# 5462

1866-S Quarter Dollar, MS62
From the Eliasberg Collection

- 3052 1866-S MS62 PCGS. Ex: Eliasberg. Housed in a green-label PCGS holder, this lovely Mint State example represents the debut of the With Motto type of Seated Liberty quarters. While a number of hairlines prevent a higher grade, this lovely example has bright silver surfaces with reflective fields and faint, dappled toning.
Ex: "New York Collector" Sale (Edouard Frossard, 3/1895); J.M. Clapp; John H. Clapp; Clapp Estate; Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1487. NGC ID# 23UC, PCGS# 5469

1868-S Seated Liberty Quarter, MS62
Rarely Seen Finer

- 3053** 1868-S MS62 NGC. From a nominal mintage of 96,000 pieces, the 1868-S Seated Liberty quarter is a rare issue in Mint State condition. This attractive MS62 specimen exhibits well-detailed design elements, with just a touch of softness on the upper stars. The lightly marked surfaces are lustrous and appealing, with a few hints of golden-tan toning. Census: 3 in 62, 8 finer (7/18). NGC ID# 23UG, PCGS# 5473

1869 Quarter Dollar, MS64
Important Condition Rarity

- 3054** 1869 MS64 NGC. This Choice Mint State 1869 quarter is brilliant and untuned with satiny silver luster. It is a show-stopper for the grade, with extraordinary eye appeal. Myriad die polishing lines are evident in the obverse and reverse fields as struck, but there are no hairlines and minimal, inconsequential surface marks. Census: 5 in 64, 4 finer (7/18). NGC ID# 23UH, PCGS# 5474

1871-S Quarter, Well-Struck MS62
Rarely Seen in Mint State Grades

- 3055** 1871-S MS62 PCGS. Briggs 1-A. The 1871-S Seated Liberty quarter claims a small mintage of 30,900 pieces and few examples were saved for numismatic purposes, making the issue elusive in Mint State grades. This attractive MS62 specimen offers well-detailed design elements and lightly marked surfaces, under shades of bluish-gray and golden-tan toning. Satiny mint luster adds to the considerable eye appeal. Population: 5 in 62, 9 finer (7/18). NGC ID# 23UP, PCGS# 5480

STANDING LIBERTY QUARTER

1916 Standing Liberty Quarter, MS61
Satiny and Appealing for the Grade

- 3056** 1916 MS61 NGC. The satiny, brilliant surfaces of this Uncirculated 1916 Standing Liberty quarter display relatively few abrasions for the grade, and neither side has mentionable toning. The luster and look of this coin are typical of many Uncirculated 1916 quarters, although the strike is slightly softer than usual, particularly on Liberty's head, the eagle's wing edge and breast, and the date numerals, which are flat but clear. The 1916 quarter is difficult to grade in circulated condition because of its poorly detailed obverse. But in Mint State, one can better study the strike characteristics of the first-year issue. Only 52,000 pieces were struck of this date, utilizing dies with a design that had not yet been fully refined by the Mint. Thus, the 1916 design differs in many minute respects from the more widely distributed 1917 Type One issue. NGC ID# 43XR, PCGS# 5704

WASHINGTON QUARTER

1965 Quarter, Choice AU
On a 90% Silver Planchet

THE LAKE GOODWIN COLLECTION OF EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, VF25
Popular O-101, T-7 Variety

3057 1965 Washington Quarter — Struck on a 90% Silver Planchet — AU55 NGC. Breen-4416, “extremely rare.” 6.13 gm. During 1965, 90% silver quarters were struck bearing 1964 dates, while quarters in the newly introduced clad composition were dated 1965. Given the enormous mintages of both issues, it was inevitable that some silver quarter planchets ended up struck with 1965 dates, a transitional alloy error similar to the famous 1943 copper cents. This lightly circulated pearl-gray example is attractive despite a few thin field marks near the profile.

3058 1794 O-101, T-7, High R.3, VF25 NGC. Tompkins Die State 1/3, with a die crack extending from the rim, through the F in OF, to the leaf below. The first delivery of half dollars at the Philadelphia Mint, comprising 5,300 pieces, took place on December 1, 1794. The second delivery (18,164 pieces) did not take place until February 4, 1795, but most, or all, of those coins were probably dated 1794. Eleven die varieties are known for the date. This coin represents the popular O-101, T-7 variety, with star 15 pointing below the point of the bust and the berries arranged in a 10x11 arrangement on the reverse. The T-7 is a reasonably available variety, and a popular choice of first-year type collectors.

This impressive VF25 specimen retains much interior detail in Liberty’s hair, and all lettering and the date are bold. The lavender-gray surfaces yield to shades of steel-blue at the peripheries, with hints of pale gold and amber on the reverse. The design elements are well-centered, with complete dentilation around both sides. Traces of original mint luster cling to protected areas. The overall presentation is most attractive for this important first-year issue.

From The Lake Goodwin Collection. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half Dollar, Fine Details
Rare O-107, T-5 Variety

- 3059** 1794 O-107, T-5, R.6 — Scratch — PCGS Genuine Secure. Fine Details Tompkins Die State 1/2, with a die crack from the rim to the center of the F in OF. Star 15 points directly at the bust point and the berries are arranged in a 10x11 pattern on the reverse, identifying the rare O-107, T-5 variety. This coin is a pleasing representative of the challenging T-5 variety, which Steve Tompkins believes is unknown in grades above the VF level. This piece exhibits all design elements complete in outline, with interior detail remaining in Liberty's hair and the eagle's feathers. Only some light abrasion is seen on the attractive, lavender-gray surfaces.
From The Lake Goodwin Collection.

1795 Flowing Hair Half, VF25
Rare Overton-101 Variety
Problem-Free for the Grade

- 3060** 1795 2 Leaves, O-101, T-28, R.7, VF25 NGC. Tompkins Die State 1/1. Overton-101 (Tompkins-28) is one of the most challenging rarities desired for a die variety collection of 1795 half dollars. The 2015 Tompkins reference indicates just nine pieces are known, with images of seven examples in the pictorial census. This VF25 coin is not shown, but based on its numeric grade and surface quality, it ranks among the top five O-101 pieces known. Attractive, medium-gray toning is a notch or two lighter on the raised devices for a pleasing visual effect. The obverse strike is especially sharp for the assigned grade, while the reverse is bold at the margins with grade-consistent, smooth wear over the eagle's plumage. The reverse is rotated about 30° counterclockwise in relation to the obverse.
- Star 1 is positioned well below the curl, and berries are arranged 10 left, 9 right — the sole identifiers needed to confirm the rare O-101 die pair. The two lowest, outside-right berries are small (the bottom one is tiny) and both lack stems. Other distinguishing characteristics include the widely spaced I and B of LIBERTY and higher position of R in the die compared to E and T. A semicircular path of die abrasion runs through the top of the date and along the inside right-hand stars, faintly curving toward Liberty's forehead. This R.7 variety is seldom available in any grade — let alone in problem-free VF condition — and it is always in great demand by early half specialists.
- From The Lake Goodwin Collection.* NGC ID# 24E7, PCGS# 39214 Base PCGS# 6052

1795 Flowing Hair Half, Choice VF
O-102, Ideal for the Variety and Type

- 3061** 1795 2 Leaves, O-102, T-26, R.4, VF35 PCGS. Tompkins Die State 4/2. Pale olive-gray surfaces display lilac overtones throughout both sides of this Choice VF Overton-102 (Tompkins-26). Some waviness of the dentils is visible on both sides, as often seen for the variety. Several faint die cracks in the date area indicate a late state of the obverse die, while the reverse shows a middle die state. The centers are bold, with much feather detail present on both wings and some of the eagle's breast and leg feathers still visible. Liberty's hair strands show sharp definition for the grade. The fields and motifs are free of any distracting marks, and there are no adjustment marks to report. This is an ideal collector-grade example of the O-102 and a Choice representative of the Flowing Hair type.

From The Lake Goodwin Collection. NGC ID# 37NX, PCGS# 39215 Base PCGS# 6052

1795 Half Dollar, XF40
O-105, Colorfully Toned

- 3062** 1795 2 Leaves, O-105, T-25, High R.3, XF40 NGC. Tompkins Die State 1/3. A total of 31 die pairs were required to strike the entire 299,680-piece mintage of 1795 Flowing Hair half dollars. A 32nd die pair (O-118) has never been confirmed, and may not exist. The Overton-105 die marriage represents the sole use of its obverse die, which produced enough coins to make the variety readily available in relation to the other 30 known die pairings. This example is colorfully toned in reddish-gold, blue, and lilac shades. The strike is sharp and the coin is well-preserved for the assigned grade, with only light wear and just a few minor marks. Glimpses of mint luster emerge from beneath the toning. Die characteristics include a recut 7 in the date and Liberty's bottom curl nestled between the top points of stars 1 and 2, which both touch the curl.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052

1795 O-105a Half Dollar
Sharp XF40, Smooth Original Surfaces

- 3063** 1795 2 Leaves, O-105a, T-25, R.4, XF40 PCGS Secure. CAC. Tompkins Die State 3/3. An interesting study is possible of the reverse die, which becomes progressively weaker and more comprehensively cracked through each use starting with the O-104 (T-24) variety, then this O-105a (T-25) die marriage, and its final use on the O-103a (T-29) pairing. Here, a band of die abrasion appears beneath ED STATES OF, and a new die crack develops from the rim through the right-hand serifs of I in UNITED, traveling on to the left wing tip and adjacent olive leaf. The radial crack at C in AMERICA is bolder than in any previous use of the die. Still, the reverse die outlasted its obverse counterpart, which apparently failed in its O-105a use. The strike remains sharp, and traces of golden mint luster glow beneath original slate-blue and stone-gray toning. CAC endorsement recognizes the quality surfaces and strong aesthetic appeal.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

The Philadelphia Mint

1795 O-107a Half Dollar, AU50
High Condition Census Example

3064 1795 2 Leaves, O-107a, T-31, R.5, AU50 PCGS. Tompkins Die State 1/4. The O-107 (T-31) variety is scarce overall, both in its early and late die stages. The population is concentrated in VF and lower grade levels, and coins grading XF or finer comprise a small group of underappreciated, true rarities of the Flowing Hair series. Just one Uncirculated example is known (certified MS63 NGC, the Barker/Gladstone coin), while the present AU50 coin ranks second in the combined Condition Census for O-107 and O-107a. To our knowledge, the current Census is 63,50,45,40,35,35. The Parsley reference cites three MS63 examples, but it reflects multiple appearances of the same coin. Both the Stephen Herrman and Steve Tompkins references agree that just one MS63 piece exists to exceed the present coin.

This example last appeared as lot 1922 in the November 14 & 16, 1996 Bowers and Merena auction of the Andrew S. Alexander Collection and Other Important Properties. Light golden-gray toning with splashes of tan-gold display intermingled silver brilliance, with luster prominent among Liberty's hair strands and in sheltered areas throughout both sides. The coin is a textbook example of the late die stage, with a heavy bisecting die crack running downward from the edge just left of the first A in AMERICA, across the eagle, to the opposite edge above T in UNITED. Die chipping along the crack is heaviest near AMERICA. The reverse shows signs of die buckle, and its upper half sits on a higher plane than the lower half along the die break. We expect spirited competition among Overton specialists for this important O-107a half dollar.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

1795 O-108a Half Dollar, VF35
Traces of Mint Luster at the Borders

- 3065** 1795 2 Leaves, O-108a, T-17, R.4, VF35 PCGS. Tompkins Die State 4/3. The O-108a (T-17) ranks among the reasonably available 1795 die marriages, found more frequently in its late die state than early die stages. The Spring 2018 Stephen Herrman Condition Census includes mostly O-108a coins, which outnumber the early die state examples 2 to 1. This example is a Choice collector-grade O-108a, with golden mint luster visible around the stars and legends. While the variety is never sharp on the eagle's breast, this coin is well-defined for the VF35 grade. Natural olive-gray toning lightens at the high points and reveals a golden glow. The sole marks of note are a pair of tiny, obverse rim flaws near 3 and 9 o'clock, likely present on the unstruck planchet.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

1795 Half Dollar, VF35
O-108a, T-17, Choice Surfaces

- 3066** 1795 2 Leaves, O-108a, T-17, R.4, VF35 PCGS. Tompkins Die State 4/3. Often identified by a small rim break on the reverse below the right ribbon, the O-108 (T-17) variety is confirmed by some curious die damage around star 1, and an unusual thick die line in the dentils below the die work. This is the late die stage, which shows a light die crack above AME in AMERICA. Attractive silver-gray surfaces exhibit gold-gray accents around the raised elements. A group of Mint-made adjustment marks cross the eagle's tail. Eye appeal is strong thanks to a sharp strike and Choice, semi-reflective surfaces.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

1795 Flowing Hair Half Dollar, XF40
O-109, T-16, Partially Lustrous Silver-Gray Toning

3067 1795 2 Leaves, O-109, T-16, R.4, XF40 NGC. Tompkins Die State 4/1. This O-109 (T-16) is from the first use of the obverse die, which was later used to strike the O-108 (T-17). Even though the die is in its late state for the O-109 mintage, it does not show more than a few microscopic defects at star 1 that are so prominent on the later O-108 use of the die. The stars and legends retain silver luster and a fair share of brilliance amid light, silver-gray toning. The boldly struck motifs and surrounding fields have a scattering of tiny abrasions and grade-consistent wear, but no individually prominent marks are seen, and there are no adjustment marks on either side. A scratch on the holder is visible in the online reverse image and should not be mistaken for a defect on the coin.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

1795 Flowing Hair Half, XF40
O-110, T-21, Sharp Central Motifs

3068 1795 2 Leaves, O-110, T-21, R.3, XF40 PCGS. Tompkins Die State 2/3. Die clashing confirms a middle die state for this coin, struck before a pair of heavy, crescent-shaped obverse die cracks form in the late O-110a die stages. Most O-110 peripheries are typically weaker than the central elements, and such weakness is seen at star 8 and at the dentils below the date on this example. Adjustment marks throughout the reverse legend contribute to a soft strike in areas along the reverse border. We note some short marks below the left branch stem and above UNITED. Liberty's portrait is sharply struck and mark-free, and the eagle displays bold feather definition on both wings. Pale-gold highlights add eye appeal to attractive, medium-gray surfaces.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 O-110a Flowing Hair Half, VF35
Richly Toned Collector-Grade Example

1795 Flowing Hair Half, XF45
O-110a, T-21, Choice Surfaces With Luster

3069 1795 2 Leaves, O-110a, T-21, R.3, VF35 PCGS. Tompkins Die State 3/3. The Tompkins reference suggests, "the latest reverse die crack occurs before all the obverse die cracks," but at first glance this coin seems to be a contradiction. The Die State 3 obverse die cracks are obvious, yet the initial reverse die crack through E in UNITED is absent. Additional study reveals faint evidence of a crack further down across the branch stem and ribbon, which is a continuation of the crack through E. So we conclude the crack exists, perhaps obscured by die lapping or weakness of strike in that area. In any case, this is a richly toned Choice VF example. Adjustment marks are limited to the reverse margins. Liberty's portrait is especially well-defined and free of marks.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

3070 1795 2 Leaves, O-110a, T-21, R.3, XF45 PCGS. Tompkins Die State 4/3. In later die stages, the obverse cracks between RTY of LIBERTY and stars 9-11 are even heavier and show pronounced sinking of the die to form three levels. This is a Choice XF example of the penultimate die state, with the curved, parallel cracks fully formed but not yet terminal. Mint luster illuminates protected areas of the lilac-gray and reddish-gold surfaces. Light wear corresponds to deeper toning on Liberty's upper hair strands, cheek, and bust truncation. Mint luster gives the reverse a reddish-bronze glow, with brief wear on the eagle's breast and wing tops. A few minor abrasions are visible only with magnification, and no adjustment marks are seen on either side. Housed in a green label holder.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

1795/1795 O-111 Half Dollar, Fine 15
Scarce and Popular 3 Leaves Type, Broad Overdate

3071 1795/1795 3 Leaves, O-111, T-19, High R.4, Fine 15 PCGS Secure. Recut Date. 3 Leaves Below Each Wing. Tompkins Die State 1/3. The O-111 (T-19) variety always draws attention from a host of collectors. Type enthusiasts require an example as the only Flowing Hair half with three leaves under each wing, and Bust half collectors seek it for its massive die break, the widely recut date, as well as its status as the sole 3 Leaves variety. The reverse die break must have happened almost immediately, since no perfect die examples are reported.

This example has attractive, old-silver album toning and no distractions for the assigned grade. The biplanar state of the reverse die is clear — the eagle is worn smooth at the breast, neck, and most wing feathers above the die break, yet its breast, leg, and wing feathers are strong below the break. The Choice Fine designation is confirmed by the obverse, which is essentially perfect for the grade. Pleasing olive-gold and slate-gray colors provide outstanding eye appeal. There are no adjustment marks seen on either side.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

1795 Two Leaves Half Dollar, VF35
A Over E in STATES, O-113a, T-14

3072 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VF35 PCGS. Tompkins Die State 4/2. The die lump between star 15 and the 5 in the date is less advanced than some examples of O-113a (T-14), but it is larger than that seen on O-114 (T-15), confirming this is a coin struck during the remarriage of the O-113 dies. A diagnostic die crack above LIB continues across ERTY to confirm the late die stage. Lightly toned in dappled silver-gray and lilac hues, this Choice VF example is sharply struck with minimal marks and strong eye appeal. The reverse is rotated 40° counterclockwise.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

1795 Flowing Hair Half, AU53
O-113a, A Over E in STATES
Condition Census Quality

3073 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, AU53 PCGS. Tompkins Die State 5/2. The O-113 (T-14) variety shares its obverse with the scarce O-114 (T-15) variety, which had a brief mintage until the O-114 reverse failed. At that time, the O-113 reverse was remarried to the obverse, and more of the O-113 die pair was struck (as O-113a — the later die state). This example shows a late stage of both the obverse and reverse dies confirming the remarriage.

An erroneous E was punched in the reverse working die (STETES rather than STATES), then corrected by overpunching the 'A' to cover most of the die sinker's mistake. No effort was made to efface the errant E, creating an ever-popular Mint blunder. This attractive example retains soft mint luster beneath bluish-gray and gold toning. The O-113 is softly struck at the center of Liberty's hair and the eagle's breast (even on high-grade pieces). A ragged, diagnostic die lump between star 15 and the numeral 5 confirms the late die stage. The Tompkins Condition Census is 64,63,60,55,55,50.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

1795 Half Dollar, AU55
O-117, Lightly Toned and Choice

3074 1795 2 Leaves, O-117, T-3, R.4, AU55 PCGS. Tompkins Die State 3/1. The reverse die was carried over from 1794 (O-102, T-8), then used on four more varieties in 1795. The TED in UNITED is noticeably lower than UNI to identify the resilient reverse die. In total, 41 dies were used to strike 299,680 of the 1795 half dollars; of the dies, 19 were for the obverse, and 22 were for the reverse. The O-117 (T-3) variety is relatively available in both Uncirculated and circulated conditions, but only in context of the series. Choice About Uncirculated examples of any 1795 variety are scarce and highly prized.

This lightly toned, silver-gray representative retains traces of its original mint luster and hints of iridescent color throughout both sides. Actual wear from circulation is minimal — crisp definition is seen on the eagle's wing tops, and some breast feather detail is visible. Only a few light abrasions are seen on the smooth, hard fields. No die crack is visible between star 15 and 5, indicating a middle die state for this coin. Steve Herrman's Spring/Summer 2018 cumulative listings show only two finer auction appearances for O-117 in its early-to-mid die state.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39233 Base PCGS# 6052

1795 O-117a Half Dollar, AU55+
Brilliant With Golden Highlights

3075 1795 2 Leaves, O-117a, T-3, R.4, AU55+ NGC. Tompkins Die State 4/2. Traces of gold toning visit the high points and speckle the fields of this brilliant and lustrous About Uncirculated O-117a (T-3) half dollar. A die crack midway between 5 and star 15 from the edge to the bust truncation confirms an advanced obverse die stage, and a short crack from the rim to A in STATES signifies a late reverse die state. CA in AMERICA is broadly recut, an often overlooked indicator for the variety.

This high-end Choice About Uncirculated example merited the NGC Plus designation. Golden highlights identify points of brief wear. Liberty's hair definition appears "as struck", with just a hint of rub at the uppermost strands, and the reverse is equally sharp. Light-to-moderate Mint-made adjustment marks angle through the right field and continue across the portrait. Although a few Uncirculated O-117 and O-117a examples are known, this piece should be counted among the late die state Condition Census candidates based on its overall quality, eye appeal, and numeric grade.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

1795 Flowing Hair Half Dollar, XF40
O-119, CAC Endorsed, Strong Eye Appeal

3076 1795 2 Leaves, O-119, T-1, R.4, XF40 PCGS. CAC. Tompkins Die State 2/1. Struck from the earliest known die state, this pleasing O-119 (T-1) coin displays sharp XF definition and natural, old-time toning. Medium slate-gray shades deepen at the borders, growing lighter at the high points for the classic, old-silver look preferred by many collectors. A crisp strike adds to the bold eye appeal.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39236 Base PCGS# 6052

1795 O-119 Half Dollar, AU53
First Die Marriage for the Issue
Die Defect Lump Near Bust Point

- 3077** 1795 2 Leaves, O-119, T-1, R.4, AU53 PCGS Secure. Tompkins Die State 4/2. Some 1794-dated coins may have been struck early in 1795, but the O-119 (T-1) variety represents the first 1795-dated variety struck for that year. The wreath and eagle motifs were punched low into the working die for O-119, giving the reverse a bottom-heavy appearance. A die line from the top serif of E in AMERICA to the wingtip below provides easy identification of the reverse die. Likewise, a die defect lump above star 15 is the quick identifier for the obverse, since no perfect die examples are known.

The O-119 is a monogamous die marriage — neither the obverse nor reverse dies were reused in future pairings. Partial mint luster remains throughout both sides of this well-struck and attractive early half dollar. Pale-blue and orange-gold shades display subtle iridescence for exceptional eye appeal. Mint-made adjustment marks at the reverse rims are mostly confined to the margins, especially at the lower-left border. This attractive About Uncirculated example is otherwise smooth and sharply struck, with just a few light marks from its limited time in circulation.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39236 Base PCGS# 6052

1795 Flowing Hair Half, Fine 15
Attractive and Rare O-120 Variety
Fewer Than 20 Known in All Grades

- 3078** 1795 2 Leaves, O-120, T-4, High R.6, Fine 15 NGC. Tompkins Die State 2/1. Fewer than 20 examples have been traced of the rare O-120 (T-4) variety. The Tompkins reference reports 16-17 examples known — 11, but not this coin, are pictured. Nor is it shown among the dozen examples in our 20-year archive. According to the recent Spring and Summer 2018 Stephen Herrman listings, either 17 or 18 pieces are known (8/18).

This example is struck from the late die state, with a crack from the rim through date numeral 7 in the date to the bust. Lumps near stars 1 and 2 accompany an additional die crack from the edge between stars 2 and 3 to the inside points of star 1. A slight flat area at the edge near stars 9 and 10 appears to be Mint-made, as if the planchet had been cut from the side or end of a strip. Dentilation is otherwise full throughout both sides of this warmly toned medium-gray coin. Smooth, unabraded fields and devices show strong definition for the Choice Fine grade.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39237 Base PCGS# 6052

1795 O-121 Half, XF45
Y Punched Over a Star

- 3079** 1795 2 Leaves, Y Over Star, O-121, T-2, High R.4, XF45 PCGS. Tompkins Die State 2/1. It is unclear whether the O-121 (T-2) variety is scarcer than its High R.4 rating, or if it is scarce by demand, because Heritage offers the variety only infrequently. At the Choice XF level, there is no question about its scarcity. This is a sharp and lightly toned example, with a ring of sea-green and olive-gold toning around pale lilac-silver centers. Faint obverse die clashing is seen, but the lack of die cracks indicates an early-to-middle die state. Both sides are boldly struck, with a scattering of short obverse adjustment marks and light abrasions.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39256 Base PCGS# 6052

1795 Flowing Hair Half Dollar, AU55
Elusive O-122 Die Pair
Tied for Finest Known

3080 1795 2 Leaves, O-122, T-5, R.5, AU55 NGC. Tompkins Die State 5/3. The long-lasting reverse die was carried over from 1794 and finally expired during mintage of the O-122 (T-5) variety, its fifth and final use. This example is the latest die stage, with a heavy die crack that curves through the right side of M in AMERICA, touching the lower left serif of E, through the right wing, across two sets of leaves, before it exits the edge below the right ribbon end. A retained cud with die chipping along the crack confirms the terminal reverse die state.

Obverse rim crumble below the 9 in the date forms a lump and demonstrates that the late die state of O-122 is a remarriage of its dies following a brief mintage of the rare O-123 (T-6) variety. The two varieties share the same obverse, but no die crumble is seen on O-123. This Choice About Uncirculated O-122 retains frosted mint luster beneath pale russet and blue toning. Only minor wear is seen on the high points of the design, with occasional wispy lines and small ticks. No adjustment marks are seen. The Parsley, Tompkins, and Herrman listings of high-grade pieces all show a single AU55 coin at the top of their respective Census. This coin is tied for finest known, and the updated Census is 55,55,50,50,45,45.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39238 Base PCGS# 6052

1795 Flowing Hair Half, Rare O-123a
XF Sharpness, Album Toning
Fewer Than a Dozen Pieces Exist

3081 1795 2 Leaves, O-123a, T-6, Low R.7 M — Cleaned — PCGS **Genuine Secure**. **XF Details.** Tompkins Die State 1/3. The reverse die cracked and failed almost immediately, creating one of the rare varieties in the Flowing Hair series. A fatal die crack formed across the top of the second S in STATES, encompassing OF and extending to the edge between OF and AMERICA as a retained cud. A second die crack subdivides the cud to the left of OF. This O-123a (T-6) example shows bi-level shift of the retained cud, weakening the date area on the obverse directly opposite the break.

In terms of sharpness, this coin rivals the finest O-123a known. Although lightly cleaned in its distant past, it has naturally recovered with colorful album toning. Both sides display crisp XF definition despite Mint-made adjustment marks that intersect across the obverse. Glimpses of mint luster remain. The near-terminal die state confirms some of the O-122 (T-5) variety was struck after this coin, since the shared obverse lacks any die crumble beneath the date. The finest O-123a shown in the Stephen Herrman Census grades VF35 (8/18).

From The Lake Goodwin Collection.

1795 Half Dollar, XF40
O-125, T-13, Traces of Mint Luster

3082 1795 2 Leaves, O-125, T-13, R.4, XF40 PCGS. Tompkins Die State 2/2. Orange-gold mint luster is strongest at the obverse margins of this lightly toned, lilac-gray early half dollar. The O-125 variety is moderately scarce among the thirty-one 1795 varieties, and it is often seen with a bold central strike surrounded by somewhat weaker peripheries. The obverse of this coin is especially sharp for the grade. Judging by myriad reverse adjustment marks, the original planchet must have been quite a bit overweight. Although numerous at the margins, the Mint-made adjustments are diminished by strike and are less noticeable surrounding the eagle. Plentiful luster remains throughout both sides.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

1795 Half Dollar, Exceptional XF40
Popular O-126a Small Head Variety

3083 1795 2 Leaves, Small Head, O-126a, T-22, High R.4, XF40 PCGS Secure. Tompkins Die State 1/2. A new master die was introduced for the O-128 (T-18) variety, making O-126 (T-22) the second Small Head variety. This example is struck from a late state die, with a faint die crack curving beneath UNITE along the nearby branch. Current research suggests Robert Scot created the new master die, and John Smith Gardner made the working dies.

This coin is an exceptional Small Head example. It has an ideal combination of surface quality and eye appeal, with the smooth, original old-silver coloration sought by early half collectors — light-gray on the raised devices, rich bluish-gray toning at the margins, and faint iridescence beneath medium-gray fields. The obverse strike is sharp in all regards, while the reverse shows soft definition at the eagle's lower torso and along the wing tops. There are no post-Mint distractions to mention.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39248 Base PCGS# 6054

1795 Flowing Hair Half, O-127a, Fine 12
Finest Known of the Late Die State

3084 1795 2 Leaves, Small Head, O-127a, T-23, Low R.6, Fine 12 PCGS. Tompkins Die State 3/2. Like other examples from Overton's reverse H (Tompkins reverse W), a fine die crack is seen from the lower border that curves into the wreath to the E of UNITED. The O-127a obverse die is shattered, with a crack from the border to the right tip of the 5 and the bust, and yet another from the border through star 7 to the back of Liberty's head. A pair of spectacular, parallel die cracks run from the edge through Y and star 9, both to Liberty's nose, with the area between these cracks raised to form a retained cud. The interesting conclusion one comes to when studying this coin is that the workhorse reverse die outlasted four obverse dies, including two of the Small Head varieties. This is an outstanding example with deep gray surfaces and deeper steel toning near the borders. The coin is essentially ideal for the grade and is the finest-known O-127a in the Tompkins pictorial Census.

Ex: Michael Summers (5/2005); *The Westmoreland County Collection of Early Bust Halves/FUN Signature* (Heritage, 1/2008), lot 1344.

1795 Half Dollar, XF45+
Among the Top Dozen O-130 Half Dollars

3085 1795 2 Leaves, O-130, T-8, Low R.5, XF45+ NGC. Tompkins Die State 3/3. Rich, reddish-gold and brownish-gray toning blankets both sides of this well-struck O-130 (T-8) half. A subtle glow of mint luster at the borders also surrounds the central motifs. Die clashing confirms a late die stage of the obverse, while a diagnostic crack between OF and A in gives way to a second crack along the top of AMERICA. The O-130 ranks among the scarcer 1795 die marriages, especially in Choice XF or finer grades.

From *The Lake Goodwin Collection*. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

1795 Flowing Hair Half Dollar, VG10
 Unique O-132, T-27 Variety
 The Parsley/Tompkins Plate Coin

- 3086 1795 2 Leaves, O-132, T-27, R.8, VG10 NGC.** Tompkins Die State 2/1. Among 1795 Flowing Hair half dollar varieties, the O-132, T-27 is a singular rarity, with only a single specimen known to present day collectors. Despite diligent searching by hundreds of early half dollar collectors over the 137 years since collecting half dollars by die variety became popular, only two specimens of this incredibly rare variety have ever been reported, and one of those coins has not been seen in 89 years. This VG10 NGC coin is the only example certified by either of the leading grading services and the only specimen reported in recent times. Heritage Auctions is pleased to offer this fabulous rarity in just its second auction appearance.

The 1795 Half Dollars

Research by early half dollar specialist Steve Tompkins indicates Chief Engraver Robert Scot engraved all the master dies for the 1795 Flowing Hair half dollars. Two major hubs were used for the obverse dies, one with the Normal Head (deeply scalloped truncation), and another with the Small Head (with a flatter truncation). Assistant Engraver John Smith Gardner probably produced many of the working dies. Nineteen obverse dies and 22 reverse dies were combined to produce 31 different die varieties for the date (discounting the likely erroneous O-118 variety). Delivery warrants indicate a respectable mintage of 317,844 half dollars was accomplished in 1795, but some of those coins may have been dated 1794. All the half dollars were delivered between February 4 and June 5 of 1795.

The O-132, T-27 Variety

The extremely rare O-132, T-27 variety combines Tompkins' Obverse 19 with his Reverse Z. Obverse 19 features the Normal Head motif. The date is narrow and evenly spaced. Some recutting appears on the 7, and this coin shows an anomalous protrusion on the outside curve of the 9. The first curl rests between two points of star 1, touching the one on the left. The letters ER in LIBERTY are closely spaced at the base. Reverse Z displays 10 berries on the left side of the wreath, with five inside and five outside. Nine berries show on the right side of the wreath, four inside and five outside. The lower two berries are small, with no stems. Reverse Z is the only 1795 reverse die with this distinctive berry arrangement. This was the only use of the obverse die, which failed quickly, due to a die crack that developed through the letters ERTY. The reverse die was also used to strike the rare O-101, T-28 variety of 1795.

Early History of the Variety

The first systematic research on early half dollar die varieties was compiled by prominent coin dealer John W. Haseltine and collector John Colvin Randall in the early 1880s. Their findings were published unilaterally by Haseltine in the auction catalog of his own collection in June of 1881. Known as the *Haseltine Type Table*, it was the standard reference on early half dollars for the next five decades.

Unfortunately, the rare T-27 variety was unknown to Haseltine and Randall, and early students of the series remained unaware of this important die marriage until Martin Luther Beistle, of Shippensburg, Pennsylvania, published his landmark study on half dollars in 1929. Beistle formed an extensive collection of half dollars in the first quarter of the 20th century, buying many of his coins from old-time coin dealer David Prosky. With considerable financial backing by the redoubtable "Colonel" E.H.R. Green, Beistle published his well-regarded *Register of Half Dollar Die Varieties and Sub Varieties* in 1929. He identified a single specimen of the O-132, T-27 variety, which he classified as his variety 10 C, noting, "Exceedingly rare; the only one I have seen and believe it to be unique." The obverse of the coin was pictured on page xxv of Beistle's book. The coin shown is from an earlier stage of the dies than the coin offered here, with the die crack through ERTY less advanced. The Beistle coin has never been seen in any collection since its 1929 appearance in his book, and its fate is one of the greatest unsolved numismatic mysteries of the 20th century. The coin may have been lost or misattributed after Beistle's death in 1935, in which case it may be masquerading as a mid-grade specimen of a more common variety in some old-time collection or estate.

Whatever the fate of the Beistle T-27, it has not been seen publicly since 1929, and modern-day numismatists began to have serious doubts about the variety's existence by the time Al Overton published his *United States Early Half Dollar Die Varieties* in the early 1960s. The O-132, T-27 variety was on the brink of being delisted when the coin offered here surfaced in 2000, to the amazement of the entire numismatic community.

The Present Coin

Manny Acosta purchased this coin over the counter at his coin shop in Southern California in July of 2000. With assistance from half dollar specialist Gary Beedon, Acosta attributed the new coin as the incredibly rare O-132 variety. Comparison with the photograph of Beistle's coin confirmed this was a different example, in a more advanced die state. The discovery was celebrated throughout the numismatic community and hailed as the most important half dollar find in decades. Acosta consigned this piece to the Goldberg's auction of the Benson Collection, Part I, where it was described in lot 1728. The lot realized \$39,100, a strong price for any half dollar at the time. The coin has been off the market ever since.

An attractive VG10 specimen, this coin exhibits lightly abraded surfaces with attractive highlights of pale gold and lavender toning. The design elements were strongly impressed and retain some interior detail on Liberty's hair and the eagle's feathers. The lettering and date remain bold, aside from the bottoms of RTY, where the fatal die crack has widened to become an internal cud. The coin is well-centered, with complete dentilation around the rims. The overall presentation is most appealing. To say this lot represents an important opportunity for early half dollar collectors is an understatement. For the collector of early half dollar die varieties, there is no replacement for this celebrated specimen and, once this opportunity passes, it may be decades before the coin is offered again. The discerning collector will bid accordingly.

ADDITIONAL EARLY HALF DOLLARS

1794 O-101 Half, Very Fine
Pleasing Sea-Green Surfaces

- 3087** 1794 O-101, T-7, High R.3, VF20 NGC. Tompkins Die State 1/3. A relatively early die state for this iconic 1794 die marriage. The dies proved hardy and undoubtedly delivered a majority of the first-year mintage. As often seen for T-7, on this coin the obverse dentils become faint near 4 o'clock, perhaps due to a misalignment of the obverse die. There are no adjustment marks, and both sides are refreshingly unabraded, with identifiers limited to four trivial lines near the E in AMERICA. The surfaces exhibit deep sea-green fields that contrast slightly with dove-gray high points.
From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half Dollar, O-101a, Fine 12

- 3088** 1794 O-101a, T-7, High R.3, Fine 12 ANACS. Tompkins Die State 1/5. There is no shortage of demand for the 1794 half dollar, but there are multiple interested parties for every one example that survives. This variety, O-101 (and O-101a), happens to be the most plentiful die marriage for the year. Little central design detail remains, but all the important elements are present on this example. The margins display deep crimson-brown and violet patina that progresses to lighter shades of lavender-gray over the interiors. Housed in a small-sized holder. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Hair, VF25
O-101a, Late Die State

- 3089** 1794 O-101a, T-7, High R.3, VF25 NGC. Tompkins Die State 1/5. The diagonal crack between a leaf tip and the second S in STATES is diagnostic for O-101a. On well-worn examples, that crack can be difficult to discern, but it is unmistakable on the present coin. The powder-blue and butter-gold surfaces retain considerable hair and plumage detail. Marks are few, though we mention a line above LIBER and a slight edge bump beneath the 4 in the date. The Terry Brand Estate has provided collectors with many examples of this historic introductory issue, but once they are dispersed, opportunities for acquisition will be limited.
From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, XF40
Desirable First-Year Type Coin

- 3090** 1794 O-101a, T-7, High R.3, XF40 NGC. Tompkins Die State 1/5. Forest-green, lilac-red, and chestnut-gold undertones emerge as this gunmetal-gray representative is rotated beneath a light. A well-defined representative of the ever-popular first-year type coin. The specialist-familiar die cracks on the upper-reverse border promptly identify the variety as O-101a. A few faint parallel adjustment marks cross Liberty's ear and jaw, but these are mint-made and customary for the Flowing Hair type. A narrow, minor lamination is noted between the UN in UNITED, and is also of mint origin. Encapsulated in a circa-2000 holder.
From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, XF45
Originally Toned

- 3091** 1794 O-101a, T-7, High R.3, XF45 NGC. Tompkins Die State 1/5. Aquamarine and chestnut-gold borders surround lavender-gray centers. The eagle's neck feathers are absent, but the wings display pleasing definition, and the borders shimmer with luster. The surfaces are exceptionally nice for the series, with a tiny rim nick above the R in AMERICA noted strictly as an identifier. The stars and portrait display moderate adjustment marks, as coined and usual for the Flowing Hair type. Overton-101a is the most prevalent 1794 variety, but sharp problem-free examples are always in demand. Certified in a circa-2000 holder.
From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-104, T-11 Half Dollar, Fine 15
Final 1794 Variety

3092 1794 O-104, T-11, R.5, Fine 15 NGC. According to Steve Tompkins, who presented the varieties in their emission order sequence, this die marriage was the final 1794 half dollar. This piece was probably struck early in 1795. The obverse that appeared earlier on O-110 (T-9) and O-103 (T-10), has a die crack from the border down through star 3 to the second hair curl. The reverse is unique to this variety, and shows a rim break over the ER in AMERICA. Pewter-gray surfaces show wisps of gold and pale blue overtones. Grade-consistent handling marks are present, with two old marks in the left obverse field that show toning consistent with the surrounding field.

From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 Half Dollar, O-104, VF30

3093 1794 O-104, T-11, R.5, VF30 NGC. Tompkins Die State 2/3, the intermediate-to-late die state with a crack through star 3 but no indication of the eventual crack from Liberty's chin. The reverse exhibits a double set of clash marks. Overton-104 is a better 1794 die marriage, and the present VF30 example ties for the bottom rungs of the Condition Census for the variety. The stone-gray surfaces are lightly hairlined, and display unimportant obverse adjustment marks (as made), but there are very few marks. As an identifier, we note two tiny roundish obverse field depressions, southeast of the chin and east of the base of the neck.

From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 O-105, T-3 Half Dollar, Fine 12

3094 1794 O-105, T-3, R.5, Fine 12 NGC. The obverse die is perfect as always on this die marriage, and appears earlier on O-111 and later on O-106, according to the Tompkins emission sequence. The reverse die has a faint trace of a die crack through the first T in STATES, and appeared in its perfect state on O-109. Minor adjustment marks and old hairline scratches are evident on each side. This attractive medium gray example shows delicate blue and gold overtones.

From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1794 Half Dollar, Choice VF
Better Overton-105

- 3095** 1794 O-105, T-3, R.5, VF35 NGC. Tompkins Die State 1/1. A better-grade example of this better-variety and better-date Flowing Hair half dollar. Medium lavender-gray and straw-gold toning accompanies moderately circulated and minimally marked surfaces. The reverse displays a few traces of adjustment marks, as made, and shows a couple of small depressions near the M in AMERICA and past the F in OF. Without the radial die crack above the first T in STATES that defines the rare O-105a. Overall, a desirable representative that likely ranks within the top 10 survivors of the die marriage.

From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1794 O-107, T-5 Half Dollar, VG10
Workhorse Reverse Die

- 3096** 1794 O-107, T-5, R.6, VG10 NGC. The obverse die appeared on this variety alone. The reverse die was used for four different 1794 varieties, O-106 (T-4), O-107 (T-5), O-108 (T-6), and O-101 (T-7). There is no evidence of the reverse die crack through the F in OF on this early die state example. Gold toning appears on the pleasing blue-gray surfaces of this example that shows heavy reverse adjustment marks. The usual grade-consistent circulation marks are present on both sides.

From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

1795 Two Leaves Half Dollar
Remarkably Clean VF30, O-130

- 3097** 1795 2 Leaves, O-130, T-8, Low R.5, VF30 PCGS. CAC. The 7 x 10 berry arrangement is unique to Overton-130. The top of the O in OF is defective, a secondary diagnostic. Olive-green and navy-blue peripheral patina surrounds light gray centers. Appropriately defined for the designated grade. Both sides are remarkably clean for a midgrade example of this two-year introductory type.
Ex: Long Beach Signature (Heritage, 6/2014), lot 3870, which realized \$5,581.25. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

1797 Draped Bust, Small Eagle Half, Fine 15
Sought-After, Two-Year Type Coin
Popular O-101a Variety

3098 1797 O-101a, T-1, High R.4, Fine 15 PCGS Secure. Amato 438. Tompkins Die State 3/4. The Draped Bust, Small Eagle design was introduced on the half dollar denomination in 1796 and discontinued after 1797, making it a short-lived, two-year type. No half dollars were actually delivered by the coiner in 1796, although it is possible that some were struck late in the year. Since all the coins were actually delivered in 1797, Mint records combined the mintage for both years on the 1797 Mint report. The reported mintage was a meager 3,918 pieces for both dates combined, making the Draped Bust, Small Eagle half dollar the rarest silver design type and the acknowledged key to any silver type set. Collectors prize examples of both dates in all grades and conditions.

One obverse and two reverse dies were used to strike the 1797 half dollars, creating two major die varieties for the date. This coin represents the O-101 variety, with a leaf pointing to the left foot of the second T in STATES. An extensive network of die cracks is seen on the reverse, including the diagnostic crack from the rim, through the first T in STATES, to the eagle's head that identifies the late die state O-101a. The O-101a is actually seen more often than the earlier O-101.

The present coin is an attractive Choice Fine specimen that shows all major design elements complete in outline and retains much interior detail on the hair and wing feathers. The devices are well-centered, but the dentilation is weak on the obverse from 1 to 4 o'clock and the corresponding area on the reverse. The surfaces are lightly abraded, with silver-gray centers that yield to shades of golden-tan further out, with russet and blue-steel at the peripheries. Traces of mint luster are evident in the sheltered areas. A linear mark between star 5 and the middle hair ribbon serves as a pedigree marker. The overall presentation is most attractive for this early silver rarity. The 1797 Draped Bust half dollar is listed among the 100 Greatest U.S. Coins. Population: 19 in 15, 40 finer (7/18).

Ex: Dominic Graziano Collection (Stack's, 3/2008), lot 278, realized \$53,475. NGC ID# 24EC, PCGS# 39265 Base PCGS# 6060

1802 O-101 Half Dollar, VF30
Original Surfaces, Low-Mintage Key

- 3099** 1802 O-101, T-1, R.3, VF30 PCGS. CAC. Tompkins Die State 1/1. Nearly 8,000 half dollars were delivered on January 26, 1802. Another 21,980 pieces were delivered between December 8 and 10. The issue's low mintage of 29,890 coins makes the 1802 a key in the series. All coins were struck from a single set of dies, the reverse having been previously used in 1801. Lavender-gray patina dominates this smooth, well-circulated example. Golden accents appear over the motifs, while rings of russet, blue, and green color frame the peripheries. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1806/5 Half Dollar, XF40
Rare O-104b Variety, Late Die State

- 3100** 1806/5 O-104b, T-1, R.7, XF40 PCGS. Both dies are in a terminal state on O-104b. On the reverse, heavy rim cud appears above UNITED, and on the obverse a heavy retained cud extends from the tip of the bust up to star 11. This piece is at the top of Stephen Herrman's Condition Census, last seen at auction more than a decade ago. Hints of luster cling to the protected portions of the fields, accented by lilac-gray, gold, and sea-green toning on each side. Strike weakness affects the tip of the bust and the area above the eagle's head, but wear is light.
Ex: Michael Summers; FUN Signature (Heritage, 1/2008), lot 1369, which realized \$6,325. NGC ID# 37BS, PCGS# 39303 Base PCGS# 6077

1806 O-118a Half Dollar, Lustrous MS62
Pointed 6, Multicolor Toning

- 3101** 1806 Pointed 6, Stem, O-118a, T-24, R.3, MS62 PCGS Secure. Tompkins Die State 2/5. Satiny original luster is strongest in the margins on this multicolor Draped Bust type coin. Concentric shades of yellow-gold, rose, mint-green, blue, violet, and dusky peach encompass each side. The right-hand stars are weak, but the design is otherwise well brought up. No major abrasions are seen. O-118a shows a shattered reverse die, with heavy cracks along the left-hand border and diagonally across the eagle from 7 to 1 o'clock. NGC ID# 24EJ, PCGS# 39322 Base PCGS# 6071

BUST HALF DOLLARS

1813 Capped Bust Half, MS61
Large Center Dot, O-108 Variety

- 3102** 1813 O-108, R.3, MS61 NGC. The second 1 in the date is low and a large center dot shows in the upper-left shield lines, identifying the O-108 variety. This is an attractive Mint State example with well-detailed design elements that exhibit flat stars on the left, but sharper-than-usual details on the right. Dusky shades of lavender-gray and champagne-gold toning color the lightly marked surfaces. A few clash marks show on the upper reverse. Housed in a prior-generation holder. NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

1823 Half Dollar, Pleasing VG8
Rare Overton-113 Variety

1834 Large Date, Large Letters Half Dollar
O-102, Lustrous MS65

3103 1823 O-113, High R.6, VG8 PCGS. The Overton-113 variety represents the only truly rare die pair dated 1823, and ranks among the challenging die marriages sought by serious variety specialists from the entire Capped Bust series. The position of stars 7 and 8 are key to confirming the variety, sitting closer to the cap than any other 1823 variety. On the reverse, 50 and C. are more widely spaced than any other 1823 reverse and confirm the sole use of that die.

The latest report from Steve Herrman (Spring, 2018) suggests that only 13 examples of the rare O-113 are known. This is a solid VG8 example — smoothly worn, with pleasing lilac-gray patina and strong rims for the assigned grade. The devices show considerable wear but are fully outlined and problem-free. We note some short, minor abrasions in the left obverse field and an old scratch from the back of the cap toward star 9. This coin is plated on the PCGS Coin Facts website (7/18).

NGC ID# 24FJ, PCGS# 39619 Base PCGS# 6131

3104 1834 Large Date, Large Letters, O-102, R.1, MS65 NGC. The 3 in the date is noticeably repunched on O-102, although this variety is relatively plentiful overall. The 1834 Capped Bust half dollar as a date is elusive in Gem condition and rare finer. This piece displays frosty luster with russet and olive border toning that surrounds pearlescent interiors. Several border stars are weak, but the coin is otherwise well-defined. The surfaces are devoid of bothersome abrasions. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

REEDED EDGE HALF DOLLAR

1836 Reeded Edge Half, GR-1, MS63
Rare This Well-Preserved

3105 1836 Reeded Edge, GR-1, R.2, MS63 NGC. The reeded edge collar was introduced on the half dollar denomination in 1836 to take advantage of the new steam powered technology. Only 1,200 Capped Bust, Reeded Edge half dollars were struck that year, all from the same pair of dies. The 1836 is always in demand because of its low mintage and its status as a first-year type coin. The issue is scarce in all Mint State grades, and rare in MS63, or finer.

The present coin is an attractive Select specimen, with well-detailed design elements that show just a touch of the usual softness on the eagle's left (facing) claw. From a later state of the dies, a die crack is visible from the edge near the second S in STATES into the field, and some small die lumps are clustered around the E. The lightly marked surfaces are blanketed in vivid shades of golden-brown and lavender-gray toning, with satiny mint luster underneath. Census: 6 in 63, 6 finer (7/18). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

SEATED HALF DOLLAR

1873-CC Seated Liberty Half, MS64
Popular Arrows Variant

3106 1873-CC Arrows MS64 NGC. WB-103, Die Pair 6, R.4. Large CC. Arrows were placed at the date on the half dollar part way through the year in 1873, to indicate a slight increase in the weight of the planchet, from 12.44 grams to 12.5 grams. The arrows were continued in 1874, and removed the following year, creating a popular two-year design type. The mintage of Arrows half dollars at the Carson City Mint was a relatively modest 214,560 pieces in 1873, making the issue rare at the MS64 grade level, and virtually unobtainable any finer.

The present coin is an impressive Choice example, with sharply detailed design elements, aside from some weakness on the tailfeathers. Clash marks show in the reverse shield and fine die cracks are evident through the olive leaves. The well-preserved surfaces are lustrous and appealing, with highlights of sea-green and lavender-gray toning. Census: 5 in 64, 2 finer (7/18). NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

PROOF SEATED HALF DOLLAR

1866 Motto Half, PR66 Cameo
Lightly Toned and Well-Contrasted

3107 1866 Motto PR66 Cameo PCGS. Beautiful orange-gold and rose patina circles the rims of this fully struck Premium Gem proof 1866 Motto Seated half dollar. The 1866 coins are popular for type purposes and represent the first issues in the Motto series. This piece features stark contrast with frosted devices against reflective fields. Only partial drapery shows under Liberty's elbow, apparently from die lapping. This specimen is pictured on PCGS CoinFacts. Population: 4 in 66 (1 in 66+) Cameo, 1 finer (7/18).

Ex: Dallas Signature (Heritage, 3/2013), lot 3535, where it brought \$11,926.25. NGC ID# 27TZ, PCGS# 86424

BARBER HALF DOLLARS

1907-S Half Dollar, MS64
Beautifully Toned

3108 1907-S MS64 NGC. Beautiful multicolor toning and subtle field reflectivity deliver outstanding eye appeal on this near-Gem 1907-S half dollar, despite moderate strike weakness that affects the area of Liberty's ear and the head and right (facing) wing of the eagle. Abrasions are minimal and the devices show satiny luster. An outstanding example of the date. We have not offered a 1907-S half dollar in MS64 since 2015. This issue is rare in Choice and finer condition. Census: 7 in 64, 10 finer (7/18). NGC ID# 3KVJ, PCGS# 6511

1908-S Half Dollar, MS66+ ★
Beautifully Toned

3109 1908-S MS66+ ★ NGC. We have seen a few high-grade 1908-S Barber halves with excellent toning, but this Star-designated, Plus-graded Premium Gem is likely the most attractive that we have seen yet. Both sides showcase vivid sea-green, midnight-blue, and violet border toning around sunset-orange and gold interiors. The luster is satiny and unabraded, and the only mentionable strike softness is seen on the eagle's right (facing) wing junction. Few 1908-S half dollars are known this fine. A true Registry-grade example. Census: 4 in 66 (1 in 66+ ★), 1 finer (7/18). NGC ID# 24N7, PCGS# 6515

PROOF BARBER HALF DOLLARS

1900 Half Dollar, PR67 Cameo
A Registry-Grade Example

- 3110** 1900 PR67 Cameo PCGS Secure. The 1900 proof Barber half dollar is a popular date for type collectors. Nonetheless, Superb Gem examples are conditionally scarce. This piece is among the finest Cameos at PCGS. Liquidlike mirroring appears in the fields, complementing softly frosted devices and legends. A light golden hue warms each side. The only mentionable strike weakness is a touch of uneven detail on the right shield corner and the adjacent wing feathers. Population: 8 in 67 (1 in 67+) Cameo, 0 finer; 4 in 67 (1 in 67+) Deep Cameo, 2 finer (7/18). NGC ID# 24P4, PCGS# 86547

1913 Barber Half Dollar, PR67
Late-Date Semikey, Low Total Mintage

- 3111** 1913 PR67 NGC. The 1913 is one of the challenging low-mintage issues with which the Barber half dollar series draws to a close. Only 188,000 circulation strikes were produced that year. Many collectors opt for a high-end proof as a more affordable alternative. This brilliant Superb Gem enjoys reflective fields and modest, if undesignated contrast. Void of mentionable contact and one of 627 specimens struck. Census: 12 in 67 (1 in 67+), 2 finer (7/18). NGC ID# 24PH, PCGS# 6560

EARLY DOLLARS

1795 Flowing Hair Dollar, VF25
Two Leaves, B-2, BB-20

- 3112** 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3, VF25 PCGS. Bowers Die State II. The usual state with a lapped obverse. On BB-20, star 1 punctures the lowest curl, berries are arranged 9x10 on the reverse, and one berry is directly below the right foot of A(MERICA). This is a splendid example for the grade with pleasing grayish-lilac color accented by pale blue toning. Aside from light adjustment marks in the center of the obverse, only the usual minor circulation marks are present. This example has the reverse rotated clockwise about 45 degrees. NGC ID# 24WZ, PCGS# 39985 Base PCGS# 6853

1795 Flowing Hair Dollar, B-5, BB-27, Fine 12
Three Leaves, Circulated Cameo Effect

- 3113** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 12 NGC. CAC. Bowers Die State IV. The obverse shows a clash mark in the field before the chin, and a die crack connects the rim to the branch stem on the reverse. BB-27 features a raised die gouge in the field behind Liberty's curls, making attribution simple. It should also be noted that while the holder indicates this is a Draped Bust dollar on the insert, that is clearly a mechanical error. This plentiful variety would make an excellent example of the Flowing Hair type, used only for two years. The hidden areas show deep olive patina, the fields are steel-gray, and the well-worn motifs are a shade lighter, creating an eye-appealing and original circulated cameo effect. Adjustment marks occur at the central reverse. Housed in a first generation holder. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Draped Bust Dollar, Choice VF
Centered Portrait, B-15, BB-52**

- 3114** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF35 PCGS. Bowers Die State V. The obverse shows a knife-like extension on the die break on Liberty's hair, and a die crack runs through the top of ICA on the reverse. BB-52 is quickly identified as one of just two 1795 Draped Bust variants and the only one with the portrait well-centered. On BB-51, Liberty was too far to the left. The obverse die used here was corrected to fix that problem, and overall quality is often better. This Choice VF stone-gray example was clearly well-struck, and while the high points display noticeable merging, the impression remains bold. Each side is incredibly smooth. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

**1796 B-5, BB-65 Dollar, XF40
Large Date, Small Letters
Small Eagle Type Coin**

- 3115** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF40 NGC. Bowers Die State II, in a late stage, although the die lump between the I and C in AMERICA does not quite touch the C yet. This well-detailed Small Eagle dollar is perfectly centered on the planchet and evenly struck. There are a few wisps of golden toning across the interiors, but the coin is mostly bright with silvery-white color. Wear is minimal, and neither side exhibits bothersome abrasions. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1798 Large Eagle Dollar, AU50
B-27, BB-113, Pointed 9**

- 3116** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU50 PCGS. Bowers Die State II. A thin die crack runs through the top of OF on the reverse. Die erosion on the reverse causes UNITED STATES to merge with the border dentils. The coin is well-struck and shows little wear, and the surfaces are free of significant abrasions. Bright slate-gray coloration includes additional accents of gold, russet, and lilac. Hints of luster remain in the protected portions of the reverse. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**1798 Draped Bust, Large Eagle Dollar, XF45
Rare B-26, BB-114 Variety, Terminal Die State**

- 3117** 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5, XF45 PCGS. Die State V. The reverse is extensively cracked in this terminal die state. Bowers writes in the updated edition of his *Silver Dollar Encyclopedia*, "1798 BB-114 exists to the extent of 35 to 60 pieces, if indeed even that many, and is one of the classic rarities of the year. All or nearly all specimens are in grades from EF downward." This is clearly an important offering for advanced die variety specialists. Stone-gray surfaces show strong detail throughout the obverse and around the reverse borders, with softness confined to the reverse stars and the eagle's head and neck. Golden accents appear within the recesses. Smooth except for a few small marks on the portrait. The plate coin in Bowers' *Silver Dollar Encyclopedia*, 1993. NGC ID# 24X6, PCGS# 40031 Base PCGS# 40018

**1799 Draped Bust Dollar, AU55
7x6 Stars, B-12, BB-160**

- 3118** 1799 7x6 Stars, B-12, BB-160, R.3, AU55 NGC. Bowers Die State IV, with an extensive network of die cracks throughout the obverse. This coin represents the popular BB-160 variety, with star 1 far from the curl and no berries on the reverse. Just a touch of wear is evident on the well-detailed design elements and the lightly abraded surfaces show highlights of violet, lavender-gray, and golden-tan toning. The BB-160 is a reasonably available variety, but it is always in demand as one of just two "no berries" varieties for the date. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

1801 B-4, BB-214 Dollar, XF45
Scarce Late Die State, High-End

- 3119** 1801 B-4, BB-214, R.4, XF45 PCGS Secure. CAC. Bowers Die State III, with a tiny, faint crack from the border right of (STATE) S. Bowers calls this late die state about 10 times scarcer than the usual Die State II. BB-214 dollars have a distinct obverse with the flag of the 1 nearly touching the curl. Most examples of this scarce variety exist in lower grades. Possibly only 15 to 20 examples are finer than this Choice XF representative. Dusky gray centers are framed by deeper shades of russet, olive, and gunmetal patina. Both sides are well-centered with good detail and minimal marks. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

1802/1 Draped Bust Dollar, XF40
Wide Date, B-3, BB-234

- 3120** 1802/1 Wide Date, B-3, BB-234, R.3, XF40 PCGS. Bowers Die State III. According to Mint records a substantial mintage of 41,650 Draped Bust dollars was accomplished in 1802. Seven die varieties are known for the date, five of them struck from overdated obverse dies leftover from the previous year. Based on frequency of appearance, it seems likely that some 1802-dated coins were struck in later years. This coin represents the popular B-3 overdate variety, easily identified by a die lump in the field near star 8. Some light wear shows on the design elements but the drapery is distinctly visible and the hair is well-outlined and detailed. Some faint planchet adjustment marks show on the central reverse, but the pleasing surfaces are lightly abraded and show hints of lavender-gray and pale gold toning. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

GOBRECHT DOLLAR

1836 Gobrecht Dollar, Toned PR61
Judd-60 Original, Die State E

- 3121** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 PR61 NGC. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State E. The rim nick above the A in STATES is clear; however, the die chip in the dentils slightly right of the R in DOLLAR has not yet formed on this intermediate die state example. The fields are bright and serve to backlight the mottled gray and blue toning seen on each side. The strike is not quite complete on the high points of the design, and there are numerous, small contact marks distributed over the obverse and reverse. An attractive example of this necessary type for any silver dollar type set. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1850-O Seated Dollar, AU58
Few Pieces Certified Finer

- 3122** 1850-O AU58 PCGS Secure. OC-1, R.2. Only one die pair was used for silver dollar coinage at New Orleans in 1850. Just 40,000 pieces were struck, and this was only the second year of dollar coinage at the Southern branch mint. Examples are rarely offered in Uncirculated condition, and high-end AU coins are scarce. This near-Mint piece displays sharp detail and rich red-gold toning over each side. Subtle reflectivity in the fields complements the overall satiny surfaces, which show no bothersome abrasions. Population: 10 in 58, 12 finer (7/18). NGC ID# 24YN, PCGS# 6938

1859-O Seated Dollar, MS64
Luminous Original Mint Luster

- 3123** 1859-O MS64 PCGS. OC-1, R.1. The 1859-O is a favorite No Motto issue for type purposes, but it is conditionally scarce in MS64 and uncollectible finer for most enthusiasts of Seated Liberty coinage. This near-Gem displays luminous, original mint luster with a dusting of lilac-gold toning over frost-white surfaces. Abrasions are minimal and eye appeal is outstanding. The only discernible strike weakness is on several border stars, which show incomplete centers. An outstanding type coin for the grade. Population: 32 in 64 (2 in 64+), 2 finer (7/18). NGC ID# 24YY, PCGS# 6947

1862 Seated Liberty Dollar, MS64
Rarely Encountered Any Finer

- 3124** 1862 MS64 NGC. OC-1, R.3. The advent of the Civil War had far reaching economic consequences, as the federal government suspended specie payments late in 1861 and coin production was drastically reduced, due to widespread hoarding. Only 11,540 business-strike Seated Liberty dollars were struck in 1862, and few examples ever saw any significant circulation. As a result, the 1862 is an elusive issue in all grades today, but survivors tend to be in higher grade than would normally be expected. At the MS64 grade level, the 1862 is scarce, however, and finer coins are virtually unobtainable. All the business strikes were struck from a single pair of dies.

The present coin is an impressive Choice example, with sharply detailed design elements and well-preserved surfaces, under attractive shades of lavender and greenish-gold toning. Satiny mint luster shines through the patina and the overall eye appeal is outstanding. Census: 20 in 64 (2 in 64 ★), 2 finer (7/18). NGC ID# 24Z5, PCGS# 6952

1863 Seated Dollar, MS63
Exceptional for the Grade

- 3125** 1863 MS63 NGC. OC-1, Low R.3. A conditionally scarce example of this late No Motto Seated dollar, showing a trace of light golden toning over exceptionally clean surfaces. The lack of bothersome abrasions gives this coin eye appeal comparable to that of finer examples. The fields are not truly prooflike, although they have a smooth satin luster that contrasts with the frosty devices. Eye appeal is outstanding. Census: 8 in 63 (1 in 63+), 27 finer (7/18). NGC ID# 24Z6, PCGS# 6953

PROOF SEATED DOLLARS

1860 Seated Dollar, PR64
Multicolor Patina

- 3126** 1860 PR64 PCGS. CAC. OC-P1, R.2. This set of dies was later used to produce circulation strikes after 1,330 proofs had been struck. Only 525 specimens are believed extant. Broad squared-off rims surround surfaces colorfully toned in blue, violet, green, and peach-orange patina, yet the fields remain flashy and reflective. Void of significant contact and extraordinarily appealing. PCGS has seen 13 non-Cameo proofs finer (7/18). NGC ID# 252E, PCGS# 7003

1866 Seated Dollar, PR66
First Motto Issue, Partial Contrast

- 3127** 1866 Motto PR66 NGC. OC-P1, Low R.4. With the exception of two specimens, all 1866 Seated dollar proofs are of the With Motto type. This PR66 coin, despite not being awarded a Cameo designation, shows significant contrast on the obverse. Light gray-gold patina deepens slightly on the reverse, where it joins with daubs of blue and violet-pink near the right border. Delicate frost covers strongly detailed devices. The eye appeal is lovely. Census: 6 in 66 (1 in 66 ★), 2 finer (7/18).
Ex: *Central States Signature* (Heritage, 4/2013), lot 4347; *Chicago Signature* (Heritage, 8/2013), lot 5727, where it realized \$18,800. NGC ID# 5GDV, PCGS# 7014

1867 Seated Liberty Dollar, PR64
From a Mintage of 625 Pieces

- 3128** 1867 PR64 NGC. OC-P1, R.3. Gold, olive, russet, and peach are colorations in the reflective fields of this Choice proof, although they are only visible at certain angles. Both sides of the coin are overlaid in olive-gray toning that prevents a Cameo designation. This sharp 1867 proof Seated dollar shows no bothersome contact marks. Higher-grade coins are seldom offered. Census: 59 in 64, 9 finer (7/18). NGC ID# 252N, PCGS# 7015

TRADE DOLLARS

1875-S Trade Dollar, MS65
Type One Reverse

- 3129** 1875-S Type One Reverse MS65 NGC. CAC. Type One Reverse. Much luster radiates from beneath gorgeous pinkish-gray and ice-blue toning on each side of this piece. The strike is sharp, and despite the mintage exceeding 4.4 million pieces, NGC and PCGS together have certified only 53 coins in Gem condition, with 18 finer. The type coin collectors and Trade dollar collectors should give this coin serious consideration, as finer specimens appear infrequently in the marketplace. Census: 33 in 65, 5 finer. CAC: 10 in 65, 5 finer (7/18). NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

1877-CC Trade Dollar, MS64
Only Two Finer Coins at PCGS

- 3130** 1877-CC MS64 PCGS Secure. The 1877-CC Trade dollar claims a small mintage of 534,000 pieces. All the coins were intended for export, as the legal tender status of the Trade dollar had been revoked on July 22, 1876. However, there was some demand for the coins in the regional economy, as indicated in an article published in the *Virginia City Territorial Enterprise*, June 29, 1877 edition, "Our people would not object to the big dollars just now, yet if they could get plenty of half dollars they will try to worry along." Some Trade dollars were released into circulation in this country, as evidenced by the number of worn, circulated examples that are available today. Most of the coins were exported and melted, but some have been repatriated, often with colorful chop marks from Chinese merchants. Today, the 1877-CC is definitely a rare issue in MS64 condition, and finer coins are virtually unobtainable.

This impressive Choice specimen exhibits sharply detailed design elements and well-preserved surfaces, under shades of lavender-gray and pale gold toning. Satiny mint luster shines through the patina, adding to the considerable visual appeal. Population: 13 in 64 (1 in 64+), 2 finer (7/18). NGC ID# 253D, PCGS# 7045

PROOF TRADE DOLLAR

1882 Trade Dollar, PR66
Lovely Original Toning

- 3131 1882 PR66 NGC.** This late-series proof-only Trade dollar displays beautiful lilac, blue, and mint-green toning across mirrored fields on each side. The design elements are fully struck, showing satiny mint luster. Neither side exhibits contact marks or visible hairlines. Finer 1882 proof Trade dollars exist, but the present Premium Gem offers a high degree of eye appeal and quality for the grade. Census: 34 in 66 (1 in 66+, 1 in 66 ★), 5 finer; 11 in 66 (1 in 66 ★, 2 in 66+) Cameo, 5 finer; 11 in 66 (2 in 66 ★, 1 in 66+) Ultra Cameo, 6 finer (7/18). NGC ID# 27YU, PCGS# 7062

MORGAN DOLLARS

1879-CC Morgan Dollar, MS62
Low-Mintage Branch Mint Key

- 3132 1879-CC MS62 PCGS Secure. CAC.** Normal Mintmark. From a small mintage of 756,000 pieces, the 1879-CC Morgan dollar is the first truly scarce issue in the Carson City series. This impressive MS62 specimen exhibits well-detailed design elements, with some incomplete detail on the eagle's claws, possibly due to a blockage in the die. The lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64
Carson City Key

- 3133 1879-CC MS64 PCGS.** Normal Mintmark. A lack of silver made the 1879-CC a scarce issue in its own time, and today the rarity of Gem or finer coins makes the near-Gem grade the most appealing collector option. A blazing white representative, the mint luster rolls across fully brought-up, frosty devices. Marks are few and of minor consequence, while the eye appeal is terrific. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS65
Conditionally Rare in Finer Grades

- 3134 1879-CC MS65 PCGS.** Normal Mintmark. The present Gem example of this issue is the finest quality practically obtainable, as PCGS and NGC have combined to certify only six coins in higher numeric grades (7/18). Legions of Morgan dollar collectors have this coin at the top of their want lists — perhaps even more so than the much-pricier 1889-CC. The Normal Mintmark variety is about twice as common as the “Capped Die” or Large CC Over Small CC variety, but the price differential is small in most grades, and many collectors prefer one or the other for personal reasons.

The present untuned silver Gem offers beaming luster over surfaces that show considerable prooflike qualities, even if insufficient for a PCGS Prooflike designation. The eye appeal, however, is more than sufficient, with a bold strike, few signs of contact, and a clean cheek on Liberty. A few flecks of grayish toning in the left-obverse field and on the reverse above the eagle help pedigree the piece but are not distracting.

Ex: *Central States Signature* (Heritage, 4/2009), lot 2615, realized \$19,550; *Long Beach Signature* (Heritage, 9/2014), lot 3252, realized \$23,500. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64
Elusive Prooflike Example

- 3135 1879-CC MS64 Prooflike PCGS. CAC.** Regular mintmark. Contracts between greedy mine owners and railroad magnates actually made shipping raw bullion from the Comstock Lode to the San Francisco Mint for coinage cheaper than transporting it to the much closer Carson City Mint in 1879. As a result, silver deposits were small at the Carson City facility and only 756,000 Morgan dollars were struck there that year. Some coins were released into circulation at the time of issue, while others were held in government vaults for later release. Many of the coins in government storage were probably melted under the provisions of the Pittman Act in 1918. A few bags were also paid out over the years from the Treasury reserves. By the time of the GSA sales of the 1970s, only 4,123 examples were left for dispersal, and about 500 of those coins were lesser-quality pieces. Today, the 1879-CC is the second-rarest Carson City Morgan. Examples with prooflike surfaces are especially elusive.

The present coin is an attractive Choice specimen, with sharply detailed design elements throughout. The well-preserved surfaces include reflective fields that contrast boldly with the frosty devices. Hints of silver-gray and lavender toning visit both sides and eye appeal is outstanding. Population: 88 in 64 (5 in 64+) Prooflike, 11 finer. CAC: 21 in 64, 5 finer (7/18). NGC ID# 253T, PCGS# 7087

1879-CC Morgan Dollar, MS62
Capped Die Variety

- 3136 1879-CC Capped Die MS62 PCGS. VAM-3.** A Top 100 Variety. The remnants of an undertype CC are evident below the primary mintmark of this impressive MS62 specimen, identifying the famous Capped Die variety. This piece exhibits sharply detailed design elements and vibrant mint luster, under shades of sea-green and lavender-gray toning. The surfaces are appropriately marked for the grade. NGC ID# 253U, PCGS# 7088

1882-O Dollar, MS66+
Colorful Obverse Toning

- 3137 1882-O MS66+ PCGS.** Widely available through the Gem grade level, the 1882-O dollar becomes scarce in MS66 and an elusive condition rarity any finer. This colorful example appears to have developed its iridescent patina while housed in a Treasury bag. On the obverse, blue and green borders progress to violet and peach-gold centers, while the somewhat dusky reverse exhibits a more mottled effect. Preservation is outstanding. Population: 79 in 66 (6 in 66+), 7 finer (7/18). NGC ID# 254C, PCGS# 7136

1889-CC Dollar, AU53
Significant Traces of Luster Remain

- 3138 1889-CC AU53 NGC.** The 1889-CC is a well-known, low-mintage Carson City issue that is the undisputed key to the CC Morgan dollar series. This AU example retains a significant presence of mint luster still around the devices, and there is also moderate reflectivity present in the fields, a common finish for 1889-CC dollars. Mostly brilliant, there is a slight accent of golden-russet toning that surrounds the outer devices. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62
Elusive CC-Mint Key

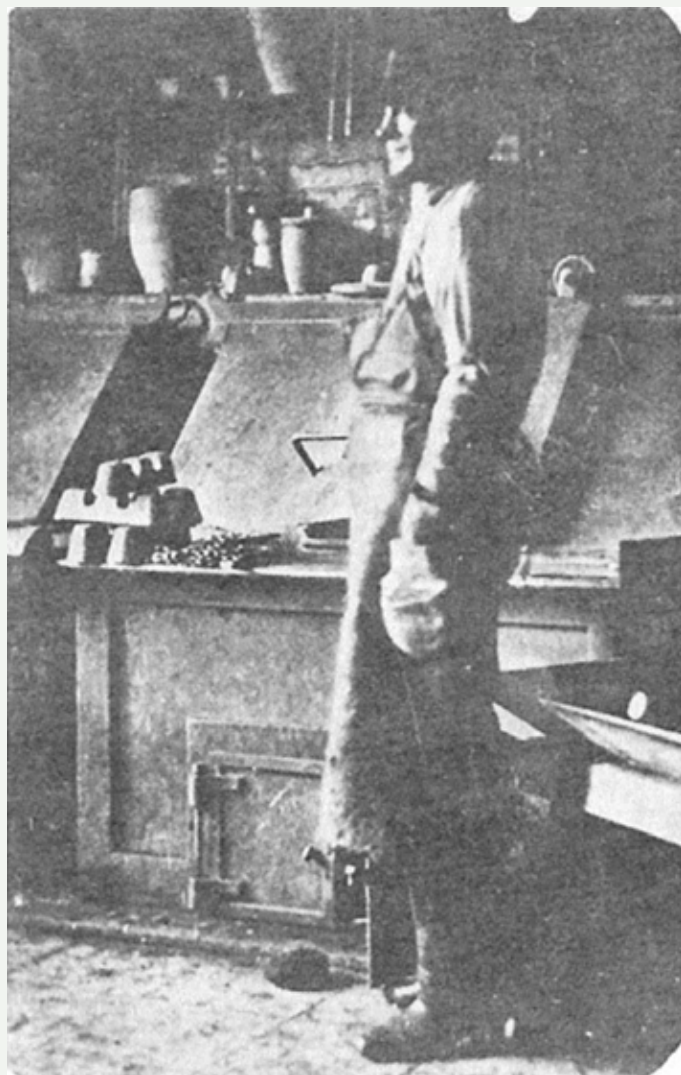

3139 1889-CC MS62 PCGS Secure. The Carson City Mint resumed coinage operations in 1889, after a three year hiatus. The Mint required a number of structural repairs and its machinery required an extensive overhaul before production could begin. Key personnel, including the superintendent, had to be replaced as well. With all the delays, the facility was only ready to begin coinage on October 10, 1889. In the short interval between that date and the end of the year, a small mintage of 350,000 Morgan dollars was accomplished. A significant number of coins was released into circulation in the hard-money economy of the region, as the issue is seen most often in circulated grades today. Coins held in government storage were probably heavily melted under the provisions of the Pittman Act in 1918. A small number may have been released in later years, but only a single specimen was still in government hands when the GSA sales began in 1972. The 1889-CC is the most elusive Morgan dollar from the Carson City Mint today.

The present coin is an impressive MS62 specimen, with well-detailed design elements and much prooflike reflectivity in the fields. The surfaces are not heavily marked, but the reflective fields magnify every little tick and scrape. Hints of lavender-gray and pale gold toning visit both sides. This coin should find a home in a fine collection of Morgan dollars. NGC ID# 2559, PCGS# 7190

1890-CC Dollar, MS63 Prooflike
Tailbar, VAM-4

3140 1890-CC Tail Bar, VAM-4, MS63 Prooflike PCGS Secure. CAC. A Top 100 Variety. A prominent die gouge from the eagle's tail to the wreath identifies the popular VAM-4. This impressive Select specimen exhibits sharply detailed frosty design elements that contrast noticeably with the reflective prooflike fields. The lightly marked surfaces show highlights of pale gold and lavender toning. Population: 3 in 63 Prooflike, 2 finer (7/18). NGC ID# 255D, PCGS# 43338 Base PCGS# 87199

1891-CC Morgan Dollar, MS66
Only One Coin Finer at PCGS

- 3141 1891-CC MS66 PCGS.** Always favored by collectors, this Carson City issue is known for frequent bagmarks and is most often available in low to mid-Mint State grades. The grading service populations are inflated by Treasury release coins, GSA sale coins, and thousands of Redfield hoard dollars. Premium Gem coins are available only occasionally, and the issue is nearly impossible to find any finer.

This brilliant-white example is satin-smooth and sharply struck. A few light slide marks are barely noticeable on the bold, frosted devices. A cluster of tiny ticks is seen beneath the eagle's right (facing) wing, but they are not overly severe and do not distract. Some collectors will be relieved to see this is not the "Spitting Eagle" variety, a too-common VAM reverse die gouge often encountered for this issue, and a nuisance to those who prefer a non-expectorating eagle. Population: 37 in 66 (5 in 66+), 1 finer (7/18).

Ex: *Chicago Signature* (Heritage, 8/2014), lot 5610, realized \$21,150. NGC ID# 255H, PCGS# 7206

1893-CC Dollar, MS60
Old Green Holder, CAC Green Label

- 3142 1893-CC MS60 PCGS. CAC.** Glimmers of reflectivity in the fields on this Mint State 1893-CC dollar increase the eye appeal despite scattered grade-limiting abrasions. The centers are poorly struck, as often seen on this final Carson City Morgan. Most of each side is brilliant, but the right-obverse margin and the right-reverse periphery show a trace of light pastel color. The CAC endorsement confirms the high quality for the grade on this piece, which is housed in an old green label holder. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Well-Struck MS62
Lustrous and Appealing

- 3143 1893-CC MS62 PCGS Secure.** Radiant and attractive cartwheel luster shows a hint of tan-gold toning on this Mint State final-year Carson City Morgan. Scattered light abrasions limit the grade but none are individually bothersome. The hallmark of this piece is the strike, which is remarkably bold on the central high points. The 1893-CC silver dollar is famous for being often weakly struck. This example is quite pleasing for the grade. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, CAC-Approved MS62
Old Green Holder, Clean Fields

- 3144** 1893-CC MS62 PCGS. CAC. This 1893-CC dollar shows the usual strike weakness in the centers, but the frosty original luster still promotes strong eye appeal. The fields are clean and luminous, abrasions being primarily on Liberty's cheek — hence the MS62 grade. Still, eye appeal is excellent for this numeric level, and CAC has awarded this coin a green sticker, endorsing its quality. It is housed in an old green label holder. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Final CC-Mint Issue

- 3145** 1893-CC MS63 PCGS. From the final year of the Carson City Mint, this Select dollar has great luster and a solid strike for the issue. A few marks in the fields and a couple of luster grazes on the devices partially account for the grade. Excellent eye appeal for this semikey date.

Ex: FUN Signature (Heritage, 1/2002), lot 7709, realized \$3,277.50; ANA Signature (Heritage, 8/2006), lot 3083, realized \$5,750. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS64
Final Carson City Issue

- 3146** 1893-CC MS64 PCGS. Only 677,000 Morgan dollars were produced at the Carson City Mint in 1893, the last year of coinage operations for that famous facility. Many examples were held in government storage at the time of issue, but these coins were gradually paid out over the years and the 1893-CC was not heavily represented in the Treasury releases of the early 1960s. By 1964, the GSA had only one single specimen of the 1893-CC in its inventory. Circulated examples and heavily bagmarked specimens in lower Uncirculated grades can be found without much difficulty in today's market, but the issue is rare in grades above MS64.

This attractive Choice example exhibits sharply detailed design elements and vibrant mint luster on both sides. Unlike most examples seen, the surfaces are free of large or distracting flaws and eye appeal is quite strong. PCGS has graded only 15 numerically finer examples (7/18). NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS64
Frosty Original Mint Luster
Few Finer Pieces Are Certified**

- 3147 1893-CC MS64 PCGS. CAC.** The final-year Carson City Morgan dollar is a better date in high grade. Although MS64 coins are frequently available for a price, they appear at auction less often than most other CC-mint issues. In finer grades, PCGS reports only 15 submissions (7/18), and those coins are out of reach for most collectors. This near-Gem example is CAC-endorsed, which is a coveted designation among series specialists and Registry collectors. A small percentage of Choice 1893-CC dollars carry the CAC green label, and only a few finer pieces do. This coin is sharp and radiantly frosted with untuned surfaces. A few light, scattered marks in the obverse limit the grade. NGC ID# 255S, PCGS# 7222

**1893-O Silver Dollar, Frosty MS63
Better New Orleans Date**

- 3148 1893-O MS63 PCGS Secure.** A frosty, untuned Select example with a clean cheek and only a few light fields marks. Considerable strike weakness on the central devices is typical of New Orleans issues from this period and likely contributes to the grade on this coin. The 1893-O Morgan is available for a price in this grade, but finer pieces are elusive and may be out of reach for many collectors. NGC ID# 255T, PCGS# 7224

**1893-S Dollar, VF20
Appealing Olive-Gold Accents**

- 3149 1893-S VF20 NGC.** Few issues in this series or any other enjoy the cachet of the 1893-S Morgan dollar, the unrivaled key date from a low mintage of 100,000 coins. This is a well-circulated example, but it maintains lovely eye appeal for the grade with olive-gold accents that complement mostly stone-gray surfaces. All of the important design elements are clear. A single pinscratch appears between stars 5 and 6. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF45
Clean and Problem-Free for the Grade**

- 3150 1893-S XF45 PCGS.** An elusive and deservedly popular issue in all levels of preservation, the present specimen boasts originality through pale slate-gray patination. While the faces exhibit scattered contact marks that befit a circulated silver coin of this size, we note that the focal features are well-defined for this grade level. Still partially lustrous.
Ex: *FUN Signature* (Heritage, 1/2004), lot 9000, where it realized \$12,650. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU50
Sought-After Key Issue

- 3151 1893-S AU50 PCGS Secure.** The financial Panic of 1893 resulted in the repeal of the Sherman Silver Purchase Act, releasing the U.S. Mint from its obligation to produce millions of unneeded silver dollars every year. Accordingly, mintages were drastically reduced at all three active Mints that year and the San Francisco facility only struck 100,000 Morgan dollars, the lowest business-strike production total of the series. As might be expected, the 1893-S is an elusive issue today, and the acknowledged key to the business-strike series.

The present coin is an attractive AU specimen that exhibits only light wear on the design elements. The lightly abraded surfaces show traces of prooflike reflectivity in sheltered areas, with highlights of greenish-gold and lavender-gray toning. This coin will be a welcome addition to a fine collection of Morgan dollars. NGC ID# 255U, PCGS# 7226

1894 Silver Dollar, MS64
Frosty and Pleasing

- 3152 1894 MS64 PCGS.** The 1894 is the scarcest circulation strike Morgan dollar from the Philadelphia Mint. Only 110,000 pieces were struck, and it is a rare event to find one that grades finer than MS64. This collectible Choice example displays bright, frosty luster and well-struck design elements. Only a few faint luster grazes on the cheek and in the field prevent Gem classification. PCGS lists 32 finer submissions (8/18). NGC ID# 255V, PCGS# 7228

1894-O Dollar, Lightly Toned MS64
Nearly Impossible to Find in Higher Grades

- 3153 1894-O MS64 PCGS Secure.** This New Orleans Morgan dollar emission is most often found in grades ranging from XF45 to AU58. The population sees a sharp decline in mint condition, although survivors remain accessible through this high grade, above which the date becomes nearly impossible to collect. Soft, satiny surfaces combine areas of brilliance with pale golden color. Abrasions are generally well-hidden, except for one on the cheek and another on the left shield-wing juncture. PCGS reports 13 higher grading events (8/18). NGC ID# 255W, PCGS# 7230

1895-O Morgan Dollar, MS62
Elusive Issue in Mint State

- 3154 1895-O MS62 PCGS Secure.** The effects of the Panic of 1893 and the repeal of the Sherman Silver Purchase Act were still being felt in 1895, resulting in modest mintages of Morgan dollars at all three operating U.S. Mints. In fact, discounting the ephemeral 12,000 business-strike coins that were reportedly struck at Philadelphia, but have never appeared in any collection, it seems only the branch mints at San Francisco and New Orleans struck Morgan dollars for circulation that year. The New Orleans issue claims a small production total of 450,000 pieces, and the San Francisco mintage was even smaller.

The 1895-O was not a well-produced issue to begin with, and most examples seen are softly struck, with insipid mint luster. The majority of the small mintage was released into circulation at the time of issue and no large quantities were held in government storage for later releases. In addition, few high-quality examples were saved by contemporary collectors. As a result, the 1895-O can be found in circulated grades with little trouble, but the issue is the third most-elusive Morgan dollar in Mint State grades today.

This attractive MS62 specimen exhibits a much better-than-average strike, with just the faintest trace of blending on the hair above the ear. The lustrous surfaces show the expected number of minor contact marks for the grade, with hints of lavender-gray and golden-tan toning. Population: 47 in 62 (4 in 62+), 45 finer (7/18). NGC ID# 255Y, PCGS# 7236

1896-O Silver Dollar, MS63
Few Finer Pieces Are Certified

- 3155 1896-O MS63 PCGS Secure.** This better New Orleans issue is marginally available in MS63, but PCGS has seen only 34 finer submissions (8/18). The certified population in this and higher grades is even lower at NGC. The present coin displays amber-gold border toning that gradually fades to a light champagne hue in the centers. Moderate strike weakness occurs on the eagle's breast and the hair above Liberty's ear, but a lack of significant abrasions balances the eye appeal. NGC ID# 27ZU, PCGS# 7242

1896-S Morgan Dollar, MS64
Attractive Luster and Toning

- 3156 1896-S MS64 PCGS.** The 1896-S Morgan dollar was not a well-produced issue, with striking problems and insipid mint luster the norm on most examples seen. In addition, most survivors are heavily abraded from extensive time in circulation. Accordingly, the 1896-S is a challenging issue in high grade. This attractive Choice example exhibits well-detailed design elements, with just a trace of the usual softness on the hair above the ear and eagle's breast. The well-preserved surfaces radiate vibrant mint luster, with iridescent shades of golden-brown and lavender toning. NGC ID# 2564, PCGS# 7244

1898-S Morgan Dollar, MS66+
Well-Preserved, Lustrous Surfaces

- 3157 1898-S MS66+ NGC. CAC.** Cream-gray, pale gold, and a hint of lavender color this carefully preserved, Registry-grade dollar from the San Francisco Mint. Light striations appear over the centers, as strike definition is somewhat soft. Both sides are incredibly smooth. The only noticeable mark is a tick behind Liberty's mouth. The 1898-S has an average certified grade just shy of MS60. Premium Gems are rare. Census: 8 in 66 (1 in 66+), 1 finer. CAC: 19 in 66, 1 finer (7/18). NGC ID# 256A, PCGS# 7256

1900-O Dollar, Brilliant MS67

- 3158 1900-O MS67 NGC.** This scintillating Superb Gem has frosty silver luster without toning on either side. The surfaces are brilliant and attractive with a strike that is virtually full, or as full as it gets for this issue. The lower reverse exhibits crisscross die polishing lines. Census: 78 in 67 (3 in 67+, 2 in 67 ★), 0 finer (7/18).
Ex: Santa Clara Signature (Heritage, 11/2002), lot 6749; Dallas Signature (Heritage, 10/2008), lot 1478. NGC ID# 256F, PCGS# 7266

1904-S Morgan, Brilliant MS64
Elusive Finer

- 3161 1904-S MS64 PCGS.** Brilliant surfaces entertain subtle glimmers of reflectivity in the fields on this Choice 1904-S Morgan dollar. The devices are well brought up in the centers, and only light abrasions are present to limit the grade. The 1904-S is a better date overall, but MS64 coins are usually available for interested collectors. However, finer representatives are much more elusive. NGC ID# 256W, PCGS# 7294

1901 Silver Dollar, MS63
Light Original Toning

- 3159 1901 MS63 NGC.** Delicate golden and slate-gray hues grace the satiny original surfaces of this Select 1901 Morgan dollar. Minor strike softness occurs on the eagle's breast and the hair above Liberty's ear, but the sharpness is otherwise pleasing. Grade-limiting abrasions are light and unobtrusive. The 1901 is a famous condition rarity in Uncirculated grades. This MS63 coin offers a balance of quality and price. NGC lists 20 finer representatives (7/18).
Ex: New York Signature (Heritage, 7/2002), lot 7105, which realized \$7,187.50. NGC ID# 256J, PCGS# 7272

1904-S Dollar, Brilliant MS65
San Francisco Condition Rarity

- 3162 1904-S MS65 PCGS Secure.** This San Francisco dollar is a scarce issue in Gem condition and a rarity any finer. More than 2.3 million coins were struck in the final year before output was halted for what would be 17 years. Well-detailed motifs and brilliant, thickly frosted surfaces define this MS65 example. Clean with minor ticks on each side. PCGS reports 19 finer grading events (7/18). NGC ID# 256W, PCGS# 7294

1903-S Dollar, Radiant MS64
Better San Francisco Issue

- 3160 1903-S MS64 PCGS.** The 1903-S dollar is a better date in all grades, but it is especially sought-after in the finer Mint State levels. This near-Gem is satiny and toned a light russet-gold hue. The strike is sharp, and the only grade-limiting abrasions are a few trivial grazes and marks on Liberty's cheek. Cartwheel luster is especially luminous on this attractive, upper-end example. NGC ID# 256T, PCGS# 7288

PROOF MORGAN DOLLARS

1895 Morgan Dollar, PR65
Undesignated Contrast, CAC-Endorsed
A Beautiful Example of This Key Proof Issue

3163 1895 PR65 NGC. CAC. The year 1895 was one of low silver dollar coinage at the U.S. Mint and its branches. The Carson City branch mint suspended coinage operations two years earlier, leaving only three active Mints. New Orleans produced 450,000 pieces and San Francisco 400,000. Philadelphia struck either just 12,000 circulation-strike dollars in 1895 or none, depending on the school of thought that one entertains. Mint records indicate a coinage of 12,000 pieces. Research by some suggests that this was an accounting error, and that the coins were not dated 1895. Other numismatists hold to the plausible idea that 12,000 circulation strikes were produced but were apparently later melted. The Chapman brothers, in later years, believed that no circulation strikes were made. In any case, there are no circulation-strike 1895 dollars known today.

The Philadelphia Mint did strike 880 proof dollars in 1895. This small mintage was normal for proof coinage, and the coins were distributed through the sales of silver proof sets. As early as 1896, proof sets of 1895 began appearing at auction, often with a note about the rarity of the dollar. This publicity led to many of the 1895 sets being broken up to access the dollar. Today, the 1895 proof Morgan is no more rare than most other proof issues in the series, but it experiences unparalleled demand from date and mintmark collectors due to the absence of circulation strikes to fill the 1895 spot in a collection. It is also one of the most iconic key dates across all United States coinage series.

This Gem representative is CAC-endorsed, showing a virtually flawless reverse. The obverse fields have only a few trivial lines when viewed beneath a loupe. Both sides are starkly contrasted, although the coin is housed in a prior-generation holder with no Cameo designation. Trivial strike softness occurs on the eagle's breast and the hair above Liberty's ear. Both sides of this outstanding example have a hint of light golden toning, with additional lavender and russet border color. A magnificent coin with sought-after CAC approval. Census: 32 in 65, 38 finer; 22 in 65 Cameo, 33 finer; 1 in 65 Ultra Cameo, 14 finer. CAC: 4 in 65, 8 finer (7/18). NGC ID# 27ZR, PCGS# 7330

1896 Silver Dollar, PR68 Ultra Cameo
Dramatically Contrasted, Untoned

- 3164** 1896 PR68 Ultra Cameo NGC. Only a small number of proof 1896 Morgan dollars achieve the PR68 numeric grade level, even though this is one of the better-made proof issues in the series. The present coin embodies every outstanding aspect of a proof Morgan dollar, including stark white-on-black contrast and virtually flawless preservation. Neither side is toned, giving this coin a “just struck” appearance. The devices are frost-white and luminous, melting into liquidlike mirrors of seemingly infinite depth. This is a proof Morgan dollar that will dazzle the eye of even the most discerning collector. Census: 17 in 68 Ultra Cameo (5 in 68 ★), 2 finer (7/18). NGC ID# 27ZT, PCGS# 97331

1903 Morgan Dollar, PR68
None Certified in Higher Numeric Grades

- 3165** 1903 PR68 NGC. The Philadelphia Mint switched to an all-brilliant finish for proof coins in 1902, which involved polishing the recessed areas of the dies and largely eliminating the frosty devices seen on proofs of earlier years. Only 755 proof Morgan dollars were struck in 1903 and most survivors, including the present coin, have what Mike Fuljenz calls a “chrome” look, with little-to-no cameo contrast between the fields and devices. The coin offered here is a stunning PR68 specimen, with sharply detailed design elements and deeply mirrored fields, but only modest field/device contrast. The surfaces are impeccably preserved, with subtle hints of pale gold toning and terrific eye appeal. Census: 6 in 68 (1 in 68 ★), 0 finer (7/18). NGC ID# 2823, PCGS# 7338

PEACE DOLLARS

1934-S Dollar, MS64+
CAC-Approved, Scarce So Fine

- 3166** 1934-S MS64+ PCGS. CAC. The average certified grade for the famously challenging 1934-S Peace dollar falls shy of AU50. This high-end MS64+ with CAC approval is on the cusp of joining rarified company. Frosty surfaces are largely brilliant and show daubs of pale crimson and gold color that serve to confirm the originality. Two ticks, one in the right field of each side, barely limit the grade. Well-struck. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, Untoned MS65
Frosty Mint Luster

- 3167** 1934-S MS65 PCGS. The 1934-S Peace dollar is recognized as the scarcest issue in the series in Mint State and is most heavily sought-after in Gem or better condition. This untuned MS65 representative boasts intense, frosty mint luster with only a few trivial surface grazes. The strike is bold, and the eye appeal is excellent. Overt ticks are limited to the chin. PCGS lists 31 finer representatives (8/18). Ex: FUN Signature (Heritage, 1/2016), lot 6199, where it brought \$8,812.50. NGC ID# 257Z, PCGS# 7377

1935 Dollar, MS66+
Finest at PCGS and CAC

- 3168** 1935 MS66+ PCGS. CAC. The final-year 1935 Peace dollar was struck to the extent of 1.5 million coins, and the average Mint State example grades between MS62 and MS64. Gems are elusive but obtainable, and only in this high grade does the issue become scarce. This bold Premium Gem is one of only a handful of examples to have been recognized for quality within the grade by both PCGS and CAC. An entirely brilliant obverse cedes to light chestnut patina on the reverse, while both sides display glimmering luster. Superficial distractions are at a minimum. Among the finest coins at PCGS and CAC (7/18). NGC ID# 2582, PCGS# 7378

CERTIFIED MODERN PROOF SET

1936 Five-Piece Proof Set, PR64-66
All NGC-Certified

- 3169** 1936 Five-Piece Proof Set, PR64-PR66 NGC. A sequentially numbered NGC-certified set that includes:

Brilliant Cent PR64 Red. The deep cherry-red surfaces are highly reflective. There are no apparent hairlines or spots of significance, making us wonder if this is potentially undergraded.

Brilliant Nickel PR66. Nearly untuned, the fields are deeply mirrored on each side and there are only the slightest flyspecks apparent with magnification.

Dime PR66. Another deeply mirrored proof, this one has a thin, hazy layer of light gray patina on each side.

Quarter PR65. Like the dime, each side shows light, hazy speckles of gray-russet toning. Still, the deep mirrors are abundantly evident on both obverse and reverse.

Half Dollar PR65. A well-preserved example of this key proof issue. The deeply reflective fields provide a "black" background for the moderately frosted devices. Slight, speckled gray-rose toning is seen on each side. (Total: 5 coins)

CLASSIC QUARTER EAGLE

1834 Classic Head Quarter Eagle, MS62
Ex: D.L. Hansen Collection

- 3170** 1834 MS62 PCGS. Breen-6140, Variety 2, R.3. Ex: D.L. Hansen Collection. A well-struck representative with radiant and refreshingly unabraded sun-gold surfaces. This is an example of the Large Head subtype, which is scarcer than the Variety 1 Small Head. The reverse die with a wide AM in AMERICA would be reused on later dates, although among 1834 marriages it is known only on Variety-2. NGC ID# 25FS, PCGS# 7692

LIBERTY QUARTER EAGLES

1842-C Quarter Eagle, AU55+
Among the Rarest Issues from This Mint

- 3171** 1842-C AU55+ PCGS. CAC. Variety 1. Only 100 to 125 1842-C quarter eagles are believed to survive, according to Doug Winter. That this Charlotte issue ranks among the rarest from the facility should come as no surprise considering its mintage: a paltry 6,729 pieces. What makes this minimally circulated example so impressive is not only its excellent preservation, but also its original orange color. The rims are broad and most elements show good detail. Population: 5 in 55 (1 in 55+), 6 finer. CAC: 1 in 55, 5 finer (7/18). NGC ID# 25GH, PCGS# 7724

1844-C Quarter Eagle, AU55
Small Charlotte Mintage

- 3172** 1844-C AU55 NGC. Variety 1. One die pair is known for the meager mintage of 11,622 pieces. Doug Winter estimates that only 150 to 175 coins survive in all grades. The present yellow-gold representative displays noticeable luster and is devoid of relevant abrasions. The strike is slightly soft in the centers, as usual. Under magnification, a fin rim is visible around much of each side. Census: 25 in 55, 27 finer (7/18). NGC ID# 25GU, PCGS# 7735

1854-C Two and a Half, MS61
A Rarity in Uncirculated Condition

- 3173** 1854-C MS61 NGC. Variety 1. The Mint State population of this issue consists of only a handful of coins. The 1854-C quarter eagle comes from a mintage of just 7,295 pieces and has an estimated survivorship of less than 145 pieces in all grades, according to Southern gold specialist Doug Winter. This representative displays bright, satiny yellow-gold surfaces and grade-appropriate abrasions. Moderate strike weakness affects the centers as usual. Census: 7 in 61, 8 finer (7/18). NGC ID# 7J2P, PCGS# 7770

1897 Quarter Eagle, MS67
Excellent Quality, One PCGS Coin Finer

- 3174** 1897 MS67 PCGS. CAC. The Mint was producing some of the highest-quality coins it ever had during the final years of the 19th century, on display here. This gorgeous Superb Gem is fully struck and shows glowing mint frost over warm peach-gold surfaces. A single tick on the chin prevents an even higher grade. Population: 15 in 67, 1 finer. CAC: 6 in 67, 1 finer (7/18). NGC ID# 25LM, PCGS# 7849

PROOF LIBERTY QUARTER EAGLES

1903 Two and a Half, PR66
Rare High-End Example

3175 1903 PR66 PCGS Secure. PCGS lists only a single Cameo example of this proof issue (a Gem) and no Deep Cameos, meaning that the best coins typically available to collectors are the high-end non-Cameo pieces. This Premium Gem is just such a coin. There are 12 pieces in this grade at PCGS and just one finer (7/18). These coins survive from a mintage of 197 proof 1903 quarter eagles. Although not overly rare, this issue is significantly scarcer than the certified population figures suggest. PCGS and NGC combined have graded an example on 289 occasions, which exceeds the number of pieces struck by 92 coins. In their gold *Encyclopedia*, Garrett and Guth estimate that more than 100 pieces survive, but the frequency of auction appearances for the date suggests that the survivorship is probably no greater than about 150 coins.

This piece is fully struck and has deeply mirrored orange-gold fields. Although not a Cameo, subtle contrast is still apparent on each side at certain angles. The coin is beautifully preserved and free of contact marks and hairlines. NGC ID# 288T, PCGS# 7929

1906 Quarter Eagle, PR63
Eye-Appealing Proof Type Coin

3176 1906 PR63 PCGS Secure. Most Liberty Head quarter eagle proof issues are out of reach for collectors who are not well-heeled to pursue the series. However, for the type collector, this Select 1906 proof has tremendous eye appeal and is in a more affordable grade. The strike is sharp and the depth of mirroring in the fields is outstanding. Modest cameo contrast is apparent on the reverse. Only 160 proofs were struck in 1906, and survivors are highly sought-after. NGC ID# 288W, PCGS# 7932

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, MS64
Fully Struck With a Bold Mintmark
Premium Eye Appeal

- 3177 1911-D MS64 PCGS.** A bold mintmark is just one of the highlights of this remarkable key-date coin, the undisputed king of the Indian Head quarter eagle series and a issue that is subject to ceaseless demand from a growing collector base. This near-Gem also offers satiny, textured, peach-gold surfaces that feature deeper reddish-gold accents around the rims. The delightful coloration adds to the premium appeal. Each side is notably free of all but the most minuscule signs of contact, even on the Indian's exposed cheekbone and the open fields on the reverse. This is a fantastic example, for which strong bidding should be expected. PCGS has certified only 26 pieces finer (8/18).
Ex: FUN Signature (Heritage, 1/2008), lot 3106, where it brought \$25,300. NGC ID# 7KR7, PCGS# 7943

1912 Quarter Eagle, MS65
Beautiful Color

- 3178 1912 MS65 PCGS.** The 1912 quarter eagle is readily obtainable in the lower Mint State grades. Gems, however, will take considerable patience and searching to acquire. Beautiful apricot-gold and mint-green hues color lustrous surfaces and sharply struck design elements. A few tiny marks are noted in the reverse field. Encapsulated in a green label holder. Population: 86 in 65 (2 in 65+), 5 finer (7/18).
Ex: Central States Signature (Heritage, 5/2007), lot 3443, where it realized \$10,637.50. NGC ID# 7KR8, PCGS# 7944

THREE DOLLAR GOLD PIECES

1855 Three Dollar, MS63
Collectible Second-Year Issue

- 3179 1855 MS63 PCGS Secure.** Production of three dollar gold coins dropped by nearly two-thirds from the first year of issue in 1854 to 1855, when 50,555 pieces were struck at the Philadelphia Mint. Even that total is high in the context of the series, however, and the 1855 remains a collectible date. Bright mint frost and light yellow-gold color adorns this well-struck Select representative. There are a few scattered ticks in the fields but nothing of consequence. NGC ID# 25M6, PCGS# 7972

1855-S Three Dollar Gold, AU53
Elusive Branch Mint Issue

- 3180 1855-S AU53 PCGS. CAC.** Only 6,000 business strike three dollar gold pieces were struck at the San Francisco Mint in 1855, and few examples were saved for numismatic purposes. As might be expected, the issue is rare in high grade today. This attractive AU53 example shows just a touch of wear on the well-detailed design elements, and the lightly abraded orange-gold surfaces exhibit prooflike reflectivity in the sheltered areas. Population: 12 in 53, 22 finer. CAC: 3 in 53, 3 finer (7/18). NGC ID# 7K5D, PCGS# 7973

1856 Three Dollar Gold, MS63
Seldom Seen Finer

- 3181 1856 MS63 NGC.** The 1856 three dollar gold piece claims a business strike mintage of 26,010 pieces, making the issue scarce-to-rare in all Mint State grades today. This impressive Select example displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. Census: 16 in 63, 9 finer (7/18). NGC ID# 25M8, PCGS# 7974

1885 Three Dollar, MS63
Only 800 Pieces Struck

- 3182 1885 MS63 PCGS.** A paltry mintage of 800 coins drives demand for the 1885 three dollar gold piece, the second-lowest production in the series after the 1881. The Mint also struck 109 proofs that year from the same set of dies. All circulation strikes exhibit the prooflike reflectivity expected of such a low mintage. This Select rose and greenish-gold three dollar is no different, with modest contrast between the fields and frosted motifs. Definition is bold on the relief elements, including the left bow leaf, the date, and Liberty's hair curls. Small, wispy marks account for the grade. A spindly lint mark (as-made) travels from the E in AMERICA to the Y in LIBERTY, down through the curls, and back out into the field. NGC ID# 7KDP, PCGS# 8007

EARLY HALF EAGLES

1802/1 Capped Bust Right Five, MS63
Popular BD-2 Variety

- 3183 1802/1 BD-2, High R.4, MS63 NGC.** Bass-Dannreuther Die State c/c. A substantial mintage of 53,176 Capped Bust Right half eagles was accomplished in 1802. The coins were struck using two overdated obverse dies from 1801, paired with seven different reverse dies to form eight distinct die varieties for the date. This coin represents the popular BD-2 variety, with the 2 in the date free of the bust, and an incomplete ribbon loop on the reverse. The BD-2 is an available variety in the context of the series, but it is scarce in absolute terms, with a surviving population of 75-100 examples in all grades. This was the only use of the reverse die, but the obverse was used previously to strike the BD-1 variety of this date, and used again to produce the BD-3, BD-4, and BD-5 varieties.

The present coin is an impressive Select example, with well-detailed design elements that show just a touch of softness at the junctions of the shield and eagle's wings. The lustrous orange-gold surfaces are lightly marked and show a lump break at the rim before STATES. Many examples from this late die state have a rim cud that forms above the F in OF, but the rim of this coin is obscured by the NGC holder in that area. Census: 16 in 63 (1 in 63+), 13 finer (7/18). PCGS# 519885 Base PCGS# 8083

1803/2 BD-3 Half Eagle, AU50
Intermediate Die State

- 3184** 1803/2 BD-3, R.4, AU50 PCGS. Bass-Dannreuther Die State e/b-f/b — the obverse is lapped and cracked through the left-hand stars and at the R, but the reverse does not show the late die state crack through the shield. The coin is partially lustrous and bright yellow-gold. Moderate strike weakness is seen on the eagle's left (facing) foot and the adjacent side of the shield. Scattered handling marks are consistent with the reputation of early half eagles. The T in UNITED is recut on this variety. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1803/2 BD-3 Half Eagle, AU55+
Late Die State

- 3185** 1803/2 BD-3, R.4, AU55+ NGC. Bass-Dannreuther Die State f/b. Both of the 1803 half eagle obverses were overdated 1802 dies. BD-3 is the third and final use of the first obverse die, which shows the underlying 2 clearly within the loops of the 3 in the date. This Plus-graded Choice AU piece displays satiny, luminous surfaces with partial luster in the fields. Pleasing brass-gold surfaces complement an even strike that is weak only on the eagle's left (facing) talons and the arrows. Some faint adjustment marks are visible along the upper-obverse margin. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

CLASSIC HALF EAGLES

1834 Half Eagle, Semiprooflike MS63+
Plain 4, McCloskey 3-B

- 3186** 1834 Plain 4 MS63+ PCGS Secure. CAC. Breen-6501, McCloskey 3-B, R.1. First Head. An often-seen variety with a Script 8, wide 34 in the date, and no tongue in the eagle's mouth. Quality for the grade and eye appeal are both outstanding, explaining the Plus designation and CAC approval sticker. Deep orange tones adhere to the margins, while the centers are lighter yellow-gold with semireflective fields. The devices are practically fully struck, except for stars 3 and 4, and marks are minor. This Select Uncirculated offering would make an excellent first-year type coin for the Classic Head half eagle series. CAC: 9 in 63, 16 finer (8/18). NGC ID# 25RR, PCGS# 8171

1834 Classic Head Half Eagle, AU55
Elusive Crosslet 4, McCloskey 5-D Variety

3187 1834 Crosslet 4 AU55 PCGS. McCloskey 5-D, R.4. Second Head. The 1834 Classic Head half eagle with the Crosslet 4 in the date is much more elusive than its Plain 4 counterpart. This attractive Choice AU specimen offers lustrous yellow-gold surfaces that show the expected number of minor abrasions for the grade, with just a touch of wear on the well-detailed design elements. Population: 13 in 55, 19 finer (7/18).

Ex: Long Beach Signature (Heritage, 2/2015), lot 3271, which realized \$6,462.50. NGC ID# 25RU, PCGS# 8172

1835 Classic Head Half Eagle, MS62
McCloskey 3-D, Semireflective Surfaces

3188 1835 MS62 PCGS. CAC. Breen-6505, McCloskey 3-D, R.3. Second Head. The Script 8 in the date and the leaf tip under the right side of the U in UNITED serve as attribution markers. Central detail is complete, and softness is relegated to a handful of stars. The most impressive features include semireflective lemon-gold surfaces and vibrant mint luster. The resulting eye appeal is terrific, and marks are scant. Population: 21 in 62, 28 finer. CAC: 2 in 62, 5 finer (7/18). NGC ID# 25RV, PCGS# 8173

LIBERTY HALF EAGLES

1839-D Half Eagle, Choice XF
Obverse Mintmark Type Coin

3189 1839-D XF45 PCGS Secure. Variety 2-A. The mintmark is on the obverse of the 1839-D Liberty half eagle. On Variety 2-A, it is tilted slightly to the left and is placed partly over the 9 in the date. This Choice XF Dahlonga five displays olive-gold surfaces and good central detail. Scattered abrasions and field chatter accompany the grade. The Dahlonga Mint began striking half eagles in 1838, but 1839 was the first year of coinage with the new Liberty Head design. Population: 21 in 45, 46 finer (7/18). NGC ID# 25S9, PCGS# 8193

1840-D Half Eagle, AU50
Tall D Mintmark

3190 1840-D Tall D AU50 PCGS. Variety 3-B. The 1840-D five dollar, with a mintage of 22,896 pieces, is most often found in the VF to XF grade range. This AU example displays bright yellow-gold surfaces and possess traces of luster in the protected areas. The design features are well-defined, and the few minute marks scattered about are within the confines of the grade designation. Population: 11 in 50, 31 finer (7/18).

Ex: ANA Signature (Heritage, 3/2007), lot 1909, which realized \$4,312.50. NGC ID# 25SG, PCGS# 8198

1843-D Liberty Half Eagle, AU58
Medium D, Variety 10-G

3191 1843-D Medium D AU58 NGC. Variety 10-G. The 1843-D Liberty half eagle claims a large production total for a D-mint issue, at 98,452 pieces. Accordingly, the 1843-D is reasonably available, in the context of the series, and is a popular choice with branch mint type collectors. This lightly worn, lightly abraded near-Mint specimen exhibits pleasing orange-gold surfaces that retain much of their original mint luster. Census: 26 in 58, 17 finer (7/18). NGC ID# 25T4, PCGS# 8215

1846-D/D Five Dollar Liberty, AU55
Popular Guide Book Variety

3192 1846-D/D AU55 NGC. Variety 16-J. The remnants of an undermintmark are plainly visible to the north of the primary mintmark on this popular Guide Book variety. The 1846-D/D is usually seen with a sharper strike than its Normal Mintmark counterpart, and this Choice AU specimen exhibits just a trace of wear on the strongly impressed design elements. The lightly abraded orange-gold surfaces retain much of their original mint luster. Census: 25 in 55, 32 finer (7/18). NGC ID# 25TH, PCGS# 8229

1848-C Five Dollar, MS61
Rarely Seen in Mint State

- 3193 1848-C MS61 PCGS Secure. Variety 1.** The 1848-C half eagle claims a mintage of 64,472 pieces, but the issue is more elusive than that relatively high production total would suggest, especially in high grade. The coins were released into the channels of commerce at the time of issue and few were saved for numismatic purposes. Most examples seen today are in the VF-XF grade range, and Mint State coins are rare.

The present coin is an attractive MS61 with well-detailed design elements that show a touch of the usual softness on the eagle's legs. The pleasing orange-gold surfaces exhibit the expected number of minor contact marks for the grade and display a mix of satiny mint luster and semiprooflike reflectivity in the sheltered areas. Population: 2 in 61, 3 finer (7/18). NGC ID# 25TT, PCGS# 8237

1854-D Half Eagle, MS61
Popular Large D Variant

- 3194 1854-D Large D MS61 NGC. Variety 37-BB.** The 1854-D is one of the more commonly encountered Dahlonega half eagles, especially in VF-AU grades. At the MS61 level the issue is rare, but some high quality examples are known. This piece is softly struck in the centers, but the orange-gold surfaces show bright, frosted mint luster around the devices, and there are no individually detracting abrasions.

Ex: FUN Sale (Heritage, 1/2003), lot 4784; Long Beach Signature (Heritage, 1/2004), lot 9030; Central States Signature (Heritage, 4/2018), lot 5333. NGC ID# 25UK, PCGS# 8258

1858-C Five Dollar, AU58
High-Grade Charlotte Type Coin

- 3195 1858-C AU58 NGC. Variety 1.** The 1858-C half eagle is a relatively plentiful issue among Charlotte coinage, making it ideal for collectors seeking a single quality coin from this mint. Nonetheless, high-grade examples are scarce. This nearly Uncirculated piece displays tiny bits of reflectivity in the protected regions, with only light abrasions elsewhere. High-point friction prevents a Mint State grade but is truly trivial. The bright yellow-gold surfaces are pleasing. Census: 37 in 58 (3 in 58+), 24 finer (7/18). NGC ID# CLAK, PCGS# 8277

1859-C Liberty Half Eagle, AU58
Elusive Issue Any Finer

- 3196** 1859-C AU58 NGC. **Variety 2.** The 1859-C Liberty half eagle is an elusive issue in AU58 condition, and finer examples are rare. This attractive near-Mint specimen is sharply struck on the obverse, but the central reverse is somewhat mushy, due to an improperly annealed die (all 1859-C half eagles show this effect to some degree). The pleasing orange-gold surfaces exhibit the expected number of minor abrasions for the grade and only a trace of wear shows on the high points of the design. Much original mint luster remains intact. From a mintage of 31,847 pieces. Census: 34 in 58, 13 finer (7/18). NGC ID# 25VC, PCGS# 8281

1859-D Half Eagle, Choice AU
CAC Approval, Original Surfaces

- 3197** 1859-D Medium D AU55 PCGS. CAC. **Variety 44-HH.** The usual variety. Doug Winter writes, "The coloration on original, uncleaned examples is medium to deep green-gold. Pieces are also known with lighter orange-gold shading. Most have been cleaned or dipped at one time." This high-end Choice AU half eagle is undeniably original with remaining mint luster and eye-appealing color. The stars, date, and reverse legend are razor-sharp, while detail is typically mushy in the centers. There are a few small marks in the obverse fields but not much else. From a mintage of 10,366 pieces. Population: 21 in 55, 29 finer. CAC: 4 in 55, 7 finer (7/18). NGC ID# 25VD, PCGS# 8282

1880 Half Eagle, CAC-Approved MS66
Unseen in Higher Grades

- 3198** 1880 MS66 PCGS. CAC. The PCGS CoinFacts plate coin. David Akers once wrote, "The 1880 is common in all grades and is readily obtainable even in Choice Uncirculated condition." While it is true that Choice representatives are obtainable, Gems are rare. Premium Gems like the one offered here are the finest quality known. The PCGS *Population Report* shows four MS66 submissions, while the NGC *Census* lists two more in that grade. CAC has approved two examples at this unsurpassed level (8/18).

Shimmering rose-gold surfaces radiate vibrant frost. Greenish elements appear on each side, adding to the eye appeal and confirming the originality of this marvelous Registry-grade half eagle. The devices are sharply struck with inconsequential softness on the central curls and the eagle's talons. An alloy spot below the I in UNITED will identify the coin in future appearances. NGC ID# 25XA, PCGS# 8351

1882-CC Liberty Half Eagle, MS61
Excellent Branch Mint Type Coin

- 3199** 1882-CC MS61 NGC. Variety 1-A. From a substantial mintage of 82,817 pieces, the 1882-CC half eagle is a reasonably available issue in most grades, and a popular choice with branch mint type collectors. However, the 1882-CC is elusive at the MS61 grade level. This attractive Mint State specimen is sharply detailed and lightly marked, with lustrous orange-gold surfaces. Census: 16 in 61, 7 finer (7/18). NGC ID# 25XH, PCGS# 8359

INDIAN HALF EAGLE

1909-O Indian Head Five, AU53
Final New Orleans Gold Issue

- 3200** 1909-O AU53 PCGS. After the turn of the 20th century, the eagle was the only gold denomination in regular production at the New Orleans Mint. The gold dollar — discontinued as a denomination in 1889 — was last struck at New Orleans in 1855. Quarter eagles had not been struck at the facility since 1857, the three dollar gold piece since 1854, and the double eagle since 1879. In 1909, the New Orleans Mint had not struck half eagles since 1894. In early 1909, a small coinage of 34,200 new half eagles, featuring Bela Lyon Pratt's Indian Head design, rolled off the presses, but the coinage was cut short by governmental suspension of all coinage operations at the New Orleans Mint. The 1909-O half eagle is not only the final gold issue of any denomination to bear the O mintmark, it is also a one-year type for the New Orleans series and it is a low-mintage key in the Indian gold set.

This About Uncirculated piece displays excellent detail and satiny orange-gold surfaces. Hints of luster remain in the protected regions. Scattered abrasions are the product of a brief stint in circulation, which places this 1909-O half eagle in a grade level that many collectors can pursue for their Indian half eagle date and mintmark sets. NGC ID# 25ZK, PCGS# 8515

EARLY EAGLE

1801 Capped Bust Right Ten Dollar, AU50
Nice BD-2 Type Coin

3201 1801 BD-2, R.2, AU50 PCGS. Ex: D.L. Hansen Collection. Bass-Dannreuther Die State a/a, scarce early die state without vertical spines in the cap. A substantial mintage of 44,344 Capped Bust Right eagles was accomplished in 1801, but some of those coins may have been struck from dies that were dated 1800, or even 1799. Remarkably, only two die varieties are known for the date. This coin represents the popular BD-2 variety, with star 1 away from the bust and star 13 close. The relatively available BD-2 variety has a surviving population of 600-800 examples in all grades, making it a logical choice for type collectors. This was the only use of the obverse die, but the reverse was used again to produce the BD-3 variety of 1803.

The present coin is an impressive AU specimen that exhibits only a touch of wear on the strongly impressed design elements. Just a touch of flatness is evident on the stars on the right. The pleasing orange-gold surfaces are lightly abraded, with satiny mint luster in the protected areas. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1839/8 Liberty Ten Dollar, AU50
Large Letters, Scarce Two-Year Type

3202 1839/8 Large Letters AU50 PCGS. This is a significant two-year type with a portrait of Liberty considerably different from the one employed midway through 1839 until the end of the series in 1907. All 1839 Large Letters tens were created by punching a 9 over the 8 on an 1838-dated die. About 150 to 200 pieces are believed extant. This orange and khaki-gold example is unevenly struck with bold detail on Liberty's portrait but slight softness is seen on the stars and eagle. Partly lustrous surfaces are expectedly abraded but are no less appealing because of it. Population: 13 in 50, 47 finer (7/18). NGC ID# 54XF, PCGS# 8576

1842 Ten Dollar Liberty, MS61
Elusive Small Date Variant

3203 1842 Small Date MS61 NGC. The 1842 ten dollar coinage is divided between the Small Date and Large Date varieties (18,623 versus 62,884 pieces, respectively), and the Small Date is by far the scarcer issue overall. Moreover, while both issues are conditionally rare in Mint State, the Small Date variant is almost entirely limited the MS60 and MS61 grades, while the Large Date is represented by a few pieces as fine as MS64 and MS65.

This Small Date coin is tied with just two others as the finest at NGC, while PCGS reports a coin each in MS62 and MS63 (8/18). The design elements are well-defined and each side shows satiny straw-gold luster with semiprooflike reflectivity in the fields. A bisecting die crack extends from the eagle's left (facing) wingtip, across the shield, toward the opposite border. Scattered abrasions define the grade. NGC ID# 262M, PCGS# 8585

1855-S Ten Dollar, AU50
Unknown in Mint State

3204 1855-S AU50 PCGS Secure. Only 9,000 Liberty tens were struck at San Francisco in the second year of operation at that mint. Gold coinage was almost entirely focused on double eagles, and the few tens that were struck circulated. This issue is unknown in Mint State today, and the entire survivorship numbers only 60 to 80 pieces, according to the most recent PCGS estimate. Examples are scarce at auction. This About Uncirculated piece displays sharp detail and bright yellow-gold surfaces with hints of luster in the protected areas. Moderate abrasions on each side accompany the grade. Population: 8 in 50, 11 finer (7/18). NGC ID# 263N, PCGS# 8618

1857 Ten Dollar, MS60
Few Seen in Mint State

3205 1857 MS60 NGC. The 1857 Liberty eagle is scarce, coming from a mintage of 16,606 pieces. Extremely Fine and AU examples are frequently available for a price, but in Mint State only a handful of coins are known. Including possible resubmissions, NGC and PCGS combined list just 10 Uncirculated representatives (7/18). Since 1993, we have handled a Mint State coin on only four occasions, just one of which occurred in the last decade. This issue is decidedly rare so well-preserved.

This MS60 coin displays lustrous fields and sharp design elements. Moderate abrasions on each side determine the grade, but the rarity of this piece outweighs the impact of the surface marks. An important opportunity for No Motto eagle collectors. Census: 3 in 60, 5 finer (7/18). NGC ID# 55GV, PCGS# 8622

1879-CC Liberty Eagle, AU53+
Sought-After, Low-Mintage Issue

3206 1879-CC AU53+ NGC. Variety 1-A. The 1879-CC Liberty eagle claims a low mintage of just 1,762 pieces, the lowest production total for any gold coin ever struck at the famous Western facility. The coins were all struck from a single pair of dies and all show a diagnostic die line through the E in LIBERTY. The coins were released into circulation at the time of issue and few examples were saved by contemporary collectors. PCGS CoinFacts estimates the surviving population of the 1879-CC at just 45-60 examples in all grades.

The present coin is a Plus-graded AU53 specimen that shows some light wear on the well-detailed design elements, but the die line through E remains bold. The lightly abraded orange-gold surfaces retain traces of original mint luster and the overall presentation is quite pleasing. Census: 6 in 53 (1 in 53+), 10 finer (7/18). NGC ID# 265N, PCGS# 8684

1880-CC Ten Dollar, MS60
A Rarity in Uncirculated Condition

3207 1880-CC MS60 NGC. Variety 1-A. The Carson City Mint struck 11,190 Liberty tens in 1880, continuing a trend of low mintages for this denomination at the Nevada branch mint that would not end until 1891. The 1880-CC ten circulated extensively. Worn examples are often available for a price, but in Mint State this issue is genuinely rare. NGC lists only 14 Uncirculated coins, and PCGS reports an additional four. None of these are finer than MS62, and most grade MS60, as does the NGC coin offered here. This piece is sharp and displays bright yellow-gold color. Light surface marks account for the grade but none are individually significant. The fields are mostly prooflike, although frosty luster emerges in the peripheral regions. Census: 8 in 60, 6 finer (7/18).

Ex: Long Beach Signature (Heritage, 6/2011), lot 4753. NGC ID# 265T, PCGS# 8688

1901 Eagle, MS66
High-End for the Grade

3208 1901 MS66 PCGS Secure. CAC. The well-made 1901 eagle was produced to the generous extent of 1.7 million coins. Many are known today through grades as high as MS66, though the issue is scarce at that level, making it an ideal option for type purposes. Rose-gold surfaces are near-flawless, clearly high-end for the grade, with reddish alloy accents on the reverse. Boldly struck throughout. Population: 40 in 66 (2 in 66+), 1 finer. CAC: 12 in 66, 0 finer (7/18). NGC ID# 7LHF, PCGS# 8747

INDIAN EAGLES

1908-S Ten Dollar, MS61
First Indian Head Issue From San Francisco

3209 1908-S MS61 NGC. This sharp 1908-S Indian eagle displays luminous wheat-gold luster and has remarkably few obvious abrasions for the grade. Light scuffs on the cheek appear to be the main inhibitors of a finer grade. Luster is radiant and eye appeal excels for the MS61 level. The San Francisco Mint struck only 59,850 ten dollar gold pieces in 1908, all of the With Motto type. NGC ID# 28GL, PCGS# 8861

1908-S Ten Dollar Indian, MS62
Low Mintage, Conditionally Scarce

3210 1908-S MS62 PCGS. The high-grade availability of the 1908-S is similar to that of subsequent S-mint issues in this challenging series. That is to say that anything above MS61 or MS62 is beyond the reach of most collectors. Bold design detail, radiant mint frost, and rich orange-gold coloration contribute to the appeal of this example. The issue's low mintage of 59,850 coins is also part of what makes the 1908-S so popular. No marks merit attention. NGC ID# 28GL, PCGS# 8861

1911-D Saint-Gaudens Ten Dollar, AU58
Lowest Mintage Among Regular Issues

- 3211 1911-D AU58 NGC.** Demand for this low-mintage Saint-Gaudens eagle (30,100 coins struck, the lowest total among regular issues) is what makes it so difficult to obtain in high grades, particularly in Mint State. There are simply far more collectors looking for the 1911-D than there are examples to satisfy that demand. Lightly marked reddish-gold surfaces maintain traces of satin mint luster. The two lowest headdress feathers are pinpoint-sharp, while the eagle's shoulder is soft. NGC ID# 28GU, PCGS# 8869

1911-D Indian Eagle, AU58
Low-Mintage Denver Issue

- 3214 1911-D AU58 NGC. CAC.** Most of the mint luster clings to each side of this near-Mint 1911-D ten. The high points of the eagle's breast and the headdress show the slight color change from circulation. A few marks are scattered about with orange-gold base color and some light grayish haze. The low-mintage 1911-D ten dollar saw only 30,100 pieces struck, far fewer than its quarter eagle and half eagle counterparts.

Ex: Philadelphia Signature (Heritage, 8/2012), lot 4702, realized \$4,700. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, AU58
Lustrous and Appealing

- 3212 1911-D AU58 PCGS.** The Denver Mint struck only 30,100 Indian eagles in 1911, marking the lowest mintage of the With Motto series. This is a semikey date in all grades, with only the late-series melt rarities — the 1920-S, 1930-S, and 1933 — being overall rarer among With Motto Indian tens. Luster glows in the orange-gold fields and abrasions are trivial only. A brush of friction keeps this near-Mint 1911-D ten from an Uncirculated designation. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar, MS62
Attractive for the Grade

- 3215 1911-D MS62 NGC.** The 1911-D boasts the lowest mintage of the With Motto Indian eagle series at just 30,100 coins. Most surviving examples are lightly circulated, and high-grade Mint State pieces are decidedly rare. In our experience auctioning examples of the 1911-D, XF and AU coins are most often encountered, and pieces grading finer than MS62 make only rare appearances. This MS62 coin is scarce but remains accessible for many collectors. Luster is satiny and vibrant, illuminating minimally marked straw-gold surfaces. Eye appeal is pleasing for the grade. An attractive example of this Denver semikey. Census: 57 in 62 (1 in 62+), 23 finer (7/18). NGC ID# 28GU, PCGS# 8869

1911-D Eagle, AU58
Fully Struck

- 3213 1911-D AU58 PCGS.** This near-Mint eagle enjoys wonderful eye appeal for the grade. The devices are fully struck, and deep orange-gold color yields to occasional rose accents. Each side remains smooth and minimally abraded. Friction is trivial. With only 30,100 coins struck, the 1911-D serves as a popular key to the series. Finer examples usually pose a serious challenge. NGC ID# 28GU, PCGS# 8869

1916-S Ten Dollar, MS64
A Rarity in Finer Grades

3216 1916-S MS64 NGC. CAC. Only 138,500 Indian eagles were struck at San Francisco in 1916, and this issue is highly sought-after as the only Indian eagle issue of that date from any mint. Examples are relatively available through MS63, but Choice and finer representatives are scarce. This CAC-approved near-Gem displays soft, satiny wheat-gold luster and well-struck design elements. Only light surface marks are visible beneath a loupe. Census: 28 in 64 (2 in 64+), 7 finer. CAC: 11 in 64, 3 finer (7/18). NGC ID# 28H7, PCGS# 8880

1932 Indian Eagle, MS65+
Exceptional Type Coin

3217 1932 MS65+ PCGS. CAC. This famous type-coin issue is available in MS65 but scarce any finer. The present Plus-graded Gem is an ideal type collection addition. The strike is bold, and the frosty, radiant luster reveals rose, mint-green, and sun-gold hues. A few trivial grazes define the grade assignment, and the CAC endorsement confirms the high quality and eye appeal.
Ex: Central States Signature (Heritage, 4/2016), lot 5993, realized \$4,230. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU58
Ex: S.S. Republic

3218 1850 AU58 NGC. *Ex: S.S. Republic.* An evenly struck and only lightly circulated example. The reverse has surprisingly few marks, and while the obverse has distributed abrasions, none individually distract. The *S.S. Republic* sank in a hurricane off the coast of Georgia in October 1865. However, not all of the gold coinage on board was recently struck. This 1850 double eagle was struck in Philadelphia some 15 years before it was loaded onto the ill-fated *S.S. Republic*.
Ex: Long Beach Signature (Heritage, 5/2008), lot 3513, which realized \$7,762.50. NGC ID# 268F, PCGS# 8902

1851 Double Eagle, Sharp AU58
Phenomenal Visual Appeal

3219 1851 AU58 PCGS Secure. CAC. Massive quantities of California gold were converted into more than 2 million double eagles at the Philadelphia Mint in 1851, the denomination's second year of regular issue. This borderline Uncirculated representative enjoys phenomenal eye appeal — the result of vibrant luster over original medium yellow-gold surfaces that lack any marks of note. The design elements are essentially fully struck. This would serve as an excellent early type coin. NGC ID# 268H, PCGS# 8904

1851-O Twenty Dollar, XF45
New Orleans Type Coin

3220 1851-O XF45 PCGS. Variety 2. Light wear on each side of this 1851-O double eagle removes most of the luster, although the surfaces have a pleasing olive-gold patina and few significant abrasions. This issue is among the most plentiful New Orleans double eagles, ideal for collectors seeking a single piece from the Louisiana branch mint. The mintage was 315,000 coins, the highest in the series from New Orleans. NGC ID# 268J, PCGS# 8905

1851-O Twenty Dollar, AU50
Attractive Color

3221 1851-O AU50 NGC. Variety 1. Uncirculated 1851-O double eagles are rarities, but this AU piece is more collectible. The 1851-O comes from a mintage of 315,000 coins and is among the most accessible New Orleans double eagles in the series. Detail remains sharp and each side has minimal abrasions. The olive-gold coloration is original and attractive. Hints of luster remain in the most protected areas of the reverse. NGC ID# 268J, PCGS# 8905

1851-O Liberty Twenty, AU58
Seldom Seen Any Finer

3222 1851-O AU58 PCGS. Ex: "Col." E.H.R. Green / Eric P. Newman Collection. While the banking sector experienced increasing demand for coins, this period also saw some of the largest gold exports from the California gold fields during the Gold Rush. Despite its high mintage (315,000 pieces), the 1851-O Liberty double eagle also experienced a high attrition rate. High-end AU examples are scarce, and the date is a notable rarity across the Mint State threshold. This lightly abraded near-Mint example boasts rich lemon-gold patina and retains substantial original, semiprooflike mirroring in the fields. A highly attractive early New Orleans twenty, close to full Mint State — appealing in every way. Population: 22 in 58, 14 finer (7/18). NGC ID# 268J, PCGS# 8905

1852-O Double Eagle, AU53
Less Than 0.01% of Coins Struck Survive

3223 1852-O AU53 PCGS. **Variety 1.** The heavy abrasions that normally plague this popular New Orleans issue are unseen on this lightly circulated, bright straw-gold example. Design elements show strong definition despite a hint of friction. From a mintage of 190,000 coins, less than 0.01% of the 1852-O double eagles struck survive. Many were sent overseas for payments during the Civil War and were subsequently melted. NGC ID# 268L, PCGS# 8907

1853-O Liberty Double Eagle, AU53
Nice Branch Mint Type Coin

3224 1853-O AU53 NGC. The 1853-O Liberty double eagle claims a mintage of 71,000 pieces, lower than the substantial New Orleans production totals of previous years, but still much larger than any mintage achieved after that date at the famous Southern facility. The reason for the decline in production in subsequent years is undoubtedly the opening of the San Francisco Mint in 1854, which drained off the flood of gold deposits that had found its way to New Orleans in the earlier period.

This attractive AU53 example exhibits light greenish-yellow surfaces, with the usual minor abrasions that are expected on large gold coins that spent any time in circulation. A touch of wear on the highpoints of the design is consistent with the grade and traces of original mint luster are evident in sheltered areas. Census: 43 in 53, 67 finer (7/18).

Ex: ANA Signature (Heritage, 3/2008), lot 1630. NGC ID# 268N, PCGS# 8910

1854 Double Eagle, AU53
Scarce Large Date Variant

- 3225** 1854 Large Date AU53 NGC. A die lump on the lower part of Liberty's neck helps confirm the variety. Large Date 1854 double eagles are significantly scarcer than their Small Date counterparts. This About Uncirculated piece displays sharp detail and partially lustrous rose-gold fields. Brighter yellow-gold color appears on the devices. Heavy abrasions on each side are typical of Type One double eagles in AU grades. Census: 26 in 53, 69 finer (7/18). NGC ID# 268S, PCGS# 98911

1854-S Liberty Double Eagle, MS60
Seldom Seen in Mint State

- 3226** 1854-S MS60 PCGS. Approximately 200 to 300 1854-S Liberty double eagles were recovered from the wreckage of the S.S. *Yankee Blade*, many of which were Uncirculated and showed granular surfaces indicative of a seawater effect. While we are unable to confirm that this is one such coin, its textured surfaces and MS60 certification make it a distinct possibility. This attractive Mint State specimen exhibits sharply detailed design elements, with the Large S mintmark touching the tailfeathers. The colorful orange-gold surfaces are lightly marked for the grade, but the mint luster is slightly subdued. Population: 1 in 60, 54 finer (7/18).
Ex: *Chicago Signature (Heritage, 8/2014)*, lot 4069, realized \$25,850.
From *The Trifilio Family Collection*. NGC ID# 268U, PCGS# 8913

1857 Double Eagle, MS60
Rare Mint State Survivor

1857-S Double Eagle, MS65
S.S. Central America, 'Spiked Shield'

3227 1857 MS60 PCGS. CAC. Ex: Dallas Bank Browning / Gilded Age Collection. The plate coin in Bowers' *U.S. Liberty Head \$20 Double Eagles: The Gilded Age of Coinage* (2014). The 1857 is very scarce in mint condition, and this MS60 representative is far finer than its grade suggests. In fact, the Stack's Bowers cataloger noted in this coin's 2014 appearance: "In our opinion, if all MS-60 coins were this nice there would be no reason to seek MS-63 coins." A pinpoint strike, vibrant frosty luster, and amazing orange-gold color are highly desirable qualities. Inarguably high-end for the grade. Population: 11 in 60, 58 finer. CAC: 3 in 60, 11 finer (7/18). Ex: Dallas Bank Collection (Stack's, 10/2001), lot 18; Gilded Age Collection (Stack's Bowers, 8/2014), lot 12015, which realized \$12,925. NGC ID# 2693, PCGS# 8920

3228 1857-S MS65 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 1224. The "Spiked Shield" variety, associated with high-grade 1857-S twenties recovered from the famous "Ship of Gold." This lustrous and sharply struck apricot-gold representative appears close to pristine, although a few specks of struck-in grease (as made) surround obverse star 7. The coin is outstanding from a technical perspective. Housed in a gold label holder. Included with the lot is a brown faux book and slipcover, and a certificate of authenticity signed by Columbus-America Discovery Group founder Tommy Thompson. NGC ID# 2696, PCGS# 8922

1857-S Liberty Double Eagle, MS65
'Spiked Shield,' Variety 20A

3229 1857-S MS65 PCGS. CAC. Variety 20A. Ex: S.S. *Central America*, SSCA 2117. Like most Type One Liberty double eagles, the 1857-S was seldom seen in high grade before the discovery of the treasure of the S.S. *Central America*. More than 5,000 examples of the 1857-S were recovered from the famous shipwreck find, many of them in pristine Mint State condition. The discovery resulted in an exponential increase in the study and collecting of early double eagles. At least eight die varieties were discovered for the 1857-S, including the popular Spiked Shield, Variety 20A, with two prominent die lines to the left of, and penetrating, the eagle's shield.

The present coin is a delightful Gem, with sharply detailed design elements throughout. The diagnostic die lines are plainly visible to the left of the shield, identifying the Variety 20A. The vivid orange-gold surfaces radiate vibrant mint luster and no mentionable distractions are evident. The 1857-S Liberty double eagle is listed among the *100 Greatest U.S. Coins*. NGC ID# 2696, PCGS# 8922

1859 Liberty Double Eagle, AU50
Low-Mintage Type One Issue

3230 1859 AU50 NGC. The 1859 Type One Liberty double eagle claims a small Philadelphia mintage of 43,597 pieces. There was little numismatic interest in double eagles at the time, and the few collectors who did systematically collect large denomination gold coins preferred to update their collections by buying a gold proof set every year. Accordingly, few high-quality specimens were saved by contemporary collectors. Additionally, the 1859 has not been recovered in large numbers in modern shipwreck finds. The issue is elusive in all grades today.

The present coin is an impressive AU specimen, with vivid orange-gold surfaces that show the expected number of minor contact marks for the grade. Both sides retain much of their original mint luster and the well-detailed design elements are lightly worn. The overall presentation is most attractive. Census: 23 in 50, 67 finer (7/18). NGC ID# 269A, PCGS# 8926

1859-S Twenty, Fully Struck AU58

- 3231 1859-S AU58 PCGS.** Medium S. There have been no significant recoveries or hoards of 1859-S double eagles discovered over the past few decades, so the issue remains difficult to locate in high grades, especially finer than this. A crescent of deep orange toning along the right-obverse border complements frosty peach-gold surfaces. Fully struck devices lack obvious signs of blending or merging. Two sets of reeding marks on the portrait will identify this coin in future appearances. Population: 42 in 58 (1 in 58+), 50 finer (7/18). NGC ID# 269C, PCGS# 8928

1859-S Twenty Dollar, Near-Mint
Seldom Encountered in Higher Grades

- 3232 1859-S AU58 NGC.** Medium S. When one considers how many 1859-S double eagles were struck (636,445 coins) and how many survive (probably not more than 2,000 pieces), this otherwise collectible issue becomes comparatively scarce. However, it remains the most available variant for the year ahead of the 1859 and 1859-O. Partial luster glistens from minimally abraded peach-gold surfaces. Strongly struck with practically imperceptible friction. There are 22 finer submissions at NGC (7/18).
From The Trifilio Family Collection. NGC ID# 269C, PCGS# 8928

1860-S Liberty Double Eagle, MS61+
Seldom Encountered in Mint Condition

- 3233 1860-S MS61+ NGC.** The 1860-S Type One Liberty double eagle claims a mintage of 544,950 pieces, a substantial production total in absolute terms, but slightly smaller than average for a San Francisco issue from this period. The coins were released into the channels of commerce, where they circulated heavily for many years, suffering the usual wear and attrition along the way. Few high-quality examples were saved by contemporary numismatists and the issue is rare in Mint State grades today.

The present coin is a Plus-graded MS61 specimen, with sharply detailed design elements and vivid orange-gold surfaces that are remarkably smooth for the grade. Vibrant mint luster adds to the outstanding visual appeal. Census: 14 in 61, 6 finer (7/18). NGC ID# 269F, PCGS# 8931

1861 Liberty Twenty, MS63
Exceptional Type Coin

- 3234** 1861 MS63 PCGS. With a mintage of nearly 3 million coins, the 1861 Liberty double eagle had the highest coinage total of all Type One Liberty double eagles, and the third highest mintage of all three types, behind the 1904 and 1904-S issues. In fact, there were only six double eagles of any issue from 1850 to 1933 that had higher production quantities. Perhaps surprisingly, the issue is conditionally rare in grades better than MS62. This impressive Select specimen exhibits razor-sharp definition on all design elements. The well-preserved orange-gold surfaces offer highly lustrous devices with trivial marks. The fields are semiprooflike and present a mild cameo effect with outstanding eye appeal. Population: 36 in 63 (2 in 63+), 17 finer (7/18). NGC ID# 269G, PCGS# 8932

1861-S Double Eagle, AU58
Scarce This Well-Preserved

- 3235** 1861-S AU58 NGC. Medium S. More than three-quarters of a million 1861-S twenties were struck, but examples are scarcely encountered in high grades and anything in Mint State is rare. Detail is above-average for the issue. Most pieces come softly struck, but this partly lustrous near-Mint coin maintains full star radials and crisp feathers. Perhaps most impressive is the lack of severe abrasions. NGC reports 14 finer submissions (7/18). *From The Trifilio Family Collection.* NGC ID# 269K, PCGS# 8935

1863-S Liberty Twenty, AU58
Strong Mint Luster Remains

- 3236** 1863-S AU58 NGC. Small S mintmark. This near-Mint San Francisco Type One double eagle shows signs of brief circulation and retains plentiful luster across its frosted surfaces. Light abrasions and field chatter are minor in nature. Liberty's hair curls are a bit soft, yet on balance the eye appeal is strong. Most high-grade 1863-S twenties are shipwreck recoveries, and possibly the present coin is one of those. NGC ID# 269R, PCGS# 8940

1863-S No Motto Twenty, AU58
Bright With Partial Mint Frost

- 3237** 1863-S AU58 NGC. Small S. Shipwreck recoveries have significantly improved the availability of the 1863-S double eagle, especially in high grades. This bright, partly lustrous, peach-gold representative displays typical design definition on the obverse and a slightly stronger impression on the reverse. Colorful alloy spots at the upper obverse and lower reverse identify this lightly abraded offering. Scarcely seen finer despite the previously mentioned hoards. *From The Trifilio Family Collection.* NGC ID# 269R, PCGS# 8940

1864-S Twenty Dollar, AU58
Shimmering Mint Frost

3238 1864-S AU58 PCGS. Small S. A few hundred high-grade 1864-S double eagles were recovered from shipwrecks over the past couple of decades, augmenting the number of examples available to collectors. We are unsure of the origin of this near-Mint representative, but would not be surprised to learn it had a nautical past. The devices are well-detailed, and frosty luster shimmers from the recesses. Numerous abrasions appear on each side, but they are less severe than might be expected.

From The Trifilio Family Collection. NGC ID# 269T, PCGS# 8942

1866-S Twenty Dollar, AU50
Elusive No Motto Issue

3239 1866-S No Motto AU50 NGC. The addition of the motto IN GOD WE TRUST to the double eagle in 1866 went into effect in Philadelphia immediately, although the new With Motto reverse dies did not arrive at the San Francisco Mint until 120,000 No Motto pieces had already been struck. The latter issue is elusive and highly sought-after in all grades, with most known examples residing at the VF and XF levels; About Uncirculated coins are scarce and Mint State pieces are rare, with the finest grading just MS62. This AU example is well-detailed, with deep olive-gold patina that shows remnants of luster in the protected regions. Scattered abrasions are present, as expected for an S-mint twenty in this grade. Census: 25 in 50, 66 finer (7/18).

From The Trifilio Family Collection. NGC ID# 269W, PCGS# 8945

1866-S Liberty Double Eagle, AU58
Popular With Motto Type

3240 1866-S Motto AU58 NGC. The design of the double eagle was modified to the famous Type Two motif in 1866, with the motto IN GOD WE TRUST included inside the circle of stars above the eagle's head on the reverse. The older Type One reverse was retired right away at the Philadelphia Mint, but the new dies did not reach the San Francisco Mint in time for the start of coinage operations, so a small mintage of No Motto double eagles was struck there, early in the year. Once the new dies arrived, production went ahead full-steam, and a substantial mintage of 842,250 Type Two twenties was accomplished by the end of the year. The coins were released into circulation and fulfilled their intended purpose as a medium of exchange admirably, suffering the usual wear and attrition along the way. Few examples were saved by contemporary collectors and the 1866-S With Motto double eagle is an elusive issue in high grade today.

This attractive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the pleasing yellow and rose-gold surfaces show the expected number of minor abrasions and chatter in the fields. Much original mint luster remains intact in sheltered areas. NGC has graded 27 numerically finer examples (7/18).

From The Trifilio Family Collection. NGC ID# 26B2, PCGS# 8950

1871 Liberty Twenty, MS60
Seldom Encountered Finer

3241 1871 MS60 NGC. From a small Philadelphia mintage of 80,120 pieces, the 1871 double eagle is an elusive Type Two issue, especially in high grade. This attractive Mint State specimen is lightly marked for the grade, with sharply detailed design elements and pleasing orange-gold surfaces that radiate vibrant mint luster. Census: 4 in 60, 10 finer (7/18). NGC ID# 26AA, PCGS# 8960

1873 Double Eagle, MS63
Open 3 Type Coin

3242 1873 Open 3 MS63 PCGS. Thoroughly lustrous and frosty, easily one of the most attractive Type Two MS63 coins that we have seen in recent years. Radiant cartwheel luster illuminates bold design elements and exceptional tangerine-gold color. Liberty's cheek shows no distracting abrasions, only a few very faint grazes in the patina. The Open 3 variety is scarce but collectible in this grade, and PCGS lists only 12 numerically finer representatives (7/18). NGC ID# 26AL, PCGS# 8967

1873 Liberty Twenty, MS63
Popular Open 3 Variant

3243 1873 Open 3 MS63 PCGS. CAC. An uncommonly well-preserved Open 3 coin, and an outstanding example of the date overall. This Select 1873 double eagle displays frosty, wheat-gold luster and bold motifs with only occasional contact marks in the fields. There are no singular abrasions, and eye appeal is excellent. PCGS lists 12 numerically finer representatives. CAC: 37 in 63, 3 finer (7/18). NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS63+
Vibrant Mint Frost, CAC Approval

- 3244** 1873 Open 3 MS63+ PCGS Secure. CAC. The 1873 Open 3 twenty dollar is more plentiful than its Closed 3 counterpart, but the issue is scarce in MS63 and finer examples are rarely seen. Although strike detail is typically uneven, this high-end Select representative showcases vibrant mint frost over each side that combines with eye-appealing yellow-gold color. Grazes are minimal. PCGS reports 12 finer submissions. CAC: 37 in 63, 3 finer (8/18). NGC ID# 26AL, PCGS# 8967

1873-CC Twenty Dollar, XF45
Challenging Carson City Issue

- 3245** 1873-CC XF45 NGC. Variety 1-A. The 1873-CC is significantly scarcer than the three subsequent Carson City issues. Most survivors from the mintage of 22,410 pieces are in XF to AU grades. This moderately circulated olive-gold example shows refreshingly few marks, though close inspection reveals a few small navy-blue and lavender-red alloy spots. Housed in a former-generation holder. NGC ID# 26AJ, PCGS# 8968

1873-CC Liberty Twenty, AU Details
Elusive Type Two Issue

- 3246** 1873-CC — Cleaned — NGC Details. AU. Variety 1-A. From a small mintage of 22,410 pieces, the 1873-CC Liberty double eagle is an elusive Type Two issue. This impressive specimen exhibits just a trace of wear on the well-detailed design elements and the pleasing yellow and greenish-gold surfaces are lightly abraded throughout. Traces of original mint luster remain intact, if somewhat dulled by a light cleaning. NGC ID# 26AJ, PCGS# 8968

1873-S Double Eagle, MS62+
Closed 3, Few Known Finer

- 3247** 1873-S Closed 3 MS62+ PCGS Secure. CAC. This is the usual variety among 1873-S double eagles. Closed 3 dies were used for most of the year before the San Francisco Mint received the corrected Open 3 dies. Despite a high mintage, few survive so fine and only a handful are better. Strike detail is good and marks are inoffensive, but the hallmark of this piece is its frosty mint luster over original yellow-gold surfaces. Population: 47 in 62 (6 in 62+), 3 finer. CAC: 13 in 62, 0 finer (7/18). NGC ID# 26AL, PCGS# 8969

1874-CC Twenty Dollar, AU53
Collectible Nevada Mint Type Coin

- 3248** 1874-CC AU53 PCGS. Variety 4-A. The obverse features a large die chip on Liberty's neck, and the mintmark is widely spaced, as usual. A touch of central strike softness is noted on each side, but the outer elements are boldly defined despite a trace of friction. Color is light yellow-gold and hints of mint luster remain on this accessible Carson City type coin. NGC ID# 26AP, PCGS# 8971

1875-CC Liberty Head Twenty, AU53
Lustrous Fields, Tilted Mintmark

- 3249** 1875-CC AU53 PCGS. Variety 4-C. The mintmark is closely spaced, but both C's are tilted slightly to the right. The 1 in the date is centered over a dentil. This is a less-often-seen variety of the plentiful 1875-CC double eagle, identified primarily by the aforementioned date and mintmark positions. Elements of luster remain in the fields, complementing well-detailed design elements and original olive-gold patina. Surface chatter is as typical for Carson City gold pieces of this period. NGC ID# 26AT, PCGS# 8974

1875-CC Liberty Twenty, MS62+
Popular Branch Mint Type Coin

3250 1875-CC MS62+ NGC. Variety 2-B. The 1875-CC Liberty double eagle claims a mintage of 111,151 pieces, a small production total for a Philadelphia or San Francisco Mint issue, but quite substantial in the Carson City series. Accordingly, the 1875-CC is relatively available in grades up to the MS62 level, but finer coins are elusive. The issue is always in demand from branch mint type collectors and series specialists alike.

The present coin is a Plus-graded MS62 specimen, with well-detailed design elements that show just a touch of the usual softness on the coronet and hair. The pleasing orange-gold surfaces are lightly marked and radiate vibrant mint luster over both sides. The overall presentation is most attractive. NGC ID# 26AT, PCGS# 8974

1875-S Twenty Dollar, MS63+
Lightly Marked, Lustrous Surfaces

3251 1875-S MS63+ NGC. The 1875-S double eagle claims a substantial mintage of 1.2 million pieces, but the issue is surprisingly elusive in high grade. Most of the large mintage was released into circulation near the time of issue and used to settle large accounts in both foreign and domestic trade. The coins that remained in this country circulated widely in the hard-money economy of the American West, suffering much wear and attrition over the years. The coins sent to foreign destinations were subject to rough storage and transport and repeated counting over the years, acquiring extensive bagmarks and other imperfections along the way. The 1875-S is scarce in MS63 condition, and rare any finer.

The present coin is a Plus-graded Select specimen, with lightly marked orange-gold surfaces that retain all of their original mint luster. The design elements are sharply detailed in most areas, but just a touch of flatness is apparent on some of the stars. Overall eye appeal is terrific. Census: 14 in 63 (3 in 63+), 3 finer (7/18). NGC ID# 26AU, PCGS# 8975

1877-CC Twenty Dollar, AU50
Low Mintage Old West Issue

- 3252** 1877-CC AU50 NGC. **Variety 1-A.** The 1877-CC is scarcer than its 1874-CC, 1875-CC, and 1876-CC predecessors. The mintage was less than 3% of its San Francisco cousin. Nonetheless, five die marriages are known, with Variety 1-A most often seen. This peach-gold Carson City double eagle has a pleasing amount of luster, and is free from consequential marks. The originality is confirmed by traces of dirt in the design recesses. NGC ID# 26AZ, PCGS# 8983

1878-S Twenty Dollar Liberty, MS62
Colorful Lustrous Example

- 3253** 1878-S MS62 PCGS **Secure. CAC.** The 1878-S Liberty double eagle claims a substantial mintage of 1.7 million pieces, but the issue is surprisingly difficult to locate in grades above the MS62 level. This impressive MS62 offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of grade-consistent contact marks. PCGS has graded only 13 numerically finer examples (7/18). NGC ID# 338K, PCGS# 8987

1880-S Double Eagle, MS62
Frosty Yellow-Gold Surfaces

- 3254** 1880-S MS62 NGC. **Tall S.** This San Francisco double eagle is more collectible than Philadelphia twenties struck the same year. However, the availability of the 1880-S tapers off at the MS62 grade level. Strong devices appear over frosted yellow-gold surfaces. Chatter is mostly undistracting with a few more prominent abrasions, including one near the final S in STATES. Census: 49 in 62 (1 in 62+), 11 finer (7/18).
From The Trifilio Family Collection. NGC ID# 26BB, PCGS# 8993

1883-CC Liberty Double Eagle, MS61
Rarely Seen Finer

- 3255** 1883-CC MS61 PCGS. **Variety 1-B.** The 1883-CC Liberty double eagle claims a mintage of 59,962 pieces, a tiny production total in absolute terms, but not unduly small in the context of the series. The issue can be found in lower circulated grades without much difficulty, but Mint State specimens are decidedly elusive. Many examples have been repatriated from overseas holdings and a group of 20-30 relatively high-grade coins reportedly surfaced as late as 2001.

The present coin is an attractive Mint State specimen with sharply detailed design elements in most areas and just the slightest softness on some star centers. The mintmark is positioned with the second C to the left of the D in DOLLARS, identifying the rare Variety 1-B. Some diagonal die lines are evident near star 13 and in the shield. The vivid orange-gold surfaces are lightly marked for the grade and display a mix of satiny mint luster and prooflike reflectivity on both sides. Housed in a green label holder. Population: 76 in 61, 30 finer (7/18). NGC ID# 26BH, PCGS# 8999

1884-CC Liberty Twenty, AU58
Popular Type Three Carson City Issue

- 3256** 1884-CC AU58 NGC. **Variety 1-A.** The 1884-CC Liberty double eagle claims a substantial mintage (in the context of the series) of 81,139 pieces, making it a reasonably available issue and a popular choice with branch mint type collectors. This attractive near-Mint specimen exhibits just a trace of wear on the high points of the strongly impressed design elements and the lightly abraded orange-gold surfaces are lustrous and appealing. NGC ID# 26BK, PCGS# 9001

1890-S Liberty Twenty Dollar, MS63+
Much Nicer Than the Grade Suggests

- 3259** 1890-S MS63+ PCGS **Secure.** CAC. There is no question this 1890-S double eagle appears finer than the grade awarded. Fully struck devices stand out against scintillating honey-gold surfaces that show microscopic marks but no serious distractions on either side. A colorful alloy spot appears within the lower part of the shield. An excellent example for the MS63+ assessment, totally deserving of the added recognition from CAC, if not an even higher grade. NGC ID# 26BZ, PCGS# 9015

1884-CC Double Eagle, AU58
Near-Mint State Carson City Type

- 3257** 1884-CC AU58 PCGS. CAC. **Variety 1-A.** CAC endorsement goes a long way to separate this still-lustrous, naturally patinated CC-Mint double eagle from others of its date and grade level. In general, the 1884-CC is a heavily bagmarked issue — in part, because many of the coins traveled abroad to reside in European holdings. Most returned in the 1990s into U.S. collectors' hands. This radiant example retains most of its frosted luster and sharp strike. Any trace of wear is hard to discern. NGC ID# 26BK, PCGS# 9001

1893-CC Double Eagle, XF45
Final Year for the Facility

- 3260** 1893-CC XF45 PCGS. **Variety 2-A.** The B in J.B.L. is over the right side of the 8. This final-year product from the beloved Carson City Mint derives from a low mintage of 18,402 coins. Light blending occurs over the highest points of the curls and the first couple of stars, but overall detail is strong. Orange-gold surfaces exhibit original mint luster within the hidden areas and small marks on each side. Housed in an old green label holder. NGC ID# 26C9, PCGS# 9023

1889-CC Double Eagle, AU55
Excellent Type Three Representative

- 3258** 1889-CC AU55 NGC. **Variety 1-A.** A small mintage of 30,945 double eagles was struck at the Carson City Mint in 1889, after a three-year hiatus in coinage operations. Despite the small production total, the 1889-CC is not difficult to locate in most grades today. This attractive Choice AU specimen is lightly worn and lightly abraded, with vibrant mint luster on both sides. NGC ID# 26BV, PCGS# 9011

1893-CC Liberty Twenty, AU53
Some Luster Remains

- 3261** 1893-CC AU53 NGC. **Variety 2-A.** Date and mintmark placement differentiates Variety 2-A from the other 1893-CC double eagle variety. This About Uncirculated coin displays slightly better sharpness than some AU-level examples of the final Carson City issue, and luster remains in the protected areas of the fields. The surfaces are uniformly orange-gold and only lightly abraded. Eye appeal is pleasing for the grade. NGC ID# 26C9, PCGS# 9023

1898-S Twenty Dollar Liberty, MS65
Eye-Catching Example

- 3262** 1898-S MS65 NGC. This is an eye-catching example of the generally available 1898-S double eagle, an issue that can be obtained with minimal effort through MS64, but one that becomes scarce at the Gem level and is practically impossible to upgrade from there. Alternating shades of rose and sun-gold combine with swirling mint luster over fully defined design features. Visual quality is fantastic, and NGC has only graded three coins higher (7/18). *From The Trifilio Family Collection.* NGC ID# 26CL, PCGS# 9034

1907-D Double Eagle, MS65
High-End for the Grade

- 3263** 1907-D MS65 PCGS. The 1907-D is a somewhat more available issue in finer grades, perhaps saved as the final year of the type, but it is still a scarce coin above MS65. This is a glistening Gem with pleasing honey-gold toning and well-preserved surfaces. The strike definition is uniformly sharp on both sides. PCGS lists 21 numerically finer representatives (7/18). NGC ID# 26D8, PCGS# 9053

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, MS61
Wire Rim Variant

- 3264** 1907 High Relief, Wire Rim MS61 NGC. The 1907 Saint-Gaudens double eagle claims a limited mintage of 12,367 pieces and the issue is always in demand because of its iconic design. Created by Augustus Saint-Gaudens, the foremost American sculptor of the period, the high relief double eagle is widely acknowledged as America's most beautiful coinage design. Like most examples of this issue, this specimen exhibits a raised fin, or wire rim, around the edge of the coin. This feature was created by metal extruding through the narrow gap between the collar and the die when the coin was struck. This fin was considered a defect at the time of issue, because it prevented the coins from stacking properly. Mint technicians worked successfully to eliminate this feature, by adjusting the dimensions and upset angle of the planchets, and coins struck late in the year have flat rims. The Wire Rim variant is more available than its Flat Rim counterpart, but present-day collectors prize both varieties more or less evenly.

The present coin is an attractive Mint State specimen, with razor-sharp definition on the central design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. Overall eye appeal is quite strong. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, MS62
High Relief, Wire Rim

3265 1907 High Relief, Wire Rim MS62 PCGS. The December 1907 issue of *The Numismatist* addressed protests in the newspapers concerning the removal of “In God We Trust” from the new High Relief twenty dollar gold pieces designed by Augustus Saint-Gaudens. The author disagreed with the protests, arguing that the motto was introduced at a time of great national crisis and was inappropriate during peacetime:

“Forty odd years of peace, growth, and corporation building puts a different aspect on the case, and places us indifferent of celestial influences. Take out the twenty centuries old eagle of Egypt and ‘E Pluribus Unum’ from the reverse of the new coin and in their places put a modern first class battle ship and the legend ‘In Our Navy We Trust.’ Then we will have something strictly up to date and distinctly Rooseveltian.”

Nautical motifs aside, the coins are “distinctly Rooseveltian” in character, for both their impressive High Relief detail, and their overt symbolism is strongly tied to the sense of American progressivism around turn of the century. Today, examples are prized for exactly that: their beauty and historical significance. This example has rich, satiny mint luster and minimal contact marks that are widely scattered over each side and individually insignificant. Fully struck central design elements add to the outstanding eye appeal. NGC ID# 26F2, PCGS# 9135

1907 Twenty Dollar High Relief, MS62
Wire Rim

3266 1907 High Relief, Wire Rim MS62 PCGS Secure. The Mint experienced considerable difficulty transferring Augustus Saint-Gaudens’ high relief designs into dies that were usable for circulating coinage. The High Relief was not the ultimate solution but an intermediate coin. Saint-Gaudens originally intended what we now call the Ultra High Relief as his circulating coin for the twenty dollar gold piece. That was an unacceptable solution because of the multiple strikes and annealings required to produce a single coin. In the month after Saint-Gaudens’ death in early August 1907, President Roosevelt pushed the Mint to finally produce the Saint-Gaudens design. Between early September and the end of December, the Mint struck 12,367 High Relief twenties. Approximately 80% of the total mintage was struck with what was considered a production defect, the fin around part or all of the rim. This production defect was not corrected until late in the production run, but today the so-called Wire Rim variants are collectible in their right. The fin surrounds much of each side of this piece. Additionally, the surfaces are bright yellow-gold with numerous, grade-limiting contact marks scattered about, none of which are worthy of individual mention. Fully struck, of course. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim High Relief Twenty, MS62

- 3267 1907 High Relief, Wire Rim MS62 PCGS. CAC.** The collectibility and market premium of High Relief twenties has been constant since they were produced in 1907. A secondary market immediately arose with pieces selling for \$25-\$30 to collectors who did not have access to bank personnel who could provide examples to them at face value. A high percentage of the mintage was set aside by collectors. Many were well-preserved, others not so much. This piece was especially well cared-for as seen by the thick mint luster that covers each side. Few marks are discernible, even with a loupe; both factors undoubtedly contributing to the endorsement by CAC. The untampered surfaces show a light accent of reddish patina, an indication of originality. The strike details show intricate details on each side with the drapery folds of Liberty's gown especially crisp. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Saint-Gaudens Twenty
Wells Fargo Hoard Coin, MS67

- 3268 1908 No Motto, Wells Fargo Nevada, MS67 NGC.** Ex: Wells Fargo Nevada Gold. No Motto 1908 double eagles from the Wells Fargo Hoard represent some of the finest examples of the type known. Purchased by dealer Ron Gillio, the hoard contained about 19,900 examples of this date sealed in original Mint bags for decades. This Superb Gem example displays shimmering yellow-gold luster and virtually flawless preservation. No lack of sharpness is seen in the design and eye appeal is exceptional.
Ex: *Long Beach Signature* (Heritage, 9/2013), lot 6907, which realized \$6,462.50. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908 No Motto Twenty, MS67
Ex: Wells Fargo

- 3269 1908 No Motto, Wells Fargo Nevada, MS67 PCGS.** Ex: Wells Fargo. For type purposes, few No Motto double eagles would serve better than the present 1908 Wells Fargo coin. The Wells Fargo Hoard yielded thousands of examples of this issue in Mint State, and a huge portion of the high-end coins known today originated from that source. The present piece displays rich satin luster and yellow-gold coloration. The strike is sharply detailed, and there are no mentionable abrasions. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-S Saint-Gaudens Twenty, AU58
Low-Mintage San Francisco Issue

- 3270 1908-S AU58 NGC. CAC.** The first S-Mint Saint-Gaudens double eagle, the 1908-S is also the lowest mintage regular issue in the entire series (if one discounts the celebrated High Relief pieces). This near-Mint example has a trace of high-point wear, yet retains nearly full luster and excellent eye appeal. A few marks on each side are consistent with the grade.
Ex: *Houston Signature* (Heritage, 11/2012), lot 5239, where it realized \$6,462.50.
From The Trifilio Family Collection. NGC ID# 26FA, PCGS# 9149

1909-S Double Eagle, MS66
Exemplary Luster, Rare This Fine

- 3271 1909-S MS66 NGC.** After limited production of double eagles in 1908, due to difficulties implementing the new segmented collar that was introduced for the lettered edge of Saint-Gaudens' design, the San Francisco Mint was finally able to produce mass quantities of the largest gold denomination in 1909, specifically more than 2.7 million pieces. Survivors are available through MS65, but Premium Gems stand in stark contrast and are major condition rarities. NGC has seen 10 coins in MS66 and none finer, while PCGS lists 19 Premium Gems and one finer (8/18). The present example displays beautiful orange-gold luster and exceptional preservation, particularly of the obverse. The strike is sharp, and no major contact marks appear on the high points of Liberty's figure. NGC ID# 26FE, PCGS# 9153

1910 Twenty Dollar, MS65
Few Finer Pieces Are Known

- 3272 1910 MS65 PCGS Secure.** In *Saint-Gaudens Double Eagles*, Roger Burdette notes that most of the 1910 double eagles struck were ultimately used in the foreign trade. A number of coins turned up in European vaults in the 1990s, but most were moderately abraded. In MS65, this issue is elusive, and PCGS and NGC each list only six finer pieces (7/18). This Gem displays a sharp strike and frosty, well-preserved wheat-gold mint luster. The high points of Liberty's figure show only trivial signs of contact. NGC ID# 26FF, PCGS# 9154

1914-S Double Eagle, MS66
Only One Coin Listed Finer

- 3273 1914-S MS66 NGC.** Lovely rose-gold hues emerge from the fields and recesses of this otherwise orange-gold Premium Gem. The luster is vibrant and satiny, showing no distracting abrasions. Sharp design elements complement the eye appeal. The 1914-S double eagle is an available date in lower grades, but Premium Gems are scarce. Only a single coin has been certified finer (7/18). Roger Burdette, in *Saint-Gaudens Double Eagles*, states that few examples of this date circulated domestically. The majority of the mintage was apparently shipped to Europe, South America, and possibly Japan over the span of about 15 years. NGC ID# 82KA, PCGS# 9166

1916-S Twenty Dollar, MS66
Only Three Coins Finer

- 3274 1916-S MS66 NGC.** Only San Francisco produced double eagles in 1916. Almost the entire mintage was initially put into storage, but quantities were later exported for trade, mainly to South America and Asia. In 1916, the United States exported more than \$100 million worth of gold coin. The 1916-S double eagle today is moderately elusive in MS66, and NGC lists only three finer pieces; no finer coins are reported by PCGS (7/18). This example displays a sharp strike and satiny luster. The orange and greenish-gold coloration is original. NGC ID# 34NJ, PCGS# 9169

1916-S Saint-Gaudens Twenty, MS66
None Are Finer at PCGS or CAC

- 3275 1916-S MS66 PCGS Secure. CAC.** The 1916-S double eagle is available in grades through MS65, but Premium Gems are scarce by comparison. This example is among the finest coins certified by PCGS (7/18). Luminous orange-gold surfaces are beautifully preserved, exhibiting full cartwheel luster. The strike is bold throughout. CAC: 29 in 66, 0 finer (7/18).
Ex: ANA Signature (Heritage, 7-8/2008), lot 3428, which realized \$6,037.50. NGC ID# 34NJ, PCGS# 9169

1922-S Double Eagle, MS64
Better Date in High Grade

- 3276 1922-S MS64 PCGS.** Particularly vibrant luster is an immediate attraction on this near-Gem coin, and the relatively clean fields further appeal to the viewer. The strike is sharp, and original orange-gold luster yields hints of lilac throughout. The 1922-S double eagle is available for a price in MS64, but PCGS has seen only 21 finer examples (7/18). This is a high-mintage issue, but domestic circulation was minimal. A large number of coins were shipped overseas in the years after coinage, and these repatriated pieces represent a significant portion of the survivorship. NGC ID# 26G4, PCGS# 9174

1924-D Saint-Gaudens Double Eagle, MS62
Nice Color and Luster

- 3277 1924-D MS62 NGC.** The 1924-D Saint-Gaudens double eagle claims a large mintage of more than 3 million pieces. The 1924-D was one of the most challenging issues of the series in the 1940s, as most of the large mintage was held in government storage until the Gold Recall of 1933, and later melted and stored as gold bars in the Fort Knox Bullion Depository. Fortunately, some coins were used to settle accounts in foreign trade, and many of those pieces have been repatriated in recent years to augment the meager supply. The 1924-D remains rare in higher Mint State grades, however. This attractive MS62 specimen is well-detailed and lightly marked, with vibrant mint luster and pleasing orange-gold surfaces. NGC ID# 34VE, PCGS# 9178

1924-S Saint-Gaudens Twenty, MS63
Soft, Original Mint Luster

- 3278 1924-S MS63 NGC.** A luminous, orange-gold example of this better San Francisco issue. The strike is well-detailed, and only minor chatter on Liberty's torso limits the grade. Both sides radiate vibrant frosty mint luster. Finer pieces are scarce, and the issue is virtually unobtainable in Gem condition.
Ex: Houston Signature (Heritage, 12/2014), lot 3915, realized \$7,050.
From The Trifilio Family Collection. NGC ID# 26G9, PCGS# 9179

1925-S Saint-Gaudens Twenty, MS63
Limited Mint State Availability

3279 1925-S MS63 NGC. The scarcity of the 1925-S double eagle in Mint State belies the issue's mintage of more than 3.7 million pieces. Seldom is such a high-grade coin encountered, and rarely without heavy abrasions. Although this issue is not generally included in the list of major late-series melt rarities, its overall scarcity is largely owed to the gold melts of the mid-1930s. Those pieces that survive owe much to European bank hoards, where they remained hidden until recent decades. This Select example displays satiny yellow-gold luster and minimally abraded surfaces. The design elements are well-detailed. Faint die doubling is discernible on Liberty's lower gown and many of the peripheral stars. Census: 33 in 63 (1 in 63+), 25 finer (7/18).

From The Trifilio Family Collection. NGC ID# 26GC, PCGS# 9182

1926-D Saint-Gaudens Twenty, MS61
Heavily Melted Branch Mint Issue

3280 1926-D MS61 NGC. Mint records indicate 481,000 Saint-Gaudens double eagles were struck at the Denver Mint in 1926. All the coins were delivered in the first quarter of the year. The great majority of the coins never reached circulation, as they were held in government storage until after the Gold Recall of 1933, and melted into gold bars for storage at the Fort Knox Bullion Repository two years later. Roger Burdette estimates no more than 600 examples are extant in all grades today.

The present coin is an impressive Mint State specimen, with well-detailed design elements that show a touch of the usual softness on the torch and Capitol building. The pleasing orange-gold surfaces radiate vibrant mint luster and are lightly abraded for the grade. The overall presentation is most attractive. Census: 15 in 61, 72 finer (7/18). NGC ID# 26GE, PCGS# 9184

1927-S Saint-Gaudens Twenty, MS61
Elusive, Later-Series Issue

- 3281 1927-S MS61 NGC.** The 1927-S double eagle has a higher mintage than its Philadelphia counterpart — just over 3.1 million pieces versus under 3 million coins. That makes it a perfect illustration of just how irrelevant mintages are to rarity among late-date Saint-Gaudens twenties; the 1927 is one of the most common type coins of the series, while the 1927-S is scarce and costly regardless of condition. Because of numerous repatriations from Europe over the past 50 years, there are now perhaps as many as 120-140 Uncirculated examples known of the 1927-S. This piece has lost little of the frosted luster characteristic of the issue. Rather, the coin's grade is derived from numerous small abrasions that are peppered over both sides. The strike definition is also strong throughout. This is an unusual opportunity for the collector to acquire this scarcity in a lower and more affordable grade, while still purchasing a Mint State example. Census: 15 in 61 (1 in 61+), 76 finer (7/18).

From The Trifilio Family Collection. NGC ID# 26GJ, PCGS# 9188

COMMEMORATIVE SILVER

1926 Sesquicentennial Half Dollar, MS66
Among the Finest Pieces Certified

- 3282 1926 Sesquicentennial MS66 NGC.** The Sesquicentennial half dollar, struck at Philadelphia in 1926, is usually available in any grade through MS65. Premium Gems, however, are conditionally rare, and no finer examples are known. This Registry-grade piece displays satiny original luster beneath gold and pearlescent toning. The design elements show bold definition and neither side has bothersome abrasions. Eye appeal is excellent. Census: 24 in 66 (6 in 66 ★, 1 in 66+★), 0 finer (7/18). NGC ID# BYJ4, PCGS# 9374

COMMEMORATIVE GOLD

1915-S Pan-Pac Quarter Eagle, MS67
Among the Finest Certified

- 3283 1915-S Panama-Pacific Quarter Eagle MS67 NGC.** The 1915-S Panama-Pacific quarter eagle comes from a distribution total of just 6,749 pieces. Superb Gems are scarce, and none are known numerically finer than the present. The strike is sharp, and the luminous yellow-gold surfaces offer virtually undisturbed luster that shimmers when rotated beneath a light. Eye appeal is outstanding on this top-grade type coin. NGC ID# BYLP, PCGS# 7450

1915-S Octagonal Pan-Pac Fifty, MS63 Prestigious Exposition Memento

3284 1915-S Panama-Pacific 50 Dollar Octagonal MS63 PCGS Secure. Congress authorized (along with several lesser denominations) a coinage of 3,000 fifty dollar commemorative gold pieces for the Panama-Pacific International Exposition, held in San Francisco in 1915. This was the largest gold denomination struck by the Mint for general distribution up to that time. One half of the coins were to be round, but the other 1,500 pieces were ordered to be struck “similar in shape to the octagonal \$50 gold pieces issued in California in eighteen hundred and fifty-one,” according to the authorizing legislation of January 16, 1915.

Although equal numbers of the two varieties were struck, distribution totals were different. Buyers of the hefty fifty dollar gold pieces favored the Octagonal variant. The two varieties could be purchased together as part of a framed set of Pan-Pac commemoratives, but most buyers chose an individual coin or a cheaper Pan-Pac commemorative set that contained only one fifty dollar gold piece. In the case of the smaller sets and the individual coins, the Octagonal fifty dollar gold piece was requested more frequently than the Round. In all, 483 Round and 645 Octagonal Panama-Pacific fifties were sold. The remainder of each issue was melted.

Today, the Pan-Pac fifty dollar gold pieces are the most sought-after of all classic commemoratives. The Octagonal coin differs from the Round variant not only in shape, but in design — eight dolphins appear around the periphery on each side, occupying the voids created by the angular planchet shape. The dolphins were intended to represent the uninterrupted water route between the Pacific and Atlantic oceans created by that the newly completed Panama Canal. Due to the shape, the dolphins were omitted from the Round issue. The Octagonal coin may be slightly more plentiful than the Round variant today, but it is inherently more intriguing from numismatic, artistic, and historical perspectives.

This example has luminous orange-gold surfaces with a lovely satin sheen. Pan-Pac fifties are known for often having strong eye appeal even in low grades, but this Select example is truly high-end for its designation. Close examination reveals only a few light grazes and lines on each side, and the strike is sharp. Eye appeal is outstanding.

Ex: ANA Signature (*Heritage*, 8/2010), lot 3664, which realized \$74,750. NGC ID# BYHP, PCGS# 7452

1915-S Panama-Pacific Fifty Dollar, MS64
 Iconic Octagonal Form, 645 Pieces Distributed
 Designed by Sculptor Robert Aitken

3285 **1915-S Panama-Pacific 50 Dollar Octagonal MS64 NGC.** If San Francisco sculptor Robert Aitken was not widely known outside of artistic circles before the 1915 Panama-Pacific Exposition, he certainly was afterward. Aitken was one of the artists chosen to participate in the fair, and he produced a number of works in addition to the designs he would create for the Mint's fifty dollar gold pieces.

Perhaps Aitken's most prominent contribution was a series of four sculptures called *The Four Elements*, placed at the top of the main staircase leading to the gardens in front of the Court of the Universe. Alexander Stirling Calder, himself an acclaimed sculptor, described the work: "In spite of their imaginative themes, these massive works have the same gripping reality that characterizes all the later method of this sculptor."

Aitken also created *The Fountain of Earth*, which was placed at the center of the Court of Abundance. This work was composed of several smaller allegorical figures that symbolized "a conception of life with its sorrows, joys, hopes, and tragedies; its bright and its dark side" When the National Sculpture Society exhibited the fountain in Buffalo, they wrote:

"'The Fountain of Earth' by Robert Aitken has compelled the attention of the world of art and won the gold medal of honor in sculpture awarded by the Architectural League of New York in 1915. In this fountain, Aitken expresses the idea of man's profound significance. In general it shows the development and growth of love from its lower to higher forms and the upward effect of that spiritualization upon the life of the earth."

In this same vein, Aitken was able to convey the rebirth of the city of San Francisco after the earthquake and fire of 1906, the completion of the Panama Canal, and the industrial and agricultural might of the state California through a form that harkened back to the days of the Gold Rush — a large Octagonal fifty dollar gold coin. Unlike Aitken's other sculptural works, these "slugs" are available to present-day numismatists, art historians, and other likeminded enthusiasts.

A total of 645 Octagonal coins were distributed in 1915. Many of them survive, although in varying states of preservation. Seldom are examples offered as fine as this near-Gem, and higher-graded representatives are rare. Few marks appear over finely textured yellow-gold surfaces that show original reddish accents. The relief elements are strongly brought-up, and we can see only a few thin lines on Minerva's cheek and a tick near the owl's eye that limit the grade. This is a tremendous example of one of the most popular designs in American coinage. NGC ID# BYHP, PCGS# 7452

MODERN BULLION COIN

1997 Quarter-Ounce Gold Eagle, MS70
Few Certified This Fine

- 3286** 1997 Quarter-Ounce Gold Eagle MS70 PCGS. Although more than 108,000 quarter-ounce Gold Eagles were struck in 1997, the issue is rare certified in MS70. Moreover, a minority of the coins in this grade — just 21 — are in PCGS holders (7/18). This example is a must-have for Registry Set collectors. It displays flawless surfaces and satiny yellow-gold mint luster. The strike is fully rendered. NGC ID# 26MD, PCGS# 9916

TERRITORIAL GOLD

1852 Humbert Ten Dollar, XF40
K-10, Ex: S.S. Central America

- 3287** 1852 Humbert Ten Dollar XF40 PCGS. K-10, Low R.4. Ex: S.S. Central America. SSCA 7055. The K-10 variety has the N in UNITED over the O in OF, and the Y in ASSAYER between NI in CALIFORNIA. This was one of 67 1852 Humbert tens originally recovered from the S.S. Central America. Bowers writes in *A California Gold Rush History*: "This remarkable quantity may indicate that some effort was made to redeem such pieces from circulation. There must be some explanation, as the number found is much higher than the normal and relative availability of the 1852 Humbert \$10 in the milieu of Humbert and U.S. Assay Office of Gold issues of the era." Bright straw-gold surfaces show moderate abrasions and blending over each side. All of the legends remain clear. Listed on page 398 of the 2019 *Guide Book*. NGC ID# ANGG, PCGS# 10187

1852/1 Augustus Humbert Ten Dollar, VF30
Ex: S.S. Central America, K-8 Overdate

- 3288** 1852/1 Humbert Ten Dollar VF30 PCGS. K-8, R.4. Ex: S.S. Central America. SSCA 7191. This ten dollar gold piece by the famous New York watchmaker-turned-California assayer Augustus Humbert saw considerable circulation out West during the five years between when it was struck and when it sank with the "Ship of Gold" in September 1857 off the coast of the Carolinas. The overdate remains visible, and coppery-red accents adorn lightly abraded wheat-gold surfaces. A lovely territorial gold piece with a fascinating history. Listed on page 398 of the 2019 *Guide Book*. NGC ID# 342H, PCGS# 10190

1852 United States Assay Office Ten Dollar
K-12a(2), Ex: SSCA, AU50

- 3289** 1852 Assay Office Ten Dollar AU50 PCGS. K-12a(2), R.4. Ex: S.S. Central America. SSCA 7101. Variety K-12a with the UNITED STATES ASSAY OFFICE reverse is identified by the N directly over the O. This late die state example has indistinct beading around the reverse border. These coins were struck under the auspices of the United State Assay Office of Gold with principals Curtis, Perry, and Ward, who had taken over control of the firm from John L. Moffat. The coins were critical to the local economy in the years before the opening of the San Francisco Mint. This bright yellow-gold survivor is strongly detailed with typical strike softness on the eagle's wingtips and leg. Partial luster remains. A scattering of abrasions is entirely normal, and none of them are singularly distracting. Listed on page 399 of the 2019 *Guide Book*. NGC ID# ANG, PCGS# 10001

PATTERNS

1838 Kneass / Paquet Half Dollar Mule in Copper
Judd-75b (Formerly Judd-255), PR62 Brown
Perhaps Only Two Examples Known

3290 1838 Judd-75b (formerly Judd-255), Pollock-81, R.8, PR62 Brown NGC. This mule pairs the Kneass-designed obverse with the bust of Liberty facing left, with the Paquet-designed reverse from 1859 that shows a perched eagle. Struck in copper with a reeded edge. Only two examples of this rare muling are believed known, and both are believed to have come from the Farouk collection. The surfaces are richly toned in multiple shades with significant brightness radiating from the fields.

Ex: Auction '81 (RARCOA's session, 7/1981), lot 322; Stewart Witham to Harry Bass, August 12, 1981; Bass I (Bowers and Merena, 5/1999), lot 1146. PCGS# 61951

1854 Cent in German Silver
Judd-157, PR64

3291 1854 One Cent, Judd-157, Pollock-185, High R.7, PR64 NGC. 3.4 gms. 62% copper / 26% nickel / 12% zinc. The obverse is derived from a Seated dollar obverse die, but crudely reduced by a portrait lathe to the diameter of a contemporary half cent. The 4 in the date resembles a 1 because of the blurry reduction. On the reverse, 1 CENT is encircled by an oak and acorn wreath. Struck with a reeded edge in a German silver alloy with the combination stated above (and printed on the NGC label). Struck in varying compositions, this is the heaviest example we have a record of handling and with the largest percentage of copper. The fields are bright and reflective with light rose and lilac patina present. NGC ID# 32G5, PCGS# 11650

1866 Seated Dollar in Copper
Judd-541, PR64 Brown

3292 1866 Dollar, Judd-541, Pollock-606, Low R.6, PR64 Brown NGC. Traditionally referred to as dies trial strikings, these pieces are more than likely off-metal strikes that were deliberately produced for sale to collectors. Struck in copper with a reeded edge. The surfaces have evenly mellowed, and while no traces of red remain there are equal parts of brown and blue patina present depending on how the coin is angled. Deeply mirrored fields with only a few faint carbon spots seen (almost exclusively on the obverse). NGC ID# 29LN, PCGS# 60739

1871 Indian Princess Dollar in Aluminum
Judd-1149, PR63

3293 1871 Dollar, Judd-1149, Pollock-1291, Low R.7, PR63 PCGS. On the obverse Liberty wears an Indian headdress and supports a liberty pole with her right hand facing left. Her left hand rests on a globe inscribed LIBERTY. Behind her is a flag ornamented with 22 stars. Thirteen stars surround and the date 1871 is at the bottom. The reverse is the die used for regular issue Liberty Seated dollars. Struck in aluminum with a reeded edge. This was apparently a leftover Longacre design that was implemented by William Barber as Longacre died in 1869. The brilliant surfaces show the usual (but unacknowledged) contrast on each side. A few faint pinscratches are noted near STATES. NGC ID# 2A5A, PCGS# 61411

**1877 Barber-Designed Half Dollar in Silver
Judd-1524, PR62**

- 3294** 1877 Half Dollar, Judd-1524, Pollock-1690, 1692, Low R.7, PR62 NGC. The obverse offers a head of Liberty with six stars to the left, seven to the right, and the date below. Liberty wears a wide-banded cap with the word LIBERTY, hair tied back with a ribbon. The cap is garnished by wheat and cotton. The reverse displays an eagle on a shield inside a band that carries the dual mottoes IN GOD WE TRUST and E PLURIBUS UNUM in Gothic script. Around is the legend UNITED STATES OF AMERICA with HALF DOLLAR below. Struck in silver with a reeded edge. Only seven silver examples are known of this rare and infrequently seen pattern. At least eight pieces are known struck in copper. The surfaces are deeply toned with considerable underlying brightness.
Ex: United States Coins (Stack's, 9/1994), lot 295; Elite Coin Auction (Superior, 7/2003), lot 464. NGC ID# 2AE9, PCGS# 61864

**1881 Barber Liberty Head Cent in Nickel
Judd-1665, PR66 Cameo**

- 3295** 1881 Liberty Cent, Judd-1665, Pollock-1865, High R.6, PR66 Cameo NGC. CAC. The motifs closely resemble those on the issued 1883 Liberty nickel, but the obverse stars are absent in favor of UNITED STATES OF AMERICA, and on the reverse the Roman numeral is I instead of V. Struck in nickel with a plain edge. These designs were also used on the three cent (Judd-1668) and five cent (Judd-1671) designs of this year. Deeply mirrored on each side with thickly frosted devices. Mostly brilliant with the slightest golden streakiness in the planchet (visible only with magnification).
Ex: Houston Signature (Heritage, 12/2008), lot 1775; FUN Signature (Heritage, 1/2015), lot 6766. NGC ID# 2AJP, PCGS# 62061

**Type One Double Eagle Reverse Die Trial, AU50
Undated, Judd-Unlisted**

- 3296** (1850-1866) Type One Double Eagle, Reverse Die Trial, Copper, AU50 NGC. The regular issue reverse die of the Type One double eagle, uniface, struck in copper with a plain edge. A number of die trials for double eagles are recorded in the Pollock reference, in the Judd pattern book, and in Don Taxay's coinage encyclopedia. However, none of those listings match this piece. Likely unique and one of the highly important offerings from the Newman Collection. Unevenly struck on a copper planchet that weights 201.5 grains, with a specific gravity of about 9.0, this piece shows strong details above the horizontal axis and weak details below that reference line. The planchet is uneven and out of round, and the blank back of this piece has an extra arc line apparently from a planchet cutter, ruling out the possibility of a complete copper pattern with the back ground down. Newman's notes for this pattern reference the U.S. Mint National Archives from 1849, and state "reverse die for double eagle completed June 1849. Obverse die not ready until December 22, 1849. A second obverse was made because the relief was too high and Longacre completed it Jan. 12, 1850."
Ex: Burdette G. Johnson; Eric P. Newman Numismatic Education Society; Long Beach Signature (Heritage, 2/2017), lot 4880, which realized \$9,106.25.

U.S. MERCHANT TOKEN (1845-1860)

**1846 Do Your Duty Token, MS63
Rulau-Y4, Mormon-Issued**

- 3297** 1846 Do Your Duty / Union is Strength Token MS63 NGC. Rulau-Y4. Brass. 18 mm. Plain edge. Russell Rulau listed the token in the Non-Local section of his 1846 to 1860 reference on U.S. merchant tokens, while noting that "some have associated it with the Mormon movement because of" its symbolism. The clasped hands are seen on 1849 and 1850 Mormon territorial gold varieties, and the beehive appears on Rulau-UT-SL-4, the gold medals from the Deseret Agricultural and Manufacturing Society. According to Brigham Young University, the rare Do Your Duty tokens were issued by Peter Haws of the Nauvoo Agricultural and Manufacturing Association while the Mormons were in Iowa territory. This glossy olive-brown example is nicely struck and devoid of contact.

End of Session One

SESSION TWO

COLONIALS

- 3298** 1652 Pine Tree Shilling, Small Planchet, Good 6 PCGS Secure. Noe-19, W-850, Salmon 5-B, R.5. 65.59 gr. Wear is relatively even, producing light tan-gray patina on the relief elements and deeper gunmetal-gray color in the fields. There is some more significant wear in a vertical line just left of the tree trunk, as well as over the date area and the upper margins. The strike is a trifle off-center toward 12 o'clock, but most of the legends remain readable. A low-grade but problem-free Pine Tree shilling with excellent surface quality. Listed on page 51 of the 2019 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

**Rosa Americana Twopence, AU58
M. 2.1-B.1, Scarce *Guide Book* Variety**

- 3299** (1722) Rosa Americana Twopence, Motto in Ribbon, AU58 PCGS Secure. M. 2.1-B.1, W-1322, R.3. The sole die pair for the undated twopence with ribbon. This mark-free walnut-brown near-Mint representative is well-impressed, though the right-side obverse legends are strike doubled. The surfaces exhibit only a trace of verdigris throughout. Listed on page 54 of the 2019 *Guide Book*. Population: 10 in 58 (1 in 58+), 12 finer (7/18). *From The Kentfield Collection, Part II*. NGC ID# 2U3Z, PCGS# 92

**1766 Pitt Halfpenny, Choice AU
Betts-519, Smooth Surfaces**

- 3300** 1766 Pitt Halfpenny AU55 PCGS Secure. Betts-519, W-8350, R.3. William Pitt the Elder was instrumental in the repeal of the detested Stamp Act, which taxed commerce between England and its colonies. Pitt halfpennies regularly appear at auction but most are well-circulated or exhibit problems. The present lightly worn example offers clashed but unabraded medium brown surfaces. There are no flan detractions. Population: 16 in 55, 15 finer (7/18). Listed on page 62 of the 2019 *Guide Book*. *From The Kentfield Collection, Part II*. NGC ID# 2AUH, PCGS# 236

- 3301** 1788 Massachusetts Half Cent AU55 NGC. Ryder 1-B, W-6010, R.2. A vertical die crack through the second 8 in the date confirms the Ryder marriage. A briefly circulated half cent that boasts an even strike and unabraded surfaces. Slender retained laminations cross the central obverse and the eagle's branch are as-made. Listed on page 71 of the 2019 *Guide Book*. NGC ID# 2B23, PCGS# 308

**1787 Fugio Cent, MS63 Red and Brown
STATES UNITED, Cinquefoils, N. 13-X**

- 3302** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Red and Brown PCGS Secure. N. 13-X, W-6855, R.2. Substantial peach-red accompanies the protected areas of this unabraded example. The left-side borders are softly impressed, but the remainder of the strike is bold. Minor to moderate flan striations (as made) emerge under close inspection. Struck a few degrees off-center toward 3 o'clock, affecting only the dentils. High-grade 'X' reverse Fugio cents are associated with the Bank of New York holdings. Listed on page 99 of the 2019 *Guide Book*. *From The Kentfield Collection, Part II*. NGC ID# 2B8E, PCGS# 884

- 3303** 1789 Mott Token, Thin Planchet, Plain Edge MS61 Brown PCGS. Breen-1021, Rulau-E-NY-611. Classified today as a Hard Times store card, the Mott token is nonetheless listed in the Early American section of the 2019 *Guide Book*, on page 86. This is a late die state example with an enormous die break from the upper left clock corner, and indistinct definition in the centers, all as made. The peripheral legends are sharp. The medium brown surfaces lack post-strike detractions. NGC ID# 2B5L, PCGS# 604

- 3304** Mott Token, Thin Planchet, Engrailed Edge, MS61 PCGS. Breen-1025, Rulau-E-NY-612. A lovely medium brown early American storecard. Smooth aside from one thin mark on the arrows and fletchings. The late die state with a large break from the northwest clock corner and an indistinct impression on portions of the eagle. Listed on page 86 of the 2019 *Guide Book*. NGC ID# 2B5M, PCGS# 607

**(1790) Albany Church Penny
No D Above CHURCH, W-8500**

- 3305** (1790) Albany Church Penny, No D, Uncertified. Breen-1170, W-8500, R.7. 103.4 grains. 28.1 mm. The very rare Albany Church pennies were struck in 1790, "following the coppers panic of 1789," per the *Whitman Colonial Encyclopedia*. Two varieties were issued, both uniface, and this is the variety without a letter D above CHURCH. The present chocolate-brown example has VF to XF sharpness but the obverse is intermittently granular. The second H in CHURCH is strike-doubled. The reverse exhibits a long thin mark that may have been on the planchet prior to the strike. A Classic Head large cent was twice lightly impressed into the reverse, perhaps in an attempt to pass the token as a large cent during the early 19th century. Listed on page 87 of the 2019 *Guide Book*.

3306 (1795) Washington Liberty & Security Penny, Plain Rims, MS61 Brown PCGS Secure. Baker-30, W-11050, Musante GW-45, R.2. A splendid olive-brown Washington piece that boasts smooth, satiny surfaces. Well-struck and impressive. The usual undated variety with a lettered edge and a lumpy upper-left obverse rim. Listed on page 96 of the 2019 *Guide Book*.
From The Kentfield Collection, Part II. NGC ID# 2B7V, PCGS# 767

3307 Undated Washington Success Medal, Small Size, Plain Edge, AU58 PCGS Secure. Baker-267A, DeWitt-GW-1792-4, W-10877, Musante GW-44, R.5. The triangular bow in Washington's queue is one method of distinguishing the scarce Small Size variety, aside from the reduced diameter. The initial golden-brown color is predominant, though the cheek and other high points are dove-gray. Exemplary aside from a tick or two on the forehead. Listed on page 96 of the 2019 *Guide Book*.
From The Kentfield Collection, Part II. NGC ID# 2VZ9, PCGS# 782

HALF CENTS

1804 C-13, B-10 Half Cent, MS63 Brown Plain 4, Stemless Wreath

3308 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Brown PCGS. Manley Die State 2.0. A plentiful, easily attributed variety with its own entry in the *Guide Book*. LIBERTY is bold, and no rim cud has formed above MER in AMERICA. Glossy brown surfaces show minimal marks. Most of the dentilation is gone, but central design detail remains clear. A pleasing type coin. Our EAC grade AU50. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

3309 1806 Large 6, Stems, C-4, B-4, R.1, MS62 Brown PCGS. Manley Die State 1.0. This Stems reverse lacks a berry below the second T in STATES. Glossy brown surfaces reveal pleasing pale blue and mint-green accents. The obverse is generally well-struck, while the reverse shows several points of softness on the wreath and upper part of the legend. Our EAC grade XF40. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

3310 1811 Close Date, C-2, B-2, Low R.3 — Environmental Damage — PCGS Genuine. XF Details. Manley Die State 3.0, "very scarce." The 1811 is a much better date within the Classic series. This steel-gray and mahogany-brown example shows minimal granularity given its PCGS designation. Only two marks merit mention, east of star 3 and beneath the wreath ribbon. Our EAC grade Fine 15.

LARGE CENTS

3311 1794 Head of 1794, S-59, B-57, R.3 — Altered Surfaces — ANACS. XF40 Details. A richly detailed example of the scarce second-year cent. The microgranular surfaces appear lightly burnished, and the rims show minor crimping near the pole and the second T in STATES. Abrasions are trivial for the designated grade. A radial die crack through the second S in STATES and a rising crack through the fraction identify the Sheldon variety. Our EAC grade VF20.

1794 Liberty Cap Cent, XF40 Head of 1795, S-67

3312 1794 Head of 1795, S-67, B-59, R.3, XF40 NGC. Breen Die State IV. A splendid example of this Head of 1795 variety. The obverse is chocolate-brown and the reverse is medium brown. Both sides have typical minor marks along with trivial obverse pitting and a small rim bump near the U in UNITED. The overall appearance is excellent. Our EAC grade VF25.
Ex: Long Beach Signature (Heritage, 5/2012), lot 3067, which realized \$4,025. NGC ID# 223R, PCGS# 35684 Base PCGS# 1365

3313 1797 Reverse of 1797, Stems, S-140, B-22, R.1, VF20 PCGS. Breen Die State II. Dentils are complete around both borders, and the central devices are well-struck. This dusky autumn-brown large cent displays relatively smooth surfaces with occasional contact marks. The strike is well-centered and even. Our EAC grade VG10. NGC ID# 2242, PCGS# 35951 Base PCGS# 1422

3314 1805 S-267, B-1, R.1, XF45 NGC. Breen Die State IV, with the border dentils blurred by die fatigue. Only two obverse and two reverse dies were used for cent coinage in 1805, creating three different varieties. This Choice XF example of Sheldon-267 shows uniform burgundy-brown patina and strong detail with microgranularity in the fields. Bits of green verdigris cling to the leaves of the wreath, and several hair-thin scratches are visible in the central reverse. Our EAC grade VF30. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

3315 1811/0 S-286, B-2, R.3, VF20 PCGS. Breen Die State I. Crude remnants of the underlying 0 can be seen around the final 1 in the date on this *Guide Book* variety. On this piece, the central devices are well-defined, but the border dentils grow weak. Some granularity affects the deep ebony-brown surfaces, and a few light marks are noted. A thin scratch stretches from star 6 to Liberty's ear. Our EAC grade VG8. NGC ID# 224V, PCGS# 36490 Base PCGS# 1558

3316 1816 N-2, R.1, MS64 Brown NGC. Die State A. The most accessible 1816 cent die pair, from an earlier die state. The surfaces of this Choice Brown coin are glossy with suggestions of violet and caramel-gold against a deep brown base. Weakly struck along the upper wreath and lower-right stars. Our EAC grade AU55.
Ex: New York Signature (Heritage, 12/2011), lot 3025, which realized \$977.50; Orlando Signature (Heritage, 7/2013), lot 4665, which realized \$1,292.50. NGC ID# 224Z, PCGS# 36526 Base PCGS# 1591

3317 1827 N-11, R.1, MS64 Brown PCGS Secure. A lovely chocolate-brown Choice cent. The semiprooflike surfaces appear unabraded, and the occasional minute flan imperfections near the rims are of mint origin. Only star 2 lacks a sharp strike. N-11 is attributed by prominent recutting on the base of the T in CENT. Our EAC grade AU55. NGC ID# 225H, PCGS# 36868 Base PCGS# 1651

3318 1838 N-1, R.1, MS65 Brown PCGS Secure. CAC. The 1 in the date and the I in UNITED are repunched on this collectible Newcomb marriage. A satiny and splendidly smooth chocolate-brown Gem with glimpses of remaining red in protected regions. Well-struck aside from the upper stars. Our EAC grade MS60. For all 1838 varieties, CAC: 30 in 65, 10 finer (7/18). NGC ID# 225V, PCGS# 37180 Base PCGS# 1741

3319 1853 N-3, R.1, MS66 Brown PCGS Secure. CAC. Most of the diagnostic marks are gone in this late die state, but the lump above the T in LIBERTY and the date placement aid in attribution. Faint blue accents complement glossy medium brown surfaces. This Premium Gem is well-struck and shows only two marks on the jawline and in the right obverse field. Our EAC grade MS60. Population (base number, all varieties): 31 in 66 (2 in 66+) Brown, 1 finer. CAC: 33 in 66, 0 finer (7/18). NGC ID# 226K, PCGS# 405982 Base PCGS# 1901

3320 1855 Upright 55, N-4, R.1, MS66 Red and Brown NGC. Grellman Die State a. Boldly struck, only a couple of stars near the coronet tip were not fully impressed by the dies. Lovely orange-red color dominates, with hints of ruby and olive toning. No marks are detected, and the eye appeal is irrefutable. Our EAC grade MS63. *Ex: Long Beach Signature (Heritage, 9/2005), lot 750, realized \$1,265. NGC ID# 226M, PCGS# 46953 Base PCGS# 1908*

FLYING EAGLE CENTS

3321 1857 MS64 PCGS Secure. This satiny near-Gem shows warm apricot-gold luster around the margins with more traditional tan-gold in the centers. There is slight strike softness on the eagle's tailfeathers, but the overall definition is pleasing, and the surfaces are free from distracting abrasions.

Ex: Santa Clara Signature (Heritage, 11/2000), lot 6666; Long Beach Signature (Heritage, 5/2003), lot 5182; Central States Signature (Heritage, 4-5/2009), lot 1074. NGC ID# 226P, PCGS# 2016

3322 1857 MS64 PCGS Secure. A mixture of golden-tan and dark brown create excellent eye appeal on this brilliant and highly lustrous Flying Eagle cent that is ideal for a date or type collection. Small marks are evident on the lower left of the obverse. NGC ID# 226P, PCGS# 2016

3323 1857 MS64 PCGS. CAC. The design elements of this attractive Choice Uncirculated Flying Eagle cent are sharply detailed, aside from some localized softness on the eagle's wing feathers. The copper-red surfaces are well-preserved with slightly muted mint luster. NGC ID# 226P, PCGS# 2016

1857 Flying Eagle Cent, MS65 Radiantly Lustrous

3324 1857 MS65 PCGS. Vibrant bronze-gold mint luster delivers eye-catching appeal on each side of this Gem Flying Eagle type coin. Close study with a loupe reveals scattered small marks in the fields, primarily on the obverse, but these are mint-made, a result of debris on the die face. The usual strike softness is noted on the eagle's tailfeathers and head, as well as the corresponding portions of the reverse wreath, but the centers are sharp. A faint peppering of tiny specks is discernable with magnification. Only 19 coins are numerically finer at PCGS (7/18).

Ex: PNG Dallas Invitational Signature (Heritage, 2-3/2015), lot 3364, which realized \$3,055. NGC ID# 226P, PCGS# 2016

3325 1858 Small Letters MS64 PCGS. The bases of the AM in AMERICA are separated on the Small Letters variety. This lustrous near-Gem displays traditional tan-gold color and is remarkably well-preserved and appealing for the grade. The strike is sharp as well, even on the eagle's head and tailfeathers. Finer Small Letters Flying Eagle cents are scarce. NGC ID# 2279, PCGS# 2020

1858 Flying Eagle Cent, MS65 Small Letters, Vibrant Original Surfaces

3326 1858 Small Letters MS65 PCGS. CAC. Low Leaves, Close E Reverse. The Small Letters 1858 Flying Eagle cent is scarcer than its Large Letters counterpart, particularly in Gem or finer grades. This MS65 coin is incredibly sharp throughout, with satiny bronze-gold luster and impeccably preserved surfaces. A small, shallow planchet depression below the first S in STATES is mint-made and should not be confused with an abrasion. Population: 97 in 65 (4 in 65+), 17 finer. CAC: 31 in 65, 4 finer (7/18). *Ex: Long Beach Signature (Heritage, 9/2015), lot 3087, which realized \$3,760. NGC ID# 2279, PCGS# 2020*

INDIAN CENTS

3327 1859 MS65 PCGS. The 1859 serves as a popular single-year type coin with the Laurel Wreath reverse. This lustrous well-preserved Gem features luminous tan-gold color and peach-orange accents. The headdress is strongly defined, and a single mark occurs below the N in CENTS. PCGS reports 35 finer submissions (8/18). NGC ID# 227E, PCGS# 2052

3328 1859 MS65 NGC. The 1859 Indian cent is an elusive issue in grades above the MS65 level. This attractive Gem offers sharply detailed design elements and well-preserved reddish-tinged surfaces, with vibrant mint luster throughout. NGC has graded 11 numerically finer examples (7/18). NGC ID# 227E, PCGS# 2052

1859 Indian Cent, MS65 Laurel Wreath Type Coin

3329 1859 MS65 PCGS. CAC. Satiny, unabraded luster complements sharp design elements on this Gem Laurel Wreath type coin. Warm copper-orange hues emerge from beneath tan-gold patina, producing strong eye appeal. A forked die crack at 1 o'clock on the reverse branches down into the wreath and left top of ONE. This one-year type is only moderately elusive in MS65, but PCGS lists only 35 finer coins (8/18). NGC ID# 227E, PCGS# 2052

**1860 Pointed Bust Cent, MS65
Bright Nickel-Gray Appearance**

3330 1860 Pointed Bust, FS-401, MS65 PCGS. The surfaces on this piece make it easy to understand why the general public at the time called these mostly nickel coins “white cents.” There is a uniform nickel-gray appearance on each side with just the slightest hint of iridescence. Sharply defined throughout. Population: 44 in 65 (3 in 65+), 15 finer (7/18). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

3331 1861 MS66 PCGS. A conditionally elusive Premium Gem example of this early copper-nickel issue, showing satiny tan-gold surfaces and no bothersome abrasions. The upper headdress feathers are a trifle weak on the tips, as often seen on Indian cents of this type. Population: 99 in 66 (18 in 66+), 13 finer (7/18). NGC ID# 227G, PCGS# 2061

3332 1862 MS66 PCGS. The 1862 is popular as a copper-nickel type coin, although examples are rarely offered finer than MS66. This Premium Gem displays a full strike and unabraded, softly frosted surfaces. Tan-gold coloration yields more vivid copper-orange undertones when tilted beneath a light. Population: 99 in 66 (10 in 66+), 14 finer (7/18). NGC ID# 227H, PCGS# 2064

3333 1864 Copper-Nickel MS65+ PCGS Secure. CAC. The 1864 copper-nickel cent is one of the more conditionally challenging issues in this early short set. This tremendous high-end Gem offers crisp detail with four clear diamonds and exceptionally clean amber-gold surfaces. Mint luster is vibrant. PCGS reports 43 finer submissions, and CAC has stickered 20 finer examples (8/18). NGC ID# 227K, PCGS# 2070

3334 1868 MS65 Red and Brown PCGS Secure. CAC. A mintage of 10.2 million coins was somewhat low for the 1860s, but the 1868 cent remains collectible in most grades. Few obvious marks appear on this CAC-approved Gem. Glowing copper-orange luster shines from the recesses, while the exposed areas feature golden-brown color. Well-struck, except for the lowest diamond and upper part of the date digits. NGC ID# 227S, PCGS# 2092

**1868 Cent, MS65 Red
Unmellowed Orange Color**

3335 1868 MS65 Red PCGS. Bright mint luster illuminates this nicely struck orange-red Gem. Thorough inspection reveals pinpoint flecks, along with unobtrusive obverse marks near 12 o'clock and Longacre's initial. Population: 48 in 65 (1 in 65+) Red, 4 finer (7/18). Ex: FUN Signature (Heritage, 1/2006), lot 741; Long Beach Signature (Heritage, 2/2008), lot 3061, which realized \$2,990. NGC ID# 227S, PCGS# 2093

3336 1872 MS64 Red and Brown PCGS Secure. CAC. Bold N in ONE. The usual reverse. Golden-brown and fire-orange color is entirely natural and readily appealing. Softness on the feathertips, diamonds, and reverse shield do not affect the eye appeal in any way. Glossy with few marks for the grade assessment. NGC ID# 227W, PCGS# 2104

3337 1873 Open 3 MS65 Red PCGS. A deep fire-red Gem with shades of olive on each side and a hint of ruby-red on the Indian's cheek. A tiny lamination or two is noted near the N in CENT, but the surfaces are otherwise smooth. Encapsulated in a green-label holder. Population: 25 in 65 (1 in 65+) Red, 6 finer (7/18). NGC ID# 227Y, PCGS# 2108

3338 1874 MS65 Red PCGS. Ex: Joshua and Ally Walsh. An unabraded olive-gold and lilac-red better-date Gem. Sharply struck save for a small area of the upper-right portion of the shield. A loupe reveals distributed pinpoint flecks. Population: 44 in 65 (2 in 65+) Red, 13 finer (7/18). Ex: Joshua and Ally Walsh Collection / FUN Signature (Heritage, 1/2006), lot 768; FUN Signature (Heritage, 1/2008), lot 312, which realized \$2,185. NGC ID# 227Z, PCGS# 2120

3339 1877 AU50 PCGS. The rose-tinged chocolate-brown fields have only a few isolated handling marks, though light, even wear and a handful of abrasions are noted on the portrait. Aside from the obligatory shallow definition on the N in ONE, this is a boldly defined example of this important low-mintage issue that would fit well in a similarly graded date set. Ex: Long Beach Signature (Heritage, 2/2007), lot 2237, which realized \$2,760. NGC ID# 2284, PCGS# 2127

3340 1885 MS65 Red PCGS. The sharply struck devices of this Gem display careful preservation. The pale straw-gold surfaces show subtle pink accents and isolated flyspecks near the portrait. Overall, a pleasing example of this conditionally elusive issue. Population: 71 in 65 (1 in 65+) Red, 23 finer (7/18). Ex: FUN Signature (Heritage, 1/2008), lot 327, which realized \$2,530. NGC ID# 228C, PCGS# 2153

3341 1894 MS66 Red PCGS. The 1894 is a slightly better date in the Indian cent series. Coinage amounted to less than 17 million pieces, while most other issues from this period had coinages of more than twice that number. In MS66 Red, the 1894 cent is rare. This piece showcases frosty, almost carbon-free luster and well-struck design elements. Fire-orange and golden coloration dazzles the eye. Population: 37 in 66 (6 in 66+) Red, 1 finer (7/18). Ex: Central States Signature (Heritage, 5/2003), lot 5173, which realized \$3,680; FUN Signature (Heritage, 1/2008), lot 340, which realized \$7,475. NGC ID# 228N, PCGS# 2189

3342 1895 MS66 Red PCGS. Glistening original mint luster and its frosty texture amplifies the appeal of the fire-red and sun-orange coloration that gives this Premium Gem Red 1895 Indian cent its remarkable visual appeal. One can count the number of carbon specks on one hand with fingers left over, and they are truly microscopic. A virtually flawless type coin. Population: 60 in 66 (9 in 66+) Red, 4 finer (7/18). Ex: FUN Signature (Heritage, 1/2008), lot 342, which realized \$4,312.50. NGC ID# 228P, PCGS# 2192

3343 1897 MS67 Red and Brown NGC. As of (7/18), NGC has certified only two 1897 cents at the MS67 level, the present coin and a single MS67 Red example. This unabraded Superb Gem is cherry-red and olive-green with hints of deeper lavender toning on the high points. Housed in a prior-generation holder. NGC ID# 228S, PCGS# 2197

3344 1900 MS66 Red PCGS. Frosty mint luster on this Premium Gem Red type coin is original and unabraded. A loupe is needed to see any microscopic, unimportant specks. The obverse shows fiery copper-red color, while the reverse has a minutely more golden hue. Eye appeal is outstanding. PCGS lists 19 finer Red submissions (8/18). NGC ID# 228V, PCGS# 2207

3345 1901 MS66 Red PCGS. CAC. Ex: Richard. The Richard Collection of Indian cents was auctioned in our 2004 FUN Signature. This is a lustrous and essentially unabraded Premium Gem. Apricot-gold color is seen overall with hints of sea-green and a hint of deeper color on the upper headdress feathers. A fleck or two on the upper obverse denies perfection.
Ex: FUN Signature (Heritage, 1/2004), lot 4339; FUN Signature (Heritage, 1/2008), lot 347, which realized \$2,300. NGC ID# 228W, PCGS# 2210

3346 1908-S MS65 Red PCGS. A satiny, full Red Gem example of this popular branch mint issue. The interiors are rose-gold and copper-orange in color, while the peripheries contrast with bright yellow-gold hues. The upper headdress feathers are slightly soft, as always. This lovely coin has only a few microscopic specks. NGC ID# 2296, PCGS# 2234

1909-S Indian Cent, MS65 Red Low-Mintage Branch Mint Key

3347 1909-S MS65 Red PCGS. A lovely, frosted Gem Red coin with unabraded surfaces and virtually no carbon spotting. The upper three headdress feathers are weakly struck, as usual, but no other distractions are present. This key-date San Francisco issue is occasionally seen in MS65 Red, but PCGS lists only 31 finer examples (8/18). Coinage of this issue amounted to only 309,000 pieces. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

3348 1862 PR64 PCGS Secure. CAC. This Choice proof copper-nickel Indian cent, while not designated as a Cameo, exhibits contrast between its satiny, sharply defined devices, and mirrored fields. Contact marks and spots are minimal on this attractive piece. NGC ID# 229C, PCGS# 2259

3349 1866 PR66 Red and Brown PCGS. Deeply reflective fields provide a glimmering backdrop for the sharp, frosty devices of this Premium Gem proof. Both sides are mostly copper-orange in color, although wisps of chestnut-brown toning earn the Red and Brown color designation. Appreciable cameo contrast is apparent on the obverse. Population: 26 in 66 (2 in 66+) Red and Brown, 2 finer; 4 in 66 Red, 0 finer; 4 in 66 Red Cameo, 0 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2011), lot 3191, where it brought \$2,070. NGC ID# 229J, PCGS# 2286

3350 1869 PR65 Red and Brown PCGS. CAC. The outer areas are rich pumpkin-orange, while rose and amber accents color the centers. An expectedly razor-sharp Gem proof, with reflective fields that offer immense eye appeal. From a small proof mintage of 600 pieces. NGC ID# 229M, PCGS# 2295

3351 1885 PR66 Red and Brown PCGS Secure. Snow-PR3. The date is lightly repunched, evident on the 5 and first 8. An intricately struck and flashy high-grade specimen. The apricot-gold and lime-green surfaces display a few pinpoint flecks, mostly near the rims. NGC ID# 22A6, PCGS# 2343

3352 1896 PR66 Red and Brown Cameo NGC. NGC has designated only four proof 1896 Indian cents as Cameos, including two in PR66 Red and Brown Cameo and one each in PR64 Red Cameo and PR65 Red Cameo (8/18). This Red and Brown coin displays lilac-gold coloration and is well-contrasted on both sides. The strike is razor-sharp and no bothersome specks are seen. Eye appeal is outstanding. PCGS# 82377

LINCOLN CENTS

1909 VDB Cent, MS67+ Red One Finer Coin at PCGS

3353 1909 VDB MS67+ Red PCGS. With nearly 28 million coins minted, the 1909 VDB poses no trouble at all in grades as high as MS67, but the Plus designation this Superb Gem enjoys puts it with elite company. The surfaces are spectacularly clean, fully struck, and finely textured with profound copper-orange color and rose accents around the border. There is one finer coin in a PCGS holder (8/18). NGC ID# 22AZ, PCGS# 2425

3354 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS. Die doubling is visible on LIBERTY and the date on this *Cherry-pickers'* variety. The Gem Red example offered here showcases luminous fire-orange and coppery color, sharp devices, and essentially unabraded surfaces. A few tiny pepper specks on each side are not bothersome. Eye appeal is outstanding. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

3355 1909-S VDB MS63 Brown PCGS Secure. CAC. An attractive Select specimen of this sought-after series key, with sharply detailed design elements and bold designer's initials. The well-preserved surfaces have mellowed to light brown in most areas, with a few hints of original red at the peripheries. NGC ID# BYKW, PCGS# 2426

3356 1909-S VDB MS63 Red and Brown NGC. The 1909-S VDB is the low-mintage key to this popular series. The lightly marked surfaces of this attractive Select example show a mix of original red and light brown patina, with slightly subdued mint luster and well-detailed design elements. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS64 Red Elusive CAC-Approved Example

3357 1909-S VDB MS64 Red PCGS. CAC. This full Red Choice 1909-S VDB Lincoln cent could also be described as "full gold," as that is a truer descriptive of the luster hue. The key date Lincoln is known for often having bright, golden luster that differs from the traditional look of later cents. In addition to its yellow-gold hue, this CAC-approved near-Gem is sharply struck and free of bothersome abrasions. The surfaces have a faint mattelike texture when viewed beneath a loupe. NGC ID# 22B2, PCGS# 2428

3358 1914-D AU55 PCGS. CAC. An impressive Choice AU specimen of this early series key, with just a trace of wear on the well-detailed design elements and glossy olive-brown surfaces that show only scattered minor abrasions. From a small mintage of 1.1 million pieces. NGC ID# 84BX, PCGS# 2471

3359 1914-S MS64 Red and Brown PCGS Secure. CAC. This important near-Gem cent displays significant Mint-red color throughout both sides, supplemented by cobalt-blue and amber overtones. The strike is sharp throughout. Even today, the 1914-S remains one of the storied branch mint rarities in the Lincoln cent series. NGC ID# 22BJ, PCGS# 2475

3360 1919 MS67 Red PCGS. The 1919 had a huge mintage of 393 million coins, and when Wheat cents could still be found in circulation the 1919 was one of the more frequently encountered dates, especially among earlier issues. However, even the 1919 is uncommon in Superb condition and with full red color. This is a remarkable coin with full, unmellowed color over each side. No carbon spots can be found, just a few tiny abrasions that are of no concern. Population: 77 in 67 (13 in 67+) Red, 18 finer (7/18). NGC ID# 22BY, PCGS# 2515

3361 1924-D MS64 Red PCGS. The 1924-D cent is elusive in the upper Red grades. This collectible Choice Red coin displays original copper-red surfaces and satiny luster. Both dies are heavily eroded, with the result that most design elements show fuzzy or incomplete definition. A lack of bothersome spots or abrasions adds to the visual appeal. PCGS lists 45 finer Red coins (7/18). NGC ID# 22CD, PCGS# 2554

3362 1927 MS67 Red PCGS. An incredible Superb Gem, this brilliant and frosty Lincoln cent is highly lustrous with pristine, nearly flawless surfaces. This is an important opportunity for the Registry Set collector to acquire the highest certified numerical grade. Population: 61 in 67 (11 in 67+) Red, 0 finer (7/18). NGC ID# 22CM, PCGS# 2578

3363 1928-D MS65+ Red PCGS. Despite a 31.1 million-coin mintage, the 1928-D cent is surprisingly elusive at this level. The surfaces are smooth and satiny with rich copper-orange color. Slight softness occurs on the beard, but the other design elements are fully struck. PCGS has graded 17 submissions finer (8/18). NGC ID# 22CS, PCGS# 2590

3364 1929-D MS66 Red PCGS Secure. This amazing Denver Mint cent looks like it was struck yesterday. A bold strike and minimal marks are present, with microscopic blue toning specks primarily on the obverse. Population: 35 in 66 (2 in 66+) Red, 0 finer (7/18). NGC ID# 22CV, PCGS# 2599

3365 1931-S MS66 Red PCGS Secure. The 1931-S Lincoln cent is only marginally scarce in MS66 Red, but no finer pieces are certified. This Registry-grade example displays a good strike from mildly worn dies. The original surfaces exhibit satiny copper-orange luster and are devoid of abrasions. A loupe reveals trivial specks along the lower-left obverse border. NGC ID# 22D4, PCGS# 2620

1934-D Cent, MS67 Red Rare Sharply Struck Example

3366 1934-D MS67 Red PCGS. This is one of the few sharply struck examples of the 1934-D cent known in Superb Gem condition. Most high-grade pieces were struck from heavily worn dies and seldom show strong definition. Each side has bright red centers with just slightly mellowed margins. No finer Red coins are reported by either leading certification service. Population: 22 in 67 Red, 0 finer (3/12).
Ex: *Central States Signature (Heritage, 4/2012), lot 3354, which realized \$2,530.* NGC ID# 22DA, PCGS# 2638

3367 1936 Doubled Die Obverse, FS-102, MS65 Red and Brown NGC. The die doubling on FS-102 is mainly visible on the date and LIBERTY. This lustrous, satiny Gem displays primarily copper-orange color, but tinges of amber toning in the reverse margins earn the Red and Brown designation. The strike is well-rendered despite die erosion in the fields, and eye appeal is pleasing. PCGS# 37752 Base PCGS# 2649

1939-D Lincoln Cent, MS68 Red Top-of-the-Line Condition Rarity

3368 1939-D MS68 Red NGC. The 1939-D Lincoln cent is a rarity in the Registry-essential grade of MS68 Red. NGC lists only two coins so fine and PCGS eight, with none finer at either service (7/18). We have not handled a piece in this grade since 2012. This example displays a sharp strike and virtually flawless copper-red surfaces. No carbon spotting is seen, and the eye appeal is remarkable. A coin worthy of a premium bid. NGC ID# 22DR, PCGS# 2680

1943 Steel Cent, MS68 Only Four Coins So Fine at CAC

3369 1943 MS68 PCGS. CAC. A well-struck and unabraded example of this high-mintage but conditionally elusive type. A couple of interesting areas of prooflike surface (as made) are above the O in ONE and east of the E in ONE. Pristine aside from pinpoint carbon near the F in OF. The 1943 steel cent is scarce in this grade, and only a handful of pieces are CAC-endorsed. No finer examples are known. Population: 46 in 68, 0 finer. CAC: 4 in 68, 0 finer (7/18).
Ex: *Long Beach Signature (Heritage, 5/2003), lot 5409, which realized \$1,322.50; Long Beach Signature (Heritage, 2/2005), lot 5544, which realized \$2,012.50; Long Beach Signature (Heritage, 5/2009), lot 195, which realized \$2,185; New York Signature (Heritage, 11/2013), lot 3102, which realized \$2,820.* NGC ID# 22E4, PCGS# 2711

3370 1943-D MS68 NGC. CAC. A spectacular MS68 example of the famous wartime composition "steel" cent, with sharply detailed design elements and vibrant mint luster throughout. The gleaming white surfaces are virtually pristine. Census: 56 in 68, 0 finer. CAC: 17 in 68, 0 finer (7/18). NGC ID# 22E6, PCGS# 2714

3371 1943-S MS68 NGC. Vivid ice-blue and pale rose hues blend across the virtually pristine surfaces of this high-end MS68. A full strike adds to the already strong visual appeal. No examples are certified finer at either grading service (7/18). NGC ID# 22E8, PCGS# 2717

3372 1944-D/S FS-511 MS64 Red PCGS. The remnants of an S undermintmark are clearly visible north of the primary mintmark on this popular *Guide Book* variety. This sharply detailed Choice specimen exhibits well-preserved original red surfaces. Population: 4 in 64 Red, 2 finer (7/18). NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

1954 Cent, MS67 Red
Ideal for Registry Purposes

- 3373 1954 MS67 Red NGC.** The finest 1954 Lincoln cents certified are graded MS67 Red. Examples in this grade are rare and highly sought-after by Registry Set collectors. This piece displays sharp motifs and satiny, unabraded mint luster. No bothersome carbon spots appear on the cherry-red surfaces. Eye appeal is outstanding. Census: 27 in 67 Red, 0 finer (7/18). NGC ID# 22FC, PCGS# 2815

1955 Cent, MS63 Red and Brown
Doubled Die Obverse

- 3374 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown NGC. CAC.** Burgundy and olive-brown toning covers much of this Select Red and Brown example, while tinges of original copper-red luster emerge from the protected areas. The strike is bold, although Lincoln's portrait lacks intricate detail as always. No distracting marks are seen. All obverse lettering is widely die doubled on this inherently popular *Guide Book* variety. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

1955 Doubled Die Obverse Cent
Bright MS64 Red

- 3375 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS.** Full Red examples of the 1955 doubled die cent are highly sought-after, particularly in Choice and finer grades. This near-Gem displays bright satin luster and boldly rendered design elements. Both sides are uniformly copper-orange in color, but an amber-colored toning spot appears behind Lincoln's head and lesser ones appear across the central reverse under a loupe. Pleasing for the grade. PCGS lists only 21 finer Red examples (7/18). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

- 3376 1984 Doubled Ear, FS-101, MS68 Red NGC.** The FS-101 (formerly FS-037) variety was discovered in 1984 and enjoys tremendous popularity with collectors today. This magnificent MS68 example exhibits sharply detailed design elements, with dramatic doubling on Lincoln's ear, and virtually perfect original red surfaces that radiate vibrant mint luster. Census: 42 in 68 Red, 0 finer (7/18). NGC ID# 22HZ, PCGS# 38088 Base PCGS# 3062

SMS LINCOLN CENT

- 3377 1966 SMS SP67 Red Cameo PCGS.** The Special Mint Set cent of 1966 is available overall, but Cameo examples are rarely offered as fine as the 67 numeric grade, and none are finer at PCGS. The only Deep Cameo coin at that service grades just SP65 Red. This Superb Gem is reflective in the fields and satiny on the devices. Other than a few coppery-colored reddish flecks, the surfaces are uniformly pinkish-orange in hue. Population: 25 in 67 Red Cameo, 0 finer (7/18). NGC ID# 22LV, PCGS# 83293

PROOF LINCOLN CENTS

- 3378 1909 PR66 Red and Brown PCGS.** The 1909 matte proof Lincoln cent exists with and without Victor D. Brenner's initials on the lower reverse rim. The "plain" variant was struck later and is more plentiful for date representation. This Premium Gem displays lovely rose-lavender toning over copper-orange surfaces, earning the Red and Brown designation. The strike is full, and neither side exhibits bothersome contact marks. Population: 50 in 66 (4 in 66+) Red and Brown, 7 finer; 49 in 66 (4 in 66+) Red, 7 finer (7/18). NGC ID# 22KS, PCGS# 3304
- 3379 1911 PR65 Red and Brown PCGS Secure.** Attractively toned on both sides, this Gem proof displays iridescent shades of the rainbow, with the obverse particularly striking in appearance. The obverse also has a few minor contact marks but none that are distracting. Ex: *FUN Signature (Heritage, 1/2013), lot 3229, which realized \$1,410.* NGC ID# 22KU, PCGS# 3310
- 3380 1916 PR63 Red and Brown ANACS.** Final year of issue for matte proof cents and an issue that was limited to only 1,050 pieces. The strike definition is complete throughout, as only a proof can be. The color is somewhat bright with occasional flashes of red among the otherwise brown surfaces. NGC ID# 22KZ, PCGS# 3325
- 3381 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC.** The first of the Brilliant Finish Lincoln cent proofs, though satin proofs were also struck in 1936, and matte proofs were made between 1909 and 1916. This orange-gold Gem has beautiful color and exemplary preservation. A few pinpoint flecks preclude perfection. Encapsulated in an old green label holder. PCGS has graded 64 numerically finer examples (7/18). NGC ID# 22L3, PCGS# 3335
- 3382 1953 PR67 Red Ultra Cameo NGC.** Both sides of this high-end Ultra Cameo proof display fiery copper-orange coloration save for along the right-reverse border where greenish-gold color is seen. Cameo contrast is dramatic on both sides. The 1953 proof Lincoln cent is rare this fine and a must-have item for Registry Set collectors. Census: 5 in 67 Red Ultra Cameo, 2 finer (7/18). NGC ID# 22LD, PCGS# 93368
- 3383 1960 Large Date PR69 Red Deep Cameo PCGS.** This Registry Set essential is tied for the finest Red Deep Cameo proof at PCGS. The virtually flawless surfaces are composed of thickly frosted, sharp devices and fully mirrored fields. Both sides display lovely orange-gold color overall. Beautiful in every respect. Population: 11 in 69 Red Deep Cameo, 0 finer (7/18). NGC ID# 22LM, PCGS# 93389

3384 1960 Small Over Large Date, FS-102, PR68 Red Cameo PCGS. FS-102 is among three doubled die varieties of the proof 1960 cent, involving a Small Date punched over a Large Date. The doubled numerals and letters are mainly visible on the date and LIBERTY. This nearly flawless Registry coin shows liquidlike copper-orange fields and frosted devices. Contrast is outstanding on each side. Few like-graded examples of FS-102 exist. NGC ID# 22LM, PCGS# 38164 Base PCGS# 83413

3385 1961 PR69 Red Deep Cameo PCGS. An essentially perfect Deep Cameo proof, this early Lincoln Memorial cent has light orange-gold color with deeply mirrored fields around highly lustrous devices. Only a few pieces are certified this fine, and none are finer. An essential acquisition for Registry Set collectors. Population: 10 in 69 Red Deep Cameo, 0 finer (7/18).
Ex: Long Beach Signature (Heritage, 6/2013), lot 3817, which realized \$3,055. NGC ID# 22LN, PCGS# 93395

3386 1971-S Doubled Die Obverse, FS-101, PR68 Red Cameo PCGS. Die doubling is mainly apparent on LIBERTY, IN GOD, and the date. This variety is rarely available in such fine condition as the present coin. Fully struck, frosty design elements provide modest contrast against deeply mirrored fields, and the rich copper-orange surfaces are beautifully preserved. Population (FS-101): 15 in 68 Red Cameo, 3 finer; 1 in 68 Red Deep Cameo, 0 finer (7/18). NGC ID# 22M3, PCGS# 83533 Base PCGS# 83548

3387 1978-S PR70 Red Deep Cameo PCGS. A group of 14 PR70 Red Deep Cameo coins are the finest 1978-S proof cents certified at PCGS (7/18). These coins are in great demand among Registry Set collectors. This piece is pristine and bright copper-orange in color. The strike is full and the surfaces provide stark cameo contrast. NGC ID# 22MA, PCGS# 93455

TWO CENT PIECES

3388 1864 Small Motto MS64 Red and Brown PCGS. The motto IN GOD WE TRUST first appeared on the two cent coins of 1864, making this an important inaugural-year issue in several respects. Small Motto coins were struck first, and the subtype represents a semikey in the series. Lustrous amber and golden-brown surfaces are well-struck on most of the olive leaves and legends. Minor carbon spotting occurs on the obverse. NGC ID# 22N8, PCGS# 3580

3389 1864 Large Motto MS66 Red and Brown NGC. CAC. Blended green and brick-red coloration encompasses this lustrous and practically pristine Premium Gem. The strike is intricate and no carbon is apparent. Outstanding quality for this first-year type issue. Housed in a former generation holder. CAC: 30 in 66, 0 finer as Red and Brown (7/18). NGC ID# 22N9, PCGS# 3577

3390 1865 Fancy 5 MS66 Red and Brown NGC. CAC. Predominantly orange-gold and close to full Red, but the central reverse has moderately mellowed. Devoid of contact, though an aqua fleck is noted near the upright of the C in CENTS. Certified in a prior-generation holder. CAC: 39 in 66, 0 finer as Red and Brown (7/18). NGC ID# 8HFV, PCGS# 38257 Base PCGS# 3583

1868 Two Cent Piece, MS66 Red and Brown Tied for the Finest So Designated

3391 1868 MS66 Red and Brown PCGS Secure. Generous mint red appears on this Premium Gem Red and Brown example that exhibits hints of blue toning on each side. Tied with the finest Red and Brown pieces, this example will provide an affordable alternative to a full Red Premium Gem. Population: 11 in 66 (1 in 66+) Red and Brown, 6 finer graded MS66 Red. (7/18). NGC ID# 22NC, PCGS# 3598

1868 Two Cent, MS65 Red Seldom Offered This Fine

3392 1868 MS65 Red PCGS. The vast majority of Uncirculated 1868 two cent pieces are in the Brown or Red and Brown color categories. This Gem Red coin is conditionally rare. Satiny copper-red luster shows no major abrasions but does have a few minor carbon flecks. The design elements are well-struck. Population: 18 in 65 Red, 6 finer (7/18). NGC ID# 22NC, PCGS# 3599

3393 1869 Repunched and Misplaced Date, FS-301, MS65 Red PCGS Secure. The 18 is repunched north, and the top of a date digit emerges from the dentils below 18. The variety is undesignated on the PCGS holder. Beautiful orange-red color and vibrant cartwheel sheen proclaim the quality of this well-struck Gem. The obverse border displays minuscule aquamarine freckles. NGC ID# 22ND, PCGS# 38279 Base PCGS# 3605

1872 FS-101 Two Cent, MS63 Red and Brown Doubled Die Obverse

3394 1872 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. CAC. Any 1872 two cent piece struck for commerce is rare, since a mere 65,000 pieces were issued, and most survivors are circulated. This is the popular *Cherrypickers'* variety with minor die doubling on the motto. A die flaw within the upper loop of the S in TRUST locks in the attribution. This is a mark-free Select example with moderately mellowed sea-green and rose-gold surfaces. Both sides display a few strike-throughs, as coined. NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

PROOF TWO CENT PIECES

1866 Two Cent, PR66 Red and Brown Colorful and Reflective

- 3395 1866 PR66 Red and Brown PCGS.** This glimmering proof is fully struck and reflective, showing copper-orange, olive-green, russet, amber, and violet hues over each side. The preservation is outstanding and eye appeal is its equal. The 1866 proof two cent piece is seldom offered this fine. No numerically finer coins are reported at PCGS. Population: 26 in 66 (4 in 66+) Red and Brown, 0 finer; 6 in 66 Red, 0 finer; 6 in 66 (1 in 66+) Red Cameo, 0 finer; 1 in 66 Red Deep Cameo, 0 finer (7/18). NGC ID# 274V, PCGS# 3631

1866 Two Cent, PR66 Red and Brown Deeply Reflective Fields

- 3396 1866 PR66 Red and Brown NGC.** Light blue-to-violet overtones account for most of the surface area, though the interiors show appreciable original pale copper coloration as well. Strongly reflective with excellent detail and only a small scattering of carbon at the upper obverse. Among the finest Red and Brown non-Cameos certified. Census: 15 in 66 (1 in 66+ Red and Brown, 1 in 66 ★), 0 finer (7/18).
Ex: Houston Signature (Heritage, 12/2013), lot 3157, which realized \$2,585. NGC ID# 274V, PCGS# 3631

- 3397 1868 PR66 Red and Brown PCGS Secure. CAC. Flynn-KF-PR1-TPD.** The date is lightly repunched. This peach-gold Premium Gem approaches a full Red designation, though hints of cherry-red and powder-blue are also present. An intricate strike contributes further to the eye appeal. NGC ID# 274X, PCGS# 3637

- 3398 1869 PR66 Red and Brown NGC.** The obverse is orange-gold and lilac with blue undertones. The reverse displays deep ocean-blue patina. An intricately struck and exemplary high-grade specimen, one of only 600 proofs produced. NGC ID# 274Y, PCGS# 3640

THREE CENT SILVER

- 3399 1861 MS66 NGC.** This frosty Premium Gem appears flawless even under a loupe, showing delicate pastel hues amid the light champagne patina seen over each side. The strike is bold, although die lapping on the reverse weakens the relief of that side. Finer 1861 three cent silver pieces are scarce. NGC ID# 22ZA, PCGS# 3679

PROOF THREE CENT SILVER

1864 Three Cent Piece, PR66 Just 470 Proofs Produced

- 3400 1864 PR66 NGC. CAC.** Beautiful green, orange-gold, and lavender toning endows flashy and flawless surfaces. The strike is intricate. The shield exhibits cameo contrast. A Civil War date with a proof mintage of only 470 pieces. Certified in a pre-hologram holder. CAC: 12 in 66, 6 finer excluding Cameo (8/18). NGC ID# 27CA, PCGS# 3714

1866 Three Cent Silver, PR66+ Cameo Pleasant Contrast and Toning

- 3401 1866 PR66+ Cameo NGC.** *Ex: Rev. Dr. James G.K. McClure.* A scarce, high-end Cameo example of this otherwise plentiful proof issue, showing frosty, razor-sharp design elements set against deeply reflective fields. The obverse is primarily green-gold, while the reverse has deeper blue and lavender hues. Field-motif contrast is apparent even through the patina. The 1866 proof had a mintage of 725 pieces, but few Cameo examples survive, let alone in such high of a grade as this Plus-graded Premium Gem. Census: 9 in 66 Cameo (1 in 66+, 1 in 66 ★), 4 finer (7/18).
Ex: Long Beach Signature (Heritage, 6/2016), lot 4306, which realized \$3,995. NGC ID# 27CC, PCGS# 83716

- 3402 1868 PR65 PCGS. CAC.** From a small proof mintage of 600 pieces, this spectacular Gem exhibits sharply detailed design elements throughout. The surfaces are lightly marked, with highlights of sea-green and turquoise toning, and reflective fields underneath. Population: 48 in 65 (1 in 65+), 23 finer. CAC: 13 in 65, 7 finer (7/18). NGC ID# 2U25, PCGS# 3718

PROOF THREE CENT NICKELS

- 3403 1866 PR66 Cameo NGC.** The reflective surfaces of this sharp Premium Gem proof display lovely pastel shades of sky-blue, lavender, and yellow-gold. Cameo contrast is apparent on each side, increasing the eye appeal. Few 1866 proofs are certified this fine at NGC. Census: 18 in 66 Cameo (5 in 66 ★), 3 finer; 9 in 66 (2 in 66 ★) Ultra Cameo, 8 finer (7/18).
Ex: Long Beach Signature (Heritage, 2/2012), lot 3238, which realized \$1,495. NGC ID# 275L, PCGS# 83762

- 3404 1869 PR65 Deep Cameo PCGS. CAC.** Frosty, gold-tinged design elements contrast against glassy, fully mirrored fields on this Gem Deep Cameo proof. Trivial contact on Liberty's cheek is all that limits the grade. Population: 19 in 65 Deep Cameo, 23 finer. CAC: 6 in 65, 19 finer (7/18). NGC ID# 275P, PCGS# 93765

3405 1875 PR66 Cameo NGC. Among the finest Cameos certified, this Premium Gem proof 1875 three cent nickel displays a bold strike and reflective fields that still show die polishing lines. The obverse portrait has several small planchet marks (as-made), including a “shiny” area on Liberty’s jaw and mouth. Untoned. Census: 6 in 66 Cameo (1 in 66+, 1 in 66 ★), 0 finer (7/18). NGC ID# 22NV, PCGS# 83771

3406 1876 PR66 Ultra Cameo NGC. Examples are fairly obtainable in higher grades, but pieces qualifying for the Ultra Cameo designation are the opposite. This impressive Premium Gem exhibits intensely frosty mint luster on the devices over deeply mirrored fields. Both sides are essentially brilliant, with just a hint of champagne toning. Census: 8 in 66 Ultra Cameo, 3 finer (7/18). NGC ID# DA69, PCGS# 93772

3407 1879 PR67 Cameo PCGS Secure. CAC. Modest cameo contrast appears on both sides of this Superb Gem proof, delivered by brilliant, mirrored fields and sharply defined, frosty devices. A loupe reveals no contact marks or discernable hairlines. Both sides are largely free of strike-throughs or planchet flaws, although some of the lower wreath leaves are weakened by heavy die polishing. The 1879 proof three cent nickel had a substantial mintage of 3,200 coins, making it available in most grades compared to many earlier series issues — this much to the delight of date collectors, who find its circulation strike counterpart, struck to the limited extent of just 38,000 pieces, difficult to locate in high grades. Purchased from Aspen Park Rare Coin (8/2012); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98121, where it brought \$2,350. NGC ID# 275Z, PCGS# 83775

1882 Three Cent Nickel, PR68 Satin Fields

3408 1882 PR68 PCGS. Housed in a green-label PCGS holder, this Superb Gem proof displays satiny fields and lacks the usual deep mirror appearance associated with high-grade proof coinage. Delicate gold toning frames the light gray surfaces of this outstanding proof. Population: 7 in 68, 0 finer (7/18). NGC ID# 2764, PCGS# 3778

SHIELD NICKEL

1874 Shield Nickel, MS66 Among the Finest Pieces Certified

3409 1874 MS66 PCGS Secure. CAC. This CAC-endorsed Premium Gem is among the finest 1874 Shield nickels certified, an essential acquisition for Registry Set collectors and specialists of the series alike. Delicate lilac hues appear throughout otherwise light golden surfaces, which radiate with softly frosted mint luster. Eye appeal is outstanding on this sharply struck example. Population: 21 in 66 (6 in 66+), 0 finer. CAC: 11 in 66, 0 finer (7/18). NGC ID# 22P9, PCGS# 3803

PROOF SHIELD NICKELS

3410 1866 Rays PR61 NGC. CAC. This is the initial year of the five cent denomination. This PR61 example displays hints of brownish patina imbued with traces of light green, and the design features are sharply impressed. A few minute marks are not significant. This piece has remarkably pleasing eye appeal despite the numerically designated grade, an attribute that CAC saw fit to recognize. NGC ID# 276G, PCGS# 3817

1866 Rays Shield Nickel, PR66 First-Year Rays Type Coin

3411 1866 Rays PR66 PCGS. This is by far the more available of the two With Rays proof issues, as the 1867 coin is a great rarity. The 1866 is also popular as the first issue of the Shield nickel type. This piece boasts uniformly attractive light golden surfaces with modest cameo contrast on the obverse. The horizontal shield lines show trivial softness, but the remainder of the design elements are bold. Population: 42 in 66 (2 in 66+), 1 finer (7/18). Ex: Central States Signature (Heritage, 4/2011), lot 3021, which realized \$3,881.25. NGC ID# 276G, PCGS# 3817

1866 Rays Nickel, PR66
First Year of the Denomination

- 3412 1866 Rays PR66 PCGS.** Marking the introduction of a new denomination, this Premium Gem proof is an exceptional representative for a type collector or nickel specialist. Both sides are deeply mirrored around sharply defined and fully lustrous devices, all beneath lovely reddish-gold toning. Population: 42 in 66 (2 in 66+), 1 finer (7/18).
Ex: ANA Dallas Signature (Heritage, 10/2012), lot 3400, where it brought \$3,525. NGC ID# 276G, PCGS# 3817

1877 Shield Nickel, PR65
Scarce Proof-Only Date

- 3413 1877 PR65 NGC.** Medium chestnut-gold toning embraces satiny, sharply struck, and unmarked surfaces. Only a tiny fleck or two of carbon is apparent. The 1877 is the rarer of the two proof-only dates. Breen's mintage of 510+ pieces was accepted for years, though the *Guide Book* currently states 900 pieces. Housed in a circa-2000 holder. NGC ID# 276U, PCGS# 3831

LIBERTY NICKELS

- 3414 1886 MS63 PCGS.** One of the keys to the series after the 1885. Only 3.3 million pieces were struck. This example is lustrous and brilliant with areas of softness on the left side of both the obverse and reverse. Marks are thin and shallow. None distract. NGC ID# 277U, PCGS# 3847
- 3415 1896 MS66 PCGS.** Colorful peach-gold, blue, and rose hues emerge from highly lustrous surfaces. The stars display full radials, and only the right ear of corn is soft as always. Beautifully preserved with two marks under the eye and at the juncture of the chin and neck. Fantastic eye appeal. Population: 27 in 66 (4 in 66+), 0 finer (7/18). NGC ID# 277B, PCGS# 3857

1903 Nickel, MS67
Important for Registry Sets

- 3416 1903 MS67 PCGS Secure.** *Ex: Rafferty.* Fewer than a dozen 1903 Liberty nickels are certified in MS67, and none are finer. This tiny Condition Census is in high demand by the more than 100 collectors assembling Registry Sets of Liberty nickels. This piece is virtually pristine and shows warm golden toning with wisps of lavender and blue. Eye appeal is generous. Population: 9 in 67, 0 finer (7/18). NGC ID# 277E, PCGS# 3864
- 3417 1912-D MS65 PCGS Secure.** This impressive Gem Liberty nickel exhibits well-detailed design elements with a touch of the typical softness on the lower wreath. Well-preserved surfaces are lustrous and appealing under shades of greenish-gold and lavender toning. NGC ID# 277P, PCGS# 3874

PROOF LIBERTY NICKELS

1886 Nickel, Colorful PR67+
Rare Top-Grade Coin With CAC Approval

- 3418 1886 PR67+ PCGS. CAC.** This is among the finest non-Cameo examples of the 1886 proof Liberty nickel certified. The Plus designation and CAC endorsement set it apart from its peers. Reflective fields and satiny devices offer vivid multicolor toning and are beautifully preserved. Minor strike softness is visible on the obverse stars and the corn ear to the left of the wreath bow on the reverse. The 1886 proof experiences heightened date collector demand due to the key date status of its circulation strike counterpart. Population: 34 in 67 (2 in 67+), 0 finer; 6 in 67 (2 in 67+) Cameo, 0 finer. CAC: 24 in 67, 0 finer (7/18). NGC ID# 277U, PCGS# 3884

**1888 Nickel, PR66 Cameo
A High-End Rarity**

- 3419 1888 PR66 Cameo PCGS.** Cameo proof 1888 Liberty nickels are rare, and no Deep Cameos are certified at PCGS (8/18). This Premium Gem example displays appreciable contrast on each side and it is fully struck. A hint of light golden toning accents the virtually perfect surfaces. Eye appeal is excellent. Population: 10 in 66 (1 in 66+) Cameo, 0 finer (8/18). NGC ID# 277W, PCGS# 83886

**1892 Nickel, Delicately Toned PR67
The Finest Non-Cameo at CAC**

- 3420 1892 PR67 PCGS. CAC.** PCGS lists only three non-Cameo proof 1892 Liberty nickels in PR67. This example is the only one for the grade with a CAC endorsement (8/18). The strike is full and the fields are deeply mirrored. Both sides exhibit delicate pastel toning with outstanding eye appeal and no blemishes. Modest contrast is seen on each side, although it is not quite deep enough for a Cameo designation. NGC ID# 2782, PCGS# 3890

- 3421 1897 PR67 Cameo PCGS. CAC.** The obverse boasts distinctive golden-tan woodgrain toning, while the reverse is less intensely imbued with similar coloration. Both sides exhibit good contrast between the frosted devices and reflective fields. One tiny contact mark is noted on Liberty's jaw, but this remains an exceptional piece. Population: 20 in 67 (5 in 67+) Cameo, 3 finer. CAC: 18 in 67, 4 finer (7/18). NGC ID# 2787, PCGS# 83895

- 3422 1908 PR67 PCGS Secure.** The 1908 claims one of the smallest mintages in the Liberty nickel series with only 1,620 proofs struck. This Superb Gem ranks among the finest non-Cameo examples available. Each side is lightly toned with partly reflective fields and a thin veneer of frost over fully struck devices. Population: 33 in 67 (6 in 67+), 1 finer (7/18). NGC ID# 278J, PCGS# 3906

- 3423 1911 PR67 Cameo PCGS.** Light honey-gold toning visits this prominently mirrored and intricately impressed Superb Gem. Frosty motifs ensure exemplary cameo contrast. A strong lens reveals a few pinpoint flecks on the portrait. Population: 21 in 67 (4 in 67+) Cameo, 0 finer (7/18). NGC ID# 278M, PCGS# 83909

BUFFALO NICKELS

- 3424 1913-D Type One MS67 PCGS.** Ex: ADM Collection. A remarkably sharp, beautifully preserved Superb Gem Type One nickel with luminous mattelike surfaces and delicate toning. Golden overall color yields tinges of rose and lilac in the fields, adding to the eye appeal. The Type One 1913-D Buffalo nickel is scarce in this grade and rare with the eye appeal of the current coin. Finer pieces are prohibitively rare. Population: 84 in 67 (9 in 67+), 2 finer (7/18). NGC ID# 22PX, PCGS# 3916

- 3425 1913-S Type One MS66 PCGS Secure.** Definition is full on the braid and bison's shoulder, but a touch soft on LIBERTY and the bison's head. This S-mint Type One representative is awash in frosty mint luster and remains mostly brilliant with gold and blue accents, especially on the reverse. There are 30 finer submissions at PCGS (8/18). NGC ID# 22PY, PCGS# 3917

- 3426 1913-S Type One MS66 PCGS.** The San Francisco coin is the scarcest Type One Buffalo nickel in high grade. This Premium Gem is elusive, and PCGS lists only 30 finer submissions (8/18). Hints of ice-blue appear throughout otherwise olive-gold toning on each side. Abrasions are virtually nonexistent and the luster is satiny. The only mentionable strike weakness is seen on the hair above the Indian's braid and on the bison's head. NGC ID# 22PY, PCGS# 3917

- 3427 1913-D Type Two MS66 PCGS.** Both sides display a delicate blend of powder-blue, lavender, and golden toning that covers shimmering and carefully preserved surfaces. The design elements are sharp. This is an attractive example of the Type Two 1913-D Buffalo nickel, and it is conditionally scarce in this grade. Finer coins are rare. Population: 79 in 66 (4 in 66+), 15 finer (7/18). Ex: FUN Signature (Heritage, 1/2005), lot 5843, which realized \$1,610; Denver Signature (Heritage, 8/2006), lot 646, which realized \$3,220; Long Beach Signature (Heritage, 5-6/2007), lot 478, which realized \$2,875. NGC ID# 254M, PCGS# 3922

- 3428 1913-S Type Two MS65 PCGS.** Certainly the most challenging of the six 1913 issues, the Type Two 1913-S is also a semikey in the entire series. This Gem displays frosted mint luster with a light accent of lilac and rose toning over each side. Well-struck. NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Buffalo Nickel, MS66
Beautifully Lustrous, Lightly Toned**

- 3429 1913-S Type Two MS66 PCGS.** This first-year Type Two S-mint semikey is luminous and delicately toned in warm golden hues. Minor strike softness is limited to the hair above the Indian's braid and the bison's shoulder. No abrasions are visible, and the eye appeal is outstanding. The 1913-S Type Two is scarce in this grade and a genuine rarity just one point finer. Population: 46 in 66 (3 in 66+), 6 finer (7/18). NGC ID# 22R3, PCGS# 3923

- 3430 1914-D MS65 PCGS.** A remarkable Gem representative of this popular early series issue, with well-detailed design elements and well-preserved, textured surfaces that radiate satiny mint luster. Housed in a green label holder. PCGS has graded 61 numerically finer examples (7/18). NGC ID# 22R5, PCGS# 3925

1914-D Nickel, MS66
Scarce Early Issue

- 3431 1914-D MS66 PCGS.** Ex: ADM Collection. This is an impressive example and among the finest available. PCGS has only graded eight finer pieces (8/18). This Premium Gem displays frosty light blue and pale gold toning on each side. Although falling short of a full strike, the design motifs are nicely detailed. A pleasing piece for the collector of this popular series. Population: 53 in 66 (4 in 66+), 8 finer (7/18).
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 670, where it realized \$3,450. NGC ID# 22R5, PCGS# 3925

1914-S Nickel, Luminous MS66
Beautiful Pastel Toning

- 3432 1914-S MS66 PCGS.** Ex: ADM Collection. This is a well-struck Premium Gem with luminous mattelike luster that is devoid of abrasions. Concentric pastel toning graces the borders in rings of gold, mint-green, and peach, surrounding lilac and sky-blue over the interiors. Eye appeal is outstanding. The 1914-S nickel is scarce in MS66, and only a handful of finer pieces are known. Population: 44 in 66 (6 in 66+), 2 finer (7/18). NGC ID# 22R6, PCGS# 3926
- 3433 1915 MS67 PCGS.** The 1915-S nickel is conditionally scarce in MS67 and unknown finer. Coins in this grade are highly sought-after among Registry Set collectors. This piece displays delicate gold, lavender, lilac, and powder-blue toning over satiny mint luster. The design elements are well-defined. Population: 59 in 67 (8 in 67+), 0 finer (7/18).
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 673, which realized \$3,220. NGC ID# 22R7, PCGS# 3927

1915-D Buffalo Nickel, MS66
Sharply Struck, Lustrous Example

- 3434 1915-D MS66 PCGS.** This delightful Premium Gem exhibits razor-sharp definition on all the design elements and the impeccably preserved textured surfaces radiate vibrant mint luster on both sides. Hints of pale jade and ice-blue toning add to the terrific eye appeal. From a mintage of 7.5 million pieces. Population: 43 in 66 (5 in 66+), 3 finer (7/18). NGC ID# 22R8, PCGS# 3928

1915-S Nickel, MS65
Rare Issue in Higher Grades

- 3435 1915-S MS65 PCGS.** The 1915-S often comes well-struck, and this Gem does not waver in that regard. Although not fully defined, the date and the bison's head and shoulder show good detail. Golden-tan iridescence glistens over lightly frosted nickel-gray surfaces. A single overt tick appears on the bison's midsection. The issue has an average certified grade of XF45, and there are only 38 submissions graded higher than this MS65 coin at PCGS (7/18). NGC ID# 22R9, PCGS# 3929

1915-S Buffalo Nickel, MS66
Conditionally Rare Any Finer

- 3436 1915-S MS66 PCGS.** Ex: ADM Collection. One of the scarcer issues among early Buffalo nickels. Unlike most examples seen, this piece is sharply defined on both obverse and reverse. The surfaces have a pronounced matte-like texture with an overlay of mint frost. Even golden toning completes the picture of this superior example with the slightest accent of lilac on the highpoints. Population: 35 in 66 (1 in 66+), 3 finer (7/18).
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 676, realized \$5,405. NGC ID# 22R9, PCGS# 3929
- 3437 1916-D MS65 PCGS.** This high grade is where the 1916-D nickel begins to pose a challenge. Wisps of golden color appear over otherwise brilliant, satiny surfaces. Strongly struck from eroded dies. PCGS reports 23 finer submissions (8/18). NGC ID# 22RB, PCGS# 3932
- 3438 1916-S MS65 PCGS.** This impressive Gem exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the braid. The well-preserved surfaces are lustrous and attractive. PCGS has graded 43 numerically finer examples (7/18). NGC ID# 22RC, PCGS# 3933

1916-S Buffalo Nickel, MS66
Sharply Detailed Example

- 3439 1916-S MS66 PCGS.** Ex: ADM Collection. The 1916-S is difficult to locate with a sharp strike. This Premium Gem is certainly an exception, as razor-sharp definition is apparent on all design elements. A thin coat of barely discernible orange-gold toning covers highly lustrous surfaces that are devoid of significant marks. Population: 39 in 66 (3 in 66+), 5 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 680, realized \$5,750. NGC ID# 22RC, PCGS# 3933

- 3440 1917-D MS65 PCGS.** The 1917-D Buffalo nickel is moderately elusive in MS65 and is scarce finer. This Gem displays mint-green, yellow-gold, and lilac-blue toning on the obverse, with lavender-tinted champagne color across the reverse. Both sides are satiny and well-preserved with good eye appeal. Some strike softness is noted on the upper-obverse feather, as well as on the bison's head and shoulder. PCGS lists 26 finer representatives (8/18). NGC ID# 22RE, PCGS# 3935

1917-S Nickel, MS65
Carefully Preserved

- 3441 1917-S MS65 PCGS.** This well-defined San Francisco nickel struck from heavily worn dies was carefully preserved. Marks are minimal, limited to a couple of ticks on the braid and the bison's shoulder. Frosty, mostly brilliant surfaces exhibit occasional blushes of gold. Encapsulated in an old green label holder. PCGS lists 24 higher grading events (7/18). NGC ID# 22RF, PCGS# 3936

1917-S Buffalo Nickel, MS65
Nice Toning and Luster

- 3442 1917-S MS65 PCGS.** An amazing Gem with sharp details and delightful gold toning over satiny luster. The only design points that lack full detail are the bison's head and top of the front leg. This example probably ranks in the top 25% of all known pieces for the quality of its strike. Population: 95 in 65 (4 in 65+), 24 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 683, realized \$4,140. NGC ID# 22RE, PCGS# 3936

- 3443 1918 MS66 PCGS.** The hallmark of this Premium Gem is the luster — both sides glisten when rotated beneath a light, offering a shimmering luminance seen on only the finest Buffalo nickels of any date. The high numeric grade means that this exceptional luster is also unmarred by severe abrasions. Strike softness is limited to a small area immediately above the Indian's braid and on the bison's shoulder, although the weakness is trivial. Each side has bone-gray coloration that gives the coin the look of a delicately toned silver piece, despite the nickel alloy. Population: 80 in 66 (4 in 66+), 10 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 684, which realized \$3,450. NGC ID# 22RG, PCGS# 3937

- 3444 1918/7-D FS-101 Fine 12 PCGS.** The overdate feature is clear on this coin, even while the remainder of each side displays considerable wear. The surfaces are smooth with medium tan-gray patina. Deeper olive toning characterizes the recesses and fields. An appealing, collector-grade example of this key Guide Book variety. Housed in a green label holder. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3445 1918/7-D FS-101 VF20 NGC. CAC.** Both sides of this midgrade collector coin display metal flowlines in the fields, with light wear over the devices. The date remains clear, and the devices have good definition. The 1918/7-D Buffalo nickel is a key issue in the series. This piece has original slate-gray color and is problem-free. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918-D Nickel, Brilliant Gem
Well Above-Average

- 3446 1918-D MS65 PCGS.** Strike softness, a typical hallmark of the 1918-D, is limited to the centers on this Gem. The legends and bison's head maintain relatively crisp detail. Each side is bright and entirely brilliant. Magnification reveals minor flecks but nothing else. Seldom seen finer than MS64, and usually encountered in well-worn condition. There are merely 30 finer grading events at PCGS (7/18). NGC ID# 22RH, PCGS# 3938

**1918-D Buffalo Nickel, MS65
Well-Preserved and Lustrous**

- 3447 1918-D MS65 PCGS.** From a mintage of 8.3 million pieces, the 1918-D Buffalo nickel is a scarce issue in MS65 condition, and finer examples are seldom seen. This delightful Gem exhibits sharply detailed design elements in most areas, with just the slightest touch of softness on the bison's shoulder. The well-preserved, lustrous surfaces show highlights of lime-green and ice-blue toning. Population: 73 in 65 (4 in 65+), 31 finer (7/18). NGC ID# 22RH, PCGS# 3938

- 3448 1918-S MS63 PCGS.** An attractive Select representative of this early series branch mint issue, with well-detailed design elements that show a touch of the usual softness on the hair above the braid and the bison's shoulder. The lightly marked surfaces are visited by shades of lime-green and ice-blue toning. NGC ID# 22RK, PCGS# 3940

**1918-S Nickel, MS64
Few Marks for the Grade**

- 3449 1918-S MS64 PCGS.** Writing about the 1918-S nickel, David Lange explains, "Mint state coins are few, while choice and gem pieces are rare and seldom offered." This near-Gem presents a typically incomplete strike, although definition on the date, LIBERTY, and reverse legends is slightly better than might be expected. Frosty surfaces maintain their brilliance. Minimal marks for the grade with signs of considerable die erosion in the fields. NGC ID# 22RK, PCGS# 3940

**1918-S Nickel, Delicately Toned MS64
Seldom Encountered Finer**

- 3450 1918-S MS64 PCGS.** The 1918-S Buffalo nickel is moderately available in MS64, but PCGS lists only 40 finer submissions (7/18). This near-Gem is sharp despite some die erosion in the fields and margins. A couple of linear planchet flaws are visible on the hair just above the Indian's braid but they do not affect the strike sharpness. Light golden and lilac toning graces satiny luster on both sides. NGC ID# 22RK, PCGS# 3940

- 3451 1919-D MS64 PCGS.** From a mintage of just over 8 million pieces, the 1919-D Buffalo nickel is a scarce issue in grades above the MS64 level. This attractive Choice example offers well-detailed design elements and satiny surfaces that show hints of lime-green and ice-blue toning. NGC ID# 22RM, PCGS# 3942

- 3452 1920 MS66 PCGS.** The 1920 nickel is occasionally available in MS66, but PCGS lists only 18 finer submissions (8/18). This Premium Gem displays frosty original luster cast in pastel iridescence that provides remarkable eye appeal. No bothersome abrasions are seen. The bison's shoulder exhibits the only mentionable strike weakness, and it is truly minor. NGC ID# 22RP, PCGS# 3944

- 3453 1920-D MS64 PCGS.** The high points are softly struck as always, namely the hair braid, and the bison's head and shoulder. Untoned silver surfaces radiate satin luster and show few obvious abrasions. This near-Gem is far finer than the average certified 1920-D nickel, which grades about AU50. NGC ID# 22RR, PCGS# 3945

**1920-D Nickel, Brilliant MS65
Luminous Mint Luster**

- 3454 1920-D MS65 NGC.** Totally brilliant surfaces shimmer softly with satin mint luster. The obverse shows a uniformly strong impression, and the reverse is nearly as bold, save for the bison's head and tail. Abrasions are absolutely minimal for the grade. Struck to the extent of 9.4 million coins, the 1920-D Buffalo nickel is scarce at the Gem level and nearly impossible to obtain any finer. Just six Premium Gem submissions are reported at PCGS (7/18). NGC ID# 22RR, PCGS# 3945

**1920-D Buffalo Nickel, MS65
Rarely Seen Finer**

- 3455 1920-D MS65 PCGS.** Ex: ADM Collection. The 1920-D continues the difficulty with strike that began with the 1918-D and continued through most of the 1920s. Otherwise, it is a median rarity in the series with more than 9 million pieces produced. The surfaces on this piece are bright and satiny with a hard, metallic sheen. An untuned example, the obverse is sharply defined but the reverse displays localized weakness over the bison's head. PCGS has graded six numerically finer examples (7/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 706, realized \$6,785. NGC ID# 22RR, PCGS# 3945

3456 1920-S MS64 PCGS. The 1920-S is elusive in the finer Mint State grades, and it is scarce above MS64. This near-Gem shows satiny luster and golden toning with a few scattered abrasions. The obverse is from a fairly fresh die and has above-average definition. The reverse, by contrast, is from a heavily eroded die, showing poor definition on the bison and blurred border legends. PCGS lists 29 finer pieces (8/18).

Ex: *Central States Signature (Heritage, 5/2005)*, lot 6146, which realized \$3,220; *FUN Signature (Heritage, 1/2006)*, lot 1512, which realized \$3,737.50. NGC ID# 22RS, PCGS# 3946

3457 1921 MS66 PCGS. The strike on this Premium Gem 1921 Buffalo nickel is needle-sharp, even in the centers where weakness is usually unavoidable. The full detail is amplified by frosty original luster and delicate sky-blue and lilac toning. No abrasions detract from the eye appeal. PCGS lists only 32 finer submissions (8/18). NGC ID# 22RT, PCGS# 3947

3458 1921 MS66 PCGS Secure. CAC. Each side of this glistening 1921 Buffalo nickel is razor-sharp and mostly brilliant with the faintest blushes of rose, gold, and blue color that confirms the originality. More than 10.6 million pieces were struck, yet only 32 are graded higher at PCGS (8/18). NGC ID# 22RT, PCGS# 3947

1921-S Buffalo Nickel, MS64 Bold Strike, Semikey Issue

3459 1921-S MS64 PCGS. The 1921-S has an unusually low mintage of 1.5 million pieces. As with other branch issues from the 1920s, it sells for much more than its Philadelphia cousin. This lustrous gold and green near-Gem has a surprisingly sharp strike. Only the tops of LIBERTY show softness. Devoid of detrimental contact, and certified in a first-generation "rattler" holder. NGC ID# 22RU, PCGS# 3948

1923-S Buffalo Nickel, MS65 Vivid Multicolor Toning

3460 1923-S MS65 PCGS. David Lange (2006) writes of the 1923-S nickel: "Despite its relatively low mintage (6.142 million pieces), this date is available in all grades short of Gem," and "fully struck pieces are rare." Rainbow toning travels over this Gem, and the design elements are generally well-struck, save for the hair on the bison's head and the tail. Lustrous surfaces are well-preserved. Population: 62 in 65 (6 in 65+), 3 finer (7/18). Ex: *Long Beach Signature (Heritage, 9/2007)*, lot 721, realized \$10,925. NGC ID# 22RW, PCGS# 3950

3461 1924 MS66 PCGS. Premium Gem examples of the 1924 Buffalo nickel are scarce, and finer pieces are major condition rarities. This coin has the usual strike softness in the centers, but the bison's head is well-defined. The centers also exhibit light mint-green toning, surrounded by gold, lilac, and amber in the margins. The luminous satin surfaces are devoid of bothersome abrasions. PCGS lists seven Superb Gems finer (8/18).

Ex: *Long Beach Signature (Heritage, 9/2007)*, lot 723, which realized \$1,840. NGC ID# 22RX, PCGS# 3951

1924-D Buffalo Nickel, MS65 Soft, Luminous Luster

3462 1924-D MS65 PCGS. The 1924-D Buffalo nickel is scarce in MS65 and rare finer. This Gem displays softly frosted luster and iridescent champagne toning. The surfaces are virtually pristine, but moderate strike weakness is apparent on the hair above the Indian's braid, on the tip of the upper feather, and on the bison's head and shoulder. Eye appeal is pleasing. PCGS lists nine finer submissions (8/18). NGC ID# 22RY, PCGS# 3952

1925-D Buffalo Nickel, MS65 Lightly Toned

3463 1925-D MS65 PCGS. The 1925-D is one of the most difficult dates in the Buffalo nickel series to find with a decent strike. This Gem, while it exhibits weakness on portions of the Indian's hair and above the bison's forehead, shows a sharp date, horn, and mintmark. Lustrous surfaces reveal traces of powder-blue and gold-beige on the obverse, and gold-orange on the reverse. Well-preserved overall. Ex: *Central States Signature (Heritage, 5/2007)*, lot 1623, where it brought \$5,175. NGC ID# 22S3, PCGS# 3955

3464 1925-S MS64 PCGS. The well-detailed design elements of this impressive Choice specimen exhibit just a touch of the usual softness on the bison's shoulder and tail and the well-preserved, lustrous surfaces show highlights of emerald-green and ice-blue toning. PCGS has graded 34 numerically finer examples (7/18). NGC ID# 22S4, PCGS# 3956

3465 1925-S MS64 PCGS. Fully lustrous beneath dusky lilac-gray and golden toning, with a typically soft strike overall that is mostly due to die erosion. Metal flowlines are extensive around the margins. Abrasions are nonetheless minimal. The 1925-S Buffalo nickel is often available in MS64, but the tendency of this issue to be weakly struck contributes to a small population of finer coins. PCGS has seen only 34 numerically finer representatives (8/18). Ex: *Long Beach Signature (Heritage, 9/2007)*, lot 734, which realized \$3,220. NGC ID# 22S4, PCGS# 3956

3466 1926-D MS64 PCGS. The obverse of this impressive Choice example exhibits sharply detailed design elements, but the reverse was struck from worn dies, with incomplete detail on the bison's head and shoulder. Satiny mint luster radiates from both sides. NGC ID# 22S6, PCGS# 3958

1926-D Nickel, Appealing MS65
Original Golden Accents

- 3467 1926-D MS65 PCGS.** The 1926-D has a claim to being the worst-struck issue in the entire Buffalo nickel series. Detail is soft on the usual areas, including the hair braid, and bison's head, shoulder, and tail, but this Gem exhibits a full mintmark and beautifully original golden accents over satiny, well-preserved surfaces. Housed in an old green label holder. There are 30 finer submissions at PCGS (7/18). NGC ID# 22S6, PCGS# 3958

1926-D Buffalo Nickel, MS65
Well-Struck, Nicely Toned

- 3468 1926-D MS65 PCGS.** The 1924-D is generally found with less-than-complete definition on the main devices. This piece, however, is the exception. It is a sharply detailed Gem that displays satiny luster beneath rose and lilac toning. There are no obvious or detracting marks on either side.
Ex: Denver Signature (Heritage, 8/2006), lot 688, where it brought \$5,462.50. NGC ID# 22S6, PCGS# 3958

1926-D Nickel, MS65+
Amazing Quality for the Issue

- 3469 1926-D MS65+ PCGS Secure. CAC.** The 1926-D has a reputation as one of the worst-produced issues in the series, making this high-end Gem all the more impressive. Strike detail is strong as can be, and minimally abraded surfaces show eye-appealing blushes of gold patina. Truly a difficult coin to upgrade with only 30 finer submissions at PCGS. CAC: 17 in 65, 12 finer (7/18). NGC ID# 22S6, PCGS# 3958

1927-D Buffalo Nickel, MS65
Conditionally Rare Any Finer

- 3470 1927-D MS65 PCGS.** The 1927-D Buffalo nickel claims a mintage of 5.7 million pieces and the issue can only be called scarce in MS65 condition, but finer coins are rare. This attractive Gem offers sharply defined design elements and well-preserved surfaces that show a few highlights of lavender-gray toning. Satiny mint luster adds to the overall visual appeal. PCGS has graded eight numerically finer examples (7/18). NGC ID# 22S9, PCGS# 3961

1927-D Nickel, MS65
Original Surfaces

- 3471 1927-D MS65 PCGS. CAC.** Satiny, well-struck surfaces draw the eye of the viewer. Closer inspection reveals pale iridescence that confirms the originality of this Gem 1927-D nickel. Just a couple of tiny ticks appear on the raised elements. Encapsulated in an old green-label holder with a CAC approval sticker. PCGS has seen eight higher grading events. CAC: 24 in 65, 2 finer (8/18). NGC ID# 22S9, PCGS# 3961

1927-S Buffalo Nickel, MS64
Frosted and Lightly Toned

- 3472 1927-S MS64 PCGS.** Three ticks on the obverse and one in the lower-reverse field are the only marks on this near-Gem nickel. Frosty, lightly toned surfaces are otherwise smooth and obviously high-end for the grade. The dies were not heavily worn at the time of striking, although wide spacing did cause typical high-point softness. An elusive issue in Mint State. Certified in a green label holder. PCGS reports 40 submissions finer (7/18). NGC ID# 22SA, PCGS# 3962

1927-S Nickel, MS64
Well-Struck and Richly Toned

- 3473 1927-S MS64 PCGS.** Pale gray-gold surfaces with bright underlying mint luster, and splashes of deeper gold on the obverse. While this issue is not particularly difficult to locate in Choice Mint State quality, finer examples are quite rare, with just 43 Gems certified by PCGS (8/18). The strike shows above-average definition.
Ex: Long Beach Signature (Heritage, 9/2007), lot 740, where it realized \$4,025. NGC ID# 22SA, PCGS# 3962

- 3474 1928-D MS66 PCGS.** The 1928-D is common through MS65, but above that level it is conditionally scarce. This shimmering Premium Gem example displays unmarked surfaces and lovely rose-gold and champagne toning. Minor strike weakness is isolated to the hair above the Indian's braid and the bison's shoulder. Only trivial die wear is evident in the fields. Population: 59 in 66 (2 in 66+), 1 finer (7/18).
Ex: Denver Signature (Heritage, 8/2006), lot 698, which realized \$4,600. NGC ID# 22SC, PCGS# 3964

- 3475 1928-S MS65 PCGS.** Gem examples of this San Francisco issue are scarce, and higher-grade coins are decidedly rare. This piece displays a hint of golden warmth over stone-gray surfaces and satiny mint luster. The strike is bold, although some of the finer details are softened by die wear. Population: 92 in 65 (5 in 65+), 14 finer (7/18). NGC ID# 22SD, PCGS# 3965

- 3476 1929-D MS66 PCGS.** The 1929-D Buffalo nickel is seldom available in MS66, and finer pieces are major rarities, out of reach for the average collector. This Premium Gem showcases gold-tinted satin luster with hints of iridescence in the reverse fields. Strike weakness is minor and is restricted to the central high points and the bison's head. An appealing Registry-grade example of this Denver issue. Population: 71 in 66 (6 in 66+), 4 finer (7/18).
Ex: Portland Signature (Heritage, 3/2004), lot 5404, which realized \$3,565; ANA Signature (Heritage, 8/2007), lot 426, which realized \$1,840. NGC ID# 3EDW, PCGS# 3967

1930 Buffalo Nickel, MS67
Registry Grade Example

- 3477 1930 MS67 PCGS.** Bright, lustrous surfaces display a light coat of pastel violet patina that is accented with whispers of greenish-gold on the obverse. The design elements are sharply struck, including the horn and tail. Beautifully preserved throughout. Population: 38 in 67 (1 in 67+), 0 finer (7/18).
Ex: FUN Signature (Heritage, 1/2008), lot 789, realized \$7,475. NGC ID# 22SH, PCGS# 3969

- 3478 1934-D MS66 PCGS.** PCGS has certified a few dozen new Premium Gem examples of the 1934-D nickel in the last decade, but there are still none known finer. This top-grade coin displays shimmering satin luster produced by fresh, unworn dies. Some strike weakness in the centers is not bothersome, as both sides are virtually pristine. Hints of iridescence appear throughout light golden patination. Population: 93 in 66 (6 in 66+), 0 finer (7/18). NGC ID# 22SM, PCGS# 3973

1935-S Nickel, MS67
Surprisingly Strong Strike for the Issue

- 3479 1935-S MS67 PCGS.** While most examples of this issue illustrate the effects of a weak strike, this example is boldly impressed, with nearly full details. The only area that shows the slightest softness is the central portion of the obverse. The luster is incredible, and the color is a pleasing golden-blue. The surfaces are extremely clean and the eye appeal is tremendous. Neither PCGS nor NGC have graded an example finer than this one (8/18).
Ex: FUN Signature (Heritage, 1/2008), lot 793, where it brought \$4,887.50. NGC ID# 22SR, PCGS# 3976

- 3480 1936-S MS67 PCGS.** This Superb Gem 1936-S Buffalo nickel is among the finest pieces certified, a prime Registry Set candidate. Delicate lavender and gold hues warm the frosty surfaces, complementing well-struck design elements. The dies are fairly fresh, not worn or flowlined by extended use. Population: 97 in 67 (6 in 67+), 0 finer (7/18). NGC ID# 22SU, PCGS# 3979

- 3481 1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** This is a well-struck example of the sought-after three-legged nickel variety, showing satiny champagne-gray surfaces and virtually no wear. Scattered light abrasions are not bothersome. Limited numbers of this *Guide Book* variety are available with a CAC green label in this grade. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3482 1937-D Three-Legged, FS-901, MS61 NGC.** The popular *Guide Book* variety is readily recognized by its mostly lapped leftmost leg. The trail of tiny die lumps below the bison's flank provides a secondary diagnostic. This lustrous and unmarked cream-white example displays numerous small ebony freckles. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

1913 Buffalo Nickel, Iridescent PR65 Popular Type One Design

- 3483** 1913 Type One PR65 PCGS Secure. CAC. This 1913 proof Buffalo nickel is famously the first issue in the series and the only one with the Type One reverse. A total of 1,520 proofs were struck, and they are in high demand among collectors. Light golden iridescence blankets finely textured and fully defined surfaces. Eye appeal and quality for the grade are excellent. NGC ID# 278R, PCGS# 3988

1913 Type One Nickel, PR66 Exceptional Surfaces

- 3484** 1913 Type One PR66 NGC. This is a remarkable matte proof that combines the expected granular texture of a matte finish with exceptional, bright mint luster. Of course, the strike details are complete in all areas, and there are only a couple of tiny specks of carbon that can be found on the mostly brilliant surfaces. NGC ID# 278R, PCGS# 3988
- 3485** 1936 Type One — Satin Finish PR65 PCGS. An impressively sharp strike complements a delicately toned light golden surfaces on this Gem Satin Finish proof nickel. A small spot is noted on the reverse border at 8:30, but no other distractions are noticed. NGC ID# 278X, PCGS# 3994
- 3486** 1936 Type One — Satin Finish PR67 PCGS. The Satin Finish proof of 1936 comprises only part of the 4,420-coin mintage recorded for the proof issue. This Superb Gem is among the finest pieces that most collectors will be able to obtain. The coin is fully struck and luminous with warm golden toning over each side. PCGS lists 46 finer representatives (8/18). NGC ID# 278X, PCGS# 3994
- 3487** 1936 Type Two — Brilliant Finish PR64 PCGS. This Choice Brilliant Finish proof type coin displays a full strike and deeply reflective fields. Delicate gold and lavender hues adorn each side, and scattered pepper specks of russet are visible beneath a loupe. Pleasing for the grade. NGC ID# 278Y, PCGS# 3995

1936 Brilliant Finish Buffalo Nickel, PR67 Lightly and Attractively Toned

- 3488** 1936 Type Two — Brilliant Finish PR67 PCGS. This piece is housed in an old green-label PCGS holder, although the label has actually faded to the point that it looks like a more recent blue label. The Brilliant Finish of this Superb Gem proof is highlighted by wispy blue and lilac-gold toning on each side. PCGS has only certified 10 finer examples of this date with the Brilliant Finish (8/18). Ex: *Central States Signature (Heritage, 5/2007), lot 1678, where it brought \$3,220.* NGC ID# 278Y, PCGS# 3995

- 3489** 1937 PR66 PCGS. A well-struck specimen that boasts glassy fields and light sea-green toning. Close evaluation reveals a couple of pinpoint obverse field flecks. Final proof date for the popular Western-themed series. Encapsulated in an old green label holder. NGC ID# 278Z, PCGS# 3996

- 3490** 1937 PR67 PCGS. This is a beautiful proof Buffalo nickel. The fields are deeply mirrored but are not overly polished, suggesting that this coin is an early strike from the dies. Fully struck devices showcase softly frosted mint luster that sets them off from the fields. Golden interior toning cedes to lovely lavender and sky-blue border hues. The eye appeal is remarkable. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1948-S Nickel, MS67 Full Steps None Graded Higher

- 3491** 1948-S MS67 Full Steps PCGS. Only the finest Jefferson nickel Registry Sets will contain an example of the 1948-S in MS67 Full Steps. Neither PCGS nor NGC have seen a finer submission. Razor-sharp and lustrous surfaces show gold accents on the reverse, while the obverse is brilliant. Minor chatter in the centers is minimal. Population: 13 in 67 Full Steps, 0 finer (7/18). NGC ID# 22UA, PCGS# 84036
- 3492** 1949-D MS67 Full Steps PCGS. The 1949-D Jefferson nickel is seldom found with Full Steps, and Superb Gems with or without that elusive feature are conditionally rare. Scintillating satin luster glistens over beautifully preserved, untuned surfaces. Insignificant ticks are limited to the center of Monticello, just above the Full Steps. Population: 9 in 67 Full Steps, 0 finer (7/18). NGC ID# 22UC, PCGS# 84038

EARLY HALF DIMES

1794 Half Dime, AU Details Strong Definition, V-4, LM-4

- 3493** 1794 V-4, LM-4, R.4 — Damage — PCGS Genuine. AU Details. Diagnostics include the leaf tip under the left side of the U in UNITED and a single berry below the I. The 1794 half dime is one of the first silver denominations struck at the Philadelphia Mint, and the date is always popular with collectors. This minimally circulated, well-detailed representative displays a number of small digs of unspecified origin scattered over each side, accounting for the Damage notation. Faint mint-made adjustment marks also appear across the obverse. Marvelous detail for the type.

- 3494** 1797 15 Stars, V-2, LM-1, R.3, VG10 PCGS. CAC. Varieties of the 1797 half dime come with two different sizes of 7 in the date. LM-1 is distinctive for having both 7s from the smaller punch. It is also the only variety with 15 stars on the obverse. This well-circulated coin has even wear and pleasing golden-lavender toning. Some of the weakness on the portrait of Liberty and eagle is due to strike, not wear. The definition on this coin is outstanding for the grade, hence the CAC endorsement. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

BUST HALF DIME

1835 V-10, LM-5.1 Half Dime, MS65 Richly Toned, Large Date, Small 5C

- 3495** 1835 Large Date, Small 5C, V-10, LM-5.1, R.3, MS65 NGC. CAC. This Large Date, Small 5C half dime variety features the 35 in the date closely spaced. Both sides are vividly toned in deep shades of violet-gray, blue, green, and russet-orange toning that becomes more vibrant toward the rims. The devices are essentially fully struck, and the rich patina conceals whatever marks limited the grade when this coin was certified more than 25 years ago. Housed in a former generation, pre-barcode holder. PCGS# 38712 Base PCGS# 4283

SEATED HALF DIMES

- 3496** 1852 MS66+ PCGS Secure. CAC. While silver coins did not circulate on the East coast during the early 1850s, the Mint still managed a production of 1 million Seated half dimes in 1852. Examples are accessible through most grade levels, although comparable representatives are underrated. Original golden toning lightly blankets frosty, sharply detailed surfaces. Luster is bright, and there are only a couple of well-hidden ticks on the drapery. Population: 12 in 66 (1 in 66+), 5 finer. CAC: 3 in 66, 7 finer (7/18). NGC ID# 233K, PCGS# 4349

- 3497** 1853 No Arrows MS65 NGC. Light peripheral chestnut-gold toning visits this sharply struck and lustrous Gem. The surfaces are multiply clashed but devoid of apparent abrasions. Although 1853 Arrows half dimes were struck in vast quantity, its No Arrows counterpart is a better date with a scant mintage of 135,000 pieces. NGC ID# 233M, PCGS# 4351

- 3498** 1864 MS65 NGC. The fields are semiprooflike, but heavy clash marks show on each side. The obverse is sharp save for the lower left portion of the rock base, and the reverse is weak on the upper left wreath branch as usual. Traces of light golden toning grace otherwise brilliant surfaces. The 1864 half dime is a rarity in Gem condition. Census: 12 in 65, 8 finer (7/18). NGC ID# 234E, PCGS# 4384

PROOF SEATED HALF DIMES

- 3499** 1859 PR65 PCGS. Flynn-RPD-001. The 1 and 9 are repunched south. The short-lived Paquet obverse with hollow-centered stars and a different depiction of Liberty. Aquamarine, sun-gold, and rose toning embrace this sharply struck and flashy Gem. Thorough evaluation reveals only trivial imperfections. NGC ID# 235P, PCGS# 4438

- 3500** 1866 PR66 PCGS. V-1, Flynn RPD-001. The 1866 half dime is scarce either as a business strike or proof specimen, with only 725 examples of the latter minted. This fully patinated example is bathed in ocean-blue, lavender, and tan-brown. Both sides appear devoid of carbon and contact.
Ex: Orlando Signature (Heritage, 7/2013), lot 4789, which realized \$1,762.50. NGC ID# 2363, PCGS# 4449

BUST DIMES

- 3501** 1814 Small Date, JR-1, R.3, AU58 NGC. JR-1 is the sole 1814 Small Date die marriage, and it is much scarcer than the Large Date type. This is a satiny cream-gray and straw-gold example with hints of luster remaining in the fields. Several stars and the left side of the eagle are weakly struck, but little high-point wear is apparent. A linear mark appears on Liberty's cheek.
Ex: ANA Signature (Heritage, 8/2010), lot 4392, which realized \$1,495. NGC ID# 236W, PCGS# 38773 Base PCGS# 4489

- 3502** 1821 Large Date, JR-6, R.2, AU55 PCGS. JR-6 has a vertical die crack through Liberty's cheek, although it is weak on this piece due to slight high-point wear. The coin retains luster in the protected areas and has pleasing multicolor toning on both sides. The strike is sharp and the surfaces are undeniably original. An outstanding Capped Bust type coin. NGC ID# 236Y, PCGS# 38796 Base PCGS# 4496

- 3503** 1822 JR-1, R.4, Good 6 PCGS. CAC. Battleship-gray fields surround reddish-tan devices on this rare, smooth and evenly worn 1822 dime. According to the recent estimate by Zack, Scuderi, and Sherrill's Bust dime reference, just 200 to 250 pieces remain from a reported mintage of 100,000 pieces. It is possible the "official" mintage is as much as four times too high. Population: 14 in 6, 55 finer. CAC: 4 in 6, 14 finer (7/18). NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

- 3504** 1832 JR-2, R.2, MS62 NGC. Among Capped Bust dimes, the 1832 is fairly plentiful, making it a suitable choice for type representation. This Mint State example has a few abrasions, but eye appeal surpasses expectations for the grade. The strike is razor-sharp, and the protected areas of the fields showcase a glimmer of reflectivity. Traces of light golden toning grace otherwise frost-white mint luster. NGC ID# 4FAE, PCGS# 38856 Base PCGS# 4521

- 3505** 1833 JR-3, R.6 — Smoothed — PCGS Genuine. VF Details. JR-3 is the rarest 1833 Capped Bust dime variety. This example has most major details still visible, and the slightly glossy surfaces are lightly toned in gray, lilac, and gold hues. The surfaces are microgranular, consistent with an attempt to smooth out abrasions.

SEATED DIMES

- 3506** 1857 F-107, R.2, MS65 PCGS. CAC. The date is positioned low, close to the dentils, which makes this variety easily identifiable. This Gem 1857 Seated Liberty dime is frosty and minimally marked, with flecks of olive and russet toning over otherwise pearl-gray surfaces. The right obverse stars are poorly defined, as usual for this issue. Population: 23 in 65, 10 finer. CAC: 9 in 65, 2 finer (7/18). PCGS# 538097 Base PCGS# 4614
- 3507** 1867 F-102, R.5, AU58 PCGS. With only 6,000 pieces struck, the 1867 Seated Liberty dime is scarce in all grades. This near-Mint example is the only AU58 coin at PCGS. The strike is sharp and wear is trivial. The reverse fields display semiprooflike reflectivity, while both sides display lovely sea-green, blue, lilac, and gray-gold toning. Population: 1 in 58, 57 finer (7/18). NGC ID# 239U, PCGS# 538218 Base PCGS# 4645
- 3508** 1877-CC Type Two Reverse, F-109, R.4, MS66 NGC. A lustrous and lightly toned Carson City type coin. Contact is confined to a solitary small tick on the O in ONE. An interesting die marriage with clear repunching on the 77 in the date. The surfaces exhibit light die rust. The obverse border is cracked and the reverse displays clash marks, all as made. For all 1877-CC varieties, Census: 44 in 66 (2 in 66+), 17 finer (7/18). PCGS# 538595 Base PCGS# 4683
- 3509** 1878 Type One Reverse, F-103, R.5, MS66+ PCGS Secure. Brilliant, lustrous, well-struck, and smooth. Per Fortin, "all 1878 Type 1 reverse varieties are very difficult to locate in Mint State." Beside the features noted for the variety at SeatedDimeVarieties.com, we note that the dies are boldly clashed, the base of the 1 is repunched, and a spindly die crack passes through the base, top, and left side of the wreath. PCGS# 538627 Base PCGS# 4685

PROOF SEATED DIMES

1859 Dime, PR66 Cameo Final-Year Stars Obverse Design Type

- 3510** 1859 PR66 Cameo NGC. F-102, R.5. Medium level date. The rarer of two proof die varieties. This is the final Philadelphia Mint issue of the Stars Obverse design, although this same design was continued in San Francisco for another year due to the lack of available dies of the new Legend Obverse type. Both sides have pleasing mirrored fields with frosty devices beneath champagne toning splashed with russet and blue color. Census: 5 in 66 Cameo (1 in 66 ★), 11 finer (7/18). NGC ID# 23CD, PCGS# 84748

1869 Dime, PR67 Cameo Outstanding Color and Contrast

- 3511** 1869 PR67 Cameo NGC. F-105, R.3. The die scratch in the shield below LIBERTY and the Long Flag 1 are diagnostic. A majority of the 600 proof dimes struck in 1869 are of this variety. Ice-blue and sea-green patina covers the frosted motifs, while violet tones color the reflective fields. Preservation matches the outstanding visual quality. Census: 2 in 67 Cameo (1 in 67 ★), 0 finer (7/18). NGC ID# 23CT, PCGS# 84762
- 3512** 1875 F-101, R.3, PR66 PCGS. The Mint struck 700 proof dimes using two sets of dies in 1875. This one shows numerous raised die lumps over Liberty. Light golden patina blankets slightly dusky, impeccably preserved surfaces. Housed in an old green label holder. Population (both proof varieties): 11 in 66 (2 in 66+), 3 finer (7/18). NGC ID# 23CY, PCGS# 539035 Base PCGS# 4772

1885 Dime, PR67+ Colorful Toning

- 3513** 1885 F-101, R.3, PR67+ PCGS. Multicolor toning fully covers this spectacular 1885 proof dime, limiting field-device contrast but not visual appeal. Shades include blue, green, yellow, rose-violet, and gold. There are absolutely no contact marks to report. The 1885 was struck to the extent of 930 pieces. Several holder scratches seen in the reverse online image are not on the coin. Population: 12 in 67 (4 in 67+), 2 finer (7/18). NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782

BARBER DIMES

- 3514** 1893/2 MS62 PCGS. Breen-3479. The variety listed as "3 Over 2" in the *Guide Book*, where it is joined by the note: "Overlaid photographs indicate this is not a true overdate." Still, PCGS has certified 52 examples in all grades. A loupe is needed to view the extra metal in the lower loop of the 3. This Uncirculated coin displays dusky tan-gold toning and sharp devices. No major abrasions are visible. Housed in an old green label holder. Population: 5 in 62, 28 finer (7/18). NGC ID# 23DP, PCGS# 4799
- 3515** 1895 MS65 PCGS. The interior of the obverse is broadly silver, though the rose, violet, and blue hues at the top and sides transfer to almost the entire reverse. A subtly satiny Gem with effusive luster. Population: 24 in 65, 30 finer (7/18).
Ex: *Central States Signature* (Heritage, 5/2005), lot 6606; *Central States Signature* (Heritage, 4/2012), lot 3844. NGC ID# 23DV, PCGS# 4806

1903-S Barber Dime, MS65
Original Toning and Luster
A Rarity This Fine

- 3516 1903-S MS65 PCGS. CAC.** This satiny Gem displays sharp design elements and minimal abrasions. Mint-gold and lilac toning on each side exhibits additional flecks of russet, attesting to the originality of the surfaces. The 1903-S dime is a rarity in Gem condition, particularly with a CAC green label, as this piece has. Higher-grade representatives are equally rare. Population: 7 in 65, 13 finer. CAC: 3 in 65, 6 finer (7/18). NGC ID# 23EP, PCGS# 4832

- 3517 1908-S MS65 PCGS.** This delightful Gem Barber dime exhibits sharply detailed design elements throughout and the well-preserved, brilliant surfaces radiate vibrant mint luster. A single speck of verdigris is evident on the N in UNITED. Population: 26 in 65, 18 finer (7/18). NGC ID# 23FA, PCGS# 4849

PROOF BARBER DIMES

- 3518 1894 PR66 PCGS.** A famous year for Barber dimes, represented by this lovely Premium Gem proof that has considerable contrast beneath splashes of attractive champagne and iridescent toning. This example is on the verge of a Cameo designation. Population: 47 in 66 (3 in 66+), 26 finer (7/18). NGC ID# 23G6, PCGS# 4878
- 3519 1899 PR66 NGC. CAC.** Exquisite navy-blue, peach-gold, and red patina endows the obverse. The reverse is principally straw-gold but displays peripheral indications of aquamarine. A flashy specimen from the proof mintage of 846 pieces. Census: 30 in 66, 29 finer. CAC: 10 in 66, 16 finer without a Cameo or Ultra Cameo designation (7/18). NGC ID# 23GC, PCGS# 4883

MERCURY DIMES

1916-D Mercury Dime, VF20
Midgrade Collector Coin

- 3520 1916-D VF20 NGC.** Both sides of this midgrade 1916-D Mercury dime display olive-gold toning and are mostly smooth. The obverse has scattered verdigris that accompanies isolated blue-gray speckles. The first-year Denver issue is plentiful in the lower circulated grades and is occasionally available in Mint State, but midgrade coins are elusive by comparison. NGC ID# 23GY, PCGS# 4906

1916-D Dime, VF25
Nicely Detailed Series Key

- 3521 1916-D VF25 PCGS.** An impressive silver-gray key-date dime that appears to retain traces of mint luster despite moderate wear on the cap and fasces. All of the legends are bold, and marks are inconsequential. Midgrade circulated examples are highly elusive, since most survivors of this low-mintage issue are in well worn condition. Encased in an old green label holder.
Ex: Long Beach Signature (Heritage, 5/2009), lot 551, which realized \$4,312.50. NGC ID# 23GY, PCGS# 4906

1916-D Dime, AU50 Details
Lowest Mintage of the Series

- 3522 1916-D — Corroded, Cleaned — ANACS. AU50 Details.** A sharp yet collectible example of the key 1916-D dime, an issue typically encountered in VG or lesser grades. The moderately granular and faintly hairlined surfaces are predominantly slate-gray, with charcoal-gray and forest-green toning in the protected regions.

1919 FS-101 Dime, VG8
Rare Doubled Die Obverse Variety

- 3523 1919 Doubled Die Obverse, FS-101, VG8 PCGS.** This rare variety was not reported until February 2015. The motto is die doubled west, with the most prominent spread on GOD and TRUST. This cream-gray and gunmetal example shows strong doubling on those two words. No marks are noticeable, and all peripheral letters are distinct from the rim. Population: 2 in 8, 4 finer (7/18). PCGS# 545047 Base PCGS# 4922

- 3524 1920 MS67 Full Bands PCGS Secure.** Frosty, shimmering luster on this Superb Gem 1920 dime is original, complemented by lovely golden toning in the centers that cedes to deeper russet and sea-green borders. The rims are not fully squared on this piece, although the central areas are sharply struck. Conditionally scarce this fine and unknown finer at PCGS with Full Bands. Population: 39 in 67 Full Bands, 0 finer (7/18). NGC ID# 23HB, PCGS# 4929

3525 1921 MS62 Full Bands NGC. This low-mintage issue is a semikey in all grades. Uncirculated Full Bands representatives are particularly desirable. Olive-gold toning covers the obverse, while the reverse shows lighter steel-gray patina. Boldly struck throughout, especially the centers. There are fewer marks than one would expect for the grade. NGC ID# 23HE, PCGS# 4935

3526 1923-S MS64 Full Bands PCGS Secure. This represents the highest grade for which the 1923-S Mercury dime remains widely accessible with Full Bands definition. Mottled golden-gray patina graces frosty, boldly detailed surfaces. There are a few minute ticks on each side but no mentionable imperfections. Rarely seen finer. NGC ID# 23HH, PCGS# 4941

3527 1925-D MS64 Full Bands PCGS Secure. This was a well-made issue that often comes with Full Bands, as here. This near-Gem is slightly soft around the borders, particularly the 5 in the date, but the central bands are completely split. Daubs of violet and gold patina accent satiny, minimally abraded surfaces. NGC ID# 23HN, PCGS# 4951

1928-S Dime, MS66 Full Bands Rare CAC-Approved Example

3528 1928-S MS66 Full Bands PCGS. CAC. Blazing frost-white luster encompasses this sharp Premium Gem 1928-S dime. No significant abrasions are seen and eye appeal is outstanding. This date is scarce in MS66 Full Bands and rare finer. A minority of the high-grade population carries the CAC green label, as is seen on this piece. Population: 43 in 66 (2 in 66+) Full Bands, 12 finer. CAC: 14 in 66, 5 finer (7/18). NGC ID# 23HZ, PCGS# 4971

3529 1929-D MS67 Full Bands PCGS Secure. A boldly defined Mercury dime from the Denver Mint, this beautiful Superb Gem has brilliant centers and vibrant mint luster with peripheral gold, rose-violet, and blue toning. Population: 58 in 67 (5 in 67+) Full Bands, 3 finer (7/18). NGC ID# 5LXC, PCGS# 4975

3530 1930-S MS66 Full Bands PCGS Secure. CAC. A highly lustrous Premium Gem, this splendid example features brilliant and frosty silver luster with delicate peripheral gold toning. PCGS has only certified 24 finer examples (7/18). NGC ID# 84NT, PCGS# 4981

3531 1931-S MS65 Full Bands PCGS Secure. From a mintage of 1.8 million coins, the 1931-S Mercury dime is collectible in Mint State with Full Bands in grades as high as MS66. This strongly defined Gem is mostly brilliant with splashes of gold and crimson patina. Frosty luster radiates over each side. NGC ID# 23J9, PCGS# 4987

1931-S Dime, MS66 Full Bands Totally Brilliant

3532 1931-S MS66 Full Bands PCGS Secure. Full Bands examples of the 1931-S dime are more difficult to locate than their non-Full Bands counterparts. Premium Gems are scarce, and fewer than a dozen coins are graded higher at PCGS and NGC combined. This Registry-grade representative is utterly brilliant, awash in thick mint luster, and nearly unabraded. Detail is strong around the borders, as it is over the centers. Population: 51 in 66 (2 in 66+) Full Bands, 9 finer (7/18). NGC ID# 23J9, PCGS# 4987

3533 1937 MS68 Full Bands PCGS. This high-end Superb Gem is among the finest Full Bands examples known, and it is scarce as such. Radiant luster is mainly untoned, and the central devices are sharply defined. Faint metal flowlines are visible in the fields. Population: 49 in 68 Full Bands, 0 finer (7/18).
Ex: Long Beach Signature (Heritage, 6/2004), lot 8142; ANA Signature (Heritage, 3/2007), lot 571; Central States Signature (Heritage, 4-5/2009), lot 7847. NGC ID# 23JJ, PCGS# 5005

3534 1937-D MS68 Full Bands NGC. Bright, vibrant luster radiates from each side. The obverse is just a hint of gold and blue away from brilliance, while the sharply struck reverse has more overt versions of those colors. The bands on the fasces are fully split and rounded. Census: 18 in 68 (2 in 68 ★) Full Bands, 0 finer (7/18). NGC ID# 23JK, PCGS# 5007

1945-S Micro S Dime, MS67 Full Bands FS-512, Guide Book Variety

3535 1945-S Micro S, FS-512, MS67 Full Bands PCGS. Listed in both the *Guide Book* and *Cherrypickers'* references, the 1945-S Micro S is a collectible variety that becomes rare in MS67 with Full Bands. Green, light gray, tan-brown, and lavender toning appears peripherally over the moderately toned obverse, while the reverse is richly patinated in those colors. Vibrant mint luster issues from virtually unmarked surfaces. Strongly defined with a hint of incompleteness on the hair strands. Population: 37 in 67 (3 in 67+) Full Bands, 3 finer (7/18).
Ex: FUN Signature (Heritage, 1/2016), lot 4958, which realized \$2,820. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

ROOSEVELT DIME

3536 1951-D MS68 Full Bands NGC. Here is one of the finest Full Bands 1951-D Roosevelt dimes certified. Vibrant original luster illuminates sharp devices. Most of each side is brilliant, though small flecks of russet, crimson, and green appear along portions of the borders under a loupe. Impeccably preserved. Census: 6 in 68 (2 in 68 ★) Full Bands, 0 finer (7/18). NGC ID# 23L3, PCGS# 85098

TWENTY CENT PIECES

- 3537 1875 MS63 PCGS. BF-1, R.1.** This die variety represents the majority of 1875 twenty cent pieces. The gray-lilac surfaces show flashes of underlying rose and yellow toning. Fully struck throughout, including the top of the eagle's left (facing) wing. Each side is noticeably free from the usual abrasions one associates with coins in this grade. NGC ID# 23R5, PCGS# 5296
- 3538 1875-CC MS63 PCGS. BF-2, R.1.** Aquamarine toning bathes this coruscating and lightly abraded Select double dime. The strike shows minor inexactness, customary for this Carson City type issue. The Brunner-Frost reference omits any mention of the five die cracks, two on the obverse and three on the reverse. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent Choice Mint State

- 3539 1875-CC MS64 NGC. BF-2, R.1.** A splendid near-Gem that boasts dynamic cartwheel sheen and minimal evidence of marks. The breast feathers and the crest of the left (facing) wing exhibit minor blending, but the remainder of the strike is bold. Carson City type collectors are obligated to purchase an 1875-CC, given the formidable rarity of its 1876-CC alternative.
Ex: FUN Signature (Heritage, 7/2007), lot 628, which realized \$8,050. NGC ID# 23R6, PCGS# 5297
- 3540 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS64 NGC.** The top of an errant 7 appears to be faintly visible in the dentils below the primary numeral. Of greater interest, however, is the boldly repunched mintmark, which is widely doubled at both serifs. This Choice twenty cent type coin displays satiny luster and light golden toning. The only mentionable strike weakness is on the upper edge of the eagle's left (facing) wing. NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298
- 3541 1876 MS63 NGC. BF-2, R.2.** Light wheat-gold toning adorns this lustrous and crisply struck Philadelphia example. Marks are limited to a faint hair-thin line between stars 1 and 5. The 1876 has a low commercial mintage of 14,750 pieces. In Mint State, the ratio of 1875-S to 1876 double dimes exceeds five to one. NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR64 Cameo Dramatic Field-Device Contrast

- 3542 1875 PR64 Cameo PCGS. BF-1, R.1.** The first of just four proof issues in a short and most-pursuable series. This Choice Cameo proof is well-contrasted despite faint duskiness over smooth, mirrored fields that bolster the impact of the sharp, frosty devices. Attractive gold and sea-green toning frames the peripheries. No obvious contact marks are present, and only a few delicate, stray lines in the fields define the assigned grade. Population: 20 in 64 (1 in 64+) Cameo, 17 finer (7/18). NGC ID# 23X7, PCGS# 85303

- 3543 1876 PR62 Cameo NGC. BF-4, R.4.** Sharply struck and luminous devices contrast with reflective fields. This specimen is uniformly stone-white aside from a few freckles of lavender patina on the upper-left obverse. Delicate contact in the obverse field determines the grade. A scarce proof type. NGC ID# 27H3, PCGS# 85304

EARLY QUARTER

- 3544 1804 B-1, R.3, AG3 PCGS.** Tompkins Die State 2/1. Clashed under the chin. The space between the top of the 4 and the bust confirms the variety. The central obverse is nearly flat, but the date and LIBERTY are bold. The eagle and upper reverse show better detail, but AMERICA is illegible. Light and dark gray surfaces are lightly hairlined. Always a popular date. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

BUST QUARTERS

1815 B-1 Quarter, AU58 Rich Multicolor Toning

- 3545 1815 B-1, R.1, AU58 PCGS Secure.** Tompkins Die State 4/2. Dappled walnut-brown, light gray, and rose toning encompasses satiny and sharply struck surfaces. The curls and claws show a hint of wear, but a pass beneath a lens fails to reveal any relevant marks. 1815 was a low-mintage year at the Mint, with only quarters, halves, and half eagles issued. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321
- 3546 1818 B-3, R.3, AU50 PCGS. CAC.** Tompkins Die State 2/2. Forest-green, golden-brown, gray, and lavender toning embraces this moderately worn and lightly marked example. B-3 is a later obverse die state of the B-1 1818/5 overdate that shows little or no evidence of the 5 underdigit. NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

- 3547 1818 B-6, R.4, XF40 PCGS.** Tompkins Die State 1/1. T3 is over IB, and the F in OF is over UN on the Browning-6 variety, a scarce die marriage that is rarely found in high grades. This is also the rarest die state for B-6, without any reverse cracks. Golden-gray patina covers this lightly worn but well-defined quarter. Minor hairlines appear on each side. Encapsulated in a green label holder. PCGS# 38947 Base PCGS# 5322
- 3548 1821 B-4, R.3, AU53 PCGS.** Tompkins Die State 3/2. B-4 is a collectible die pair that is available in most grades. In this state, the die scratch between stars 2 and 3 is gone, and a crack travels through the upright of the E in UNITED. This lightly circulated stone-gray Capped Bust quarter is well-struck with minor high-point blending. Hints of luster remain, and the surfaces are generally smooth. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331
- 3549 1825/4/2 B-1, R.5, VF30 PCGS.** Tompkins Die State 2/2. According to *Early United States Quarters, 1796-1838*, "B-1 is a very rare die marriage that will be difficult to acquire." This is a late die state coin with chipping between the flag of the 5 and the upper loop. Steel-gray surfaces show golden accents over lightly worn high points and within the protected areas. A few faint hairlines and a scrape between stars 8 and 9 are the only obvious flaws. NGC ID# 23RS, PCGS# 38974 Base PCGS# 5337
- 3550 1825/4/(2) "E" Counterstamp, B-2, R.2, AU50 NGC.** Tompkins Die State 1/1. In the early 1880s, Bust quarters dated 1815 or 1825 began appearing at auction bearing E or L counterstamps. All four combinations are known, with the 1815 "E" most common and the 1825 "E" considered scarcest. Despite several theories, the origins of the counterstamps are unclear. A dusky silver-gray example with a slight reverse rim bump opposite the counterstamp. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

SEATED QUARTERS

- 3551 1838 No Drapery AU58 NGC. Briggs 1-A.** Open talons on the reverse, as usual. This satiny near-Mint coin displays wisps of tan toning over pearl-gray, partially lustrous surfaces. Several stars are weakly struck, but the eye appeal is otherwise pleasing. A collector-grade first-year Seated Liberty quarter and an excellent No Drapery type coin. NGC ID# 23SE, PCGS# 5391
- 3552 1841 MS62 PCGS. Briggs 1-A, Flynn DDR-001.** The border legends on the reverse are die doubled, mainly visible on STATES OF AMERICA. As a date, the 1841 Seated Liberty quarter is a rarity in Mint State. This example displays sharp design elements and bright, untuned surfaces. A hint of reflectivity in the fields amplifies the eye appeal. Abrasions are minimal. Population: 5 in 62, 18 finer (7/18). NGC ID# 23SK, PCGS# 5399
- 3553 1842 Large Date MS62 PCGS. Briggs 1-A.** All circulation strike 1842 quarter dollars have the Large Date logotype. This Mint State example is conditionally rare. Dusky rose-gold, lavender, and blue-green toning encompasses each side, complementing sharp design elements. A loupe reveals scattered minor field marks but no severe abrasions. Only 88,000 pieces were struck. Population: 5 in 62, 6 finer (7/18).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3543, which realized \$1,955. NGC ID# 23SM, PCGS# 5401
- 3554 1847 Mispunched Date, FS-301, Briggs 3-C, MS63 NGC.** The lower loop of a misplaced 8 can be seen in the rock base above the primary numeral. This Select example displays a sharp strike with satiny luster and warm golden toning. Minor abrasions are hardly bothersome. Census: 4 in 63, 17 finer (7/18). PCGS# 395922 Base PCGS# 5410
- 3555 1847-O AU50 PCGS. Briggs 1-A.** An impressive AU specimen of this popular branch mint issue, with just a touch of wear on the well-detailed design elements and some interesting clash marks at Liberty's shoulder. The lightly abraded surfaces retain much original mint luster under shades of golden-brown and lavender-gray toning. Population: 6 in 50, 18 finer (7/18). NGC ID# 23SY, PCGS# 5411

- 3556 1851 MS63 PCGS. Briggs 1-A.** The 1851 Seated Liberty quarter is rare in Uncirculated condition. This Select example displays sharp stars and central devices with minimal surface abrasions. Neither side is toned, and the satiny cartwheel luster is most attractive. Population: 3 in 63, 15 finer (7/18). NGC ID# 23T6, PCGS# 5417
- 3557 1852 MS62 NGC. Briggs 2-B.** The 1852 Seated quarter is a rare date in Uncirculated condition. This piece displays rose-gold toning over satiny mint luster. The strike is sharp and grade-limiting abrasions are minor. Eye appeal is pleasing for the MS62 level. Census: 7 in 62, 22 finer (7/18). NGC ID# 23T8, PCGS# 5419
- 3558 1854-O Arrows MS62 NGC. Briggs 1-B.** Highly lustrous with faint lilac toning over each side. Light abrasions populate the obverse surfaces, while the reverse shows only slight contact to the left and right of the mintmark. This is a sharp, attractive example of the overlooked and conditionally rare Normal Mintmark 1854-O Seated quarter. Census: 6 in 62, 20 finer (7/18).
Ex: Long Beach Signature (Heritage, 6/2007), lot 3152; ANA Signature (Heritage, 8/2014), lot 3562. NGC ID# 3EA2, PCGS# 5433
- 3559 1854-O Arrows, Huge O, Briggs 1-A, FS-501 — Cleaned — PCGS Genuine. VF Details.** The cleaning is old, both sides having retuned in multicolor hues. Nonetheless, the underlying hairlines are apparent with a loupe. Detail is strong for the VF level, and this *Guide Book* variety is highly sought-after in any condition. On this piece, a few small nicks are noted near stars 9, 11, and 13.

1856-S Quarter, AU53 Rare So Fine

- 3560 1856-S AU53 PCGS. Briggs-Unlisted.** The 1 is aligned with the fifth shield stripe, matching Obverse 2, while the S mintmark is embedded in the fletching, matching Reverse D. Larry Briggs designated the 1856-S as R.5 in AU condition, and indeed, the issue is a significant rarity this fine. Both sides are fully struck and untuned with flashes of luster around the motifs. Friction and marks are minimal. Population: 2 in 53, 17 finer (7/18). NGC ID# 23TD, PCGS# 5440
- 3561 1857-O MS62 NGC.** Even though nearly 1.2 million quarter dollars were struck at New Orleans in 1857, few survive in Mint State. Some speckles of russet patina dot softly lustrous surfaces on this MS62 coin. Wispy handling marks are noted in the fields. The coin is sharp and appealing for the grade. Census: 5 in 62, 5 finer (7/18).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5952. NGC ID# 23TE, PCGS# 5443

1857-S Quarter, MS61
Only 82,000 Pieces Produced

- 3562 1857-S MS61 NGC. Briggs 1-A.** A scarce early San Francisco issue with a low mintage of 82,000 pieces. This coruscating representative is evenly struck and displays only a whisper of tan toning. Smooth overall despite wispy contact on the right obverse field. Elusive in all grades, and rare in Mint State. Housed in a circa-2000 holder. Census: 4 in 61, 5 finer (7/18). NGC ID# 23TG, PCGS# 5444

1862-S Quarter, MS62
Low-Mintage Issue

- 3563 1862-S MS62 NGC. Briggs 1-A.** Although San Francisco struck 1.3 million half dollars, quarter production was only about 5% of that level, a mere 67,000 pieces. A lack of West Coast collectors ensured that few survived in Mint State. This almond-gold and sky-gray quarter is well-struck except on the left-side stars. A loupe reveals distributed minute contact. Housed in a circa-2000 holder. Census: 4 in 62, 8 finer (7/18). NGC ID# 23TW, PCGS# 5457

- 3564 1865 MS62 PCGS. Briggs 1-A, Flynn-RPD-001.** Repunching is obvious on the 1 in the date. Overall, the 1865 Seated quarter is a rarity in Uncirculated condition. This piece is bright, untuned, and minimally abraded for the grade. The strike is sharp and the eye appeal is pleasing. Population: 5 in 62, 17 finer (7/18). Ex: ANA Signature (Heritage, 3/2010), lot 779, which realized \$1,495. NGC ID# 23U2, PCGS# 5461

1867 Quarter, MS62
Ex: Richmond Collection

- 3565 1867 MS62 NGC. Briggs 1-A.** Ex: Richmond Collection. Due to fractional currency and Gresham's Law, Seated quarters did not circulate during 1867, except in the far West. The business strike mintage was a scant 20,000 pieces, likely intended to prevent collector speculation of proofs. This is a semiprooflike example with light peripheral gold toning. The central obverse die was lapped, diminishing the drapery detail. Census: 6 in 62, 3 finer (7/18). Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1464, which realized \$1,725. NGC ID# 23UD, PCGS# 5470

- 3566 1868 MS63 NGC. Briggs 1-A.** Touches of lavender and gold toning visit the borders of this Select 1868 Seated quarter, leaving the interiors mostly brilliant. The strike is sharp and abrasions are minimal. The 1868 is a scarce date overall, coming from a mintage of 29,400 coins, but Uncirculated pieces are rare. Census: 8 in 63, 7 finer (7/18).

Ex: FUN Signature (Heritage, 1/2005), lot 6418, which realized \$1,840; FUN Signature (Heritage, 1/2006), lot 2297, which realized \$2,070. NGC ID# 23UF, PCGS# 5472

- 3567 1874 Arrows MS63 PCGS Secure. Briggs 4-C.** Wheat-gold toning graces this lustrous and well-struck Select example. Devoid of serious abrasions, the surfaces present excellent eye appeal for the grade. The 1874 Arrows quarter is elusive in finer condition. The With Arrows, Motto type was issued for just two years. Ex: Houston Signature (Heritage, 12/2015), lot 4288, which realized \$1,122.13. NGC ID# 23VX, PCGS# 5494

- 3568 1877-S MS65 PCGS.** An elusive Gem example of this otherwise plentiful San Francisco issue. Both sides show varying intensities of lavender and rose-gold toning, with daubs of aquamarine also visible near the borders. The strike is sharp and no bothersome abrasions are noted. Population: 41 in 65 (1 in 65+), 29 finer (7/18). NGC ID# 23V7, PCGS# 5506

- 3569 1878-S AU55 PCGS. Briggs 1-A.** The 1878-S quarter comes from a low-for-the-period mintage of 140,000 pieces. Mint State survivors are rarely offered. This collectible Choice AU representative displays bright, untuned surfaces and sharp design elements. The reverse is heavily lapped, and the fields on both sides are semiprooflike. Population: 4 in 55, 22 finer (7/18). NGC ID# 23VA, PCGS# 5510

- 3570 1878-S MS61 NGC. Briggs 1-A.** The 1878-S Seated Liberty quarter boasts a limited mintage of 140,000 pieces, and Mint State examples are rare today. The present coin features an exemplary strike, with finely detailed devices and bright mint luster. A few hints of light gold color are evident, but the surfaces are mostly brilliant. A scattering of minor handling marks explains the grade. The reverse die is heavily lapped, as usual. Census: 4 in 61, 14 finer (7/18). Ex: ANA Signature (Heritage, 8/2010), lot 4731, which realized \$1,955. NGC ID# 23VA, PCGS# 5510

- 3571 1879 MS64 PCGS Secure. Briggs 1-A.** Seated quarter production plunged with the advent of the Morgan dollar. The 1879 commercial mintage was a mere 13,600 pieces. This lustrous and nicely struck near-Gem is nearly brilliant save for a dash of deep patina on the obverse rim at 5:30. Marks are confined to a solitary field tick beneath the beak. NGC ID# 23VB, PCGS# 5511

- 3572 1890 MS66 NGC. CAC. Briggs 1-A.** Rich aquamarine, red, and orange-gold toning bathes this lustrous high-grade quarter. The strike is good except on the right-side stars. The 1890 was the last of the low-mintage Philadelphia issues. Only 80,000 pieces were coined for commerce. Approximately 300 pieces were saved in Mint State, though most are in MS62 to MS65 grades. CAC: 10 in 66, 10 finer (7/18). NGC ID# 23VP, PCGS# 5523

PROOF SEATED QUARTERS

- 3573 1858 PR61 PCGS. Briggs-Unlisted.** The date placement is virtually identical to that of the Briggs 5-E proof die pair, but on this coin the 1 is noticeably repunched at its base. Also, the reverse does not show the expected die crack at the arrowheads. This 1858 proof quarter is sharp and deeply reflective. Neither side exhibits toning, and scattered hairlines in the fields limit the grade. NGC ID# 23WK, PCGS# 5554

- 3574 1859 PR63 NGC. Briggs 1-A.** A subtly contrasted Select proof, this piece displays sharp definition and a blush of light golden toning over both sides. Close examination reveals wispy, grade-defining hairlines in the fields, but these are undetectable to the naked eye. From a mintage of only 800 coins. Ex: Long Beach Signature (Heritage, 9/2014), lot 4023. NGC ID# 23WL, PCGS# 5555

**1866 Motto Quarter, PR65 ★
Iridescently Patinated**

- 3575 1866 Motto PR65 ★ NGC. Briggs 2-B.** Navy-blue, plum, and straw-gold toning grace this flashy Gem. The attractive patina is surely the inspiration for the seldom-awarded NGC Star designation. Nicely struck and devoid of apparent imperfections. The figure of Liberty is frosty, but the more extensive reverse toning precludes a Cameo designation. Census: 23 in 65 (1 in 65 ★), 13 finer without a Cameo designation (7/18). NGC ID# 23WX, PCGS# 5565

**1870 Quarter, Gem Proof
'Rattler' Holder, CAC Seal**

- 3576 1870 PR65 PCGS. CAC. Briggs 2-B.** The peach-gold obverse center is framed by a lilac-red and blue-green border. The reverse exhibits blended green and lavender shades. A fully patinated and crisply struck proof Seated type coin. The right obverse field displays delicate hairlines. Encased in a first-generation "rattler" holder. CAC: 6 in 65, 4 finer without a Cameo designation (8/18). NGC ID# 23X3, PCGS# 5569

BARBER QUARTERS

**1893-O Barber Quarter, MS66
Lightly Toned and Sharply Struck**

- 3577 1893-O MS66 PCGS. CAC.** From a mintage of 3.3 million coins, the 1893-O proves more elusive than its Philadelphia counterpart but is more accessible in high grades than the 1893-S. This CAC-endorsed Premium Gem presents violet-gray and golden-russet patina over satiny surfaces, leaving the central motifs mostly untoned. Incredibly sharp for a New Orleans Barber quarter. Population: 14 in 66 (1 in 66+), 4 finer. CAC: 7 in 66, 2 finer (7/18). NGC ID# 23XX, PCGS# 5605

- 3578 1899 MS66 NGC. CAC.** A spectacular Premium Gem representative of a "common date" in the Barber quarter series, but it is anything but common in this grade as the census data reveals. This piece has wispy champagne toning on its brilliant and highly lustrous silver surfaces. Census: 8 in 66 (1 in 66+), 1 finer. CAC: 4 in 66, 1 finer (7/18). NGC ID# 43VN, PCGS# 5622

- 3579 1909-O XF40 NGC.** The final-year New Orleans quarter is available in well-worn condition, but surprisingly scarce in VF or better grades. This XF example is chiefly steel-gray with glimpses of chestnut toning. No marks are noticeable, and satiny luster fills the borders. NGC ID# 23ZJ, PCGS# 5655

- 3580 1914-S MS64 PCGS Secure.** This late-date semikey enjoys a low mintage of 264,000 coins. Coincidentally, that is the same total of 1916-D Mercury dimes struck a couple of years later. The obverse is well-detailed on this near-Gem. Detail is softer on the reverse fletchings and the mintmark. Both sides are clean and minimally toned with lively mint frost. Population: 21 in 64, 25 finer (7/18). NGC ID# 23ZZ, PCGS# 5669

PROOF BARBER QUARTERS

- 3581 1896 PR65 Cameo PCGS.** The normal high-quality proofs from this year is abundantly evident on this piece. Each side shows deep reddish centers that are surrounded by cobalt-blue margins. Deep mirroring is evident even through the moderately deep toning. NGC ID# 59JB, PCGS# 85682

**1896 Quarter, PR67 Cameo
Bold White-on-Black Contrast**

- 3582 1896 PR67 Cameo NGC.** Pristine proof surfaces are virtually black-and-white with a few glimpses of dusky patina. A thick layer of frost covers the devices, surrounded by glassy mirrors. The mintage for the 1896 Barber quarter was only 762 specimens. Census: 25 in 67 Cameo (1 in 67+, 1 in 67 ★, 2 in 67+★), 10 finer (7/18). NGC ID# 59JB, PCGS# 85682

- 3583 1900 PR65 NGC.** This sharp Gem proof showcases every detail of Charles Barber's design in full relief, set against liquidlike mirroring in the fields. There is a hint of light golden toning around the extreme outer periphery, but the majority of each side is frost-white and modestly contrasted. A highly appealing proof type coin. NGC ID# 43VN, PCGS# 5686

- 3584 1901 PR66 Cameo NGC.** The 1901 can be viewed as the "last chance" for collectors to obtain a Cameo example of the proof Barber quarter. Beginning in 1902 the method of manufacture for proofs changed to an all-brilliant finish, greatly reducing the possibility and availability of contrasted coins. This nicely cameoed proof is brilliant, thus enhancing the white-on-black contrast. Problem-free and sharp, as expected from a coin in this grade. Census: 12 in 66 Cameo (1 in 66+), 22 finer (7/18). NGC ID# 242G, PCGS# 85687

- 3585 1902 PR65+ NGC.** A Plus-graded Gem proof from a mintage of 777 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields on both sides. The well-preserved surfaces show subtle hints of pale gold toning. Census: 30 in 65 (1 in 65+), 59 finer (7/18). NGC ID# 242H, PCGS# 5688

STANDING LIBERTY QUARTERS

3586 1917 Type One MS66 Full Head NGC. A spectacular Premium Gem example of the short-lived Type One design, with sharply detailed design elements, including full definition on Liberty's head, and well-preserved, lustrous surfaces, with highlights of golden-brown and magenta toning. NGC ID# 242Z, PCGS# 5707

3587 1917-D Type One MS65 Full Head PCGS Secure. CAC. This Denver issue is much scarcer than the 1917 Philadelphia Type One with Full Head detail and slightly more accessible than its S-mint cousin. A trace of original color accents satiny, mostly brilliant surfaces. The only point of softness on this strongly struck Gem is the date. A dark toning spot occurs right of Liberty's right knee. NGC ID# 2432, PCGS# 5709

1918/7-S Quarter, Sharp VF20 Exceptional Collector Coin

3588 1918/7-S FS-101 VF20 PCGS. Lovely slate-gray surfaces on this midgrade coin deepen slightly in hue in the recesses, attractively displaying design elements that show strong detail for the grade. This 1918/7-S quarter is in an earlier die state than many examples that we have seen, although the obverse still shows clash marks in the recesses around Liberty's gown. This is a problem-free coin with outstanding eye appeal and a sharp date. Housed in an early generation holder. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

3589 1918-S MS65 PCGS Secure. CAC. Struck from clashed dies, this Gem 1918-S quarter displays softly frosted original luster and faintly iridescent light golden toning. Although the date is clear, significant strike weakness is visible on it, the shield rivets, and Liberty's head. On the reverse, the eagle's breast and wing edge show incomplete striking, and the denomination letters are not fully brought up. The 1918-S is a better date in high grade, rarely found sharp. CAC: 15 in 65, 11 finer (8/18). NGC ID# 2439, PCGS# 5724

3590 1919 MS66+ PCGS Secure. A lovely Premium Gem, this Standing Liberty quarter exhibits brilliant silver luster inside a frame of iridescent toning. The Registry collector would do well with this example. PCGS has only certified 38 finer examples (7/18). NGC ID# 243B, PCGS# 5728

1920-S Quarter, MS64 Full Head Clean and Frosty

3591 1920-S MS64 Full Head NGC. Specks of crimson toning along the upper-obverse border are the only hints of color on this otherwise brilliant and thickly frosted Standing Liberty quarter. Head detail is bold, as are the shield stripes, foot, and date digits. Scattered reeding marks appear mostly on the lower half of the obverse, while the remaining surfaces are comparatively clean. The 1920-S (6.3 million coins) is scarce in MS64 Full Head. Finer coins command strong five-figure prices. Census: 24 in 64 Full Head, 12 finer (7/18). NGC ID# 243G, PCGS# 5739

3592 1924 MS65 Full Head PCGS. A glittering Gem, this Standing Liberty Head quarter with Full Head definition is nearly all-brilliant, except for the faintest blushes of gold near the borders. The shield verticals, chain mail, and date digits are strong, and the obverse is essentially mark-free. NGC ID# 243L, PCGS# 5747

3593 1924 MS66 Full Head PCGS Secure. Sharp definition is seen on Liberty's head, the shield rivets, and the eagle's breast and wing. The date numerals are slightly weak but clear. This Philadelphia issue is scarce so fine with Full Head detail. Frosty luster shows no abrasions, and both sides have a light golden hue. Population: 75 in 66 (10 in 66+) Full Head, 13 finer (7/18). NGC ID# 243L, PCGS# 5747

3594 1927-S AU50 PCGS. From a low mintage of 396,000 pieces, this impressive AU specimen shows just a touch of wear on the well-detailed design elements. Shades of sea-green and lavender-gray toning visit the lightly abraded surfaces, which retain traces of original mint luster. NGC ID# 243W, PCGS# 5764

3595 1928-S MS66 Full Head PCGS. Dusky gray toning dominates this Premium Gem quarter. Splashes of violet, gunmetal-gray, olive, and gold patina are also present throughout. Liberty's head is fully defined and the shield lines are strong, while the chainmail and eagle's breast feathers are slightly incomplete. PCGS lists 26 finer submissions (8/18). NGC ID# 243Z, PCGS# 5771

3596 1930 MS66+ Full Head PCGS Secure. CAC. In addition to the full head details, the shield shows nearly complete design definition on this lovely Premium Gem that exhibits brilliant surfaces, frosty mint luster, and excellent eye appeal. PCGS has certified only 52 finer examples (7/18). NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

1936 FS-101 Quarter, MS66
Doubled Die Obverse, None Graded Finer

- 3597** 1936 Doubled Die Obverse, FS-101, MS66 PCGS. The obverse of this impressive Premium Gem is strongly doubled, a feature most easily seen on the letters in the motto IN GOD WE TRUST. The design elements are sharply detailed and the well-preserved surfaces show highlights of golden-brown and amber toning. This is one of the top-graded examples at both services and a strong Registry contender. Population: 2 in 66, 0 finer (7/18).
Ex: Long Beach Signature (Heritage, 9/2015), lot 3647. NGC ID# 244G, PCGS# 146091 Base PCGS# 5800

1936-D Washington Quarter, MS67
None Finer at PCGS

- 3598** 1936-D MS67 PCGS. The 1936-D is a scarce date in the Washington quarter series, and this Superb Gem is equal to the finest pieces certified. This beautiful Superb Gem has splendid gold toning near the borders, framing highly lustrous centers. Population: 24 in 67 (2 in 67+), 0 finer (7/18).
Ex: Fort Worth Signature (Heritage, 3/2010), lot 913; New York Signature (Heritage, 12/2011), lot 3792; Long Beach Signature (Heritage, 6/2013), lot 4489. NGC ID# 244H, PCGS# 5801

- 3599** 1972 MS67+ PCGS Secure. A condition rarity, this Plus-designated Superb Gem 1972 Washington quarter is tied for the finest certified, making it an essential acquisition for Registry Set enthusiasts. Beautiful rainbow toning on both sides presents concentric rings that culminate in powder-blue and lavender centers. The patina is somewhat dusky but exceptionally colorful. Population: 20 in 67 (2 in 67+), 0 finer (7/18). NGC ID# 2479, PCGS# 5889

THE LAKE GOODWIN COLLECTION OF EARLY HALF DOLLARS

1794 O-105 Half Dollar, Fine Details

- 3600** 1794 O-105, T-3, R.5 — Repaired — PCGS Genuine Secure. Fine Details. Tompkins Die State 1/1. Among the 1794 varieties, only the O-101 (T-7) is somewhat available. All other varieties are scarce to rare. Scattered porosity and evidence of tooling accompanies sinking of the reverse die of this O-105 (T-3) example. The date is sharp and the obverse is relatively bold, while the reverse has only sparse detail remaining within the wreath. Medium gold-gray toning deepens to slate-gray at the margins.
From The Lake Goodwin Collection.

1794 O-106 Half Dollar, Fine Details
Elusive First-Year Die Marriage

- 3601** 1794 O-106, T-4, Low R.6 — Environmental Damage — PCGS Genuine Secure. Fine Details. Tompkins Die State 1/1. Steel-gray borders encompass slate interiors with olive-gray undertones on this deeply toned O-106 (T-4) example. All legends and stars are distinct, and the wings and tail display partial feather detail. The obverse has a few thin lines near stars 5 and 9, and the microgranular reverse exhibits minor Mint-made adjustment marks near the lower border. An appealing example of this rare first-year die pairing.
From The Lake Goodwin Collection.

1795 Half Dollar, VF30
O-102, T-26, Early Die State

3602 1795 2 Leaves, O-102, T-26, R.4, VF30 PCGS. Tompkins Die State 1/1. This early die state exhibits just the faint beginnings of a crack from the top rim to E in LIBERTY. On this smooth and richly toned example, gray-brown patina deepens to bluish-gray along the obverse margins and throughout the reverse fields. The surfaces are exceptionally free of all but the tiniest marks despite a moderate stay in circulation. The motifs retain sharp definition and plentiful eye appeal. We note a few short, Mint-related adjustment marks at 3 o'clock on the obverse, which extend only a short distance between stars 11 and 12 into the right-hand field.

From The Lake Goodwin Collection. NGC ID# 37NX, PCGS# 39215 Base PCGS# 6052

1795 O-102a, T-26 Half Dollar, Fine 12
Rare Late Die State
Bold Retained Cud on Reverse

3603 1795 2 Leaves, O-102a, T-26, R.6, Fine 12 PCGS. CAC. Tompkins Die State 5/3. While the O-102a (Tompkins-26) variety is moderately available in earlier die stages, the near-terminal die state seen on this coin is rare. A more appropriate designation would be O-102 'b'; the defining die break curves upward through the ribbon and lower-left leaves to the wingtip and T in UNITED, where it branches into a second short crack to the rim. Sinking of the die forms a biplanar retained cud. Few O-102a examples show the final die stage. This is a sharp and attractive representative of the rare die state, CAC-endorsed, with crisply defined elements for the Fine 12 grade. Warm-gray fields surround silver-gray high points, creating strong eye appeal. Only pinprick marks and a few light abrasions are visible under magnification, with no adjustment marks on either side.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39216 Base PCGS# 6052

1795 Half Dollar, VF Sharpness
O-102a, T-26, Mid-to-Late Die State

3604 1795 2 Leaves, O-102a, T-26, R.6 — Obverse Damage — NGC Details. VF. Tompkins Die State 4/2. This advanced die state of O-102a shows faint obverse die cracks in the date region as well as a crack above AMERI on the reverse, all of which are seen on this example. Importantly, a very late die state exists — with a retained cud from the left ribbon end to T in UNITED — but that crack is not present on this coin. The latest die state is rare, while the intermediate stage is only slightly scarcer than early die state examples. The surfaces of this pleasing example are choice except for an old dig between I and B of LIBERTY, which NGC designates as Damage. This mark is hardly distracting, and the balance of the sharply defined surfaces display natural silver-gray toning with faint glints of gold and traces of luster.

From The Lake Goodwin Collection.

1795 O-103 Half Dollar, XF Details
Scarce Variety, Repunched M in AMERICA

3605 1795 2 Leaves, O-103, T-29, R.5 — Harshly Cleaned — PCGS Genuine. XF Details. Tompkins Die State 1/2. The M in AMERICA was originally punched too close to A, then repunched, weakening the die in that area. Several die cracks at the legend include strong radial cracks from the rim to the first A in AMERICA, and another through the right edge of C. The obverse shows numerous cracks as well, all inherited from previous uses of the die. The Overton-103 (Tompkins-29) variety is scarce in all die states and unknown in full Mint State. This example displays solid XF sharpness. Hairlines exist from a previous cleaning, but the surfaces have recovered to a golden-gray sheen with slightly deeper, reddish-gray toning at the borders. There are some adjustment marks at the right-hand stars, adding to strike weakness in that area. Sharpness on the central motifs exceeds the XF level.

From The Lake Goodwin Collection.

3606 1795 2 Leaves, O-103a, T-29, R.5, VG10 PCGS. Tompkins Die State 2/3. This is the late die state Overton-103a (Tompkins-29), with a full cud above AME in AMERICA. The advanced die stage contributes to weakness on the right-hand obverse stars and merging of the rim with the letters of the reverse legend. While the full cud variant is not significantly rarer than the early die state of O-103 at this grade level, it is in high demand by variety collectors, who seek both the early and late die states. Stone-gray toning deepens at the edges and frames the raised devices, with scattered small marks and shallow abrasions across the otherwise smoothly worn surfaces. A small Mint-related planchet flaw is seen at 9 o'clock on the obverse rim.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39218 Base PCGS# 6052

1795 O-104 Flowing Hair Half
Nearly Mint State Sharpness

3607 1795 2 Leaves, O-104, T-24, R.4 — Cleaned — PCGS Genuine Secure. AU Details. Tompkins Die State 3/3. Overton-104 (Tompkins-24) is the sole use of the obverse die and an early use of the reverse, which also appears on O-105 (T-25) and O-103 (T-29). The M in AMERICA is boldly recut. The strike is deep and sharp throughout both sides, with high rims and full dentilation. Although the surfaces show an old, light cleaning, both sides have retoned nicely while residing in an old-time album or coin board. Circular bands of amber-gold and gunmetal-blue border toning encompass lilac-gray centers. The hair definition is particularly sharp on this coin, and the eagle displays sharp wing feathers as well as some feather definition on the breast and legs. Light field chatter exists around the eagle, while the obverse fields are mostly smooth. Hair-thin obverse adjustment marks are visible under magnification. The O-104 variety is scarce in Mint State and in high About Uncirculated condition.
From The Lake Goodwin Collection.

3608 1795 2 Leaves, O-105, T-25, High R.3 — Cleaned — PCGS Genuine. Good Details. Tompkins Die State 1/1. UNITED STATES OF AMERICA is widely spaced on the O-105 variety — more than on any other 1794 or 1795 reverse die — as seen by the U almost touching the left stem, and the final A of AMERICA nearly joined to the right stem. This well-worn, golden-gray example shows partial recovery from an old cleaning, although some hairlines remain. Three Overton varieties share this same reverse: O-103 (T-29), O-104 (T-24), and O-105 (T-25). There are no adjustment marks or significant abrasions, and the occasional peripheral weakness is consistent with the assigned Details grade.
From The Lake Goodwin Collection.

1795 Flowing Hair Half Dollar, VG10
Low-Survival O-106 Variety

3609 1795 2 Leaves, O-106, T-30, R.6, VG10 PCGS. Tompkins Die State 1/3. The O-106 (T-30) obverse die spelled doom for many reverse dies in the 1795 series, most of which retired with catastrophic die cracks. The first obverse use was the O-102 (T-26) die pair. Subsequent uses include the short-lived O-101 (T-28), the O-103 (T-29), and the year-ending O-107 (T-31) pairing. Cracked but never broken, the obverse die outlasted them all. It was the last Flowing Hair obverse struck prior to introduction of the Draped Bust design in 1796.

The O-106 die marriage was particularly short-lived. An interesting note in the Tompkins reference suggests the fatal die crack occurred during hardening of the reverse working die. No O-106 examples are known without at least some portion of the heavy, bisecting reverse die crack. Struck with the reverse rotated about 70° counterclockwise in relation to the obverse, this example displays bi-level sinking of the die with two levels of wear. Accordingly, the O-106 is best evaluated based on its obverse condition — seen here with sharpness that easily meets or exceeds the assigned grade. Gold and blue overtones enhance smooth, problem-free surfaces.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39222 Base PCGS# 6052

3610 1795 2 Leaves, O-107, T-31, R.5, Fine 12 PCGS. Tompkins Die State 1/1. Overton-107 (Tompkins-31) is the final die pair of the Flowing Hair half dollar design, represented here by its scarce early die state. Olive-gray toning deepens at the borders and contrasts with silver-gray color on the high points. Problem-free, original surfaces show only a few light abrasions and no Mint adjustment marks, making this a sharp and attractive example for the grade.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39223 Base PCGS# 6052

1795 Two Leaves Half, O-107a, Fine 12
Popular Cracked Reverse

- 3611** 1795 2 Leaves, O-107a, T-31, R.5, Fine 12 PCGS Secure. Tompkins Die State 1/4. The obverse was far into its fifth and final use when this O-107a (T-31) coin was struck, yet it was the previously unused reverse die that cracked and eventually failed, bringing 1795 half dollar production to a halt. The culprit was a strong die break running right to left on a downward angle from between OF and AMERICA. Faint reddish-tan undertones glow beneath deep, bluish-brown toning throughout both sides of this well-defined example. Struck on a good planchet without any Mint adjustment, the coin shows no distracting marks and has smoothly worn surfaces.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

- 3612** 1795 2 Leaves, O-107a, T-31, R.5, Fine 12 NGC. Tompkins Die State 1/4. A number of Flowing Hair varieties were cut short in their production by severe, bisecting reverse die cracks. Such cracks formed among 1794 varieties (O-101, O-105, and O-110), and 1795 die pairs (O-106, O-107, O-111). All are extremely popular with Overton collectors and early half dollar specialists. Improper annealing (hardening) of the dies is often blamed, although the frequency of breakage suggests other factors were at work as well. This O-107a example shows bi-level surfacing of the reverse along the bisecting die crack, and weakening of the right-hand stars opposite the initial crack formation. Pleasing warm-gray toning complements minimally marked, microgranular surfaces that have a few light adjustment marks at the upper-left reverse border.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

1795 Flowing Hair Half, XF Sharpness
O-108a, Two Leaves, Late Die State

- 3613** 1795 2 Leaves, O-108a, T-17, R.4 — Scratch — PCGS Genuine. XF Details. Tompkins Die State 4/3. The O-108a (T-17) late die stage includes numerous raised ridges at star 1 and several light die cracks encircling the obverse margins. Obverse and reverse rippling at the dentils is related to the edge lettering, which sits high on the rims. Smooth olive-gray surfaces display attractive iridescent colors when viewed at an angle. This pleasing coin is net graded by PCGS for a small, curved scratch between OF and AMERICA. A few inconspicuous obverse pinscratches mingle with Mint-related adjustment marks seen under magnification at the outer borders.

From The Lake Goodwin Collection.

- 3614** 1795 2 Leaves, O-109, T-16, R.4 — Cleaned — PCGS Genuine. VG Details. Tompkins Die State 3/1. The correct berry arrangement for O-109 (T-16) is 9 left, 8 right (called 8x8 in the Tompkins reference). Deep, dusk-gray toning covers an old cleaning. An obverse rim indent between 2 and 3 o'clock is possibly Mint-related, and may be a planchet clip. Solid VG or better details remain throughout both sides of this example, with a joined pair of dentils to the left of OF a quick and reliable way of confirming the variety.

From The Lake Goodwin Collection.

1795 O-110 Half Dollar, XF Details
Early Die State

- 3615** 1795 2 Leaves, O-110, T-21, R.3 — Environmental Damage — PCGS Genuine. XF Details. Tompkins Die State 1/1. Struck from perfect dies, this O-110 (T-21) shows areas of irregular deep, charcoal-gray toning that indicate damage from environmental factors. The underlying surfaces are generally smooth and free of all but the tiniest abrasions, and there are no adjustment marks on either side. Light, brownish-gray shades reveal nearly full definition on Liberty's hair, and the eagle is bold. We note minor strike weakness at the lower stars and date.
From The Lake Goodwin Collection.

- 3616** 1795/1795 2 Leaves, O-112, T-20, R.4 — Graffiti — PCGS Genuine Secure. VF Details. Tompkins Die State 3/1. A bold die crack at 12 o'clock travels through the lower-left serif of the R in LIBERTY to the top of Liberty's head, then continues downward to the ear. The O-112 (T-20) variety is best known for its widely doubled date, paired with a 2 Leaves reverse. This attractive example has some light graffiti in the right field that is difficult to discern without a loupe. Lilac and golden toning enhance well-defined silver surfaces. Mint luster remains in protected pockets and surrounds the stars and legends. Choice eye appeal exceeds assigned net grade.
From The Lake Goodwin Collection.

1795 Flowing Hair Half, Fine 12
Rare O-114 Variety

- 3617** 1795 2 Leaves, O-114, T-15, R.6, Fine 12 PCGS Secure. Tompkins Die State 1/1. The O-114 (T-15) variety is a classic rarity in the early half series. Just 20 to 30 pieces are confirmed, many with impairments or heavy circulation. Auction appearances are infrequent, seldom exceeding one or two examples over the course of several years. This pleasing O-114 displays smooth, light- to medium-gray surfaces with only a few small marks. A shallow, hair-thin abrasion below TY of LIBERTY, which requires a glass to view, is the sole mark of any note. The motifs are sharp for the Fine 12 level, and the coin is free of Mint adjustment. The Tompkins Condition Census for the variety is 64,25,25,15,12,12 (7/18).
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39230 Base PCGS# 6052

**1795 Flowing Hair Half, VF25
O-115, Scarce Die Marriage**

- 3618** 1795 2 Leaves, O-115, T-10, R.5, VF25 PCGS. Tompkins Die State 3/3. Struck from a late die stage, with weakness along the right edge and at the central reverse opposite a gathering of obverse adjustment marks. The dies may have been misaligned and not quite parallel when this coin was struck. The surfaces are otherwise sharp for the grade, and feature intermittent areas of reddish-gold and blue toning that accent dappled stone-gray fields and devices. The reverse die failed quickly, contributing to the lack of many high-grade O-115 (T-10) examples. This VF25 piece nears the variety's Condition Census.

From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39231 Base PCGS# 6052

**1795 O-116 Half, XF Details
Heavy Die Clashing**

- 3619** 1795 2 Leaves, O-116, T-11, R.4 — **Damaged** — PCGS **Genuine. XF Details.** Tompkins Die State 2/2. This O-116 (T-11) example has slight rim damage on the obverse that prevents PCGS from assigning a numeric grade. A ghostlike, incuse mirror image of UNITED is readily seen beneath LIBE of LIBERTY, and a row of die-clashed segments above UNITED confirm the late die stage — the second and final use of the obverse, and the sole use of the reverse die. Gunmetal-gray toning deepens at the borders. Although numerous adjustment marks crisscross the reverse, this coin is sharply struck.

From The Lake Goodwin Collection.

- 3620** 1795 2 Leaves, O-117, T-3, R.4 — **Repaired** — PCGS **Genuine. Fine Details.** Tompkins Die State 2/1. Minimal die clashing is seen beneath Liberty's chin, indicative of an early die stage. Later stages show retooling of the dies with portions of the wreath above Liberty's head. Several areas of repair and smoothing are detected beneath deep walnut-brown and blue toning. The design elements are sharply defined, and the coin is free of any Mint-related adjustments.

From The Lake Goodwin Collection.

**1795 Half Dollar, XF Details
O-117, Die Defect Line Beneath Y**

- 3621** 1795 2 Leaves, O-117, T-3, R.4 — **Polished** — PCGS **Genuine. XF Details.** Tompkins Die State 3/1. A curved, heavy die line beneath the right side of Y in LIBERTY is a reliable indicator of the O-117 (T-3) variety. The exact source for the defect is unclear: Either it is the curve of a mispunched letter or just a slip of the engraver's tool. This bright-silver example is boldly struck with only minor wear from circulation. The motifs show sharp details approaching the About Uncirculated level. A loupe reveals microscopic pitting and faint die clashing, plus a small rim nick beneath 9 and 5 in the date.

From The Lake Goodwin Collection.

- 3622** 1795 2 Leaves, O-117a, T-3, R.4 — **Tooled** — PCGS **Genuine. VG Details.** Tompkins Die State 4/2. A die bulge at the base of Liberty's neck shows clearly on this O-117a (T-3) coin, obscuring the bust truncation and extending above stars 12-15. The late-state die crack between star 15 and the 5 in the date is hidden by the bulge, as that upraised area is worn smooth. On the reverse, a sunken area opposite the bulge causes a soft strike above the eagle's head, and a group of adjustment marks occupy that weakly impressed area. Random tooling is visible with a lens above ERTY of LIBERTY and beneath the date. Natural warm-gray toning deepens slightly at the obverse border.

From The Lake Goodwin Collection.

**1795 O-117a Half Dollar, XF Details
Late State Die Bulge**

- 3623** 1795 2 Leaves, O-117a, T-3, R.4 — Scratch — PCGS Genuine. XF Details. Tompkins Die State 4/2. A pair of light scratches in Liberty's hair and some thin, curving scratches through the upper reverse legend contribute to the PCGS net grade. The coin is otherwise well-struck, toned in variegated shades of gunmetal-blue and gold. A noticeable obverse die bulge has formed across the bust truncation, related to the numerous die cracks in the area. Several light adjustment marks are seen at the lower-right reverse margin. *From The Lake Goodwin Collection.*

**1795 Half Dollar, XF Sharpness
Y Over Star, Scarce O-121 Variety**

- 3624** 1795 2 Leaves, Y Over Star, O-121, T-2, High R.4 — Cleaned — PCGS Genuine. XF Details. Tompkins Die State 2/1. The Y Over Star feature is clear on this sharply defined O-121 example. Deep-gray and brownish-silver shades overlay an old cleaning. A few light obverse nicks from circulation and die clashing from the eagle's wing under Liberty's chin are the sole obverse marks. A handful of short, Mint-made adjustment marks along the right reverse margin are seen only with a loupe. *From The Lake Goodwin Collection.*

**1795 O-121a Half Dollar, VF Details
Y Over Star, Late Die State**

- 3625** 1795 2 Leaves, Y Over Star, O-121a, T-2, R.6 — Repaired — PCGS Genuine. VF Details. Tompkins Die State 3/1. Microporosity from a past cleaning and a narrow area of repair in the right obverse field account for the net PCGS grade. Slate-gray color at the centers gives way to charcoal-gray toning at the margins of this late die state O-121a. The Y of LIBERTY is punched over an errant star. While earlier die states are scarce in their own right, the late stage with a strong radial die crack that runs between 9 and 5 to Liberty's ear is rare (R.6). This near-terminal die state is always in demand among Overton variety collectors. *From The Lake Goodwin Collection.*

**1795 Half, VG8
O-124 With CAC Label, Ideal Collector Coin**

- 3626** 1795 2 Leaves, O-124, T-12, R.5, VG8 PCGS. CAC. Tompkins Die State 1/1. An early die state, struck before the dies clashed. Overton-124 (Tompkins-12) is a scarce variety, with only one Uncirculated example known and a Condition Census that includes coins at the VF level. This smoothly worn example is an ideal "circulation cameo" — with attractive medium-gray fields and light, tan-gray toning on the raised elements. Faint blue and golden-gray undertones add eye appeal. The coin is CAC-endorsed for quality at the assigned grade, and shows virtually no obverse marks. The reverse has merging of the legend with the borders in a few areas, but only light abrasions are seen. Some sparse, minor adjustment marks are visible with a loupe. *From The Lake Goodwin Collection.* NGC ID# 24E7, PCGS# 39240 Base PCGS# 6052

- 3627** 1795 2 Leaves, O-125, T-13, R.4, Good 6 PCGS. Tompkins Die State 2/2. Pleasing medium-gray toning spreads evenly across the smooth, problem-free surfaces of this well-circulated O-125 half. Although struck from a late die state, signs of die clashing are lessened by wear. A diagnostic reverse die crack from the bottom rim shows only briefly at the dentils and ribbon knot. Several stars and parts of the reverse legend merge with well-worn rims. *From The Lake Goodwin Collection.* NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

**1795 O-125 Half Dollar
XF Sharpness, Bold Central Details**

- 3628** 1795 2 Leaves, O-125, T-13, R.4 — Repaired — PCGS Genuine. XF Details. Tompkins Die State 1/1. As often seen on the O-125 (T-13) variety, some isolated strike weakness is seen at the lower-left stars and on the reverse at ED STATES. This example shows inconspicuous smoothing and finely granular surfaces beneath dappled brown and gray toning, which explains the Details grade. Liberty's hair definition is strong, and the eagle displays most of its breast feathers. *From The Lake Goodwin Collection.*

- 3629** 1795 2 Leaves, Small Head, O-127, T-23, Low R.6, AG3 PCGS. Tompkins Die State 2/2. This O-127 Small Head makes a perfect addition to a low- to mid-grade set of early halves, where it is often a missing variety. Only about 30 pieces are known in all grades. Here, stars 9 and 10 are weak in the area of an obverse die crack that soon extends to the bridge of Liberty's nose. Earlier weakness at the left-hand stars and at LIB of LIBERTY are a legacy of the O-126 die crack below UNITED. *From The Lake Goodwin Collection.* NGC ID# 24E7, PCGS# 39249 Base PCGS# 6054

**1795 Half Dollar, Good 6
Problem-Free O-127 Small Head
Just 28 to 30 Pieces Confirmed**

- 3630** 1795 2 Leaves, Small Head, O-127, T-23, Low R.6, Good 6 PCGS. Tompkins Die State 1/2. Old-time early half dollar collectors remember Overton-127 as the Narrow Head variety, the three known Small Head varieties all come from the same master die: O-126 (T-22), O-127 (T-23), and O-128 (T-18). According to the Tompkins emission sequence, O-127 is the final Small Head die pair. This is an attractive and unimpaired example, one of only 30 or fewer pieces that are known of the variety. Smooth wear minimizes most marks on the pleasing, golden-gray surfaces. Weakness at the upper left stars and at UNITED corresponds to the inherited reverse die crack from O-126 (T-22).
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39249 Base PCGS# 6054

- 3631** 1795 2 Leaves, Small Head, O-128, T-18, High R.5, Good 4 PCGS. Tompkins Die State 1/1. Known only in mid-to-low circulated grades, the O-128 (T-18) variety was the first use of Robert Scot's short-lived Small Head design. The variety is scarce but not rare in a traditional sense, and its Small Head status attracts many type and variety specialists. On this Good example, all motifs are fully outlined and marks are limited to some fine hairlines plus some small pinpricks near the reverse border. Bluish-gray toning contrasts with light-gray motifs.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39251 Base PCGS# 6054

**1795 Flowing Hair Half, VF25
S Over D Variety, O-129, CAC**

- 3632** 1795 2 Leaves, Second S Over D, O-129, T-7, R.5, VF25 PCGS. CAC. Tompkins Die State 1/4. High-end for its grade, this attractive VF coin is the O-129 (T-7) variety with one of the most popular mint blunders of the Flowing Hair series. After entering STATED in the working die, the engraver realized the error and punched the S over the incorrect D. A similar mistake occurs on the O-113 (T-14) variety, where the A in STATES was punched over an incorrect E. This is an attractive example of the S Over D dies, with luster remaining in protected areas throughout both sides. A glass reveals a handful of Mint-made adjustment marks on the obverse — all are short and hardly visible in-hand. Bluish-gray toning overlays golden fields for outstanding eye appeal.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39259 Base PCGS# 6052

**1795 Flowing Hair Half, XF Details
O-129, Second S Over D in STATES**

- 3633** 1795 2 Leaves, Second S Over D, O-129, T-7, R.5 — Tooled — PCGS Genuine. XF Details. Tompkins Die State 1/5+. This O-129 (T-7) example is sharply defined, with light, stone-gray toning and the second S in STATES clearly struck over the D. A blurry reverse die crack from the bottom edge to the ribbon knot continues through the eagle's head to the uppermost leaves, but it does not reach the top edge. The crack is indistinct through much of its path, in part because of tooling in the fields. Tiny tool marks follow the dentils completely around the reverse border, and are seen over LIBERTY.
From The Lake Goodwin Collection.

**1795 Flowing Hair Half Dollar, VF30
O-131, T-9, Sharply Defined and Attractive**

- 3634** 1795 2 Leaves, O-131, T-9, High R.4, VF30 PCGS. Tompkins Die State 1/3. Overton-131 (Tompkins-9) is a scarce die pair in problem-free VF condition, such as this well-struck example. Golden-gray centers deepen to bluish-gray shades at the margins. Liberty's hair strands retain strong definition, and approximately 60% of the feather definition is seen on the wings. Other motifs show only even wear on the high points. The fields are smooth and minimally marked, lacking any sign of adjustment at the Mint.
In this third use of the obverse die, which was also employed on O-129 (T-7) and O-130 (T-8), die lapping diminishes a blurry die crack from the lower hair curls through the ear to behind Liberty's eye. The reverse die is unique to O-131, where it is in its late stage with a die crack through the right side of the first A in AMERICA. A faint crack above CA encircles the ribbon ends to the tops of UNIT, and a small rust lump sits on the tip of the highest olive leaf nearest O in OF. Faint remnants of die clashing are seen on both sides.
From The Lake Goodwin Collection. NGC ID# 24E7, PCGS# 39243 Base PCGS# 6052

**END OF THE LAKE GOODWIN
COLLECTION OF EARLY HALF DOLLARS**

ADDITIONAL EARLY HALF DOLLARS

1794 O-101, T-7 Half Dollar, VG8 The Only 'Common' 1794 Variety

- 3635** 1794 O-101, T-7, High R.3, VG8 PCGS. The O-101 is rated R.3 while all other 1794 die marriages are rated R.5 or higher. According to rarity ratings in Steve Tompkins' *Early United States Half Dollars*, between 500 and 600 1794 half dollars exist, including 300 to 400 examples of the O-101. This variety is ideal for the date collector or first-year type collector. The obverse die is perfect and the reverse die shows the initial crack through the F in OF, and the second crack from the rim to the leaves between the D and S. Pale blue and tan overtones appear on both sides of this light gray half dollar that exhibits trivial circulation marks as expected for the grade.
From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101a Half Dollar, VG10 Clear Date and Legends

- 3636** 1794 O-101a, T-7, High R.3, VG10 NGC. The die crack through the F in OF extends left to the final S in STATES on this late die state coin. The surfaces are lightly marked, consistent with the grade. Bright slate-gray interiors cede to olive-gold border toning. The dentils are complete around each side except for the obverse from 3 to 6 o'clock, where they grow weak. The central devices retain some of the major details.
From The Terry Brand Estate, Part XII. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-104 Half Dollar, Fine Details

- 3637** 1794 O-104, T-11, R.5 — Repaired, Whizzed — NCS. Fine Details. All border legends and major design elements are clear on this piece, although the surfaces are finely granular and unnaturally mark-free due to the repair work mentioned on the holder insert. The interiors are dusky smoke-gray in color, ceding to deeper olive hues around the borders. Overton-104 is a better variety, rated R.5 and seldom seen outside of the Brand Estate coins.
From The Terry Brand Estate, Part XII.

1794 O-104 Half Dollar, VF Details

- 3638** 1794 O-104, T-11, R.5 — Damaged — NCS. VF Details. The surfaces are brushed to remove contact marks, but the evidence is hidden beneath mottled olive toning on each side. Remnants of adjustment marks are visible along the lower-left obverse border, but the dentils are otherwise complete around both sides. The central devices retain most of the major details. Overton-104 is a scarce variety in any condition.
From The Terry Brand Estate, Part XII.

1794 Half Dollar, VG Details Rare O-106 Die Pairing

- 3639** 1794 O-106, T-4, Low R.6 — Repaired — PCGS Genuine Secure. VG Details. Overton-106 is a rare variety. For many collectors, it is enough to own any example and grade is not all that important. Both sides of this glossy coin appear to have been brushed and cleaned, although the most detrimental repair work appears on the portrait of Liberty and in the adjacent right field. Attractive toning on each side casts the margins in blue-green and gold color, with light gold and lilac in the centers.
From The Terry Brand Estate, Part XII.

1795 Two Leaves Half Dollar, VF30 O-108a, T-17, High-End for the Grade

- 3640** 1795 2 Leaves, O-108a, T-17, R.4, VF30 NGC. CAC. Tompkins Die State 3/3. This die pair features the berries arranged 9x8 on the reverse, with two inside the wreath under the left wing, one outside, and none outside the wreath under the right wing. This VF30 example is in a late die state with cracks through 179, between the bust and star 15, and above AME(RICA). Softness on the eagle is a reflection of strike more than wear. The coin is clearly high-end for the grade with minimal friction on the portrait, strong definition on the peripheral elements, smooth fields, and original lavender-gray patina. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

- 3641** 1795 2 Leaves, O-109, T-16, R.4, Fine 15 PCGS. A pleasing Flowing Hair type coin. The obverse border displays golden-brown toning, the reverse margin exhibits powder-blue, and the design recesses are charcoal-gray, but the unblemished surfaces are predominantly stone-white. Struck from widely rotated dies. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

**1795 Half Dollar, Very Fine
O-113a, A Over E in STATES**

- 3642** 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VF20 PCGS. CAC. The A over E in STATES variety is mentioned in the *Guide Book* although without a separate listing. The large die lump beneath the bust tip makes the obverse equally distinctive. A nicely detailed example bathed in deep aquamarine patina. Marks are limited to a cluster of hair-thin lines between the rim and stars 9 to 12. Certified in an old green-label holder. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

- 3643** 1795 2 Leaves, Second S Over D, O-129, T-7, R.5, Fine 12 PCGS. Tompkins Die State 1/4. The STATES/D variety is noted in the *Guide Book*, though it lacks a separate line listing. This stone-white example is evenly defined save for fading on the left obverse dentils and the two leaves at the upper ends of the wreath. The reverse displays minor peripheral adjustment marks, as issued. NGC ID# 24E7, PCGS# 39259 Base PCGS# 6052

- 3644** 1801 O-101, T-2, R.3, VF20 NGC. Tompkins Die State 3/3. The clashed obverse shows a crack through the E in LIBERTY, and severe rust defects appear in the left-reverse field. The 1801 is the first Heraldic Eagle half dollar and a semikey in that short set. This well-circulated example exhibits gold and stone-gray patina with scattered abrasions on each side. The portrait maintains good detail. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1805/4 O-102 Half Dollar, XF40
Guide Book Overdate**

- 3645** 1805/4 O-102, T-5, R.3, XF40 PCGS. One of three 1805/4 die marriages, all of which exhibit substantial remnants of the underdigit 4. This nicely defined example displays deep dove-gray toning throughout the fields. The high points are stone-white. Unexpectedly unabraded except for a unobtrusive horizontal line beneath the E in LIBERTY. Softness of strike is confined to the eagle's shield. NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

**1805 O-104a Half, Fine 15
Rare Late Die State**

- 3646** 1805 O-104a, T-10, High R.6, Fine 15 PCGS. Tompkins Die State 5/4. The later die state of O-104 is both dramatic and distinctive. There are two co-joined rim breaks; a retained cud over star 10 that extends to a point of star 9, and a full rim break over stars 11 and 12. This coin has steel-gray fields and lilac-red high points. The right obverse field is moderately abraded. Central weakness is evident on both sides, as is weakness over AME, exactly opposite the rim breaks.
Ex: Julian Leidman (3/1979); Jules Reiver Collection (Heritage, 1/2006), lot 22528; Brad Higgins (5/2006); Westmoreland County Collection / FUN Signature (Heritage, 1/2008), lot 1354, which realized \$4,600. NGC ID# 24EG, PCGS# 39276 Base PCGS# 6069

- 3647** 1805 O-112, T-2, R.2 — Whizzed — NGC Details. AU. Tompkins Die State 1/1. The most often seen variety for the year has the tip of the 5 close to the bust, star 1 close to the curl, and the furthest arrow under the right foot of the N in UNITED. Well-detailed surfaces were whizzed at some point but have developed pleasing gunmetal-blue patina.

- 3648** 1806 Knob 6, Large Stars, O-105a, T-5, R.2, XF40 PCGS. CAC. The T in LIBERTY is boldly double punched, and a die line connects the tail to the fletchings. Ice-blue and golden-tan coloration dominates, with noticeable luster and a few softly impressed areas. Liberty's neck and the fields display thin marks beneath the toning.
Ex: Long Beach Signature (Heritage, 2/2008), lot 531; FUN Signature (Heritage, 6/2008), lot 965; FUN Signature (Heritage, 1/2010), lot 3421, which realized \$1,725. NGC ID# 24EJ, PCGS# 39305 Base PCGS# 6075

- 3649** 1806 Knob 6, Small Stars, O-107a, T-3, High R.4, XF40 PCGS. CAC. The high points are cream-gray, though deep gunmetal toning is otherwise prevalent. This nearly unblemished example shows softness of strike opposite the bust tip, as usual for this better die marriage. The reverse exhibits a hint of granularity. NGC ID# 24EJ, PCGS# 39308 Base PCGS# 6075

**1806 O-109, T-15 Half Dollar, AU53
Appealing Pointed 6, No Stems Example**

- 3650** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU53 NGC. Tompkins Die State 2/3. Lightly clashed above the date, and all reverse legends are drawn toward the rims. Overton-109 garners its own unique entry in the *Guide Book* as the only Pointed 6, No Stems variety for the 1806 half dollar. It is also the most collectible die pair for the year. This well-struck, minimally worn example is smooth and richly toned in violet-gray and cobalt-blue patina. Great eye appeal. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1806 Half Dollar, VF20
6 Over Inverted 6, O-111'b'
Cud Over UN in UNITED

- 3651** 1806 6 Over Inverted 6, O-111'b', T-11, R.7, VF20 PCGS. Tompkins Die State 4/7. The terminal state of this die pair, significant for the dual reverse cuds over the UN and E in UNITED. Very rare as such, with only one other example (graded VF30 by PCGS) listed by Herrman in his Spring 2018 Revision. Even wear is seen over each side. The tan-brown and lilac surfaces are remarkably free from detractors for a coin in this grade.
Ex: Henry Hilgard (8/2004); Westmoreland County Collection of Early Bust Halves / FUN Signature (Heritage, 1/2008), lot 1377, which realized \$3,737.50. NGC ID# 64WJ, PCGS# 148730 Base PCGS# 6078

- 3652** 1806 Pointed 6, Stem, O-115, T-17, R.1 — Obverse Scratched — NGC Details. AU. An accurately graded O-115 Draped Bust type coin that shows trivial high-point friction across the devices with original luster around the margins. Both sides of this lovely coin showcase vivid, concentric bands of toning, including rose-gold, mint-green, ocean-blue, lilac-gray, and beige. Most of the design elements are well-defined, the exceptions being mainly border stars. There is an unfortunate vertical scratch near the end of Liberty's bust, but the coin is otherwise problem-free. The scratch is hardly noticeable at first glance.

1806 Pointed 6, Stem Half, XF Details
Rare Overton-122

- 3653** 1806 Pointed 6, Stem, O-122, T-25, R.6 — Damage — PCGS Genuine. XF Details. Tompkins Die State 1/2. A bold vertical crack between the tail and fletchings attributes this rare die marriage. This sharp silver-gray example would appear upon first glance to rank highly within the Condition Census, but close evaluation reveals flattened areas near Liberty's profile and opposite on the reverse near the E in AMERICA.

BUST HALF DOLLARS

1809 O-114a Bust Half, XF40
Important Late State Example

- 3654** 1809 Normal Edge, O-114a, R.5, XF40 PCGS Secure. Rich old-silver toning deepens to smoke-gray shades around the margins throughout both sides of this attractive and scarce O-114a Bust half. The characteristic weak chin on Liberty reveals light planchet striations, while weakness on the eagle's left (facing) wing shows vertical file marks that contribute to a soft central strike. The diagnostic bisecting die crack runs vertically through the shield and eagle's neck to the edge above the TE in STATES, and meanders through the tail feathers, arrow fletchings, and talons before grazing the lowest olive leaf to the bottom edge. The finest O-114a in Steve Herrman's Spring 2018 Census grades XF45, with several examples tied at that level. PCGS# 39401 Base PCGS# 6092

- 3655** 1812 Large 8, O-105, R.1, AU58 NGC. CAC. Technically a mint error, this half dollar is struck a few degrees off-center toward 4 o'clock. The obverse dentils are absent between 3 and 6 o'clock, and unusually broad near 10 o'clock. A later die state example, though without the eventual radial crack through the 2 in the date. The smooth and satiny surfaces display dusky cobalt-blue, lavender-red, and dove-gray toning. NGC ID# 24EW, PCGS# 39449 Base PCGS# 6100

1812 Large 8 Half Dollar, MS62
O-109a, Die Defects Near Wingtip

- 3656** 1812 Large 8, O-109a, R.2, MS62 PCGS. Dull die lumps and ridges near the olive leaves identify Overton-109a. Some would call it O-109, since the dentilation is complete, but we consider the curious die markings to be more worthy of an Overton subvariety than die-worn dentils. This stone-gray representative exhibits vibrant luster and exemplary surfaces. Struck from double-clashed dies. NGC ID# 24EW, PCGS# 39456 Base PCGS# 6100

**1814/3 O-101a Half Dollar, AU58
Smooth and Sharply Defined**

3657 1814/3 O-101a, R.2, AU58 PCGS. The sole die marriage for the overdate, long listed in the *Guide Book*. The top of a 3 extends through both sides of the top of the 4. This briefly circulated example exhibits at least four sets of clash marks, but the steel-gray, sea-green, and pearl-white surfaces are surprisingly free from abrasions. Cracked through the stars, date, and UNITED, as usually seen.

3658 1820/19 Curl Base 2, O-102, R.1 — Questionable Color — PCGS Genuine. Unc Details. Powder-blue, gold, lilac, and tan-brown toning embraces this well-defined and satiny representative. Minimally hairlined, and abrasions of notice are absent. As the sole Curl 2 overdate die marriage, Overton-102 receives its own *Guide Book* listing.

3659 1821 O-103, R.2, AU55 PCGS. CAC. Defective A and E punches were used for the O-103 reverse die, showing broken lower serifs. This Choice AU coin displays golden-brown and sea-green toning in the peripheries with champagne-tinted pearl-gray color across the interiors. Luster remains in the fields and the design elements are sharply detailed.

Ex: *San Francisco Signature* (Heritage, 3/2014), lot 10346. NGC ID# 24FF, PCGS# 39578 Base PCGS# 6128

3660 1823 O-104, R.3, AU58 PCGS Secure. Liberty's profile is dramatically strike doubled on the present near-Mint Capped Bust type coin. Lightly dappled steel-gray and wheat-gold toning visits partially lustrous and unblemished surfaces. Per Glenn Peterson, the extension of the lowest horizontal shield line past the right shield border is diagnostic for Overton-104. NGC ID# 24FJ, PCGS# 39607 Base PCGS# 6131

3661 1824 Over Various Dates, O-103, R.1, AU58 PCGS. Described by Beistle as "a jumbled mass of recuttings," this *Guide Book* variety was deemed an 1824/2/0 by Breen in 1966. A lustrous Borderline Uncirculated example with light butter-gold toning save for a blush of powder-blue beneath UNUM. Thin marks near Liberty's profile and jaw merit passing mention. NGC ID# 24FK, PCGS# 39646 Base PCGS# 6138

**1824 O-104 Half Dollar, MS64
Lustrous and Unmarked, CAC Seal**

3662 1824 O-104, R.2, MS64 NGC. CAC. A small die lump beneath the second U in PLURIBUS combines with a normal date to confirm its status as Overton-104. This handsome half dollar has medium peach-gold, russet-brown, and powder-blue patina. The lustrous surfaces appear free from abrasions. A good strike despite blending on a few stars. Certified in a former generation holder. CAC: 16 in 64, 12 finer (7/18). NGC ID# 24FK, PCGS# 39624 Base PCGS# 6137

**1826 O-110 Half Dollar, Colorful MS64
Early Die State**

3663 1826 O-110, R.2, MS64 PCGS Secure. This early die state coin retains subtle reflectivity in the obverse fields, especially around the borders. The effect is less pronounced on the reverse. Both sides have vivid ocean-blue toning around the margins that complements less-intense lavender and mint-gold hues elsewhere. The strike is sharp. Neither side exhibits distracting abrasions and the eye appeal is outstanding. NGC ID# 24FM, PCGS# 39679 Base PCGS# 6143

3664 1827 Square Base 2, O-133, R.4, MS61 NGC. CAC. Ex: "Col." E.H.R. Green. Rich dove-gray patina encompasses this better-variety Capped Bust half dollar. No marks are apparent across the subdued surfaces. The die line above the right (facing) claw is the most prominent diagnostic for O-133, along with repunching beneath the lower inner point of star 1.

Ex: "Colonel" E.H.R. Green; *Green Estate*; *Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.*; *Eric P. Newman @ \$3.00*; *Eric P. Newman Numismatic Education Society*; *Eric P. Newman Collection, Part II* (Heritage, 11/2013), lot 33604, which realized \$3,525. NGC ID# 483X, PCGS# 39732 Base PCGS# 6144

**1828 O-117a Half Dollar, MS64
Square Base 2, Small 8s, Large Letters**

3665 1828 Square Base 2, Small 8s, Large Letters, O-117a, R.1, MS64 PCGS. The serif on the C in the denomination is recut, and a die crack arcs over STATES. This Choice Uncirculated example is tied with a handful of others atop the Condition Census for the O-117a variety and die state. Two O-117 halves are graded higher, according to Stephen Herrman (Spring 2018). Well-struck and impeccably preserved, each side is beautifully toned in violet, green, gold, blue, and russet patina. The peripheral elements are drawn to the rims. NGC ID# 4D7L, PCGS# 39772 Base PCGS# 6151

3666 1830 Small O, O-110'a', R.4, MS63 PCGS Secure. Richly toned green and golden-brown with gunmetal-gray on Liberty's face, neck, and drapery. Crisply struck and unabraded with satin luster and good eye appeal. Dr. Glenn Peterson identifies the reverse die as the "High, tall M." The obverse die is distinguished by a pointed hair curl beneath the TY in LIBERTY. The scarce late die state with a die crack through the upper left stars.

Ex: *FUN Signature* (Heritage, 1/2011), lot 3746, which realized \$2,185. NGC ID# 24FU, PCGS# 39821 Base PCGS# 6156

**1835 O-107 Half Dollar, Frosty MS64
In an Early Generation Holder**

- 3667** 1835 O-107, R.1, MS64 NGC. There is faint repunching on the 5 in the date, and a vertical line extends off the right corner of the shield. This is an available variety, ideal for type purposes, with frosted near-Gem surfaces. Both sides showcase a sharp strike and original golden toning. Grade-limiting abrasions are minimal. Housed in a prior generation holder. NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

**1835 O-109 Half Dollar, Satiny MS63
Original Luster, Pastel Toning**

- 3668** 1835 O-109, R.2, MS63 PCGS Secure. Warm golden toning yields tinges of lilac and mint-green throughout on this Select Overton-109 half dollar. The strike is sharp in the centers and only slightly weak around portions of the peripheries, where die erosion also blurs the dentils. Abrasions are minimal, mainly just light grazes and scuffs that appear beneath a loupe. The luster is original. An excellent Capped Bust type coin. NGC ID# 24FZ, PCGS# 39935 Base PCGS# 6168

REEDED EDGE HALF DOLLARS

**1836 Reeded Edge Half Dollar, XF45
GR-1, Famous Key Date**

- 3669** 1836 Reeded Edge, GR-1, R.2, XF45 PCGS. The famous key date with a low reported mintage of 1,200 coins, all of which were struck from a single set of dies using a steam-powered press for the first time. Toned problem-free surfaces retain good design detail, though the strike is a bit softer on the reverse. There are a couple of pin scratches in the left-obverse field, but no other marks merit mention. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

- 3670** 1838 GR-10, R.3, MS61 NGC. Dick Graham lists an MS61, possibly this coin, second on his Condition Census for the conditionally challenging GR-10 die variety. The obverse shows cracks below star 1, through the base of 183, and from the curls through star 12. None appear on the reverse. Lustrous with gray-gold patina, the only mark of note is a scrape above the eagle's head. Strongly struck throughout. NGC ID# 24G5, PCGS# 531091 Base PCGS# 6177

- 3671** 1839 Large Letters, GR-6, R.3, MS62 PCGS. A dusky silver-gray type representative. The original surfaces show few marks and the satin luster is slightly subdued. The borders show intermittent incompleteness of strike, but the centers are sharply defined. PCGS# 531103 Base PCGS# 6179

SEATED HALF DOLLARS

**1839 Seated Half Dollar, AU58
No Drapery**

- 3672** 1839 No Drapery, WB-101, Die Pair 4, R.4, AU58 NGC. The only diagnostics are two die lines near Liberty's heel. The 1839 No Drapery half dollar is a highly collectible first-year and single-year type. This near-Mint State example is fully toned in rich blue, tan, and violet-gray patina. The obverse is strong, and the only apparent softness on the reverse is on the eagle's left wing and leg feathers. Smooth and appealing. Census: 30 in 58, 24 finer (7/18). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

**1842 Half Dollar, MS63
Small Date, Large Letters**

- 3673** 1842 Small Date, Large Letters, WB-101, Die Pair 6, R.3, MS63 NGC. This example is boldly struck on both sides, with semiprooflike fields and minimal abrasions for the grade. Mottled shades of gunmetal-blue, lavender, and amber-gray toning blanket the surfaces, delivering a distinct old-time appeal. The die marriage is readily attributed, courtesy of the many prominent reverse cracks. Census: 4 in 63 (2 in 63+), 2 finer (7/18).
Ex: Long Beach Signature (Heritage, 1/2015), lot 3854, which realized \$2,585. NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

- 3674** 1843-O WB-101, Die Pair 7, R.3, MS62 PCGS. Subtle golden tones visit the lustrous, satiny surfaces of this Uncirculated early New Orleans half dollar. The strike is sharp except on stars 8, 9, and 10, and abrasions are minimal. The 1843-O half dollar is seldom available in Mint State. Population: 7 in 62, 23 finer (7/18).
Ex: FUN Signature (Heritage, 1/2009), lot 2856, which realized \$1,265. NGC ID# 24GY, PCGS# 572023 Base PCGS# 6244

**1844 Seated Half Dollar, MS64+
A Rarity in This Grade**

- 3675** 1844 MS64+ NGC. WB-Unlisted, Die Pair 10, R.3. Both dies are peripherally cracked on this variety, and there is minute repunching on the date. This coin is fully struck and satiny with no major abrasions. Both sides display deep amber, russet, olive, and golden toning. The 1844 half dollar is a rarity in this condition, and only a few finer pieces are known. Census: 4 in 64, 3 finer (7/18). NGC ID# 24GZ, PCGS# 6245 Base PCGS# 6245

- 3676** 1844-O WB-101, Die Pair 10, R.5, MS62 PCGS. Showing minimal evidence of toning, this Mint State 1844-O half dollar yields frosty, brilliant cartwheel luster. This late die state of the obverse shows Liberty's foot support partially effaced by die lapping, with extensive cracking around the entire periphery. The strike is sharp. Population: 8 in 62, 17 finer (7/18).
Ex: *Baltimore Signature* (Heritage, 3/2009), lot 2044, which realized \$1,955. NGC ID# 24H2, PCGS# 572030 Base PCGS# 6246

**1844-O Doubled Date Half, XF40
Dramatic Guide Book Variety
WB-103, FS-301**

- 3677** 1844-O Doubled Date, WB-103, FS-301, Die Pair 22, R.4, XF40 PCGS. The famous misplaced date variety featured on the cover of the 1993 Wiley-Bugert reference. The dramatic variety is photographed in the 2019 *Guide Book* on page 220. This example has a steel-gray obverse center, though the remainder of the coin is golden-brown. Thorough study reveals wispy marks on the lower-right obverse field. Population: 8 in 40, 20 finer (3/14).
Ex: *Central States Signature* (Heritage, 4/2014), lot 4392, which realized \$2,937.50. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

- 3678** 1845 MS62 PCGS. WB-Unlisted, Die Pair 1, R.3. The 8 and 4 in the date are connected by an unfinished area on the obverse die and repunched slightly north, representative of this previously unlisted variety in the 1993 Wiley, Bugert Seated half reference. Untoned and brilliant with thickly frosted surfaces, the present lustrous example shows only minor grazes and small marks. The strike is usually sharp on 1845 halves, and this coin is no exception. Scarce in mint condition. Population (all 1845 varieties): 5 in 62, 12 finer (7/18). NGC ID# 24H3, PCGS# 6248

- 3679** 1848 WB-101, Die Pair 14, R.4, MS61 NGC. A distinctive peripheral die crack runs along the left obverse border between the stars and the rim, from star 1 past star 6. This Uncirculated example is conditionally scarce, and it has delightful semiprooflike fields. The strike is sharp, and neither side exhibits mentionable toning. Abrasions are light and unobtrusive. Census: 1 in 61, 28 finer (7/18). PCGS# 572062 Base PCGS# 6260

- 3680** 1849 MS62 NGC. WB-Unlisted, Die Pair 10, R.3. Uncirculated examples of the 1840 Seated half dollar are scarce. This piece displays well-struck motifs and satiny mint luster. Warm golden toning embraces each side, and only light surface abrasions are observed. Census: 5 in 62, 30 finer (7/18). NGC ID# 24HE, PCGS# 6262 Base PCGS# 6262

**1849 FS-301 Half Dollar, XF45
Repunched and Misplaced Date**

- 3681** 1849 Repunched Date, WB-102, FS-301, Die Pair 6, R.5, XF45 ANACS. Bill Bugert writes that WB-102 is "a key variety in the series. ... Finding one of these in any condition would be a centerpiece of a Liberty Seated half dollar collection." The date is repunched northwest with fragments of all four digits showing. Additionally, the base of a 9 protrudes south from the rock. Broad ocean-blue borders encompass gunmetal-gray centers. Smooth save for ticks above the upper arrowhead. Housed in a small-sized holder. NGC ID# 24HE, PCGS# 409890 Base PCGS# 6262

**1850 Half Dollar, MS63
Semiprooflike, Nearly White**

- 3682** 1850 WB-101, Die Pair 4, R.3, MS63 NGC. A hint of golden toning visits the margins, but most collectors would regard this semiprooflike Seated half as brilliant. The strike is sharp except on the eagle's left (facing) ankle. Liberty has a matte appearance, as coined from a rusted obverse die. Many 1850 half dollars were melted by speculators, since the bullion content exceeded face. Housed in a circa-2000 holder. Census: 10 in 63, 6 finer (7/18). NGC ID# 24HG, PCGS# 572074 Base PCGS# 6264

- 3683** 1851 WB-101, Die Pair 1, R.4, AU50 ANACS. The flag of the final 1 in the date is repunched. This well-detailed 1851 Seated half displays mostly bright, pearl-gray surfaces but has flecks of russet and sea-green toning around the borders. Scattered hairlines are visible in the fields. The strike is sharp. NGC ID# 24HJ, PCGS# 572078 Base PCGS# 6266

- 3684** 1851 WB-101, Die Pair 6, R.4, AU50 PCGS. The crack through Liberty's head is not yet present on this piece, although the other diagnostics for the variety are apparent with a loupe. Dusky olive-gold patina blankets each side, although little wear is apparent. Several border stars are incomplete but the overall sharpness is outstanding. Population: 7 in 50, 66 finer (7/18). NGC ID# 24HJ, PCGS# 572078 Base PCGS# 6266

3685 1851-O WB-101, Die Pair 1, R.4, MS61 PCGS. This radiantly lustrous, mostly untuned Mint State example displays only light, unobtrusive abrasions. The obverse die is lapped, evident on Liberty's foot support, which is partially effaced. Eye appeal is pleasing for the grade. Housed in a green label holder. Population: 2 in 61, 28 finer (7/18). NGC ID# 24HK, PCGS# 572082 Base PCGS# 6267

3686 1851-O WB-101, Die Pair 3, R.4, MS63 NGC. A conditionally rare example of the 1851-O half dollar. This Select coin displays a full strike and semiprooflike fields. Gold and russet toning covers much of each side. Abrasions are minimal. An outstanding example of this No Motto issue. Census: 5 in 63, 11 finer (7/18). NGC ID# 24HK, PCGS# 572082 Base PCGS# 6267

3687 1852 WB-101, Die Pair 1, R.4, MS61 PCGS. The 1852 Seated Liberty half dollar is scarce in Mint State. This piece is attractive for the grade. Golden and amber toning warms satiny luster on each side, and the design elements are well brought up. No singular abrasions are seen. Housed in a green label holder. Population: 6 in 61, 44 finer (7/18). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

3688 1854 Arrows, WB-101, MS64 PCGS. Liberty's temple and the adjacent stars are weak, but this Choice 1854 Arrows half dollar is otherwise well-struck and attractive. Softly frosted luster yields original russet-gold toning and reveals only a few faint surface grazes. Eye appeal is outstanding for the grade. Finer examples are rarely offered. Population: 35 in 64 (1 in 64+), 12 finer (7/18). NGC ID# 24JL, PCGS# 572087 Base PCGS# 6279

3689 1855 Arrows, WB-101, MS63 NGC. A coin that presents as brilliant, this Select 1855 Arrows half dollar actually has a delicate golden hue over each side. The strike is sharp and abrasions are trivial. This issue is a rarity in the current grade and may be out of reach for some collectors in finer condition. Census: 11 in 63, 22 finer (7/18). NGC ID# 64Y6, PCGS# 572089 Base PCGS# 6281

3690 1856-O Repunched Date, WB-103, Die Pair 14, R.2, MS63 NGC. CAC. The 56 is repunched south, not to be confused with the WB-102, FS-301 variety which shows repunching *above* the 56. An early die state with recutting visible beneath the 6 in addition to the usually evident recutting below the upper curve. A lustrous and nicely struck representative with blushes of lavender toning near the date. PCGS# 572096 Base PCGS# 6288

3691 1857-S Large S, WB-101, Die Pair 1, R.4, Fine 15 PCGS. Deep stone-gray and almond-gold toning embraces this microgranular and faintly hairlined example. The reverse displays a few small charcoal freckles. No marks are of singular notice. The 1857-S is even scarcer than implied by its mintage of 158,000 pieces. For example, NGC has certified only 37 pieces in all grades (7/18). PCGS# 572105 Base PCGS# 6292

3692 1859-S Medium S, WB-102, Die Pair 6, R.3, MS62 NGC. A few glimpses of golden-brown toning appear at the rims, but essentially the coin is brilliant-white throughout the fields and devices. A full strike shows no weakness on any of the stars or Liberty's portrait. The eagle's plumage is razor-sharp. Bright mint luster covers both sides, which display only a few shallow marks and wispy lines that define the grade. A scarce coin in Mint State, as are all Seated halves from the 1840s through the 1860s. Census: 4 in 62, 25 finer (7/18). *Ex: Long Beach Signature (Heritage, 6/2015), lot 4524, which realized \$1,880.* NGC ID# 24J2, PCGS# 524239 Base PCGS# 6298

1860-S Half Dollar, MS63 Large S Mintmark, Lightly Toned

3693 1860-S Large S, WB-101, Die Pair 1, R.3, MS63 PCGS. The 1860-S is known with either a Large S or a Medium S mintmark. Both varieties are designated as Rarity-3 by Bill Bugert, but in our experience the Large S is more often encountered in better grades. This well-struck and coruscating half dollar is lightly toned despite occasional glimpses of mauve patina. Only a few small marks emerge beneath a lens. Population: 10 in 63, 9 finer (7/18). PCGS# 572142 Base PCGS# 6301

3694 1861 MS64 NGC. WB-101. The substantial mintage of 2.88 million pieces makes the 1861 a logical choice for a No Motto half dollar. The surfaces on this piece display undiminished luster and a light, even layer of gray-golden patina. Fully struck throughout. Slightly abraded. NGC ID# 24J7, PCGS# 6302 Base PCGS# 6302

1861-S Half Dollar, MS63 Smooth and Lustrous

3695 1861-S Large S, WB-101, Die Pair 3, R.3, MS63 PCGS. Although the 1861 mintage in San Francisco consisted of 939,500 pieces, this issue is very scarce in Mint State. Faint tan toning visits this well-struck and thoroughly lustrous example. The obverse is clashed, but no marks are apparent. *Ex: New York Signature (Heritage, 11/2013), lot 4032, which realized \$2,820.* NGC ID# 24J5, PCGS# 572149 Base PCGS# 6306

3696 1863-S Small Broken S, WB-102, Die Pair 2, R.3, MS62 NGC. The 1863-S half dollar as a date is elusive in attractive Uncirculated condition. This piece is in a collectible grade but does not show the heavy abrasions that are expected for the MS62 level. Neither side is toned and the mint luster is satiny. The design elements are boldly defined. Census: 16 in 62, 23 finer (7/18). PCGS# 572157 Base PCGS# 6310

3697 1864-S Small Wide Broken S, WB-103, Die Pair 4, R.3, AU58 NGC. The 1864-S half dollar is a great rarity in Mint State, and AU coins are themselves elusive. This near-Mint piece displays excellent sharpness and bright, partially lustrous surfaces with no toning. Scattered light marks accompany the grade. As is diagnostic of the variety, the reverse displays heavy die cracks along the lower border. Census: 14 in 58, 14 finer (7/18). PCGS# 572162 Base PCGS# 6312

3698 1865 WB-101 MS62 NGC. Although more than 511,000 half dollars were struck at Philadelphia in 1865, this issue is conditionally scarce in Mint State today. The present coin displays untuned, satiny surfaces and well-struck design elements. Light grazes in the luster limit the grade but none pose a singular distraction. Census: 3 in 62, 26 finer (7/18). NGC ID# 24JF, PCGS# 572164 Base PCGS# 6313

**1867-S Half Dollar, MS63
Well-Struck, Lightly Toned**

- 3699 1867-S WB-103, Die Pair 4, R.3, MS63 NGC.** Ex: Dick Osburn Collection. An early die state with prominent clash marks but no evidence of lapping. An interesting die line protrudes from the eagle's lower beak. Light yellow-gold toning visits this smooth, lustrous, and intricately struck representative. The 1867-S is readily located in VF or lower grades, but Select Mint State examples are surprisingly rare. Census: 5 in 63, 6 finer (7/18). PCGS# 572181 Base PCGS# 6322

- 3700 1868 Repunched Date, WB-102, MS62+ NGC.** Ex: Dick Osburn Collection. NGC has certified only 17 examples of this issue in all Mint State grades combined. This is the only one of those with a Plus designation (7/18). Semiprooflike fields complement a lack of bothersome abrasions, and each side has a hint of light golden color. Liberty's temple shows the only mentionable strike weakness. Census: 3 in 62 (1 in 62+), 10 finer (7/18). PCGS# 572183 Base PCGS# 6323

- 3701 1871 WB-101 MS63 NGC.** Untoned cartwheel luster illuminates satiny obverse fields and semiprooflike reverse fields. The design elements are well-struck, and no part of the coin exhibits significant abrasions. The 1871 Seated half dollar is scarce in this and finer grades. Census: 12 in 63, 20 finer (7/18). NGC ID# 6469, PCGS# 572193 Base PCGS# 6330

- 3702 1871-CC WB-101, Die Pair 1, R.4, VF30 PCGS Secure.** The sophomore year of the Carson City Mint provided seven die marriages of half dollars, which range from Rarity-4 to Rarity-6. Only a handful of examples are known in Mint State. This midgrade stone-gray representative displays a sharp LIBERTY and is surprisingly devoid of abrasions. The right obverse field is microgranular. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

- 3703 1871-S Very Small S, WB-102, Die Pair 2, R.3, MS63 NGC.** Ex: Eliasberg. A softly shimmering Select representative of this conditionally elusive San Francisco issue. Sharp design elements complement a hint of light golden toning on each side, and grade-limiting abrasions are trivial. The luster and surfaces are original and eye appeal is pleasing. Census: 6 in 63, 8 finer (7/18).
Ex: William M. Friesner Collection (Frossard, 6/1894), lot 721, which realized \$0.70; J.M. Clapp; John H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 2016, which realized \$770; Long Beach Signature (Heritage, 5-6/2007), lot 1122, which realized \$1,495. NGC ID# C4X9, PCGS# 572199 Base PCGS# 6332

- 3704 1872 WB-101 MS64 NGC.** Lime-green borders encompass brown fields and gray devices. The nicely struck surfaces are smooth except for minor obverse rim imperfections near 12 o'clock. The 1872 is plentiful in VF but becomes very scarce in better Mint State grades. Census: 9 in 64 (1 in 64+, 1 in 64 ★), 4 finer (7/18). NGC ID# 24K7, PCGS# 572201 Base PCGS# 6333

- 3705 1872 Misplaced Date, WB-102, MS64 NGC.** Perhaps the most remarkable aspect of this appealing near-Gem is the sharpness on all design elements. The coin is also essentially untoned and free of distractions, although a hair-thin pinscratch extends from the upper-obverse rim near 11 o'clock across Liberty's head and the cap to end at star 11. Few examples of this issue survive in high grades, despite a plentiful mintage of 880,600 pieces. Census: 9 in 64 (1 in 64+, 1 in 64 ★), 4 finer (7/18).

Ex: Baltimore Signature (Heritage, 3/2009), lot 2070, which realized \$2,990. NGC ID# 6HEP, PCGS# 572202 Base PCGS# 6333

- 3706 1872-CC WB-101, Die Pair 6, R.4, VF30 PCGS Secure.** This early Carson City issue is rare in Mint State, and midgrade examples are very scarce. The powder-blue, straw-gold, and stone-gray surfaces lack any noticeable marks. The E is faint but the remaining letters in LIBERTY are clear. Clashed within the eagle's shield, though not described as such in the Bugert reference. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

**1872-S Half Dollar, MS63
Conditionally Rare Issue**

- 3707 1872-S Medium Small S, WB-102, Die Pair 3, High R.3, MS63 PCGS.** Although 580,000 half dollars were coined at San Francisco in 1872, most survivors are in VF or lower grades. PCGS and NGC combined have seen just 31 Mint State examples. This Select specimen displays dynamic luster and light straw-gold toning. A crisp strike and smooth surfaces further ensure the eye appeal. Population: 6 in 63, 8 finer (7/18).

Ex: Central States Signature (Heritage, 5/2007), lot 802, which realized \$2,530. NGC ID# CGRS, PCGS# 572205 Base PCGS# 6335

- 3708 1873 No Arrows, Closed 3, Repunched Date, WB-104, MS63 PCGS.** The 3 in the date is triple punched at the bottom on this variety. Frosty, untoned interiors on this coin cede to tints of reddish-gold toning around the extreme outer peripheries. Liberty's temple and a couple of the upper stars are a trifle softly struck, but the overall eye appeal is pleasing for the grade. Population: 13 in 63, 13 finer (7/18).

Ex: ANA Signature (Heritage, 2-3/2014), lot 3515, which realized \$1,410. PCGS# 572209 Base PCGS# 6336

- 3709 1874 Large Arrows, WB-102, MS63 NGC.** WB-102 is identifiable by the large-size arrows on each side of the date. The 1874 half dollar is popular as a With Motto, Arrows type coin. This Select example displays dusky tan-gold toning and has satiny mint luster. The strike is sharp and abrasions are minimal. NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

**1874-S Arrows Half Dollar, MS63
Two-Year Type Coin**

- 3710 1874-S Arrows, Small Wide S, WB-101, Die Pair 1, R.3, MS63 PCGS. CAC.** In spite of an adequate mintage of 394,000 pieces, the 1874-S is seldom found in mint condition. No doubt this is from the preference for hard money in the western states where these coins circulated. This crisply struck piece displays strong mint luster and light mahogany-brown toning. Thorough inspection reveals occasional moderate field marks. Population: 16 in 63, 18 finer. CAC: 1 in 63, 6 finer (7/18).
Ex: Chicago Signature (Heritage, 8/2011), lot 4001, which realized \$3,450. PCGS# 572223 Base PCGS# 6348

- 3711 1875-S Very Small S, WB-101, Die Pair 18, R.4, MS64 PCGS.** A hint of wheat-gold toning visits this lustrous and well-struck Choice Seated type coin. Fine peripheral die cracks are noted on each side of the coin. A misplaced date variety with an errant 1 protruding from the rock above the date.
Ex: Dallas Signature (Heritage, 4/2007), lot 776; Atlanta ANA Signature (Heritage, 2/2014), lot 3521, which realized \$1,527.50. NGC ID# 24KE, PCGS# 572229 Base PCGS# 6351

- 3712 1875-S Micro S, WB-105, Die Pair 19, R.5, VF25 PCGS.** The Micro S mintmark appears on only one die pair of the 1875-S half dollar, and examples are rare. This midgrade coin displays light tan-gray relief elements that contrast against deep olive-gray fields and recesses. The ERT in LIBERTY are weak, but the other letters are clear. No surface problems are noted. NGC ID# 645L, PCGS# 572233 Base PCGS# 6351

**1877 Half Dollar, MS65+
Toned and Lustrous**

- 3713 1877 Closed Bud, WB-103, MS65+ PCGS. CAC.** The 1877 Seated half dollar is an available type coin issue, although high-end examples are conditionally scarce. This Plus-designated, CAC-approved Gem displays frosty original luster and well-struck design elements. Elements of blue and lavender toning appear occasionally around the borders, but the majority of each side has warm orange-gold patina. Population: 24 in 65 (3 in 65+), 31 finer. CAC: 6 in 65, 14 finer (7/18). NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

- 3714 1877-S Open Bud, Very Small S, WB-102, Die Pair 12, R.3, MS64 NGC.** Medium powder-blue and golden-brown toning consumes the obverse. The reverse exhibits dappled forest-green and lavender patina. The coruscating surfaces are well-struck and exceptionally unabraded. Half dollar mintages peaked in 1877, the year before the introduction of the Morgan dollar. NGC ID# 24KM, PCGS# 572253 Base PCGS# 6357

- 3715 1879 Closed Bud, WB-102, MS63 NGC.** All known circulation strike 1879 half dollars have the Closed Bud reverse. This Select example displays semireflective surfaces and sharp details. A hint of light golden toning emerges from the outer peripheries, although the interiors are mainly brilliant. Only 4,800 examples of this Philadelphia issue were struck. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

- 3716 1884 Repunched Date, WB-102, MS63 PCGS.** The 4 is faintly repunched on all circulation strike 1884 Seated half dollars. This Select example displays sharp motifs and semiprooflike fields. Flecks of russet toning surround the borders, leaving the interiors virtually brilliant. Grade-limiting abrasions are not bothersome. Housed in a green label holder. NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

- 3717 1885 WB-101 MS64 PCGS.** This semiprooflike near-Gem is sharp throughout and devoid of significant abrasions. A trace of light golden toning graces each side. Only 5,200 half dollars were struck for circulation in 1885, all at Philadelphia. Attractive survivors are available for a price, but the low mintage is inherently enticing to collectors. Population: 20 in 64 (1 in 64+), 22 finer (7/18).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6249, which realized \$1,495. NGC ID# 24KY, PCGS# 572270 Base PCGS# 6367

- 3718 1890 WB-101 MS64 PCGS Secure.** Deep ocean-blue, lilac-red, and gunmetal-gray toning embraces this nicely struck and well-preserved half dollar. The fields are moderately flashy beneath the rich patina. A scant 12,000 pieces were struck, presumably due to ongoing heavy production of silver dollars. NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

PROOF SEATED HALF DOLLARS

**1859 Seated Half Dollar, PR64
Richly Toned**

- 3719 1859 PR64 PCGS.** This Choice proof No Motto Seated half dollar exhibits deeply mirrored fields and sharply defined devices beneath intense sky-blue, gold, and lilac toning. Blue is the dominant color on the obverse and gold is most visible on the reverse. Population: 40 in 64 (2 in 64+), 15 finer (7/18). NGC ID# 27TJ, PCGS# 6413

- 3720 1861 PR64 PCGS.** Fully struck with creamy alabaster-gold toning and watery reflectivity in the fields. Some milkiness in the right obverse field likely precludes a finer grade assessment. High-grade examples of the proof 1861 half dollar are scarcer than one might expect from a mintage of 1,000 pieces.
Ex: FUN Signature (Heritage, 1/2008), lot 1580, which realized \$2,760. NGC ID# 27TL, PCGS# 6415

**1864 Half Dollar, Brilliant PR64 Cameo
Only 470 Proofs Struck**

3721 1864 PR64 Cameo PCGS. CAC. The mintage of proof half dollars this year was a paltry 470 pieces. Perhaps three dozen or so pieces are known today in near-Gem condition, while Gems are rarely encountered. This is an all-brilliant example with deeply mirrored fields and significant mint frost over the devices, the combination producing the always-desirable Cameo effect. A few light hairlines and a shallow staple scratch on the upper-left of the reverse account for the grade. Population: 24 in 64 (3 in 64+) Cameo, 3 finer. CAC: 7 in 64, 2 finer (7/18). NGC ID# 27TR, PCGS# 86418

3722 1868 PR64 Cameo NGC. An amazing near-Gem Cameo proof, this specimen is borderline Deep Cameo, with precise design definition as if sculpted rather than struck. A few trivial surface flaws prevent a higher grade, but the eye appeal is remarkable. Census: 11 in 64 Cameo, 12 finer (7/18).
Ex: FUN Signature (Heritage, 1/2012), lot 3614, realized \$1,955. NGC ID# 27U3, PCGS# 86426

3723 1869 PR65 PCGS. Deep reflectivity and rich, attractive border toning provide this piece with tremendous eye appeal. The colors include sea-green, deep electric-blue, fuchsia, vibrant orange, and violet. A few darker spots appear near 11 o'clock on the obverse. The design elements display bold detail. A highly appealing Gem proof type coin.
Ex: Central States Signature (Heritage, 4/2013), lot 2239, which realized \$3,525. NGC ID# 27U4, PCGS# 6427

3724 1878 PR63 Cameo NGC. This sharp Select proof showcases brilliant surfaces with stark cameo contrast on both sides. Although no distracting contact marks are seen, the obverse has numerous microscopic lintmarks (mint made) in the fields. The devices showcase frosty luster. No Ultra Cameos are certified at NGC. Census: 10 in 63 Cameo, 58 finer (7/18). NGC ID# 27UD, PCGS# 86439

3725 1880 PR64 NGC. Lovely blue-green and golden toning surrounds the borders on this Choice proof, with lavender-gray and gold interiors. Some strike weakness is noted on the eagle's neck and the central shield, but the obverse is sharp. Subtle cameo contrast is apparent even through the patina. NGC ID# 27UF, PCGS# 6441

**1883 Half Dollar, PR65
Low Total Mintage**

3726 1883 PR65 NGC. Rich violet and gold hues shroud the surfaces of this Gem proof Seated half dollar from a production of 1,039 pieces. Mint-green accents further the appeal. The underlying surfaces are glassy and the motifs predictably full, though contrast is limited. The 1883 is a challenging low-mintage issue in circulation-strike format, putting pressure on high-end proofs such as this. NGC ID# 27UJ, PCGS# 6444

3727 1886 PR63 PCGS. A blush of light golden toning complements needle-sharp detail and deep field reflectivity on this Select proof 1886 Seated half dollar. Subtle cameo contrast is apparent on the obverse, adding to the eye appeal. Grade-limiting hairlines and marks are remarkably minimal and pose no distraction to the unaided eye. Housed in a green label holder. NGC ID# 3EN3, PCGS# 6447

3728 1886 PR64 Cameo PCGS. A splendid Choice Cameo proof, the obverse exhibits champagne toning with deeper peripheral iridescence. The reverse is mostly brilliant with a few splashes of gold toning. Nice contrast appears between the fields and devices. Population: 27 in 64 (1 in 64+) Cameo, 20 finer (7/18).
Ex: New York Signature (Heritage, 3/2012), lot 3441, realized \$2,185. NGC ID# 27UM, PCGS# 86447

BARBER HALF DOLLARS

1892-O Micro O Half Dollar, Good 4

3729 1892-O Micro O, FS-501, Good 4 NGC. The 1892-O Micro O is by far the most formidable obstacle to the completion of a *Guide Book* collection of Barber half dollars. PCGS states "under 100 known." Many survivors are in Fair to Good grades, including the present cream-gray representative. The obverse stars and motto are distinct from the rim. On the reverse, portions of STATES OF AMERICA blend into the rim, but much of PLURIBUS is readable, and the mintmark is well-outlined. NGC ID# 24LH, PCGS# 391216 Base PCGS# 6463

3730 1894-S MS64 PCGS. The 1894-S Barber half dollar is scarce in this grade and rare finer. Orange-gold and lilac-gray toning covers each side, masking any trivial abrasions that limit the grade. The eagle's right (facing) wing junction exhibits the usual strike softness, but the obverse stars are well-defined. Population: 40 in 64 (1 in 64+), 14 finer (7/18). NGC ID# 24LR, PCGS# 6470

3731 1896-S AU58 PCGS Secure. Only light wear shows on the strongly impressed design elements of this attractive near-Mint specimen and the surfaces are lightly abraded, aside from a shallow groove in the right obverse field. The surfaces show a mix of satiny luster and prooflike reflectivity in the fields. Population: 11 in 58 (1 in 58+), 66 finer (7/18). NGC ID# 24LX, PCGS# 6476

3732 1901-S AU50 PCGS Secure. The semikey status of the 1901-S Barber half is a reflection of its low mintage of 847,044 coins and conditional scarcity, even at this level. Hints of luster glow from the recesses. Each side exhibits attractive stone-gray color and golden accents. Definition remains strong, especially on the obverse. A pinscratch on the portrait is the only mentionable mark. NGC ID# 5EPB, PCGS# 6491

3733 1907 MS65 PCGS. CAC. This impressive Gem exhibits well-detailed design elements, with a touch of the usual softness on the shield point and arrow fletchings. The well-preserved surfaces are visited by shades of champagne-gold and lavender toning, with satiny mint luster underneath. Population: 31 in 65 (2 in 65+), 5 finer. CAC: 6 in 65, 6 finer (7/18). NGC ID# 24MY, PCGS# 6508

3734 1910 MS64 NGC. This attractive Choice Barber half exhibits well-detailed design elements, with just the slightest touch of the usual softness on the arrow fletchings and eagle's talon. The well-preserved, lustrous surfaces show a few hints of pale pink toning. Census: 32 in 64 (1 in 64+), 9 finer (7/18). NGC ID# 24NB, PCGS# 6519

3735 1915 AU58 NGC. The 1915 Barber half dollar, coming from a mintage of only 138,000 pieces, is scarce in Uncirculated condition. This elusive near-Mint coin displays shimmering field luster and warm lilac-gold toning overall. Detail is sharp. Census: 13 in 58, 38 finer (7/18). NGC ID# 24NR, PCGS# 6532

PROOF BARBER HALF DOLLARS

1913 Half Dollar, PR66 Sharp and Faintly Toned

3736 1913 PR66 PCGS Secure. Hints of iridescence throughout the glimmering fields of this Premium Gem proof are almost unnoticed due to daubs of vivid ocean-blue toning on the left-hand margin of each side. This 1913 proof Barber half dollar is fully struck and beautifully preserved, showing appreciable contrast on the reverse. Population: 27 in 66 (2 in 66+), 16 finer; 5 in 66 Cameo, 7 finer (8/18). NGC ID# 24PH, PCGS# 6560

3737 1915 PR64 NGC. The mirrored fields of this Choice proof appear at certain angles, but thick russet, olive, gold, and lavender-gray toning covers each side in a thick blanket that prevents cameo contrast. The strike is sharp, and any grade-limiting hairlines are invisible under the patina. NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

3738 1916-S MS62 NGC. The 1916-S is the scarcest first-year Walker in high grade. This Mint State coin displays luminous, frosty surfaces and warm golden toning over each side. Grade-limiting abrasions are remarkably trivial, and the design elements exhibit sharp definition. An outstanding coin for the grade. Only 508,000 pieces were struck. NGC ID# 24PN, PCGS# 6568

3739 1917-D Reverse MS64 PCGS Secure. Reverse Mintmark coins are seldom encountered in grades finer than MS64. This near-Gem displays deep multicolor toning across both sides, complementing satin luster and pleasing preservation. Liberty's branch hand is well-defined, although the head detail is incomplete. NGC ID# 24PS, PCGS# 6571

3740 1917-S Reverse MS62 PCGS Secure. CAC. The initial design for the Walking Liberty half dollars called for the mintmark of branch-Mint pieces to be placed on the obverse. In 1917, the mintmark was moved to the reverse after a small number of 1917 obverse mintmark pieces were coined. This attractive Mint State example has rich gold patina on the obverse and lighter gold toning on the reverse. NGC ID# 24PU, PCGS# 6573

3741 1918 MS64 NGC. Frosty luster shimmers across each side of this Choice 1918 half dollar, and the design elements are sharp. Remarkably few discernible abrasions are seen. The reverse is essentially brilliant, but the obverse has a hint of light golden tinting. Finer 1918 halves are scarce. NGC ID# 24PX, PCGS# 6574

1918-S Half Dollar, MS64+ Luminous Surfaces

3742 1918-S MS64+ PCGS. The 1918-S Walking Liberty half dollar is available in MS64 but scarce in higher grades. This Plus-designated coin displays frosty, untuned mint luster. A few trivial abrasions are all that deny Gem classification. Liberty's head and the eagle's trailing leg are not fully struck, but there is partial definition on Liberty's branch hand. Eye appeal is pleasing. PCGS lists 37 finer representatives (7/18). NGC ID# 24PX, PCGS# 6576

3743 1921-D VF25 PCGS. Wear is consistent with the grade on this piece. The obverse has traditional slate-gray color with a golden tint, while the reverse displays deeper lavender-gray and olive-blue hues. Neither side shows bothersome abrasions. The 1921-D is a key date among Walking Liberty half dollars with only 208,000 pieces struck. NGC ID# 24R7, PCGS# 6584

3744 1921-D VF35 PCGS. A famous key issue with the lowest mintage among all Walking Liberty half dollars. This appealing Choice VF example was plucked from circulation and displays the effects of time spent in commerce. Reddish-violet and gray-gold patina blankets lightly marked surfaces. NGC ID# 24R7, PCGS# 6584

1929-D Half Dollar, MS65+ Radiant Mint Luster

3745 1929-D MS65+ PCGS Secure. This median rarity in the series has an impressively low mintage of just over 1 million pieces. This is an especially vibrant example that displays radiant mint luster. Strike details are notably strong with the only mentionable weakness on the head of Liberty. NGC ID# 24RC, PCGS# 6589

3746 1934-S MS65 PCGS Secure. Coin albums for long series were divided into two or more physical books. Many collectors would buy only the second book and complete that run of dates and mintmarks, creating the “Short Set” in different series. This issue marks the beginning of the Short Set of Walking Liberty half dollars that continued to the end of the series. This beautiful Gem has specks of gold toning on its brilliant and satiny silver surfaces. NGC ID# 24RH, PCGS# 6594

3747 1935 MS67 NGC. The 1935 Walking Liberty half dollar is scarce in MS67, and there are only two coins finer at NGC and PCGS combined. This Superb Gem displays frosty luster and medium golden toning. The usual minor strike weakness is seen on the branch hand and eagle’s leg. Census: 29 in 67 (2 in 67+, 1 in 67 ★), 1 finer (7/18). NGC ID# 24RJ, PCGS# 6595

3748 1935 MS67 NGC. A virtually immaculate Superb Gem of this popular Great Depression issue. The dusky wheat-gold surfaces offer booming luster and original eye appeal. The skirt lines are sharply struck, though the branch hand exhibits typical detail for the issue. Census: 29 in 67 (2 in 67+, 1 in 67 ★), 1 finer (7/18). NGC ID# 24RJ, PCGS# 6595

3749 1935-D MS65 NGC. The 1935-D Walker is available for the choosing in grades through MS64 and it is only marginally more elusive in MS65. However, NGC lists only six higher-grade representatives (7/18). This Gem displays glistening, untuned mint luster and exceptional preservation. The usual strike softness is noted on the central high points. NGC ID# 24RK, PCGS# 6596

3750 1936-D Doubled Die Obverse, FS-101, MS66+ PCGS Secure. CAC. The lower obverse is die doubled, most apparent on the lines of the sandals and the base of the skirt. The variety is undesignated on the insert. Blushes of blue-green and russet toning adorn the peripheries of this lustrous high-grade half dollar. The branch hand shows thumb separation, though the fingers and central skirt lines are incompletely struck. PCGS# 145782 Base PCGS# 6599

KENNEDY HALF DOLLAR

3751 1964-D/D FS-501 MS66 PCGS. Type Two Reverse. The mintmark is boldly repunched southwest, one of a handful of repunched mintmark varieties for the first-year 1964-D. This strong Premium Gem is lustrous and brilliant with a few daubs of gold color on the reverse. The only mark of note is a tick on the jaw. Population: 7 in 66, 0 finer (7/18). NGC ID# 24U3, PCGS# 146076 Base PCGS# 411633

MODERN BULLION COINS

3752 1987 Half-Ounce Gold Eagle MS70 PCGS Secure. The 1987 half-ounce Gold Eagle is scarce in MS70, and PCGS-graded examples are rare. This piece — one of just 32 coins for the grade at PCGS (8/18) — is fully struck and pristine with satiny yellow-gold luster. An eye-appealing and rare Registry Set candidate. NGC ID# 26N8, PCGS# 9812

3753 1989 Silver Eagle MS70 PCGS. This fourth-year Silver Eagle should delight Registry Set collectors, as such coins are rarely offered in MS70 condition certified by PCGS. Fully struck and technically pristine surfaces remain all-brilliant and satiny. PCGS has graded 56 comparable examples (7/18). NGC ID# 26JA, PCGS# 9826

1990 Silver Eagle, MS70 Flawless Registry Set Coin

3754 1990 Silver Eagle MS70 NGC. In terms of MS70 availability, the 1990 Silver Eagle compares much more closely with issues from the latter part of the decade than it does with the first three emissions in the series. This impeccable representative presents the pristine surfaces one would expect. Each side is totally brilliant with swirling satin mint luster. A couple of tiny milk spots occur on the drapery folds. NGC ID# 26JC, PCGS# 9836

3755 1990 Silver Eagle MS70 NGC. A pristine, satiny Silver Eagle with no toning and a full strike. Minor machine doubling is evident on the date, LIBERTY, and IN GOD WE TRUST, when viewed beneath a loupe. The 1990 Silver Eagle is a major rarity in MS70 at PCGS, but NGC coins such as the present are occasionally available for the Registry Set collector. NGC ID# 26JC, PCGS# 9836

3756 1993 Silver Eagle MS70 NGC. Few Silver Eagles are as difficult to obtain in perfect MS70 as the 1993 (6.7 million coins struck). Not a single mark resides on either side of this flawless and totally brilliant Registry coin. The devices are fully struck. NGC ID# 26JJ, PCGS# 9866

3757 1994 Silver Eagle MS70 NGC. The 1994 is seen in this flawless state of preservation about half as often as the 1995. It is one of the more difficult issues to find in MS70. Satiny, untuned surfaces are expectedly pristine. A couple of small milk spots appear on each side. NGC ID# 26JL, PCGS# 9876

1995 Half-Ounce Gold Eagle, MS70 Sharp, Satiny Registry Coin

3758 1995 Half-Ounce Gold Eagle MS70 NGC. The half-ounce Gold Eagle of 1995 is relatively scarce in MS70, and pieces in this grade are the most highly sought-after for Registry Set collectors. This example is pristine and satiny with yellow-gold luster. Sharp definition spans the central devices and includes every border star on the obverse. NGC ID# 26NG, PCGS# 9892

**1996 Silver Eagle, MS70
Devoid of Color or Contact**

- 3759 1996 Silver Eagle MS70 NGC.** A mintage of 3.6 million coins is relatively low in the Silver Eagle series, and technically flawless representatives like this MS70 are correspondingly difficult to locate. Indeed, the 1996 serves as one of the high-grade keys to the set. Both sides are devoid of color or contact and awash in satiny mint luster. NGC ID# 26JR, PCGS# 9900

**1996 Silver Eagle, MS70
Series Condition Rarity**

- 3760 1996 Silver Eagle MS70 NGC.** The 1996 Silver Eagle is one of the top rarities in the series in MS70 condition. Appearances generate considerable excitement among Registry collectors. Satiny silver surfaces exhibit complete design definition. The fields are utterly free of marks, and none are hidden within the confines of the relief elements. NGC ID# 26JR, PCGS# 9900
- 3761 1997 Half-Ounce Gold Eagle MS70 NGC.** This technically perfect half-ounce Gold Eagle displays warm mattelike yellow-gold surfaces with fully struck design elements and terrific eye appeal. From a mintage of 79,605 pieces, this issue is scarce in the ultimate grade of MS70. NGC ID# 26NJ, PCGS# 9918
- 3762 1999 Silver Eagle MS70 NGC.** Shimmering satin luster engulfs this perfectly preserved 1999 Silver Eagle, with no toning observed. The coin is fully struck and a prime Registry Set candidate. This issue is elusive in MS70, despite a mintage in excess of 7.4 million coins. NGC ID# 26JX, PCGS# 9947
- 3763 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS.** The West Point Mint struck approximately 6,000 quarter-ounce Gold Eagles from unfinished proof dies in 1999, the first business-strike bullion coins to bear the W mintmark. This delightful MS68 example is fully struck and the lustrous yellow-gold surfaces are virtually flawless. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942
- 3764 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** Struck from unfinished proof dies at the West Point Mint, this fully struck and nearly perfect MS69 quarter-ounce Gold Eagle exhibits satiny luster rather than the deeply mirrored fields expected on proof coinage. PCGS has graded 14 numerically finer examples (7/18). NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 3765 2006-W Three-Piece One-Ounce Gold Eagle 20th Anniversary Set, First Strike, PCGS.** Individually housed in holders bearing consecutive certification numbers. The lot includes: **Uncirculated finish MS70**, a few tiny tan freckles near 50; a **regular proof PR70 Deep Cameo**, minuscule tan flecks on the upper reverse field; and a **reverse proof PR70**, intricately impressed, scattered tiny pastel peach-gold freckles on the reverse. Reverse proof issues are infrequent within the American Eagle series. (Total: 3 coins) NGC ID# CNCZ, PCGS# 89995 Base PCGS# 89994
- 3766 2008-W Four-Piece Gold Buffalo Set SP70 ANACS.** Although one-ounce gold buffalos have been struck annually since 2006 in proof and Uncirculated format, fractional Gold Buffalos were only issued in 2008. They bore the West Point mintmark, and were coined as proofs or with a satin (burnished) finish. This flawless Satin Finish set includes the **tenth-ounce \$5**; **quarter-ounce \$10**; **half-ounce \$25**; and **one-ounce \$50**. (Total: 4 coins)
- 3767 2008-W Four-Piece Gold Buffalo Set, First Strike, MS70 PCGS.** A pristine quartet that includes the **tenth-ounce \$5**; **quarter-ounce \$10**; **half-ounce \$25**; and **one-ounce \$50**. The tenth-ounce piece has a small spot below the bison's nose. Struck solely in 2008, the four-piece mintmarked set has a finish that has been variously described as satin, specimen, and Uncirculated, but never to be confused with mintmarked proofs of the same date, design, and denominations. (Total: 4 coins) NGC ID# 26RS, PCGS# 400037
- 3768 2008-W Four-Piece Gold Buffalo Set, First Strike, PR70 Deep Cameo PCGS.** The set contains the **tenth-ounce \$5**; **quarter-ounce \$10**; **half-ounce \$25**; and **one-ounce \$50**. Intricately impressed matte motifs rise above the rippled and reflective fields. 2008 was the only year of fractional Gold Buffalo coinage. (Total: 4 coins) NGC ID# 26RH, PCGS# 393329
- 3769 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** This perfectly preserved 2009 one-ounce Ultra High Relief twenty dollar gold piece is fully struck and has bright brass-gold coloration, as struck. The fields are satiny rather than prooflike, but are just as appealing. A beautiful example of Saint-Gaudens' original double eagle design in its intended form. NGC ID# 26S4, PCGS# 407404
- 3770 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** Although not designated as Prooflike, this flawless 2009 one-ounce Ultra High Relief twenty is indeed reflective in the fields. The strike and preservation are perfect. The eye appeal of this coin is remarkable, balanced between the incredible quality of the coin and the beauty of Saint-Gaudens' Ultra High Relief double eagle design. NGC ID# 26S4, PCGS# 407404
- 3771 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 NGC.** The 2009 Ultra High Relief one-ounce twenty dollar gold piece offers collectors the opportunity to own Augustus Saint-Gaudens' original double eagle design from 1907 in its intended sharpness and relief. This coin is perfectly preserved and semiprooflike with bright yellow-gold color. NGC ID# 26S4, PCGS# 407404
- 3772 2015-W High Relief One-Ounce Gold, First Strike, .9999 Fine Gold, Moy Signature MS70 PCGS.** A stunning First Strike example of this popular one-ounce gold issue, with fully struck design elements and technically perfect lemon-yellow surfaces that radiate satiny mint luster. The holder bears the signature of Mint Director Edmund C. Moy on the reverse. PCGS# 546097 Base PCGS# 545532

WORLD

Saudi Arabia Gold 4 Pounds, KM-34, MS61 Struck at the Philadelphia Mint

- 3773** (1945-1946) Saudi Arabia, Ibn Saud, Gold 4 Pounds MS61 PCGS. KM-34. Struck at the Philadelphia Mint to provide payment for Saudi oil rights. The net gold weight is 452 grains, equivalent to four British sovereigns. Among the few gold coin issues struck by the U.S. Mint during an era when private gold ownership was illegal. A coruscating yellow-gold example with unobtrusive field marks.

ERRORS

1964-D Cent Struck on a Silver Dime Planchet Perfectly Centered, MS61

- 3774** 1964-D Cent — Struck on a Silver Dime Planchet — MS61 PCGS. The strike is remarkably well-centered on the planchet, leaving all border legends fully readable. A defined rim is lacking as a result, although the central sharpness does not appear to be affected. This satiny Uncirculated coin is untoned and shows only minor handling marks, not severe abrasions. An interesting wrong planchet error with the date and mintmark entirely present.

1995-P Nickel Mated Error Pair, MS63 First Coin Double Struck, Off Center Second Coin Indented, Broadstruck

- 3775** 1995-P Jefferson Nickels — Broadstruck & Double Struck, Fused by Overlapping Strike — MS63 ANACS. The first strike was normal, but the coin (coin #1) failed to fully eject. It was struck a second time, widely off center toward 12 o'clock, at 1:30 relative to the first strike. The second strike was a uniface obverse, since a newly fed planchet (to be coin #2) blocked the reverse die. The collar die was also blocked. The strike fused coin #1 and coin #2 together, though a curved fin from coin #1 looms over the upper third of the obverse of coin #2.

1999-P Connecticut Quarter, MS62 Multiple Struck on the End of a Feeder Finger

- 3776** 1999-P Connecticut State Quarter — Multiple Struck on End of Feeder Finger — MS62 NGC. Struck on an irregular white metal flan with occasional streaks of charcoal toning. About half the design is present, including the right two-thirds of the Charter Oak and Washington portrait. Struck at least twice, with evidence of a prior strike most apparent near the trunk of the tree. A search of our online auction archives turns up a different Connecticut quarter struck on a feeder finger, for example, lot 1981 in our 2006 Dallas Signature, which realized \$2,530.

**1899-S Barber Half, MS62
Partial Collar Strike**

- 3777 1899-S Barber Half — Partial Collar Strike — MS62 PCGS.** The collar die was only partly employed when the present Barber half was coined. On the reverse border, reeding is barely present near 9 o'clock, and is essentially complete near 2 o'clock. The obverse rim is much wider at 8 o'clock than at 2 o'clock. Lightly toned and satiny with unblemished surfaces. The fletchings and shield tips are well struck.
Ex: Summer FUN Signature (Heritage, 7/2015), lot 4166.

**Kennedy Half Dollar, MS62
Struck on a Cent Planchet**

- 3778 Undated Kennedy Half — Struck on a Cent Planchet — MS62 PCGS.** The PCGS insert states the date is 1966, but no portion of the date is present. This wrong planchet error was struck aligned with the collar at 2 o'clock, with a complete rim and reeding in the vicinity. Central and right-side elements are intact, while left border portions of the design are absent. A chocolate-brown example with sea-green and mahogany undertones. One small spot is seen near the cheekbone.

**John Adams Presidential Dollar, MS63
33% Double Clip, Multiple Struck
Missing Edge Lettering**

- 3779 (2007) John Adams Presidential Dollar — Multiple Strikes, 33% Double Clip, Missing Edge Lettering — MS63 PCGS.** A large clip extends from 7:30 to 11 o'clock. A second and more shallow clip spans 11:30 to 1 o'clock. Both clips are mostly straight but have curved endings. Close inspection reveals at least five separate strikes, with a wide spread between the first and final impressions. The rim varies in width and is very wide near 4 o'clock. The reverse exhibits a couple of thin marks made by a curious finder.

REDFIELD DOLLARS

- 3780 1883-S MS62 NGC.** Encased in a red Mint State 65 Paramount holder bearing a Redfield Collection pedigree. Brilliant fields and devices cede to peripheral brown and cobalt-blue borders. The obverse is prooflike while the reverse displays vibrant cartwheel luster. The cheek and right-obverse field are abraded. The 1883-S is conditionally scarce relative to preceding San Francisco Morgan issues. NGC ID# 254K, PCGS# 7148
- 3781 1892-CC MS62 NGC. VAM-10.** Housed in a red Mint State 65 Paramount holder pedigreed to the Redfield Collection. Apple-green and golden-brown margins aid the eye appeal of this lustrous and nicely struck scarcer-date Carson City silver dollar. The fields are surprisingly smooth, though the portrait displays distributed grazes. VAM-10 is a misplaced date variety that shows the top of a 2 or 9 in the dentils between the 92 in the date. NGC ID# 255M, PCGS# 7214

GSA DOLLAR

- 3782 1893-CC GSA Soft Pack VG10 PCGS.** A search of our online archives shows only one prior appearance of a GSA soft pack 1893-CC Morgan in a Heritage auction: a Good 6 example that brought \$2,115 in January 2015. This cream-gray key-date Carson City dollar displays even wear and surprisingly few abrasions. NGC ID# 255S, PCGS# 7222

SO-CALLED DOLLARS

- 3783 1902 Wells Fargo & Co. Semicentennial, Silver, HK-296, R.5, MS63 NGC.** A walnut-brown example of the popular so-called dollar variety. A couple of slight rim nicks decide the grade. The design contrasts the "Wild West" of 1852 with the industrial economy of 1902. As always, the left obverse is die doubled, most apparent on the tree above WELLS. The original box accompanies the lot, Fine. It has a tan-brown exterior and a blue velvet interior. PCGS# 642688
- 3784 No Lot**

CONFEDERATE STATES OF AMERICA

- 3785 Six-Piece Lot of Bashlow Restrike Confederate Coins NGC.** The lot includes: (1961) Silver cent MS67, Breen-8011, Bertram-B861-208; (1961) Bronze cent MS67 Red, Breen-8013, Bertram-B861-206; (1961) Goldline cent MS68, Breen-8014, Bertram-B861-207, all struck from defaced dies; and (1962) Silver half dollar MS67, Bertram-B861-220; (1962) Bronze half dollar MS68 Red and Brown, Bertram-B861-218; and (1962) Goldline half dollar MS65, Bertram-B861-219. A custom plastic holder (Bertram-B861-221) for the six coins accompanies this lot. (Total: 6 tokens)

CERTIFIED MODERN PROOF SETS

- 3786 1937 Five-Piece Proof Set, PR62 to PR65 PCGS.** The coins in this set are consecutively numbered coins. Included are:
- Cent PR63 Red and Brown.** Lightly hairlined, the mostly red surfaces show slightly mottled brown color on each side.
- Nickel PR65.** Vivid lilac toning covers most of each side with faint accents of rose. Deeply mirrored.
- Dime PR62.** Lightly hairlined, the slightly dulled surfaces show a struck-in grease stain in the obverse field at 5 o'clock.
- Quarter PR63.** Just the faintest traces of color are seen on each side of this cleaned quarter.
- Half Dollar PR62.** Slightly hairlined with subtle streaks of patina across each side. Deeply mirrored. (Total: 5 coins) PCGS# 904751

3787 1937 Five-Piece Proof Set PR63 to PR66 NGC. The coins are individually housed in holders bearing consecutive certification numbers. The set includes:

Cent PR63 Red. Minimal carbon, seamless orange color. Exemplary for the grade.

Nickel PR66. Light olive-green toning. Ideal save for a minute carbon fleck beneath the chin.

Dime PR66. Obverse hints of struck-in grease. A small linear lamination near the C in AMERICA.

Quarter PR66. Medium golden-brown and steel-gray toning.

Half Dollar PR66. Attractive honey-gold toning with glimpses of lilac-red on the eagle. (Total: 5 coins)

3788 1942 Six-Piece Proof Set, PR65 to PR67. The set includes:

Cent PR65 Red Cameo PCGS. Beautiful peach-red color.

Type One nickel PR66 NGC. Brilliant, fully struck, and outstanding.

Type Two nickel PR67 NGC. Pristine, stone-white, and intricately struck.

Dime PR67 NGC. Light silver-gray and powder-blue patina.

Quarter PR67 PCGS. Faintly freckled apple-green and golden-brown toning.

Half Dollar PR67 PCGS. CAC. Sea-green and tan toning adorns the borders. (Total: 6 coins)

3789 1950 Five-Piece Proof Set, PR66 to PR67. The set includes:

Cent PR67 Red Ultra Cameo NGC. Blushes of fire-red and sea-green across the reverse.

Nickel PR67 NGC. Both sides display faint chestnut-gold toning.

Dime PR67 NGC. Sharply struck, brilliant, and immaculate.

Quarter PR67 PCGS. A splendid stone-white Superb Gem.

Half Dollar PR66 PCGS. Light lavender and straw-gold toning with a small streak of dark color above the F in HALF. (Total: 5 coins)

INGOT

Congress Mines Silver Ingot, 50.47 Ounces

3790 Congress Mines Silver Ingot. 50.47 Ounces. The Congress Mine was primarily a gold mine, located just outside the town of Congress, Arizona. Placer gold was found nearby in 1863-4, workings began on what would later be called the Congress Mine in 1880. By 1917 the mine was essentially non-existent. We have not previously handled an ingot from this mine. The top side contains all the necessary information and is impressed in a sans-serif font: CONGRESS / MINES / 999.5 FINE / 50.47 TROY OZ. The sides are beveled, and this large-size ingot measures 67 x 126 x 17 mm. The surfaces are bright, untuned silver with no surface blemishes worthy of comment.

End of Session Two

SESSION THREE

EARLY DOLLARS

- 3791** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Repaired, Whizzed — ANACS. Fine 12 Details. Light to medium almond-gold and gunmetal-gray toning. The legends are bold and most dentils are distinct. The right obverse field is smoothed, and both sides are microgranular from whizzing. Nonetheless, a collectible example of the first Draped Bust variety.

1798 Large Eagle Dollar, Choice VF B-29, BB-119, Pointed 9

- 3792** 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, VF35 PCGS. Bowers Die State II, showing a crack through the STA in STATES. The obverse is extensively cracked in this usage of the die, most notably at the date. Uniform olive-gold and gray patina on each side complements well-detailed design elements and an even strike. Die erosion blurs the obverse border, but neither side has visible adjustment marks. On the obverse, several old scratches are visible in the right field. NGC ID# 24X6, PCGS# 40036 Base PCGS# 40018

1799 8x5 Stars Dollar, AU Details B-23, BB-159, Attractive Toning

- 3793** 1799 8x5 Stars, B-23, BB-159, R.3 — Whizzed — ANACS. AU Details, Net XF40. Bowers Die State II. Faint whizzing across the interiors gives those areas false luster, although original luster is visible in the protected border regions. This sharp 8x5 Stars dollar is also beautifully retoned in concentric yellow-gold, sea-green, blue, and lavender hues. Eye appeal far surpasses expectations for a Details-graded Draped Bust dollar.
Ex: Rocky Mountain Collection (Stack's, 11/2006), lot 443, which realized \$2,760; ANA Signature (Heritage, 2-3/2014), lot 3600, which realized \$4,406.25.

1799 Large Eagle Dollar, XF40 B-17, BB-164, 7x6 Stars

- 3794** 1799 7x6 Stars, B-17, BB-164, R.2, XF40 NGC. Bowers Die State V. Rich aquamarine and autumn-brown toning consumes this Heraldic Eagle dollar. The cheek shows noticeable wear, but luster accompanies the peripheral elements. Only trivial contact is present, though two speckles of tan residue are noted near UNUM. Die cracks through UNITED STATES help attribute the Bolender die marriage. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

- 3795** 1802 Narrow Date, B-6, BB-241, R.1 — Plugged, Repaired, Corroded, Whizzed — ANACS. XF40 Details. Bowers Die State III. Presumably once holed near 12 o'clock, since the ERT in LIBERTY, the uppermost curls, the eagle's tail and right claw, the lower shield lines, the lower branch, and the CA in AMERICA are reengraved. The silver-gray surfaces are lightly granular and faintly hairlined.

1803 Large 3 Dollar, Choice VF B-6, BB-255, Originally Toned

- 3796** 1803 Large 3, B-6, BB-255, R.2, VF35 PCGS. CAC. Bowers Die State I. Rich green, lavender, and stone-gray shades embrace this lightly abraded Choice VF Bust type coin. Liberty's cheek, forehead, and shoulder display wear, but glimmers of luster emerge from the peripheral elements. E PLURIBUS UNUM is fairly sharp. The CAC "green bean" is infrequently encountered on early dollars. CAC: 8 in 35, 33 finer (7/18). NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

1846 Seated Dollar, MS62 Semiprooflike Fields

- 3797 1846 MS62 NGC. OC-2, R.2.** An elusive date in Uncirculated condition. The fields on this piece are semiprooflike, complementing sharp, satiny design elements. Both sides have a light golden hue overlaid with daubs of blue-green, gray, and amber toning. Abrasions are minimal. Date placement and small die lumps on Liberty's neck help identify the plentiful OC-2 die marriage. Census: 20 in 62, 36 finer (7/18). NGC ID# 24YH, PCGS# 6932

- 3798 1850 — Cleaned — PCGS Genuine Secure. AU Details. OC-1, R.3.** The 0 in the date is repunched on this obverse die. The reverse shows a heavy die line in the right horizontal shield lines. AU-level detail and semireflective fields offer much of this coin's eye appeal, while both sides display deep sea-green and olive toning. The patina serves to mask hairlines from an old cleaning.

- 3799 1859-O MS61 NGC. OC-1, R.1.** Richly blended sea-green, butter-gold, and lilac shades embrace this well-struck New Orleans type coin. Most Mint State 1859-O dollars are thoroughly abraded, but the present piece is uncommonly free from marks, and will command attention from the collector of originally toned silver type coins. NGC ID# 24YY, PCGS# 6947

- 3800 1859-S XF45 NGC. OC-1, R.2.** The sole No Motto San Francisco issue has a tiny mintage of 20,000 pieces, and survivors are scarce in all grades. This well-defined representative features medium wheat-gold and powder-blue patina. A cluster of marks on the field near the knees provides an identifier. NGC ID# 24YZ, PCGS# 6948

1860 Seated Dollar, MS63 Struck From Proof Dies

- 3801 1860 MS63 PCGS Secure. OC-6, High R.3.** According to recent research by Dick Osburn and Brian Cushing (Seateddollarvarieties.com), seven different die pairs were used to strike 218,930 Seated dollars in 1860. OC-6 represents the same set of dies used to strike proofs, distinguished by the date position and die lines within the upper recesses of the reverse shield stripes. Whether a coin struck from these dies is a proof or a circulation strike depends entirely on the nature its surfaces. This mostly brilliant example with blushes of marginal toning is lustrous and lacks the reflectivity one would expect of a proof. Definition is pinpoint-sharp on the obverse, but considerable softness occurs on the eagle's left (facing) leg. NGC ID# 24Z2, PCGS# 6949

- 3802 1860-O MS61 NGC. OC-1, R.1.** The 1860-O was well-represented in the Treasury releases of the 1960s, making it a relatively available issue today. This attractive Mint State specimen offers well-detailed design elements and lustrous surfaces, with hints of sea-green toning and some minor, scattered contact marks on both sides. NGC ID# 24Z3, PCGS# 6950

1862 Seated Dollar, MS61 Lowest Mintage in the 1860s

- 3803 1862 MS61 NGC. OC-1, R.3.** The U.S. Mint struck more than 1.3 million gold dollars in 1862, the highest 1860s mintage of the series. Also in 1862, silver dollar commercial output was a scant 11,540 pieces, the lowest 1860s mintage of the series. This lightly toned and nicely struck representative exhibits only a wisp of wheat-gold toning. The fields are flashy fields and surprisingly free from abrasions. Census: 8 in 61, 49 finer (7/18). NGC ID# 24Z5, PCGS# 6952

- 3804 1870-CC VF20 PCGS Secure. OC-9, Low R.4.** Deep olive-gray and bluish patina blankets this midgrade 1870-CC dollar. Detail is pleasing for the grade and there are no bothersome contact marks. All of LIBERTY is readable, although the IBER are weak. The 1870-CC is the most plentiful Seated dollar from this mint, although it is a semikey date in the entire Seated Liberty series. Such is the scarcity of Carson City Seated dollars. NGC ID# 24ZE, PCGS# 6964

- 3805 1870-CC — Altered Surfaces — PCGS Genuine Secure. AU Details. OC-8, High R.4.** A Top 30 Variety, since the dies are rotated 60 degrees. Golden-brown, powder-blue, and rose toning adorns this glossy but sharply detailed first-year Carson City silver dollar. We note a thin mark above star 8, but the coin is otherwise free from apparent abrasions.

- 3806 1872-S XF40 PCGS. OC-1, Low R.3.** The 1872-S is the only collectible With Motto Seated Liberty dollar from the San Francisco Mint. Only 9,000 pieces were struck, but enough circulated coins survive for the issue to be obtainable by most collectors of the series. This XF coin displays excellent detail and warm golden patina. Subtle reflectivity remains in the fields. Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 3767, which realized \$1,840. NGC ID# 24ZL, PCGS# 6970

- 3807 1872-S XF45 NGC. OC-1, Low R.3.** From a small mintage of just 9,000 pieces, the 1872-S Seated Liberty dollar is an elusive issue in the With Motto series. This lightly abraded Choice XF specimen shows light wear on the devices, but the horizontal lines in the shield remain intact and the eagle's eye is bold. Census: 26 in 45, 50 finer (7/18). NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLAR

- 3808 1867 PR61 PCGS. OC-P1, R.3.** The fields are deeply mirrored and provide undesignated cameo contrast with the frost-white design elements. Sharp detail characterizes each side. Consistent with the grade, extensive hairlines are apparent, although eye appeal remains pleasing for the grade. Housed in a green label holder. NGC ID# 252N, PCGS# 7015

TRADE DOLLARS

3809 1873 MS63 NGC. The Trade dollar was designed and struck for the purpose of international trade, not domestic circulation. Relatively few high-grade examples of the first-year issue were set aside for numismatic purposes. This collectible Select representative displays bright, satiny surfaces with glimpses of light golden toning. The eagle's right (facing) leg exhibits the only mentionable strike softness. Census: 35 in 63 (2 in 63+), 43 finer (7/18).
Ex: *Orlando Signature (Heritage, 7/2013)*, lot 5093, which realized \$3,055. NGC ID# 252W, PCGS# 7031

3810 1873-S MS61 NGC. The first-year Trade dollar from the San Francisco Mint is scarce in Uncirculated condition. This piece has original satin luster and warm golden toning that deepens toward the rims. Scattered scuffs and small marks account for the grade but none are individually bothersome. The eagle's right (facing) talons show the only mentionable strike weakness. Census: 17 in 61, 54 finer (7/18). NGC ID# 252Y, PCGS# 7033

1874-S Trade Dollar, MS64 Scarce and Underappreciated

3811 1874-S MS64 NGC. Breen-5785. Large S. No period after FINE. Light caramel-gold toning graces this lustrous and lightly marked Choice Trade dollar. The claws are fully struck, though Liberty's hair lacks complete definition. The 1874-S is a better date in the present grade, much scarcer than the 1875 through 1878 San Francisco issues. Census: 18 in 64, 2 finer (7/18). NGC ID# 2533, PCGS# 7036

1875-CC Trade Dollar, MS62 Popular Carson City Issue

3812 1875-CC Type One Reverse MS62 PCGS Secure. Period after FINE. The "Narwhale" variety with a lengthy die line extending from the eagle's beak through the scroll. A charming silver-gray Carson City type coin. Luster illuminates design elements. Small marks are scattered but none merit individual description. The strike is good though shy of complete. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

3813 1875-S MS64 PCGS. Type One Reverse. Large S. The usually seen reverse type. This is an unquestionably original dollar. The surfaces are highly lustrous and scattered dabs of golden toning are scattered around each side. Sharply struck overall. NGC ID# 2536, PCGS# 7039

PROOF TRADE DOLLAR

3814 1875 PR63 PCGS. Ex: Benson. All 11 proof Trade dollars in the Benson Collection were acquired June 8, 1944 for \$120. The collection remained intact until 2002. This Select specimen enjoys undesignated contrast with frosted, minimally toned devices against glassy fields. Golden toning surrounds the borders.
Ex: *James G. Macallister (6/1944)*; *Benson Collection, Part II (Goldberg Auctions, 2/2002)*, lot 1244. NGC ID# 27YL, PCGS# 7055

MORGAN DOLLARS

3815 1878 8TF Lines in Hair, VAM-14.15, XF45 PCGS. Die lines in the hair, a break near the P in PLURIBUS, and doubling on the motto identify this rare variety, described by VAMWorld.com as "one of the terribly rare 8 tailfeather varieties" and "Extremely difficult to find" This lightly circulated example is largely steel-gray with russet accents. A few cuts appear on the eagle's breast, but the surfaces are otherwise smooth. NGC ID# 253H, PCGS# 133810 Base PCGS# 7072

3816 1878-CC MS65 PCGS Secure. The central design elements are thickly frosted on this Gem Carson City representative from the first year of Morgan dollar production. Strike detail is good, and a ring of faint golden patina surrounds brilliant, well-preserved surfaces. Thin roller marks appear on Liberty's chin. NGC ID# 253M, PCGS# 7080

3817 1878-CC MS65 PCGS. A wonderful Gem of this first-year Morgan dollar, a transitional year that also saw production of Trade dollars at the Carson City Mint. This piece is brilliant and virtually untuned with frosty silver luster. NGC ID# 253M, PCGS# 7080

3818 1878-CC MS65 NGC. CAC. Vivid shades of sea-green, golden-tan, and magenta toning blanket the well-preserved surfaces of this attractive Carson City Gem, from the first year of the Morgan design. Sharply detailed design elements and vibrant mint luster shine through the patina. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66 First-Year Branch Mint Type Coin

3819 1878-CC MS66 PCGS. From a first-year mintage of 2.2 million pieces, the 1878-CC Morgan dollar is an available issue in grades up to the MS66 level, but finer coins are rare. This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved creamy surfaces that radiate vibrant mint luster from both sides. PCGS has graded six numerically finer examples (7/18). NGC ID# 253M, PCGS# 7080

3820 1878-CC MS65 Prooflike PCGS. This remarkable first-year Morgan dollar is sharply detailed in most areas, but the eagle's right (facing) claw lacks detail, possibly from a clogged die. The well-preserved surfaces feature hazily reflective prooflike fields, with hints of greenish-gold toning. PCGS has graded only nine numerically finer Prooflike specimens (7/18). NGC ID# 253M, PCGS# 7081

- 3821 1879-CC XF45 NGC.** Substantial luster remains in the fields of this Choice XF example such that a “broken” cartwheel effect can be produced on the obverse by rotation — slight rub in the fields “breaks” the band of light as it circles the coin in-hand. This well-detailed Carson City dollar is bright and mostly untuned with grade-appropriate abrasions over each side. NGC ID# 253U, PCGS# 7086
- 3822 1879-O MS65 PCGS.** The New Orleans Mint reopened in 1879 with the express purpose of striking silver dollars. Unsurprisingly, the issue is common in typical Mint State grades, but Gems are scarce. This lustrous and lightly toned representative has a good strike and a smooth cheek. A diagonal tick above the eagle’s head serves as an identifier. NGC ID# 253X, PCGS# 7090
- 3823 1879-S MS67+ PCGS. CAC.** Significant semiprooflike mirroring in the fields contributes to this beautifully preserved Superb Gem’s eye appeal. The design elements are boldly struck. The reverse is brilliant, although the obverse displays subtle amber-gold toning overall. NGC ID# 253X, PCGS# 7092
- 3824 1880 MS66 NGC.** This early Philadelphia Morgan is available in grades through MS65, but Premium Gems are moderately elusive and the date is unknown finer (8/18). This non-Prooflike coin displays untuned, frosty mint luster and well-struck design elements. Liberty’s cheek and the field are pristine. Census: 45 in 66 (1 in 66+), 0 finer; 6 in 66 Prooflike, 0 finer; 3 in 66 Deep Prooflike, 0 finer (7/18).
Ex: *Long Beach Signature (Heritage, 2/2006)*, lot 1816, which realized \$3,737.50. NGC ID# 253Y, PCGS# 7096
- 3825 1880/79-CC Reverse of 1878, VAM-4, MS64+ PCGS.** A Top 100 Variety. Remnants of 79 beneath 80 in the date and the parallel top arrow feather confirm the variety, discovered in 1964 by Harry Forman. Frosted mint luster shines from bright silver surfaces accented with glints of pale almond-gold. Strike detail is good in the centers. Reeding marks on and near the eagle limit the grade. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 3826 1880-CC 8 Over Low 7, VAM-6, MS65 PCGS. CAC.** A Top 100 Variety. No lens is needed to see the underdigit 7 on this overdated Carson City dollar. A lightly toned and nicely struck Gem. Minor grazes on the motifs fail to challenge the designated grade.
Ex: *Dallas Signature (Heritage, 2/2015)*, lot 3947, which realized \$1,292.50. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104
- 3827 1880-CC MS65+ PCGS Secure. CAC. VAM-10.** A Carson City Gem with booming luster and an above-average strike, though the centers show slight inexactness. Brilliant aside from a hint of gold toning near the rims. The fields and eagle are smooth, and the cheek shows only delicate grazes. NGC ID# 2542, PCGS# 7100
- 3828 1880-CC MS66 PCGS.** A spectacular Premium Gem Morgan dollar from a small mintage of 591,000 pieces, this coin exhibits well-detailed design elements, with just a touch of softness on the hair above the ear. The well-preserved surfaces radiate satiny mint luster, with subtle hints of lavender-gray toning. NGC ID# 2542, PCGS# 7100
- 3829 1880-O MS64 PCGS.** Small or Micro O. While this Louisiana issue is readily available in MS64 condition, only a few dozen pieces survive in higher grades, putting pressure on non-Gem examples. Totally brilliant surfaces offer good definition over the centers and attractive satin mint luster. Minimal marks on the cheek and in the fields. NGC ID# 2543, PCGS# 7114
- 3830 1880/79-O Crossbar, VAM-4, MS64 PCGS.** A Top 100 Variety. The Micro O mintmark sets VAM-4 apart from VAM-5. Both show the crossbar of a 7 within the upper loop of the second 8. Faint golden border toning surrounds brilliant, satiny surfaces. The central reverse is well-defined. Population: 45 in 64 (8 in 64+), 2 finer (7/18). NGC ID# 2543, PCGS# 133880 Base PCGS# 7116

- 3831 1880/9-S VAM-11, Medium S, Hot 50, MS67 PCGS.** A Hot 50 Variety. This VAM was discovered in April 1967. Remnants of a previous 9 remain within the loop of the 0. This all-brilliant Superb Gem is awash in thick mint frost typical of the facility. The fields and cheek are practically unmarked, showing just a few superficial flecks. Strongly struck. PCGS has graded three finer examples of the variety (8/18). NGC ID# 2544, PCGS# 133988 Base PCGS# 7122
- 3832 1880/9-S VAM-11, Medium S, MS67 PCGS.** A Hot 50 Variety. The 0 in the date has die fill suggestive of a largely effaced underdigit. Medium S mintmark. Virtually untuned, with a bold strike and highly lustrous surfaces. A trace of struck-in grease is relegated to the upper-left portion of the wreath. Population: 78 in 67 (9 in 67+), 3 finer (7/18).
Ex: *Rafael Romero Collection / Palm Beach Signature (Heritage, 11/2004)*, lot 10183, which realized \$2,645. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122
- 3833 1881 MS66 PCGS Secure.** A beautifully preserved frost-white Premium Gem with almost perfect luster. Only a few faint grazes in secondary focal areas prevent a Superb Gem classification. The devices are well-struck and eye appeal excels. PCGS lists only five finer non-Prooflike 1881 Morgan dollars (8/18). NGC ID# 2546, PCGS# 7124
- 3834 1881-CC MS66 NGC. VAM-2.** Vivid shades of magenta and golden-brown toning blanket the obverse of this delightful Premium Gem and the brilliant center of the reverse yields to shades of lime-green and lavender at the peripheries. The design elements are sharply detailed and vibrant mint luster shines through the toning. NGC ID# 2549, PCGS# 7126

**1881-CC Morgan Dollar, MS67
Fully Struck**

- 3835 1881-CC MS67 PCGS.** It is a rare occasion that we can describe a Morgan dollar as fully struck, but this example shows every hair strand over Liberty’s ear and full breast feathers on the eagle. Both sides exhibit exceptional luster with no evidence of toning, and the fields are semiprooflike. The devices are frosted, presenting light field-to-device contrast. PCGS has only certified four finer non-Prooflike examples (7/18).
Ex: *ANA Signature (Heritage, 2/2014)*, lot 4003, which realized \$5,581.25. NGC ID# 2549, PCGS# 7126
- 3836 1881-CC MS65 Deep Mirror Prooflike PCGS. VAM-2.** An arc of russet, forest-green, and red toning endows the lower-obverse periphery. This sharply struck and lower-mintage Carson City dollar is exceptionally smooth despite a brief reed impression on the field above the arrowheads. Housed in an old green-label holder. NGC ID# 2547, PCGS# 97127
- 3837 1881-CC MS65 Deep Mirror Prooflike PCGS Secure. VAM-2.** Upon first glance, this Gem has the appearance of a cameo proof. Prominently reflective fields contrast with icy motifs. The sharply struck surfaces display minimal imperfections. A better Carson City issue, the 1881-CC is highly popular with collectors, especially with a Deep Mirror Prooflike finish. NGC ID# 2547, PCGS# 97127

**1881-S Morgan Dollar, MS68
Vivid One-Sided Toning**

3838 1881-S MS68 NGC. The obverse of this spectacular MS68 Morgan dollar is blanketed in vivid shades of magenta and violet-gray toning, while the reverse remains essentially brilliant. The design elements exhibit razor-sharp definition throughout and the impeccably preserved surfaces radiate vibrant mint luster on both sides. NGC has graded one numerically finer example (7/18). NGC ID# 2549, PCGS# 7130

3839 1882 MS66+ PCGS Secure. CAC. Premium Gem is the highest readily available grade for the 1882 Morgan dollar. Comparable Plus-designated and CAC-approved examples are scarce, and finer coins are rare. Brightly frosted, all-brilliant surfaces showcase strong definition. The lack of contact is impressive. PCGS reports 11 higher grading events (8/18). NGC ID# 254A, PCGS# 7132

3840 1882-CC MS66 Prooflike PCGS. VAM-2. A Hit List 40 Variety. The top of a 1, evident as a diagonal line, is misplaced below the first 8 in the date. The variety is undesignated on the holder. Highly lustrous and virtually brilliant with an intricate strike and smooth fields. Housed in a 30th Anniversary Green Label Holder. NGC ID# 254B, PCGS# 7135

3841 1883 MS65 Deep Mirror Prooflike PCGS Secure. Contrast between the watery fields and thickly frosted motifs is dramatic on both sides of this Gem 1883 Morgan dollar. The strike is strongly impressed, except over Liberty's ear, and marks are entirely trivial. There are 15 finer Deep Mirror Prooflike submissions at PCGS (8/18). NGC ID# 254G, PCGS# 97143

3842 1883-S MS62 PCGS. The brilliant surfaces of this attractive MS62 Morgan dollar exhibit the expected number of minor contact marks for the grade and show a mix of satiny mint luster and semiprooflike reflectivity in the fields. The design elements are sharply detailed throughout. NGC ID# 254K, PCGS# 7148

3843 1883-S MS62 PCGS Secure. An attractive MS62 specimen of this popular branch mint issue, from a mintage of 6.2 million pieces. The design elements are sharply detailed and the lustrous surfaces are appropriately marked for the grade, with pleasing hints of golden-brown toning. NGC ID# 254K, PCGS# 7148

3844 1883-S MS62 PCGS. The 1883-S is a better date in Uncirculated grades and highly sought-after with good eye appeal. For an MS62 coin, this piece is quite appealing. Brilliant, radiant cartwheel luster engulfs the satiny surfaces, complementing a hint of reflectivity in the fields. Scattered abrasions appear on each side. NGC ID# 254K, PCGS# 7148

3845 1883-S MS62+ NGC. The Plus designation seems to be awarded for this coin's outstanding cartwheel luster, unhindered by toning and revealing only minor surface abrasions. Sharp definition on the devices adds to the appeal. The 1883-S is a better date in Uncirculated condition, sought-after in the lower Mint State grades with good eye appeal. NGC ID# 254K, PCGS# 7148

3846 1883-S MS63 PCGS. The 1883-S is the first of the better-date San Francisco Morgan dollars, and it is a perennial collector favorite. This near-Prooflike Select example offers a hint of golden color at the rims, with mostly clean, problem-free fields. A few wispy luster grazes do not detract from the strong eye appeal of this desirable 1883-S dollar.

Ex: Long Beach Signature (Heritage, 9/2006), lot 5122, which realized \$2,070. NGC ID# 254K, PCGS# 7148

**1884-CC Dollar, MS67
Brilliant and Semiprooflike**

3847 1884-CC MS67 NGC. According to the Bowers silver dollar *Red Book*, President Chester A. Arthur is said in 1884 to have remarked concerning silver dollars: "Well, we got a mess of these things now. We made 185 million and only 40 million are out." Fortunately for collectors of today, most of the original mintage of this issue was stored for decades, to be released in the GSA sales of the 1970s. This piece offers superb quality, with smooth, fully brilliant surfaces. Each side has highly lustrous, frosty devices with satiny fields. The contrast provides exceptional eye appeal. Few can match it for quality.

Ex: Central States Signature (Heritage, 4/2006), lot 3395, where it realized \$3,881.25; Dallas Signature (Heritage, 10/2006), lot 1403, where it brought \$3,335. NGC ID# 8BBF, PCGS# 7152

3848 1884-CC MS66 Prooflike PCGS. A popular GSA hoard issue that is scarcely found in this impeccable state with such contrast. Brilliant, unmarked fields are deeply reflective and surround thickly frosted, strongly struck motifs. Faint roller marks are found on each side. PCGS reports a single Prooflike example finer (7/18). NGC ID# 254M, PCGS# 7153

3849 1884-CC MS66 Deep Mirror Prooflike PCGS. In spite of the numerous opportunities to acquire CC dollars (many of which were 1884-CC) from the GSA Sales, very few were high-quality coins. This is an all-brilliant example with extraordinarily deep mirrors in the fields. The devices are heavily frosted, producing a profound white-on-black contrast on each side. NGC ID# 254M, PCGS# 97153

3850 1884-CC MS66 Deep Mirror Prooflike ANACS. The well-preserved, brilliant surfaces of this delightful Premium Gem exhibit deeply reflective fields that contrast boldly with the sharply detailed, frosty design elements. The 1884-CC is a rare issue in grades above the MS66 level and with the Deep Prooflike designation. NGC ID# 254M, PCGS# 97153

3851 1885-CC MS66 PCGS. An impressive Premium Gem Morgan dollar, with sharply detailed design elements and an extensive network of peripheral die cracks on the reverse. The surfaces are well-preserved and lustrous, with outstanding eye appeal. From a mintage of just 228,000 pieces. NGC ID# 254S, PCGS# 7160

3852 1885-CC MS66 PCGS. A delightful Premium Gem from the famous Carson City Mint, this coin exhibits sharply detailed design elements and impeccably preserved brilliant surfaces, with vibrant mint luster throughout. The 1885-CC becomes scarce in grades above MS66. NGC ID# 254S, PCGS# 7160

3853 1885-CC MS66+ PCGS. CAC. Nearly 131,000 Uncirculated 1885-CC dollars were released to the public during the GSA sales of the 1970s, constituting more than half the original mintage of 228,000 coins. This totally brilliant, high-end Premium Gem boasts a pinpoint strike, except over the ear, and incredibly clean, frosty surfaces. NGC ID# 254S, PCGS# 7160

3854 1885-CC MS64 Deep Mirror Prooflike PCGS. CAC. The biggest pull for collectors is the low mintage of 228,000 pieces. This near-Gem displays profound depth of mirroring on each side with noticeably frosted devices. Light abrasions and luster grazes prevent an even higher grade. NGC ID# 254S, PCGS# 97161

3855 1885-CC VAM-2 MS65 PCGS Secure. Dash under the second 8. Here is a mint-fresh Carson City dollar with uninhibited brilliance and frosty cartwheel luster, almost certainly of GSA origin. Two milling marks occur on the cheek and neck, and a few more are seen above the eagle's head, but this well-struck Gem is otherwise clean. PCGS# 42592 Base PCGS# 7160

3856 1885-O MS67 PCGS. CAC. Shades of sea-green and lavender toning enhance the impeccably preserved surfaces of this spectacular Superb Gem, with well-detailed design elements and vibrant mint luster throughout. Eye appeal is terrific. PCGS has graded only one numerically finer example (7/18). NGC ID# 254T, PCGS# 7162

3857 1885-S Doubled 5, VAM-2, MS65 PCGS Secure. The 5 in the date is repunched north. This lustrous scarcer-date dollar displays only a glimpse of golden toning. The centers are incompletely brought up, though the peripheral elements are bold. The cheek and upper-reverse field exhibit unimportant contact. PCGS# 42660 Base PCGS# 7164

3858 1886-O MS61 PCGS Secure. Although myriad surface marks are noted on both sides, this example has full mint frost and bright silver luster. A conditionally elusive Morgan dollar issue. NGC ID# 254W, PCGS# 7168

3859 1886-O MS62 NGC. Despite a large mintage of 10.7 million pieces, the 1886-O is a challenging issue in high grade. This sharply detailed MS62 specimen offers lustrous, brilliant surfaces with the expected number of minor contact marks for the grade. NGC ID# 254W, PCGS# 7168

3860 1886-O MS62 NGC. The 1886-O Morgan dollar is a slightly better date in Uncirculated grades. This collectible MS62 coin displays softly frosted, untuned mint luster and is only a trifle weakly struck on the central high points. Light abrasions limit the grade but none are individually detracting. NGC ID# 254W, PCGS# 7168

3861 1886-O MS63 PCGS. The centers maintain considerable brilliance, especially on the reverse of this Select New Orleans dollar. Shades of violet, blue, and gold surround the margins. Characteristic softness over the centers is minor, as are scattered abrasions. Conditionally challenging despite the high mintage (10.7 million coins). NGC ID# 254W, PCGS# 7168

3862 1886-O MS63 PCGS Secure. An important opportunity for the advanced collector to obtain this conditionally scarce New Orleans Morgan dollar. This piece is fully brilliant with frosty, untuned silver surfaces. NGC ID# 254W, PCGS# 7168

1886-S Morgan Dollar, MS66 Sought-After, Low-Mintage Issue

3863 1886-S MS66 PCGS. From a small mintage of 750,000 pieces, the 1886-S Morgan dollar is an elusive issue in MS66 condition, and finer coins are rare. This delightful Premium Gem exhibits sharply detailed design elements and virtually pristine surfaces, with attractive highlights of champagne-gold toning. Vibrant mint luster adds to the terrific eye appeal. Population: 52 in 66 (7 in 66+), 5 finer (7/18). NGC ID# 254X, PCGS# 7170

1886-S Dollar, MS65 Prooflike Hint of Cameo Contrast

3864 1886-S MS65 Prooflike PCGS. Prooflike 1886-S dollars are scarce compared to non-Prooflike pieces, and most grade no finer than MS64. This Gem is conditionally rare. Sharp, frosty devices contrast against mirrored fields, all amid a hint of light golden toning. Abrasions are minimal and eye appeal is pleasing. Housed in a green label holder. Population: 23 in 65 Prooflike, 4 finer; 2 in 65 Deep Mirror Prooflike, 0 finer (7/18). NGC ID# 254X, PCGS# 7171

3865 1887 MS67 PCGS Secure. A beautiful swath of deep iridescent rainbow colors, primarily across DOLLAR on the reverse, adds to the visual appeal of this piece. Light rose hues drape the obverse. The piece is brightly lustrous and reveals only a few signs of contact when viewed with a loupe. PCGS has awarded a higher numeric grade to only a single example (7/18).
Ex: *Dallas ANA Signature* (Heritage, 10/2012), lot 4836, realized \$1,292.50; *Central States Signature* (Heritage, 4/2014), lot 4812, realized \$1,292.50. NGC ID# 27Y3, PCGS# 7172

3866 1887/6-O VAM-3 MS63 PCGS Secure. A Top 100 Variety. The bottom loop of a previously entered 6 appears below the primary 7 in the date. Softness of strike occurs over the centers, as usual, but this Select example remains totally brilliant with vibrant luster and surprisingly clean fields. A popular *Guide Book* variety. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

3867 1887-O MS65+ PCGS. The 1887-O Morgan dollar is an elusive issue in grades above the MS65 level. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with hints of lavender and pale gold toning. PCGS has graded 14 numerically finer examples (7/18). NGC ID# 2547, PCGS# 7176

3868 1887-S MS65 PCGS. Gem condition is the highest collectible grade level for the 1887-S Morgan dollar, which becomes a rarity in MS66. Minimal flecks over brightly frosted and entirely untuned surfaces explain the grade. A hint of softness is noted over the ear, but the breast and talons are crisp. PCGS reports 34 finer submissions (7/18). NGC ID# 2554, PCGS# 7180

3869 1889-CC VF30 NGC. A pleasing VF30 specimen of this challenging Carson City issue, with lightly abraded lavender-gray surfaces that show a few specks of amber in selected areas. The ear remains well-defined, but the feathers on the eagle's breast are worn flat. NGC ID# 2559, PCGS# 7190

3870 1889-CC VF30 PCGS. Original medium gray surfaces with a golden undertone prevail on each side of this midgrade key-date Morgan. The devices are evenly worn over the highpoints, and there are only the slightest abrasions present, none of which merit individual mention. Always a highly coveted issue, and in problem-free VF condition this should be of interest to a wide variety of bidders.
Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5261, which realized \$1,725. NGC ID# 2559, PCGS# 7190

3871 1889-CC — Rim Damage — PCGS Genuine. AU Details. A couple of minor rim dings are visible, the worst at 6 o'clock on the obverse, but the full extent of the noted damage is difficult to evaluate because of the holder. Just a touch of wear is evident on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster.

**1889-O Morgan Dollar, MS65
Excellent Branch Mint Type Coin**

- 3872 1889-O MS65 NGC.** This attractive Gem exhibits well-detailed design elements, with just a trace of blending on the hair strands above Liberty's ear. The well-preserved surfaces show a few hints of sea-green and turquoise toning around the peripheries, with more subtle flashes of pink in the centers. Vibrant mint luster adds to the outstanding eye appeal. Census: 54 in 65 (2 in 65+), 5 finer (7/18). NGC ID# 255A, PCGS# 7192

**1889-O Morgan Dollar, MS65
High-Mintage and High-Demand Issue**

- 3873 1889-O MS65 PCGS.** Just locating a nice Choice example of this date can be a challenge with the right combination of decent strike, minimal abrasions, and acceptable luster. In MS65 this is a scarce issue and Gem quality specimens have always been in demand by collectors. This is certainly an above-average example. The surfaces show almost no abrasions, and the strike, while not completely brought up, does show abundant central details on each side (most noticeably on the obverse). The luster is satiny, as always. NGC ID# 255A, PCGS# 7192

- 3874 1889-S MS65 PCGS.** Translucent gold and rose-violet accents complement mostly brilliant surfaces awash in coruscating mint frost. Strike definition is strong despite the presence of roller marks on the chin. A tick on the neck and a few flecks in the fields are minimal for the Gem assessment. Only 700,000 1889-S Morgan dollars were manufactured. NGC ID# 255B, PCGS# 7194

1890-CC Silver Dollar, Clean MS65

- 3875 1890-CC MS65 PCGS.** This late-date Carson City Morgan is frosty and well-preserved, although strike weakness on the central high points may prohibit a finer grade. Still, the Gem surfaces are attractive. Amber, russet, and lilac-gray border toning surrounds mainly golden interiors, offering good eye appeal. PCGS lists 16 finer non-Prooflike 1890-CC Morgans (7/18). NGC ID# 255D, PCGS# 7198

- 3876 1890-CC Tail Bar, VAM-4, MS63 PCGS. CAC.** A Top 100 Variety. This Tail Bar variety is easily recognizable with the leaves and fletchings connected by a sizeable die gouge. Near-fully struck surfaces are entirely brilliant and awash in frosted mint luster. Grazes are minor, especially on the reverse. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

**1890-CC VAM-4 Dollar, MS63+
Popular 'Tail Bar' Variety**

- 3877 1890-CC Tail Bar, VAM-4, MS63+ PCGS. CAC.** A Top 100 Variety. The distinctive Tail Bar reverse features a huge die gouge that connects the wreath leaves to the fletchings and tailfeathers. The variety is well-known and popularly sought-after among collectors. Brightly frosted surfaces show unimportant luster grazes and small ticks. Pale gold colors the upper-left reverse border. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

- 3878 1890-O MS64 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike examples of the 1890-O Morgan dollar are moderately accessible and usually come better-struck than their non-Cameo counterparts. This frosty, largely brilliant Choice representative shows well-detailed central devices with softness limited to the legends. A few stray marks occur on the cheek. PCGS reports 23 Deep Mirror Prooflike submissions finer (7/18). NGC ID# 255E, PCGS# 97201

- 3879 1890-S MS66 PCGS.** An exquisite Premium Gem, and rarely found finer, this piece is brilliant and fully lustrous with satiny silver surfaces. Faint gold toning splashes are noted at the borders. NGC ID# 255F, PCGS# 7202

**1891-CC Silver Dollar, MS65
VAM-3 'Spitting Eagle'**

- 3880 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. The first C in the mintmark is lightly repunched, but this "Spitting Eagle" VAM is best known for the die lump beneath the beak. The variety is undesignated on the holder. An essentially brilliant Carson City dollar with pleasing luster and no obtrusive marks. Ex: *Chicago Signature* (Heritage, 8/2011), lot 4680, which realized \$3,593.75. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

- 3881 1891-CC Spitting Eagle, VAM-3, Top 100, MS63 Deep Mirror Prooflike PCGS.** A Top 100 Variety. Though the die lump beneath the beak attracts all the attention, VAM-3 also exhibits repunching on the top of the first C in the mintmark. The variety is plentiful except with Deep Mirror Prooflike surfaces. This is a brilliant better-date Carson City dollar with a good strike and a grade-limiting mark beneath the left ribbon end. Population: 7 in 63 Deep Mirror Prooflike, 5 finer (7/18). NGC ID# 255H, PCGS# 43505 Base PCGS# 97207

3882 1892 MS64+ NGC. CAC. Peripheral shades of reddish-gold and gunmetal-blue accent dusky silver-gray centers on this undeniably original 1892 Morgan dollar. Strike softness affects each side but does not diminish the appeal or quality for the grade. The 1892 was struck to the extent of 1 million coins and becomes elusive in Gem condition. NGC ID# 255L, PCGS# 7212

3883 1892-CC MS62 PCGS. A pleasing MS62 example of this popular Carson City dollar, with sharply detailed design elements and some interesting die cracks through the tops of the letters in STATES. The surfaces are lightly marked for the grade, with vibrant mint luster throughout. NGC ID# 255M, PCGS# 7214

3884 1892-CC MS62 NGC. An attractive MS62 representative of this popular issue from the famous Carson City Mint, this coin exhibits sharply detailed design elements and lustrous, brilliant surfaces with some scattered, minor contact marks on the obverse. NGC ID# 255M, PCGS# 7214

3885 1892-CC MS63 PCGS Secure. VAM-4B. The centers are lightly brought up, but this lustrous and essentially brilliant better-date Carson City dollar is exceptionally free from marks. The second C in the mintmark is repunched, and both sides exhibit multiple sets of clash marks. NGC ID# 255M, PCGS# 7214

3886 1892-CC MS63 PCGS. VAM-8A. Double clashed n. Rather than the clashing, a more distinctive characteristic of this late-state VAM-8 variety is the filled lower part of the 2 in the date. This Select example displays brilliant, frosty cartwheel luster and boasts a sharp strike. Light surface chatter on the obverse limits the grade. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64+ High-End Example

3887 1892-CC MS64+ PCGS. Always in demand, this Carson City issue often displays high-quality, attractive surfaces and a bold strike. This borderline Gem coin is sharp and frosted on the motifs with satiny, mostly unabraded fields. A couple of small marks above the eagle's head do not detract significantly from the appeal. A glint of champagne-gold toning appears overall.

Ex: Houston Signature (Heritage, 12/2014), lot 4323, which realized \$3,760; ANA Signature (Heritage, 8/2015), lot 5664, which realized \$3,554.38; Central States Signature (Heritage, 4-5/2016), lot 5224, which realized \$2,585. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS65+ Exceptional Quality

3888 1892-CC MS65+ PCGS Secure. The quality of this 1892-CC dollar is seldom encountered for the issue. A majority of certified examples fall within the MS62 to MS64 range. Gems are scarce but offered with some frequency, while MS65+ coins are much more elusive and anything finer is rare. The only exception to the eye-catching brilliance of this frosty Carson City dollar is a ring of pale rose-gold toning around the margins. Unimportant softness is noted on the strands above Liberty's ear. NGC ID# 255M, PCGS# 7214

3889 1892-S AU50 PCGS. From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar is one of the most challenging issues of the series in high grade. This attractive AU example displays just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster in the sheltered areas. NGC ID# 255P, PCGS# 7218

3890 1893 MS63 PCGS. Only 378,000 business-strike Morgan dollars were struck at the Philadelphia Mint in 1893. This attractive Select example displays sharply detailed design elements and lightly marked, lustrous surfaces, with highlights of lavender-gray and sea-green toning. NGC ID# 255R, PCGS# 7220

3891 1893 MS63 PCGS Secure. Iridescent shades of sea-green and lavender toning visit the lightly marked surfaces of this attractive Select specimen, with sharply detailed design elements and vibrant mint luster throughout. From a small mintage of 378,000 pieces. NGC ID# 255R, PCGS# 7220

3892 1893 MS64 PCGS. A brilliant near-Gem, this 1893 Morgan dollar has frosty silver surfaces with no evidence of toning. Only minor surface grazes prevent a finer grade. An important semikey date, the 1893 is among the most elusive Philadelphia circulation strikes in the series.

Ex: Chicago Signature (Heritage, 8/2011), lot 4708, which realized \$1,725. NGC ID# 255R, PCGS# 7220

1893-CC Dollar, MS60 Prooflike Old Green Label Holder

3893 1893-CC MS60 Prooflike PCGS. Prooflike 1893-CC Morgan dollars are scarce. Although only graded MS60, this example is quite pleasing and has a strong glimmer in the fields. The devices are satiny and lightly marked, but considerable central strike weakness likely also contributes to the grade. No toning is present on this coin, which is housed in an old green label holder. NGC ID# 255S, PCGS# 7223

3894 1893-O AU58 NGC. High-point friction on this near-Mint 1893-O dollar is seen only on Liberty's cheek and hair curls, and on the eagle's breast. Moderate strike weakness is also visible in those areas. This satiny, lustrous coin shows no toning across the interiors, although light golden color graces the outer peripheries. NGC ID# 255T, PCGS# 7224

3895 1893-O AU58 PCGS. CAC. From a small mintage of 300,000 pieces, this attractive near-Mint Morgan dollar exhibits just a trace of wear on the well-detailed design elements, and the lightly abraded surfaces retain much original mint luster. NGC ID# 255T, PCGS# 7224

3896 1893-S Good 4 NGC. VAM-1. The mintmark is well-outlined, and all of the legends are clear. The stone-gray and gold toning is slightly deeper on the reverse. The 1893-S is the key to the business strike series, and affordable, problem-free examples are subject to strong collector demand. NGC ID# 255U, PCGS# 7226

1893-S Morgan, VG10 Collector-Grade Example

3897 1893-S VG10 NGC. This well-circulated key-date Morgan dollar displays mainly slate-gray patina, although deeper ebony toning clings to the protected design recesses and the field areas near the relief elements. No significant abrasions are noted. This San Francisco issue is a traditional key date — not prohibitively rare in the low circulated grades but inherently popular and priced accordingly. Only 100,000 pieces were struck. NGC ID# 255U, PCGS# 7226

3898 1894 AU58 PCGS. The 1894 Morgan dollar claims the second-smallest business-strike mintage of the series, at 110,000 pieces. This attractive near-Mint specimen offers well-detailed design elements, with just a trace of wear on the high points, and lightly abraded surfaces that retain much of their original mint luster. Hints of emerald-green and lavender-gray toning enhance the considerable visual appeal. NGC ID# 255V, PCGS# 7228

3899 1894 AU58 PCGS. Among regular issues, only the 1893-S has a lower mintage than the 1894. This minimally abraded and well-struck Borderline Uncirculated example displays pleasing cartwheel luster and shows only a whisper of high-point wear. Housed in a first-generation "rattler" holder. NGC ID# 255V, PCGS# 7228

3900 1894 — Cleaned — NGC Details. Unc. The 1894 has the lowest mintage of any regular issue Morgan dollar from the Philadelphia Mint. This untoned example is slightly bright but displays cartwheel sheen and is without consequential contact. The strike is good, and the high points show no evidence of wear.

1894-O Morgan, MS63 Above-Average Luster

3901 1894-O MS63 PCGS. Silver dollar production exceeded 1.7 million coins in New Orleans in 1894, all accomplished in the latter half of the year. The coins circulated extensively with the result that worn examples are easily obtainable but Mint State coins are seldom seen. This example displays unusually radiant luster for the issue with light golden toning that deepens toward the borders. The strike is lacking in sharpness in the central regions, as usual. NGC ID# 255W, PCGS# 7230

3902 1894-S MS63 NGC. In Mint State, the 1894-S is most often found in MS62 to MS64 condition, but the average certified grade for the issue as a whole is AU55. This Select example is thickly frosted, bright, and eye-appealing for the grade. Lightly struck over the highest points. Bagmarks are minimal, especially on the reverse. NGC ID# 255X, PCGS# 7232

3903 1895-O AU55 PCGS. From a small mintage of 450,000 pieces, the 1895-O Morgan dollar is a challenging issue in high grade. This lightly worn, lightly abraded Choice AU specimen exhibits shades of sea-green and pink toning. NGC ID# 255Y, PCGS# 7236

3904 1896 MS67 PCGS. The 1896 is generally an available date through MS66, but Superb Gems are more elusive; PCGS has seen only two coins numerically finer than the present example (7/18). Frosty, vibrant mint luster is brilliant on the obverse and toned in mottled multicolor hues on the reverse. Slight strike weakness is seen on the eagle's breast and the hair above Liberty's ear. NGC ID# 2562, PCGS# 7240

3905 1896-O MS61 PCGS. The 1896-O is common in Very Fine but surprisingly scarce in Mint State. Medium almond-gold and pearl-gray toning embraces satiny surfaces. Only lightly abraded for the designated grade, though the hair above the ear is softly impressed. NGC ID# 27ZU, PCGS# 7242

3906 1896-O MS61 PCGS. From an adequate mintage of 4.9 million pieces, the 1896-O Morgan dollar is surprisingly difficult to locate in high grade. This lightly marked Mint State specimen is softly struck in the centers, with satiny luster and highlights of pale pink toning. NGC ID# 27ZU, PCGS# 7242

3907 1896-S AU58 PCGS. Despite the reported mintage of 5 million pieces, the 1896-S Morgan dollar is surprisingly difficult to locate in high grade. This impressive near-Mint example exhibits just a trace of high-point wear on the devices and the lightly abraded surfaces are enhanced by attractive shades of lavender toning. NGC ID# 2564, PCGS# 7244

3908 1897-O MS62 PCGS Secure. The 1897-O becomes a condition rarity in MS64 and is generally only accessible as high as MS62 or MS63. This untoned example is well-defined for a New Orleans dollar with the satiny luster characteristic of the facility. There are several small marks on the portrait, but the fields remain relatively unabraded. NGC ID# 2565, PCGS# 7248

3909 1897-O MS62 PCGS. A conditionally elusive New Orleans issue, this 1897-O Morgan dollar exhibits hints of gold toning on the obverse with brilliant, untuned luster on the reverse. Minimal marks are consistent with the grade. NGC ID# 2565, PCGS# 7248

- 3910 1897-O MS62 PCGS.** An impressive MS62 specimen, with well-detailed design elements that show just a touch of blending on the hair above the ear. The lustrous surfaces are lightly marked for the grade, with subtle hints of lavender and pale gold toning. NGC ID# 2565, PCGS# 7248
- 3911 1898-S MS65 PCGS.** This fully brilliant Gem has the appearance of the “semiprooflike” coin of the 1970s, meaning it has reflective fields and frosty devices that create a trace of cameo contrast. A lovely Gem with untoned silver surfaces and excellent eye appeal. NGC ID# 256A, PCGS# 7256

**1898-S Dollar, MS66
Three Coins Finer at PCGS**

- 3912 1898-S MS66 PCGS.** Most 1898-S dollars were dispersed from Treasury holdings prior to the 1960s. This untoned example in Premium Gem condition shows a moderate degree of frost over well-impressed devices. Only the hair strands over the ear and the breast feathers exhibit limited incompleteness. The fields and cheek display top-notch preservation. PCGS has graded only three finer coins (8/18). NGC ID# 256A, PCGS# 7256
- 3913 1899 MS66 NGC.** The 1899 was produced to the extent of 330,000 coins, one of the lowest figures in the series. This untoned MS66 example displays bright frosty luster. The design features are well-impressed. Minor luster grazes do not distract. Census: 77 in 66 (2 in 66+, 1 in 66 ★), 4 finer (7/18).
Ex: *FUN Signature* (Heritage, 1/2006), lot 6930; *Denver Signature* (Heritage, 8/2006), lot 3158, where it brought \$1,495. NGC ID# 256C, PCGS# 7258
- 3914 1899 MS66 NGC.** This delightful Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster throughout. Eye appeal is outstanding. Census: 77 in 66 (2 in 66+, 1 in 66 ★), 4 finer (7/18). NGC ID# 256C, PCGS# 7258
- 3915 1899-S MS65 PCGS.** A splendid Gem Morgan silver dollar, this S-Mint example has bright luster and frosty, untuned silver surfaces with excellent design definition. NGC ID# 256D, PCGS# 7262
- 3916 1900-S MS65 PCGS.** This example features the new C4 hub over the old C3 reverse, as confirmed the berry, gap between the eagle's neck and wing, and the flat breast feathers. Brilliant surfaces are smooth and frosty, showing few significant ticks. Scarce any finer despite the 3.5 million-coin mintage. NGC ID# 256H, PCGS# 7270
- 3917 1900-S MS65 PCGS.** Delicate gold toning appears at the obverse and reverse borders of this lovely Gem that exhibits fully brilliant luster and frosty silver surfaces. A pleasing example for the advanced Morgan dollar collector. NGC ID# 256H, PCGS# 7270
- 3918 1901 AU58 PCGS. CAC.** Despite a mintage of nearly 7 million pieces, the 1901 Morgan dollar is an elusive issue in high grade. This attractive near-Mint specimen shows just the slightest trace of wear on the sharply detailed design elements and the lightly toned, lightly abraded surfaces retain much of their original mint luster. NGC ID# 256J, PCGS# 7272

- 3919 1901 Doubled Die Reverse, VAM-3, AU50 PCGS Secure.** A Top 100 Variety. Listed in the *Guide Book* and popularly collected as such, VAM-3 exhibits pronounced die doubling on the reverse, including on the lower part of the eagle's wings and tailfeathers, and the motto. This lightly circulated representative displays violet, crimson, gold, and blue patina over each side. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302
- 3920 1901-S MS65 PCGS.** A delightful Gem Morgan dollar, from a mintage of 2.2 million pieces, this coin offers well-detailed design elements and well-preserved lustrous surfaces with outstanding eye appeal. PCGS has graded 42 numerically finer examples (7/18). NGC ID# 256L, PCGS# 7276
- 3921 1902-S MS65 PCGS.** This brilliant Gem has full satin luster and untuned silver surfaces with exceptional eye appeal. PCGS has only certified 62 finer examples (7/18). NGC ID# 256P, PCGS# 7282
- 3922 1904 MS65 PCGS Secure.** Collectors can target the 1904 Morgan dollar in grades as high as MS65 but seldom any finer. This Gem is toned in original dusky hues with reddish-gold and blue patina around the margins. Slightly soft over the centers, the upper obverse, and the lower reverse. However, marks are few and far between. PCGS reports 38 finer submissions (8/18). NGC ID# 256U, PCGS# 7290
- 3923 1921 MS66+ PCGS. CAC.** A Plus-graded Premium Gem from the last year of the Morgan design, this coin exhibits sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces are enhanced by highlights of russet, sea-green, and lavender toning. PCGS has graded 16 numerically finer examples (7/18). NGC ID# 256X, PCGS# 7296
- 3924 1921-D MS66+ PCGS Secure. CAC.** The 1921-D is common in most grades but underrated at this level and certainly in better condition, where the issue becomes extremely difficult to obtain. Splashes of crimson, russet, and ice-blue toning color the border areas, leaving the centers mostly brilliant. Sharp and clean. NGC ID# 256Y, PCGS# 7298
- 3925 1921-S MS66 PCGS Secure.** A brilliant Premium Gem from the San Francisco Mint, this piece has frosty surfaces and bright silver luster with above-average design definition. Tied for the finest that PCGS has certified (7/18). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

- 3926 1890 PR62 PCGS.** From a small proof mintage of 590 pieces, this impressive PR62 example exhibits sharply detailed design elements and reflective fields throughout. The surfaces show the expected number of contact marks and hairlines for the grade, under mottled shades of lavender, gray, and sea-green toning. NGC ID# 27ZK, PCGS# 7325
- 3927 1892 PR61 PCGS.** Cleaning has subdued the surfaces on this proof, yet when held at just the right angle beneath a light the mirrored fields flash strongly, even more so on the reverse. Lacking just a bit of definition in the center of each side, as usually seen on this date, the surfaces show slight gray toning. NGC ID# 27ZM, PCGS# 7327

PEACE DOLLARS

- 3928 1921 MS65 NGC.** The first-year High Relief 1921 Peace dollar is always a popular issue, available here in brilliant Gem condition. Characteristic softness affects the central high points, but the fields and cheek are clean and lustrous. PCGS# 7356
- 3929 1921 MS65 NGC.** A luminous satin Gem example of the one-year High Relief Peace dollar type. The 1921 is arguably the most sought-after issue in the series due to its high relief, although a side effect of that relief is strike softness in the centers, as seen on this piece. Nonetheless, this coin displays excellent preservation and eye appeal. A hint of light golden toning graces each side. PCGS# 7356

3930 1921 MS65 PCGS. This Gem High Relief Peace dollar displays well-preserved, golden-toned mint luster and excellent eye appeal. The central high points are poorly struck, as usual on this issue. Finer examples quickly climb out of reach for the average collector. *Ex: ANA Signature (Heritage, 8/2016), lot 5580, which realized \$1,468.75. PCGS# 7356*

3931 1922 MS66+ PCGS. CAC. The 1922 Peace dollar becomes quite elusive in grades above the MS66 level. This high-end Premium Gem is well-detailed and impeccably preserved, with vibrant mint luster throughout. No mentionable toning is present. PCGS has graded 29 numerically finer examples (8/18). *Ex: Houston Signature (Heritage, 12/2015), lot 3984, which realized \$1,645. NGC ID# 257C, PCGS# 7357*

1924 Peace Dollar, MS67 Rare at This Grade Level

3932 1924 MS67 NGC. The 1924 Peace dollar is a plentiful issue through MS66, but its conditional rarity is obvious at the Superb Gem level. The fields and cheek are virtually unmarked, and just a couple of reeding marks hide within the confines of the eagle's feathers. Frosty mint luster glows from mostly brilliant surfaces that show faint blushes of gold. Census: 91 in 67 (2 in 67+, 1 in 67 ★), 1 finer (7/18). NGC ID# 257J, PCGS# 7363

3933 1926 MS66 PCGS. A spectacular Premium Gem specimen of this popular issue, with well-detailed design elements and well-preserved lustrous surfaces under pleasing shades of golden-tan toning. PCGS has graded no coins in higher numeric grades (7/18). NGC ID# 257N, PCGS# 7367

3934 1926-D MS66 PCGS. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the virtually pristine surfaces radiate vibrant mint luster from both sides. PCGS has graded eight numerically finer examples (7/18). NGC ID# 257P, PCGS# 7368

3935 1927 MS65 PCGS. From a low mintage of 848,000 pieces, the 1927 Peace dollar is seldom encountered in grades above the MS65 level. This well-detailed Gem exhibits well-preserved, lustrous surfaces, under pleasing shades of golden-brown toning. PCGS has graded 16 numerically finer examples (7/18). NGC ID# 257S, PCGS# 7370

3936 1927-D MS64+ PCGS. The 1927-D is a slightly better date in high grade. This Plus-designated MS64 coin displays satiny, untuned cartwheel luster and well-defined relief elements. Trivial grazes in the left obverse field and on the eagle's wing appear to be all that limit the grade. NGC ID# 257T, PCGS# 7371

3937 1927-D MS65 PCGS Secure. A small mark at 5 o'clock on the obverse rim appears mint-made on this brilliant Gem 1927-D Peace dollar that exhibits fully lustrous and untuned silver surfaces. PCGS has only certified 15 numerically finer (7/18). NGC ID# 257T, PCGS# 7371

3938 1927-S MS64+ NGC. CAC. Each side is clean for the grade and fully deserving of both the Plus designation from NGC and green approval sticker from NGC. Bright mint frost shimmers across the untuned surfaces. Minor softness over the centers is expected and does not affect the appeal of this near-Gem. A conditionally elusive semikey. NGC ID# 26J6, PCGS# 7372

3939 1934 MS66 PCGS. The 1934 Peace dollar is occasionally available in MS66, but PCGS lists only three Superb Gems finer (8/18). This Premium Gem displays satiny, untuned mint luster and well-struck design elements. Liberty's cheek and the fields are exceptionally clean, promoting strong visual appeal. NGC ID# 257Y, PCGS# 7375

3940 1934-D Doubled Die Obverse, VAM-4, Hot 50, MS63 PCGS. A Hot 50 Variety. Micro D mintmark. This is the most dramatic doubled die in the series, apparent on Liberty's profile. Daubs of crimson and gold color around the edges frame brilliant centers on each side of this lustrous MS63 representative. Sharply struck on the hair and feathers with minimal marks. Population: 10 in 63, 8 finer (7/18). NGC ID# 257Y, PCGS# 133781 Base PCGS# 7376

3941 1935 MS66 PCGS. An attractive Premium Gem, with well-detailed design elements and satiny mint luster on both sides. The well-preserved surfaces show highlights of golden-tan and lavender toning. PCGS has certified no coins in higher numeric grades (7/18). NGC ID# 2582, PCGS# 7378

3942 1935 MS66 NGC. Mint luster swirls beneath an overlay of deep chestnut-gold patina that covers the entire obverse and much of the reverse. Both sides are strongly defined and well-preserved without mentionable flaws. Census: 73 in 66 (2 in 66+), 5 finer (7/18). NGC ID# 2582, PCGS# 7378

3943 1935-S MS65 PCGS. CAC. Three rays below ONE. Splashes of peach-gold and olive-green toning cross a majority of the obverse. The reverse is primarily brilliant but does display russet freckles near ONE and DOLLAR. A popular West Coast issue. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

1972 Eisenhower Dollar, MS66 Type One, None Graded Finer

3944 1972 Type One MS66 PCGS. The Type One Eisenhower dollar reverse shows a flat border from 9 to 12 o'clock on the earth. With a mintage of nearly 76 million coins, this issue does not necessarily stand out as a great rarity, but it is at this level. Satiny nickel-gray surfaces are mostly smooth with shallow marks that are far fewer in number than usual. Population: 11 in 66, 0 finer (7/18). NGC ID# 2587, PCGS# 87409

3945 1976 Type One MS66 PCGS. The Type One reverse for this Bicentennial issue has thick lettering for UNITED STATES OF AMERICA and a long tail on the final S. Satiny, well-preserved surfaces show pale gold elements around the margins. Population: 37 in 66 (1 in 66+), 0 finer (7/18). NGC ID# B76K, PCGS# 7418

GOLD DOLLARS

3946 1849-C Closed Wreath XF40 PCGS. Variety 1. The Closed Wreath hub type makes up almost all 1849-C gold dollars. This lightly circulated piece displays pleasing detail for the grade with original olive-gold and amber patina. The surfaces are luminous and minimally abraded. An outstanding first-year Charlotte gold dollar. NGC ID# 25BC, PCGS# 7505

3947 1850-C VF35 PCGS. CAC. Variety 1. A rare Charlotte issue with a low mintage of 6,966 pieces. This Choice VF example has attractive and original olive-green and orange-gold toning. Marks are virtually absent save for a small tick beneath the A in DOLLAR. Certified in a first generation “rattler” holder. CAC: 1 in 35, 10 finer (8/18). NGC ID# 25BG, PCGS# 7510

3948 1850-O AU58 NGC. CAC. Variety 1. The 1850-O is the lowest mintage New Orleans gold dollar, with about one-fourth the production of the more costly Type Two 1855-O. This sharply defined near-Mint example retains its original green-gold “skin.” The minimally marked surfaces exhibit attractive eye appeal. CAC: 15 in 58, 6 finer (8/18). NGC ID# 25BJ, PCGS# 7512

3949 1851-D — Repaired — NGC Details. AU. Variety 3-D. The rarer of two varieties, identified by the leaf under right foot of second 1 in date and minor repunching on the serifs of the mintmark. This well-defined AU representative has deep orange-gold color and shows a small area of repair between stars between 8 and 9 o’clock, most easily seen by faint pinscratches. The reverse is rotated almost 90 degrees. From a mintage of 9,882 coins. NGC ID# 25BM, PCGS# 7515

3950 1855 Type Two MS61 PCGS. An attractive Mint State specimen of the short-lived Type Two design, with well-detailed design elements and some interesting clash marks on both sides. The lustrous yellow and rose-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 25C4, PCGS# 7532

3951 1855-O AU55 PCGS Secure. CAC. Variety 2. The only New Orleans issue of the briefly produced Type Two design. An attractive green-gold example with light wear on the forehead curls. Smooth except for a slight rim nick at 4 o’clock on the reverse. The upper portion of the wreath is lapped, as usual for this die pair. CAC: 15 in 55, 34 finer (8/18). NGC ID# 25C7, PCGS# 7535

1857-C Gold Dollar, AU55 Elusive Charlotte Issue

3952 1857-C AU55 NGC. Variety 1. A satiny apricot-gold example of a challenging Charlotte issue. Surprisingly unabraded aside from a small dig above the O in DOLLAR. The surfaces are microgranular in places, as coined. The strike is usual for the Southern branch facility, but UNITED STATES OF AMERICA is bold. Just 13,280 pieces were produced. Census: 53 in 55, 46 finer (7/18). NGC ID# 25CE, PCGS# 7545

3953 1889 MS66 PCGS. CAC. A delightful Premium Gem specimen from the final year of the denomination, this coin exhibits sharply detailed design elements and some interesting peripheral die cracks on the reverse. The well-preserved orange-gold surfaces are lustrous and appealing. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

3954 1835 AU55 NGC. Breen-6141, Variety 6, R.2. Luster outlines the stars and legends of this lightly circulated Classic quarter eagle. No abrasions are of individual consequence. The stars are well-struck with full centers, while the centers are incompletely brought up, as usual for the variety.
Ex: Long Beach Signature (Heritage, 9/2010), lot 5186; Chicago Signature (Heritage, 8/2011), lot 5353; Beverly Hills Signature (Heritage, 11/2014), lot 5049, where it realized \$1,116.25. NGC ID# 25FT, PCGS# 7693

3955 1836 Script 8 AU58 NGC. Breen-6143, Variety 11, R.2. This piece is well-struck at the borders with selected incompleteness in the centers. The straw-gold fields display only trivial contact, though we note a slender diagonal mark on Liberty’s cheek. A pleasing Classic Head type coin with remnants of original luster in the margins.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 4456, which realized \$1,880. NGC ID# 25FU, PCGS# 7694

LIBERTY QUARTER EAGLES

1841-D Two and a Half, VF35
Only 4,164 Pieces Produced

3956 1841-D VF35 PCGS Secure. CAC. Variety 2-D. This rare variety is most easily distinguished by a vertical die crack to the left of the mintmark. Only 4,164 pieces were struck from three die pairings. From that tiny mintage, it is estimated that today only 80-100 examples are known. The surfaces show even wear and slight reddish patina over each side. CAC: 1 in 35, 6 finer (7/18). NGC ID# 54TW, PCGS# 7722

3957 1846-O AU55 NGC. Variety 1. The O mintmark nearly touches the claw, as usual. A total of 62,000 quarter eagles were struck at the New Orleans Mint in 1846. This Choice AU representative has deep olive-gold color that lightens around the design elements, where original luster remains. Typically defined. NGC ID# 25H4, PCGS# 7743

3958 1847-C AU58 ANACS. Variety 1. This inordinately well-struck Charlotte quarter eagle is void of any indication of highpoint wear, but it is lackluster and has a consistent microgranular texture. The surface appearance is not typical of a coin designated Cleaned, but it is strikingly similar to the “etched” look of sea-salvaged gold pieces. Given its sharpness, this 1847-C quarter eagle remains an important consideration for the Southern gold specialist.
Ex: ANA Signature (Heritage, 3/2007), lot 1705, which realized \$1,725. NGC ID# 25H6, PCGS# 7745

3959 1852 MS64+ PCGS Secure. Gold coin production at the Philadelphia Mint took off in the early 1850s. In 1852, more than 1.1 million quarter eagles were struck. A number of die cracks appear near the upper stars. The obverse is yellow-gold, while the reverse is a deeper shade of orange-gold. Fully struck with small abrasions. Population: 57 in 64 (5 in 64+), 16 finer (7/18). NGC ID# 25HR, PCGS# 7763

1852-C Quarter Eagle, AU53
Elusive in All Grades

- 3960 1852-C AU53 NGC. **Variety 1.** A lightly circulated straw-gold representative of this difficult, low-mintage Charlotte issue (9,772 coins). No marks are noticeable on either side and luster glints from the recessed areas. The centers show incompleteness of strike but the wings and the curls near the hairbun are well-defined. Only 115 to 165 pieces are believed known of this challenging issue. *Ex: Central States Signature (Heritage, 4/2013), lot 5507.* NGC ID# 25HS, PCGS# 7764

- 3961 1852-O AU58 PCGS **Secure. Variety 2.** The large, relatively high-relief mintmark mostly left of the fletching is thought to have been hand-engraved into the working die. A total of 140,000 quarter eagles were struck at the O-mint in 1852. About 200 to 250 pieces survive, according to Winter. The obverse is strong on this light yellow-gold example. Marks occur in the fields on that side, and the reverse is a bit softer. Population: 31 in 58, 20 finer (7/18). NGC ID# 7HX8, PCGS# 7766

1861 Quarter Eagle, MS61
Type One Reverse

- 3962 1861 Old Reverse, Type One, MS61 NGC. The shape of the arrowheads on the reverse is drastically different on the two types that transitioned between 1859 and 1861. The Type One, or Old Reverse, varieties are scarcer than the Type Two coins for all three dates. This piece has inconsequential marks on its brilliant light yellow surfaces. Census: 24 in 61, 23 finer (7/18). NGC ID# 25JX, PCGS# 97794

1861 Quarter Eagle, MS62
Scarce Type One Reverse

- 3963 1861 Old Reverse, Type One, MS62 NGC. The Type One reverse has shorter, wider arrowheads and an oval O in OF. These 1861 Old Reverse quarter eagles are scarce in all grades with only 150 to 200 pieces extant. This peach-gold Mint State rarity is well-struck on the stars and wing feathers, while the centers exhibit slight softness of strike. Luster is radiant, and the grade is limited only by scattered marks on each side. Census: 16 in 62, 7 finer (7/18). NGC ID# 25JX, PCGS# 97794

- 3964 1861 New Reverse, Type Two, MS63 PCGS. **CAC.** This is the usual variety for the date with a round O in OF and thin, widely spaced arrowheads. Warm yellow-gold surfaces exhibit frosty luster, strong detail, and few marks for the Select Uncirculated grade. A lovely original example with CAC approval. NGC ID# 25JX, PCGS# 7794

- 3965 1861 New Reverse, Type Two, MS64 PCGS. This impressive Choice specimen exhibits sharply detailed design elements, including the thin, separated arrow heads that characterize the reverse hub that was first adopted in 1859. The well-preserved orange-gold surfaces radiate satiny mint luster throughout. PCGS has graded 50 numerically finer examples (7/18). NGC ID# 25JX, PCGS# 7794

- 3966 1861 New Reverse, Type Two, MS64 PCGS. The thin, separated arrow heads identify the Type Two reverse. This impressive Choice example exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster and ample eye appeal. PCGS has graded 50 numerically finer examples (7/18). NGC ID# 25JX, PCGS# 7794

1872-S Quarter Eagle, MS61
Low Mintage and Survival Rate

- 3967 1872-S MS61 NGC. Probably only a couple hundred 1872-S quarter eagles survive from a mintage of 18,000 coins, and the majority of those are in XF-AU condition. The lustrous, reddish-gold surfaces of this MS61 condition rarity offer bold definition on the design elements and terrific overall appeal. Small abrasions are apparent on each side. Census: 7 in 61, 8 finer (7/18). NGC ID# 25KL, PCGS# 7816

**1899 Quarter Eagle, MS66+
Radiant, Nearly Mark-Free Type Coin**

- 3968 1899 MS66+ PCGS. CAC.** The Mint struck 27,200 quarter eagles in 1899. This 19th century issue is popular for type purposes. Radiant yellow-gold surfaces glimmer with frosty mint luster and show faint coppery hues above Liberty's head. The motifs are completely brought-up. We can find no marks that merit mention. Population: 34 in 66 (5 in 66+), 10 finer. CAC: 12 in 66, 4 finer (7/18). NGC ID# 25LP, PCGS# 7851

**1904 Liberty Quarter Eagle, MS67
One Finer Example at PCGS**

- 3969 1904 MS67 PCGS.** The long-employed Liberty Head design by Christian Gobrecht, in use on the quarter eagle since 1840, is fully brought-up on this 20th century Superb Gem. Yellow-gold surfaces beam with thick, frosty luster and are notably free of abrasions. A speck of aqua residue occurs in the L of LIBERTY. Population: 74 in 67 (4 in 67+), 1 finer (7/18). NGC ID# 25LV, PCGS# 7856

**1905 Quarter Eagle, MS67
Fully Struck and Frosty**

- 3970 1905 MS67 PCGS.** Putting together a short set of 20th century Coronet quarter eagles is a fun and entirely achievable endeavor, but the task becomes difficult in MS67 even for the 1905, which claims one of the series' highest mintages (217,800 coins). This seemingly flawless, fully struck Superb Gem offers frosty apricot-gold surfaces that are nearly devoid of marks and show delicate lilac accents. A single tick appears on Liberty's neck. PCGS reports five finer examples (7/18). NGC ID# 267S, PCGS# 7857

INDIAN QUARTER EAGLES

- 3971 1911-D — Cleaned — NGC Details. AU.** NGC notes light cleaning, although the evidence is faint to the point of being questionable. Both sides have somewhat smooth fields — not the microgranular texture typical of 1911-D quarter eagles — but this can be attributed to light wear on each side. Some faint hairlines are not bothersome, and such are often seen on AU-level gold coins as a result of circulation. The devices are similarly worn on the high points and show touches of lilac color. Overall, the coin is olive-gold and visually pleasing. The mintmark is worn but faintly visible with a glass.

- 3972 1912 MS64 PCGS.** Although a significant number of 1912 quarter eagles have earned the Choice Mint State (MS64) grade at PCGS and NGC, only 91 have received a higher numerical grade at PCGS (7/18). This frosty Mint State piece has excellent eye appeal with brilliant yellow surfaces. NGC ID# 7KR8, PCGS# 7944

**1913 Two and a Half, MS65
Beautiful Luster and Color**

- 3973 1913 MS65 PCGS.** A luminous, frosty orange-gold Gem with remarkably clean fields and sharp design elements. Original peach-orange coloration adorns each side, producing exceptional eye appeal. The 1913 is a relatively plentiful issue and is occasionally seen in MS65. But PCGS lists only nine higher-grade representatives (8/18), and this Gem is among the most eye-appealing coins that we have seen. NGC ID# 7KR9, PCGS# 7945

**1914 Two and a Half, MS64
Rich Original Toning**

- 3974 1914 MS64 PCGS.** The 1911-D is the unchallenged key to the Indian quarter eagle series, but the low-mintage 1914 is comfortably in second place. An orange-gold near-Gem with green undertones. Lustrous, well-struck, and exceptionally free from marks. This highly attractive example is housed in a green-label holder. NGC ID# 7KRA, PCGS# 7946

- 3975 1914-D MS64 PCGS.** The 1914-D quarter eagle experiences strong demand in MS64 due to the rarity of finer pieces. This example has original satin luster that shows deep orange-gold color in the centers, ceding to brighter yellow-gold margins. Moderate strike weakness is visible on the lower headdress feathers.
Ex: Houston Signature (Heritage, 11/2007), lot 61589, which realized \$3,737.50. NGC ID# 2899, PCGS# 7947

- 3976 1925-D MS65 PCGS.** This spectacular Gem Indian quarter eagle exhibits sharply detailed design elements on both sides, with well-preserved orange-gold surfaces and vibrant mint luster throughout. PCGS has graded 39 numerically finer examples (7/18). NGC ID# 7KRD, PCGS# 7949
- 3977 1926 MS65 NGC.** This type-coin representative features a uniformly bold impression and glistening mint frost over medium yellow-gold surfaces. There are a couple of minute ticks in the left obverse field but few elsewhere. NGC has graded a mere 23 finer submissions (8/18). NGC ID# 7KRE, PCGS# 7950
- 3978 1927 MS65 PCGS.** Beautiful orange-gold luster with lilac accents adorns this luminous Gem type coin. The strike is sharp and a few scattered field marks are not bothersome. The 1927 quarter eagle is available in this grade, but PCGS lists only 22 finer representatives (8/18). NGC ID# BUTL, PCGS# 7951
- 3979 1928 MS65 PCGS.** The rich orange-gold toning is accompanied by glimpses of steel-blue on the devices. This coruscating near-Gem has few marks, and the strike is complete save for the lowest headdress feathers. Encapsulated in a green-label holder.
Ex: FUN Signature (Heritage, 1/2008), lot 3966, which realized \$4,312.50. NGC ID# 289E, PCGS# 7952
- 3980 1928 MS65 PCGS.** This well-struck Gem 1928 Indian quarter eagle displays softly frosted, luminous mint luster with only trivial surface grazes. Much of each side has warm orange-gold color, although wisps of lilac and rose appear when tilted beneath a light. PCGS lists 13 finer grading events (8/18). NGC ID# 289E, PCGS# 7952

THREE DOLLAR GOLD PIECES

- 3981 1854-O — Tooled — PCGS Genuine. AU Details. Variety 2,** as usual, the dies lapped. This AU-level 1854-O three dollar gold piece displays bright yellow-gold color and sharp detail. There are numerous scratches in the fields that limit the grade. PCGS calls the coin tooled, although the field marks might more accurately just be described as scratches, since they have no apparent purpose. Only 24,000 three dollar gold pieces were ever struck at the New Orleans Mint.
- 3982 1856-S XF45 NGC.** Medium S. From a mintage of 34,500 pieces, this Choice XF specimen shows only light wear on the well-detailed design elements, and the often-seen die break below L in DOLLAR is present. The still-lustrous orange-gold surfaces are lightly abraded. NGC ID# 25M9, PCGS# 7975
- 3983 1859 AU55 PCGS Secure.** This is a relatively collectible early three dollar issue from a mintage of 15,588 coins. Well-detailed, minimally worn surfaces are light yellow-gold. The central reverse and left wreath leaf are particularly strong. Abrasions in the right obverse field and left of the final A in AMERICA merit attention. NGC ID# 7K5K, PCGS# 7979
- 3984 1878 MS62 NGC.** A bright yellow-gold example of this plentiful type coin issue, showing well-struck design elements and satiny mint luster. Scattered light contact marks account for the grade but none are individually bothersome. Eye appeal is pleasing for the MS62 level. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS63 Perfect for Type Purposes

- 3985 1878 MS63 PCGS.** The 1878 three dollar gold piece derives from a healthy mintage of 82,304 coins struck in anticipation of heightened demand for gold when the yellow metal reached parity with paper currency. Commercial demand for these coins never materialized, however. Instead, most sat in storage. This Select Uncirculated example has shimmering mint luster and reddish-gold accents. The headdress, upper wreath elements, and denomination are crisp, while minor softness occurs on the lower curls, the date, and the bowknot. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS64+ Glistening Type Coin

- 3986 1878 MS64+ NGC.** The 1878 may be the most available issue in the series, but seldom does one encounter an example with eye appeal as pronounced as this. Coruscating mint frost shimmers over shades of deep orange and lighter rose-gold on each side. The date and central wreath bow are slightly soft, but design detail is bold elsewhere. An unlisted doubled die variety is seen on the ARS in DOLLARS and the upper-right portion of the wreath. The 8s in the date are also lightly repunched. NGC ID# 25MZ, PCGS# 8000
- 3987 1879 AU53 PCGS Secure.** Only 3,000 pieces were manufactured, but this remains a collectible date in the absolute sense. Semireflective orange-gold surfaces display moderate friction and wispy, inoffensive hairlines. The date and denomination are bold, as are the headdress elements. NGC ID# 25N2, PCGS# 8001
- 3988 1887 AU53 NGC.** While output increased sixfold over the previous year, only 6,000 three dollar gold pieces were struck in 1887. This briefly circulated, partly lustrous example with reddish-gold color features a strong strike with design elements that exhibit a normal amount of friction. Faint hairlines are scattered over each side. NGC ID# 25NA, PCGS# 8009

**1888 Three Dollar, MS63
Attractive Original Color**

- 3989 1888 MS63 PCGS.** Original color doubtless serves as the hallmark of this Select three dollar gold piece. Lavender and reddish accents complement medium yellow-gold surfaces. The surfaces are smooth and frosty with planchet voids above Liberty's nose and the D in DOLLAR. Well-struck throughout. The 1888 claims a mintage of 5,000 pieces, but it is possible some of these were undistributed and later melted. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

**1803/2 BD-4 Five Dollar
AU Sharpness**

- 3990 1803/2 BD-4, R.4 — Mount Removed, Improperly Cleaned — NCS. AU Details.** Bass-Dannreuther Die State c/c. The "perfect" T in LIBERTY distinguishes BD-4 from the first three 1803-dated die varieties. A horizontal crack through the E in AMERICA further confirms the marriage. This well-struck representative shows little if any wear, but the surfaces are glossy and hairlined. The dentils near the fletchings exhibit signs of repair.

**1810 Large Date, Large 5 Half Eagle
BD-4, AU Details**

- 3991 1810 Large Date, Large 5, BD-4, R.2 — Repaired — PCGS Genuine Secure. AU Details.** Bass-Dannreuther Die State c/b. A crack or die line runs vertically between the 81 in the date. This AU-level type coin displays bright yellow-gold surfaces with sharp detail. The fields on both sides are tooled, most prominently to the left of the portrait of Liberty and above the eagle's head. Little circulation-caused wear is discernible. Bits of whitish residue cling to the edges of the border stars and legends and are also visible in the letters of LIBERTY and E PLURIBUS UNUM.

CLASSIC HALF EAGLES

- 3992 1834 Plain 4 AU50 NGC. CAC. Second Head, Breen-6502, McCloskey 2-B, R.3.** Slight evidence of friction can be seen in the exposed areas of the fields, but a significant presence of mint luster can still be seen around the devices on each side. Even light reddish-gold color with no obvious or distracting marks. NGC ID# 25RR, PCGS# 8171
- 3993 1834 Plain 4 AU58 NGC. Breen-6501, McCloskey 1-A, R.3.** First Head. The Script 8 and the close spacing of the 3 and Plain 4 in the date confirm the attribution. The base of (UNITE)D is repunched. Luminous mint luster within the recesses and bright yellow-gold coloration appear on each side. Friction is minimal, as are distracting abrasions. NGC ID# 25RR, PCGS# 8171
- 3994 1834 Plain 4 AU58 PCGS. Breen-6502, McCloskey 2-A, R.1** Breen's Second Head. A bright, near-Mint example of this popular first year of issue for the Classic design type. Problem-free examples, such as this piece, make an excellent selection for type or inclusion in a date set of this highly collectible series. The fields are bright and semiprooflike, as often found on 1834s. Rich yellow color with a hint of reddish patina. NGC ID# 25RR, PCGS# 8171

LIBERTY HALF EAGLES

**1839-D Five Dollar Liberty, VF25
Problem-Free, CAC-Certified**

- 3995 1839-D VF25 PCGS. CAC. Variety 2-A.** The 1839-D is a scarce and important issue in the series. It is a one-year type coin, distinguished by the obverse mintmark and the distinctly curved truncation of the neck. For a VF coin the surfaces are original and problem-free for the grade. There are no obvious or detracting marks. The yellow-gold surfaces show a faint outline of reddish patina surrounding the devices. CAC: 1 in 25, 10 finer (7/18). NGC ID# 25S9, PCGS# 8193
- 3996 1841-D Small D VF35 NGC. CAC. Variety 5-D.** The Small Mintmark reverse is the usual variety of this early Dahlonega five. This Choice VF example displays olive-gold patina with deeper russet tinges in the protected peripheral recesses. Wear is consistent with the grade. Both sides are moderately abraded, although no singular marks detract from the eye appeal. NGC ID# 25SR, PCGS# 8204
- 3997 1842 Small Letters AU50 NGC.** Small Letters representatives are slightly more available than their Large Letters counterparts. However, with a mintage of 27,500 pieces, all examples are scarce, and coins as fine as this are rare. Partly lustrous wheat-gold surfaces are heavily abraded, but definition is still strong. An underrated issue. NGC ID# 25ST, PCGS# 8207
- 3998 1843 MS61 PCGS.** The lustrous orange-gold surfaces of this Mint State Liberty half eagle are lightly marked for the grade and the design elements are sharply detailed throughout. Population: 19 in 61, 29 finer (7/18). NGC ID# 94FD, PCGS# 8213
- 3999 1845 MS61 PCGS Secure.** Uncirculated examples of this No Motto issue are scarce. This piece is attractive for the grade, showing fully struck devices and slight reflectivity in the fields. Rich orange-gold color and a lack of severe abrasions enhance the appeal. An excellent type coin. Population: 8 in 61, 40 finer (7/18). NGC ID# 25TB, PCGS# 8223

1846-D/D Five Dollar, XF40
Dramatic Repunched Mintmark

4000 1846-D/D XF40 NGC. CAC. Variety 17-J. The mintmark was initially entered much too high, then repunched in a proper position. Arguably the best-known die variety from the Dahlonega Mint. This almond-gold representative displays fewer than the anticipated number of small abrasions. The strike shows blending on the curls. Housed in a circa-2000 holder. Rarely encountered with the CAC seal of approval. CAC: 2 in 40, 8 finer (8/18). NGC ID# 25TH, PCGS# 8229

4001 1847-C — Cleaned — NGC Details. AU. Variety 1. The 1847-C half eagle is among the more plentiful issues from the Charlotte Mint, ideal for collectors seeking a single C-mint coin. This AU-level example displays an excellent strike and trivial high-point friction. The usual scattered abrasions and chatter are expected from the grade. Hairlines on each side indicate a light cleaning but are not overly bothersome.

1847-C Half Eagle, AU55
Collectible Charlotte Mint Issue

4002 1847-C AU55 PCGS. Variety 1. Commercial demand for half eagles in North Carolina was at its peak in 1847, when 84,151 of these five dollar gold coins were struck. The 1847-C is one of the most collectible Charlotte Mint products, claiming a survival rate of 300 to 400 coins. The central devices exhibit relatively strong detail and partial luster remains around the legends. Reddish accents appear over abraded orange-gold surfaces. Population: 17 in 55, 23 finer (7/18). NGC ID# 25TN, PCGS# 8233

1847-D Half Eagle, AU50
Underrated Branch Mint Issue

4003 1847-D AU50 NGC. CAC. Variety 19-I. The 1847-D Liberty half eagle claims a fairly substantial mintage of 60,405 pieces, but the issue is surprisingly difficult to locate in high grade and its elusive nature is largely unappreciated, outside of series specialists. This attractive AU example exhibits some light wear on the strongly impressed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 25TP, PCGS# 8234

4004 1849 AU58 NGC. The 1849 half eagle is scarce in any grade and becomes conditionally rare in Mint State. This lustrous red-gold survivor is nearly Uncirculated. Friction is essentially imperceptible over razor-sharp devices with particularly strong borders and marginal elements. Faint hairlines do not detract. Census: 39 in 58 (1 in 58+), 30 finer (7/18). NGC ID# C5XC, PCGS# 8240

1853-D Half Eagle, AU58
Semireflective Fields

4005 1853-D AU58 NGC. Variety 35-AA. The mintmark is high, touching the fletchings and the stem, and it is lightly repunched at its base and left inside loop. Luster fills the borders and the recesses of the devices on this coin. The strike is weak on the eagle's neck and talons and the hair curls around Liberty's face, but the stars and legends are well-defined. The fields are slightly reflective. Both sides are moderately abraded, and a few deeper scrapes are visible in the field next to Liberty's forehead. Ex: Long Beach Signature (Heritage, 2/2005), lot 7815, which realized \$4,945. NGC ID# 25UF, PCGS# 8255

4006 1854-O AU55 NGC. Variety 1. The most protected portions of the fields show prooflike reflectivity, while the majority of this Choice AU New Orleans half eagle is lightly circulated with bright straw-gold patina. Trivial strike weakness is seen on the hair curls around Liberty's face, although the remainder of the coin is well-defined. Census: 37 in 55, 47 finer (7/18). NGC ID# 25UM, PCGS# 8259

1858-D Half Eagle, XF45
Scarcer Than Generally Believed

- 4007 1858-D XF45 PCGS. Variety 43-HH.** This late-date Dahlonega half eagle “is generally overlooked, but it is actually scarcer than most collectors believe,” according to Doug Winter, who pegs the survivorship at 200 to 250 pieces. A total of 15,362 examples were originally coined. This Choice XF representative with the upright of the mintmark over the gap between VE in FIVE is typically struck, though the stars display surprisingly full radial lines. Bright with scattered abrasions. NGC ID# CBBT, PCGS# 8278

1858-D Five Dollar, AU50
Scarce Dahlonega Issue

- 4008 1858-D AU50 PCGS. Variety 43-HH.** A small mintage of 15,362 pieces confirms the rarity of the 1858-D half eagle. This representative is mostly peach-gold, though the eagle's high points are powder-blue. The bright and glossy surfaces show only incidental marks. A minor lamination (as made) is seen near the STA in STATES. The strike is above average for the Dahlonega facility, despite blending on the fletchings, eyebrow, and upper curls. NGC ID# CBBT, PCGS# 8278
- 4009 1861 MS61 PCGS Secure.** This attractive Mint State Liberty half eagle exhibits sharply detailed design elements throughout, with lustrous yellow and rose-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 25VK, PCGS# 8288
- 4010 1871-CC — Cleaned — PCGS Genuine. VF Details. Variety 1-A.** PCGS notes a light cleaning, although this VF-level 1871-CC half eagle has dusky wheat-gold patina that is pleasing for the grade level. Most major details are still visible. Light surface chatter is apparent on each side, but there are no significant abrasions. This issue is scarce in all grades.
- 4011 1874-S VF35 PCGS Secure.** An underappreciated issue with a meager mintage of 16,000 pieces. As of (7/18), PCGS has certified only 85 examples in all grades, a smaller number than (for example) the 1921 double eagle. This Choice VF 1874-S five has rich peach-gold color and a smattering of unimportant marks. The wings exhibit considerable design detail. NGC ID# 25WR, PCGS# 8335

1880-CC Half Eagle, Choice AU
Partly Lustrous and Problem-Free

- 4012 1880-CC AU55 NGC. Variety 1-B.** The 1880-CC is intermediate in rarity between the costly Carson City issues of the 1870s and the readily collected CC-mint issues from the 1890s. This briefly circulated butter-gold example displays bright luster throughout the borders. There are no distracting marks. The strike is incomplete on the fletchings and hairbun. Census: 54 in 55, 57 finer (7/18). NGC ID# 25XB, PCGS# 8352
- 4013 1891-CC MS61 PCGS Secure. Variety 1-A.** The date is better-centered relative to Variety 2-A, where it is further left and shows repunching on the second 1. The 1891-CC half eagle is an ideal issue for type purposes with 208,000 coins struck. This Uncirculated example has brightly frosted yellow-gold surfaces and strong detail. Small abrasions fail to distract. NGC ID# 25Y5, PCGS# 8378
- 4014 1891-CC MS61 PCGS. Variety 1-A.** An orange-gold half eagle with relatively few marks. Luster dominates the margins and motifs. The strike is good, though the eagle's breast feathers show blending. An affordable addition to a Carson City type set. NGC ID# 25Y5, PCGS# 8378
- 4015 1891-CC MS61 NGC. Variety 1-A.** Vibrant mint luster promotes strong eye appeal for the grade on this Mint State 1891-CC five, and surface abrasions are minimal. The strike is sharp, complementing original yellow-gold coloration. The 1891-CC half eagle comes from a mintage of 208,000 pieces and is collectible for those seeking a type coin from the Carson City Mint. NGC ID# 25Y5, PCGS# 8378
- 4016 1893-CC AU55 ANACS. Variety 2-A.** From the final year of production at the Carson City Mint, this Choice About Uncirculated half eagle exhibits a bold strike with only a trace of friction seen over the high points of the devices. Substantial mint luster remains beneath deep yellow-gold patina.
Ex: Central States Signature (Heritage, 4/2014), lot 6514, which realized \$1,762.50. NGC ID# 25YB, PCGS# 8384
- 4017 1893-CC AU58 NGC. Variety 2-A.** Satiny luster still glistens in the fields of this near-Mint 1893-CC five, while the well-struck design elements exhibit a touch of friction that denies a Mint State grade. The surfaces are smooth and appealing. The 1893-CC half eagle is available in AU grades, but finer examples are scarce and often have poor eye appeal due to heavy abrasions. NGC ID# 25YB, PCGS# 8384
- 4018 1893-O MS62 PCGS. Variety 1.** With Motto Liberty half eagle mintage at New Orleans was confined to the three years between 1892 and 1894. Since the 1892-O and 1894-O have very low mintages, Southern gold type demand is focused on the 1893-O. This caramel-gold representative has a good strike and no distracting marks. Population: 52 in 62 (1 in 62+), 18 finer (7/18). NGC ID# 25YC, PCGS# 8385

1894 Half Eagle, MS65
Underrated and Among the Finest at NGC

4019 1894 MS65 NGC. The 1894 half eagle is underrated at the MS64 and MS65 grade levels. Only a handful of survivors compare to this Gem, and just three pieces, all certified at PCGS, are graded higher. Peach-gold colors each side, and frosty mint luster illuminates well-preserved surfaces. The stars, feathers, olive leaves, and fletchings are strong. Census: 12 in 65, 0 finer (7/18). NGC ID# 25YE, PCGS# 8387

4020 1895 MS65 PCGS Secure. The PCGS CoinFacts plate coin. Although plentiful through MS64, this date, like its contemporaries, is underrated at the Gem level. Definition is strong on the devices, and peach-gold surfaces glisten with lively mint luster. Identifying marks are noted on the nose and in the adjacent fields, otherwise smooth. Population: 24 in 65, 8 finer (7/18). NGC ID# 25YH, PCGS# 8390

4021 1903-S MS65 PCGS. CAC. This spectacular Gem exhibits sharply detailed design elements throughout, with well-preserved orange-gold surfaces and vibrant mint luster on both sides. PCGS has graded 29 numerically finer examples (7/18). NGC ID# 25Z3, PCGS# 8408

4022 1904 MS65 PCGS. CAC. A sharply detailed Gem representative of this late-series issue, with vibrant mint luster and well-preserved orange-gold surfaces. Housed in a green label holder. Population: 81 in 65 (3 in 65+), 32 finer. CAC: 11 in 65, 15 finer (7/18). NGC ID# 25Z6, PCGS# 8409

1905 Five Dollar, MS66
Vibrant Mint Luster

4023 1905 MS66 NGC. Even though 302,200 examples were struck of the 1905 Liberty half eagle it is an elusive issue in MS65 or better condition. This Plus-graded Gem is sharply detailed throughout, with well-preserved orange-gold surfaces and vibrant mint luster. Census: 19 in 66 (1 in 66+, 2 in 66 ★), 6 finer (7/18). NGC ID# 25Z6, PCGS# 8411

4024 1908 MS65 PCGS. CAC. Always a popular issue for type because of its ready availability as well as its status as the final year of the Liberty Head five dollar series. This Gem example displays lovely medium-gold surfaces with lilac, olive-green, and reddish accents that float across the sharply struck, frosty surfaces. Cartwheel luster intensifies the coloration. CAC endorsed, with a few tiny ticks on the portrait but no serious marks and great eye appeal. CAC: 57 in 65, 17 finer (7/18).
Ex: Central States Signature (Heritage, 4/2016), lot 5855, which realized \$2,820. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

4025 1908 MS64 PCGS Secure. A transitional year marking the end of the Liberty head design and the beginning of the Indian design is represented by this Choice Mint State 1908 Indian five that features brilliant honey-gold surfaces and satin mint luster. NGC ID# 28DE, PCGS# 8510

4026 1909-D MS64+ PCGS. The 1909-D is famously popular as a type-coin issue, although pieces grading finer than MS64 are elusive. This is a frosty high-end near-Gem with bold design elements and refreshingly unabraded reddish-gold surfaces. The obverse is fully Gem quality, the reverse has stray lines in the fields that limit the PCGS designation. NGC ID# 28DJ, PCGS# 8514

4027 1909-D MS64 NGC. CAC. Pleasingly detailed overall with strong mint luster. The surfaces are primarily straw-gold, though occasional pink and violet accents visit the well-preserved fields. An attractive representative of this popular type issue. NGC has certified 88 numerically finer pieces (7/18).
Ex: Baltimore Signature (Heritage, 7/2008), lot 3085, realized \$3,714.50. NGC ID# 28DJ, PCGS# 8514

4028 1910-S MS62 NGC. Examples of the conditionally scarce 1910-S half eagle become extremely difficult to locate in grades finer than this. The feathers on the headdress and eagle are strong. Pale orange-gold color paints surfaces that show thin, moderate marks rather than heavy abrasions. NGC reports 32 finer coins (8/18). NGC ID# 28DN, PCGS# 8519

4029 1911 MS64 PCGS. Khaki-green and peach-gold toning enrich this satiny Indian five dollar type coin. The strike is good, and the only consequential marks are limited to the field near the profile. Certified in a green-label holder.
Ex: Houston Signature (Heritage, 11/2007), lot 61687, which realized \$4,600. NGC ID# 28DP, PCGS# 8520

4030 1911-D AU55 NGC. Profound red-gold color provides wonderful eye appeal to this Choice About Uncirculated half eagle. High-point friction occurs on each side, as do scattered marks, and the mintmark is somewhat difficult to discern, but these do not affect the desirability of this low-mintage key date. NGC ID# 28DR, PCGS# 8521

4031 1911-S MS62 PCGS Secure. This piece shimmers with original, frosty mint luster, yielding wheat-gold, orange, and olive hues. The lower headdress feathers are incompletely detailed, but the remainder of the coin is well-struck. Eye appeal exceeds expectations for the grade on this lovely 1911-S Indian half eagle. NGC ID# 25ZM, PCGS# 8522

4032 1911-S MS62 PCGS. This is a moderately well-struck 1911-S Indian half eagle with a clear mintmark and bright, frosty luster. Moderate abrasions on each side define the grade, although the luminance of the surfaces promotes pleasing visual appeal nonetheless. This is a better date in higher grades. NGC ID# 25ZM, PCGS# 8522

1911-S Indian Half Eagle, MS63
Elusive Issue in Finer Grades

4033 1911-S MS63 PCGS. The 1911-S Indian half eagle claims a substantial mintage of 1.4 million pieces, but the issue is more elusive than the large production total would suggest, especially in high grade. This attractive Select specimen exhibits sharply detailed design elements throughout, and the lightly marked orange-gold surfaces radiate vibrant mint luster. PCGS has graded 35 numerically finer examples (8/18). NGC ID# 25ZM, PCGS# 8522

4034 1913-S MS61 NGC. Scattered scuffs in the fields limit the grade but are pleasantly unobtrusive overall compared to what is seen on many other MS61 examples of this issue. The strike is sharp, and original orange-gold luster illuminates the recesses of the design. Olive-tinted overtones in the fields attest to the originality of the surfaces. The 1913-S Indian five is a better date in Uncirculated condition. NGC ID# 25ZP, PCGS# 8526

1914-S Five Dollar, MS62
Attractive, Well-Preserved Example

4035 1914-S MS62 PCGS. The 1914-S serves as a conditionally elusive semikey that is rarely found finer than MS62 and is nearly uncollectible in MS64. This razor-sharp representative enjoys attractive orange-gold color and soft mint frost over impressively clean surfaces. Slight die buckling occurs along the reverse rim. NGC ID# 28DW, PCGS# 8529

LIBERTY EAGLES

4036 1843-O AU53 NGC. Variety 2. This impressive AU53 specimen exhibits light wear on the well-detailed design elements. From a late state of the dies, this example shows the die crack through the tops of the letters in STATES. The lightly abraded orange gold surfaces retain traces of original mint luster. NGC ID# 262R, PCGS# 8589

1852 No Motto Ten, MS61
Semireflective Type Coin

4037 1852 MS61 PCGS. The 1852 becomes rare in Mint State, though it is otherwise fairly accessible. More than a quarter-million coins were struck, and probably about 1,000 pieces survive in all grades. The population drops to a few dozen coins in MS61, and a handful are graded finer. Semireflective yellow-gold surfaces display good central detail. The stars are slightly soft, and a predictable number of abrasions are scattered throughout. Population: 15 in 61, 7 finer (7/18). NGC ID# 263C, PCGS# 8608

1855-S Ten Dollar Liberty, XF45
Scarce, Low-Mintage Issue

4038 1855-S XF45 NGC. The low mintage gives the 1855-S ten dollar one of the lowest populations in the entire ten dollar series. Curiously, the entry-level price for a Choice XF is not that high for a coin with so few known. Recent NGC examples have sold at auction in the \$3,200 to \$3,500 price range. This piece has bright surfaces and a thin layer of reddish patina. A number of small, but individually insignificant abrasions are scattered over each side. The strike details are a bit soft over the stars and Liberty's hair curls, but are strongly defined elsewhere. NGC ID# 263N, PCGS# 8618

1856 Ten Dollar, MS60
Far Finer Than Usually Seen

4039 1856 MS60 PCGS Secure. Appreciation of this issue derives not from an obviously low mintage, since 60,490 pieces were produced, but rather from its significantly higher state of preservation than usually seen. An average grade for all the 1856 tens we have handled over the past 25 years yields a grade of 52.6, making this MS60 far finer. The mint luster is complete across each side and the surfaces show the usually seen reddish patina. Sharply detailed and minimally abraded for an MS60. Population: 4 in 60, 18 finer (7/18). NGC ID# 263P, PCGS# 8619

**1856-S Ten Dollar, AU58
Original and Appealing**

- 4040 1856-S AU58 NGC.** Scarce Large S mintmark. This is a slightly more collectible issue from the period despite its low mintage of 68,000 coins and the widespread circulation it experienced out West. To be sure, the 1856-S is scarce at this level and difficult to find in Mint State. Partial luster glows from well-detailed red-gold surfaces. Friction and marks are minimal. An original and eye-appealing eagle from the early years of the S-mint. Census: 43 in 58 (2 in 58+), 4 finer (7/18). NGC ID# 263S, PCGS# 8621

**1859-S Eagle, Fine 15
Only 40 to 60 Examples Extant**

- 4041 1859-S Fine 15 PCGS Secure. CAC.** The total number of submissions for the 1859-S eagles at NGC and PCGS combined is 79 pieces. Only 40 to 60 coins are believed extant for this rare issue. This is a well-worn but nonetheless important example that shows slightly muted yellow-gold surfaces, myriad marks, and considerable blending. The date and mintmark are bold as can be. Population: 1 in 15, 36 finer. CAC: 1 in 15, 5 finer (7/18). NGC ID# 2643, PCGS# 8630

- 4042 1861 AU53 PCGS.** Bulging Bun subtype. The 1861 is one of the more available No Motto tens, similar to the availability of the double eagles of the same date. This is an attractive and affordable AU example that is well-struck. The light reddish-gold surfaces show numerous small abrasions scattered across each side. NGC ID# 2647, PCGS# 8633

**1870-S Ten Dollar, VF35
Smooth, Attractive Surfaces**

- 4043 1870-S VF35 PCGS.** Coins dated 1870-S have a special charm for collectors. The three dollar gold piece of this date and mint is unique, and the silver dollar is a trophy coin. The 1870-S eagle is not quite so rare, but it is scarce in all grades. Only 8,000 pieces were struck, and the most recent PCGS estimate is that just 80 to 100 coins survive in all grades, mostly in circulated condition. This Choice VF example displays smooth olive-gold surfaces and grade-consistent wear. Eye appeal is excellent for the VF level. Population: 4 in 35, 43 finer (7/18). NGC ID# 53FU, PCGS# 8659

- 4044 1874-S XF40 PCGS.** Throughout the first quarter-century of coinage at San Francisco, West Coast bankers and exporters preferred the double eagle denomination. In 1874, the facility struck 1,214,000 twenties but only 10,000 Liberty tens. Despite its rarity in all grades, the 1874-S is affordable in XF. This orange-gold example is smooth except for moderate field marks above the arrowheads. Certified in a green-label holder. NGC ID# 2659, PCGS# 8671

**1879 Eagle, MS64
Razor-Sharp Motifs**

- 4045 1879 MS64 NGC. Breen-6993.** Breen's so-called 1879/8 variety, now generally regarded as an 1879/9. Strike definition is practically full on each side of this near-Gem. The obverse stars and reverse eagle are particularly sharp. Warm yellow-gold surfaces glisten with radiant mint luster and display nothing more than minor field chatter. Census: 11 in 64, 2 finer (7/18). NGC ID# 265M, PCGS# 8683

- 4046 1884-CC XF45 PCGS. Variety 1.** The only dies used in 1884, although five pairs were sent from the Philadelphia Mint. The estimated survivorship for the issue is less than 300 coins in all grades. Varying shades of orange-gold color moderately marked surfaces with faint hairlines. Light blending occurs over generally well-defined relief elements. NGC ID# 266B, PCGS# 8704

- 4047 1888-O MS62 NGC. Variety 1.** The appeal of this MS62 1888-O Liberty eagle is the rarity of finer coins — only 12 are so graded at NGC (8/18). This piece displays sharp design elements and semiprooflike fields. Original straw-gold luster shows light abrasions consistent with the grade, but eye appeal is yet excellent. NGC ID# 266L, PCGS# 8713

- 4048 1891-CC AU58 PCGS. Variety 1-A.** The variety is secondarily confirmed by the presence of a die line above the base of the shield. This is one of the more frequently encountered CC tens. In near-Mint it represents good value, and this particular piece retains a significant presence of bright yellow mint luster on each side. The margins deepen to a pleasing golden-brown. NGC ID# 266U, PCGS# 8720
- 4049 1891-CC/CC FS-501 AU55 PCGS. Variety 3-C.** Both Cs in the mintmark are repunched. The hair above the ear shows slight wear, but this Carson City type coin has a good strike and ample luster across inoffensively abraded apricot-gold and sea-green surfaces. Traces of struck-in grease are noted near the mintmark. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720
- 4050 1893 MS61 Prooflike NGC.** The prooflike fields encompass both sides of this Uncirculated 1893 Liberty eagle. The strike is sharp and the design elements showcase original, frosty luster. Scattered abrasions appear overall on this orange-gold coin, limiting the grade, but the reflective fields balance the eye appeal. NGC ID# 266Z, PCGS# 78725
- 4051 1900 MS64+ PCGS Secure. CAC.** The collectibility of the 1900 eagle changes dramatically any finer than this high-end near-Gem. The population drops significantly in MS65. Glistening mint frost, peach-gold color, and a strong impression make this a terrific pickup. There are only 31 finer examples at PCGS. CAC: 38 in 64, 7 finer (8/18). NGC ID# 7LD2, PCGS# 8745
- 4052 1901 MS65+ NGC. CAC.** Orange-gold color and swirling cartwheel mint frost deliver terrific eye appeal for this high-end Philadelphia type coin. The strike is nearly full, and marks are limited to a handful of shallow grazes and a couple of insignificant ticks around the eye. Far finer than average and seldom seen with CAC approval. CAC: 63 in 65, 12 finer (7/18). NGC ID# 7LHF, PCGS# 8747
- 4053 1902-S MS64+ NGC. CAC.** A strong strike, original honey-gold color, vibrant mint frost, and a dearth of significant abrasions confirm the high-end nature of this CAC-approved MS64+ ten dollar gold coin. A planchet flake in the field near star 12 and a tick on Liberty's cheek identify this piece. NGC ID# 267U, PCGS# 8751
- 4054 1902-S MS64+ NGC. CAC.** The 1902-S Liberty ten dollar is many times scarcer than the San Francisco eagle issue that precedes it. Near-Gems remain accessible, but MS65 examples prove conditionally scarce. This is a minimally marked and strongly defined high-end MS64+ with softness limited to star 13. Cartwheel luster rolls over attractive yellow-gold surfaces. NGC ID# 267U, PCGS# 8751

1902-S Ten Dollar, MS65
Gleaming Straw-Gold Surfaces

- 4055 1902-S MS65 PCGS.** Gleaming mint frost brightens the straw-gold surfaces of this impeccable Gem ten dollar. The stars, feathers, talons, and fletchings are razor-sharp. Minor chatter occurs in the fields, typical for a large gold coin, but it does not affect the top-notch eye appeal. PCGS has graded 11 finer submissions (7/18). NGC ID# 267U, PCGS# 8751

- 4056 1903 MS64 PCGS. CAC.** Lightly patinated yellow-gold fields host devices that boast razor-sharp definition. A luster graze over Liberty's cheekbone and a small disturbance at the rim near star 13 contribute to the grade. Population: 53 in 64 (5 in 64+), 9 finer. CAC: 6 in 64, 3 finer (7/18).
Ex: Summer FUN Signature (Heritage, 7/2010), lot 4768, realized \$3,220. NGC ID# 267V, PCGS# 8752
- 4057 1906-D MS64 PCGS.** The 1906-D ten dollar Liberty represents the first year of coinage operations at the Denver Mint. This sharply detailed Choice specimen offers well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 36 numerically finer examples (7/18). NGC ID# 7JHG, PCGS# 8760
- 4058 1906-O MS62 PCGS. CAC. Variety 1.** The final New Orleans ten is scarcest among the four 20th-century O-mint issues. The present nicely struck caramel-gold example has good eye appeal, and is much less-abraded than its grade suggests. CAC: 4 in 62, 25 finer (7/18). NGC ID# 53FB, PCGS# 8761
- 4059 1907 MS63 NGC.** A final-year Philadelphia type issue. The lustrous butter-gold surfaces are well-struck and show refreshingly few marks. It is surprising that Liberty tens of this quality are available at only a modest premium above their bullion content.
Ex: FUN Signature (Heritage, 1/2010), lot 9355; ANA Signature (Heritage, 8/2010), lot 11009, which realized \$1,150. NGC ID# 2688, PCGS# 8763
- 4060 1907-S MS62 PCGS. CAC.** An attractive MS62 representative from the final year of the Liberty design, this coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. Housed in a green label holder. Population: 70 in 62 (1 in 62+), 34 finer. CAC: 6 in 62, 2 finer (7/18). NGC ID# 38EP, PCGS# 8765

INDIAN EAGLES

- 4061 1907 No Motto MS62 PCGS.** This was the first regular issue in the Saint-Gaudens ten dollar gold series. The type was only produced for a few months in 1907 and 1908 before being modified to include the motto IN GOD WE TRUST. Baggy, khaki-gold gold surfaces exhibit soft mint frost. Detail is slightly soft on the curls and shoulder tip, but there are no singular abrasions. NGC ID# 28GF, PCGS# 8852
- 4062 1907 No Motto MS62 NGC.** Luster glows from the protected areas of this 1907 No Motto eagle, while the lightly abraded fields and devices are slightly more subdued. Orange and khaki-gold color is eminently appealing, and none of the previously mentioned marks are singular in nature. Characteristically struck from a mintage of 239,406 pieces. NGC ID# 28GF, PCGS# 8852
- 4063 1907 No Motto MS62 NGC.** The first-year issue in master sculptor Augustus Saint-Gaudens' Indian Head eagle series is always in-demand. This MS62 example enjoys glowing luster amid mixed olive and orange-gold coloration. An expected amount of incompleteness is noted in the usual areas, and marks are scattered over each side. NGC ID# 28GF, PCGS# 8852
- 4064 1907 No Motto MS63 PCGS.** This Select 1907 Indian eagle displays satiny yellow-gold and orange luster over sharp design elements. Scattered light marks account for the grade but none are individually bothersome. An excellent, collector-grade No Motto type coin. NGC ID# 28GF, PCGS# 8852

**1907 Indian Head Eagle, MS64
Popular No Motto Design**

4065 1907 No Motto MS64 PCGS. This 1907 Indian eagle represents the popular but short-lived No Motto design, the closest business-strike approximation to Augustus Saint-Gaudens' original concept. This attractive Choice specimen is well-detailed with a touch of the usual softness on the hair and headdress feathers. Well-preserved orange-gold surfaces are brightly lustrous and appealing. NGC ID# 28GF, PCGS# 8852

4066 1908 No Motto AU58 PCGS. A trace of high-point rub is evident on the brilliant wheat-gold surfaces of this No Motto ten that retains virtually full luster. Scattered marks are inconsequential. NGC ID# 28GG, PCGS# 8853

4067 1908 No Motto MS61 PCGS. Only 33,500 No Motto tens were struck at the Philadelphia Mint from the start of 1908 through July 1. The issue proves somewhat challenging in Mint State, especially in MS63 or finer. Abraded and partly lustrous reddish-gold surfaces display pleasing olive accents. Typically struck. NGC ID# 28GG, PCGS# 8853

4068 1908-D No Motto MS62 PCGS. There are remarkably few major marks on this MS62 Saint-Gaudens ten from the only production of No Motto eagles at the Denver Mint (33,500 coins). Luster is vibrant over each side, and the strike is as strong as can be expected. Scarce in higher grades. NGC ID# 28GH, PCGS# 8854

4069 1908-D Motto MS62 PCGS. Wheat-gold surfaces glisten with satin mint luster. Reddish elements are also seen. The overall impression is good despite softness over the central high points. A spot of blue-green color occurs above the olive branch. A pleasing first-year Motto representative. NGC ID# 28GK, PCGS# 8860

4070 1908-S AU58 PCGS. Only 59,850 Indian eagles were struck at the San Francisco Mint in 1908, all of the With Motto design type. This was the first coinage of Saint-Gaudens' design at the West Coast mint. This is a nearly Uncirculated example with orange-gold surfaces that retain ample field luster. Well-struck design elements have scattered light abrasions. NGC ID# 28GL, PCGS# 8861

4071 1909 MS63 NGC. The average 1909 ten dollar is graded MS60, and most examples fall within a tight range of AU58 to MS62. This Select Uncirculated eagle is well-struck with lustrous honey-gold surfaces. Small marks appear on the cheek. NGC ID# 28GM, PCGS# 8862

4072 1909-D MS62 NGC. David Akers called the 1909-D "one of the most underrated issues of the series" The highest points of the design are slightly incomplete, but the satiny reddish-gold surfaces should appeal to the most discerning collectors. A series of ticks are noted on the cheek. The fields are relatively smooth for the grade. NGC ID# 28GN, PCGS# 8863

4073 1909-S MS61 PCGS. The 1909-S commands little premium in circulated grades, but the issue becomes scarce in mint condition. Olive-green and rose toning graces this lustrous branch mint representative. Marks are absent save for a slight obverse rim nick at 5 o'clock. NGC ID# 28GP, PCGS# 8864

**1909-S Ten Dollar, MS63
Conditionally Scarce**

4074 1909-S MS63 NGC. Nearly 300,000 ten dollar gold coins were struck at the San Francisco Mint in 1909, yet high-grade examples elude most collectors. This is a readily appealing medium yellow-gold example with strong overall strike characteristics and just a hint of softness on the eagle's shoulder. The fields are clean and a couple of small nicks appear on Liberty's portrait. NGC ID# 28GP, PCGS# 8864

4075 1912-S MS61 NGC. The 1912-S is more collectible at this level than contemporary San Francisco eagles. A few marks on the cheek and across the reverse and slightly subdued luster in the fields account for the grade, but this peach-orange ten dollar is well-detailed and better-preserved than usually encountered. NGC ID# 269G, PCGS# 8872

**1913-S Indian Ten, AU58
Low-Mintage Issue**

4076 1913-S AU58 NGC. The San Francisco Mint produced a mere 66,000 Indian tens in 1913, creating a key issue in all grades. Only about 300 survivors are certified finer than this near-Mint representative at NGC and PCGS combined (7/18). This piece has brilliant yellow-gold luster and frosty surfaces. NGC ID# 28GZ, PCGS# 8874

4077 1914 MS63 PCGS. Visual appeal is excellent for this highly lustrous Select ten dollar gold piece, one of 151,000 eagles struck at the Mint in 1914. Warm orange-gold color and light lilac accents contribute to the aesthetic quality. Frosted mint luster glistens over minimally abraded, finely textured fields. NGC ID# 28H2, PCGS# 8875

4078 1914 MS63 PCGS Secure. CAC. A pleasing Select example of this slightly better Philadelphia issue, showing bright yellow-gold surfaces and satiny luster. Grade-limiting abrasions are restricted to light grazes on the high points of the devices. The 1914 eagle is not rare in this grade, but few pieces are CAC endorsed. CAC: 19 in 63, 42 finer (8/18). NGC ID# 28H2, PCGS# 8875

**1914-D Ten Dollar, MS64
Rich Original Color**

- 4079 1914-D MS64 PCGS.** Scattered light abrasions prevent Gem classification, but this Choice 1914-D Indian eagle is nonetheless appealing. Rich orange-gold, peach, and rose hues adorn each side, complementing well-struck design elements. The 1914-D is only moderately elusive in this grade, but PCGS has seen just 46 numerically finer submissions (8/18).
Ex: Long Beach Signature (Heritage, 9/2007), lot 3720, which realized \$3,450. NGC ID# 28H3, PCGS# 8876

- 4080 1914-S MS61 PCGS.** Khaki-gold color dominates this softly frosted San Francisco eagle, one of 208,000 ten dollar gold coins struck there in 1914. High-point softness is typical and marks are peppered throughout, limiting the technical assessment, but the 1914-S can be difficult to find in finer Mint State grades. NGC ID# 28H4, PCGS# 8877

- 4081 1915 MS64 PCGS.** Rich, original color is the first feature one notices about this attractive near-Gem. Deep reddish patina is interspersed with bright dabs of lilac on each side. Sharply detailed and highly lustrous. Housed in a green label holder. NGC ID# 28H5, PCGS# 8878

- 4082 1916-S MS62 NGC.** From a mintage of 138,500 coins and the final production before a four-year hiatus. Finer coins are scarce. Detail is slightly incomplete and each side has a number of scattered marks, but the frosty khaki-gold surfaces maintain good eye appeal for this challenging issue. NGC ID# 28H7, PCGS# 8880

- 4083 1932 MS64 PCGS.** Frosty peach-gold luster engulfs the minimally marked, luminous surfaces of this near-Gem 1932 Indian eagle type coin. The eagle's shoulder exhibits trivial softness but the eye appeal is otherwise outstanding.
Ex: Long Beach Signature (Heritage, 2/2007), lot 4852, which realized \$1,725. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

**1852 Twenty Dollar, AU55
Much Luster Remains**

- 4084 1852 AU55 NGC.** A brush of high-point friction is evident, but this Choice AU 1852 double eagle remains highly lustrous and frosty with bright yellow-gold color. Both sides are heavily abraded, including two notable marks below the R in AMERICA. Bright luster and abraded surfaces are the norm for Philadelphia issues of the Gold Rush period, but the luster of the present coin is lacking on many of its peers. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU53
FS-301, Repunched Date**

- 4085 1852/1852 FS-301 AU53 PCGS Secure.** All four date digits are repunched north. An apricot-gold representative of the scarce *Cherrypickers'* variety. Small marks on the rim beneath the date provide identifiers, but the surfaces are lightly abraded overall. The central reverse shows attenuated detail, as struck from a lapped die. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

**1853 Liberty Twenty, AU58
Normal Date**

- 4086 1853 AU58 PCGS Secure.** There is no repunching beneath the 3 on the obverse of this lovely double eagle. Just a trace of rub is evident on the high points with bright yellow luster and minimal, grade-consistent surfaces marks on each side. PCGS has only certified 52 finer examples (7/18). NGC ID# 268M, PCGS# 8908

- 4087 1854 Small Date AU53 NGC.** This variety constitutes about 90% of the mintage for the year (757,899 coins), yet it remains a major challenge in high grades. Here is one of the few examples that retains original red and orange-gold color. The obverse is razor-sharp in spite of slight friction, and partial luster remains relatively vibrant. A couple of hits appear near star 10. NGC ID# 268R, PCGS# 8911

- 4088 1855-S XF40 NGC.** Medium S. Doug Winter explains, "The 1855-S is one of the better-made Type One double eagles from this mint." This piece is well-detailed with glints of luster and orange-gold color. A dark encrustation appears within the lower loop of the 8. Fine hairlines are noted on the obverse, and a couple of cuts occur on the reverse. NGC ID# 268X, PCGS# 8916

- 4089 1855-S AU55 NGC.** Medium S. Pinpoint definition on the hair curls and stars is the hallmark of this minimally circulated, second-year S-mint double eagle. Luster glows from the recesses, and each side features attractive red-gold color. Myriad abrasions throughout. NGC ID# 268X, PCGS# 8916

- 4090 1855-S AU55 NGC.** Substantial luster remains in the fields of this Choice AU 1855-S double eagle. Light wear over the design elements does not impede the sharp strike, and neither side exhibits bothersome abrasions. There is a small coppery discoloration at the W in TWENTY. Eye appeal is outstanding. Housed in a prior-generation holder. NGC ID# 268X, PCGS# 8916

**1855-S Double Eagle, Near-Mint
Second Year of S-Mint Production**

- 4091 1855-S AU58 NGC.** Medium S. The San Francisco Mint opened in April 1854 and increased double eagle production significantly in its second year of operation, when 879,675 twenties were struck. High as that total seems, few coins survive finer than this near-Mint offering. Bright mint frost illuminates light yellow-gold surfaces. Strike definition is good and marks less severe than expected. The only two of note are on the cheek and neck. NGC has seen 31 finer submissions (7/18).
From The Trifilio Family Collection. NGC ID# 268X, PCGS# 8916

**1856 Twenty, AU53
Significant Mint Luster Remains**

- 4092 1856 AU53 NGC.** The 1856 twenty dollar is the second scarcest P-mint twenty produced during the 1850s. Only five coins were recovered from the S.S. *Central America*, standing in stark contrast to the hundreds of high-grade 1856-S twenties recovered. This piece retains significant portions of original mint luster on each side, and the surfaces are light, even reddish-gold in color. Appropriately marked for the grade. NGC ID# 268Y, PCGS# 8917
- 4093 1856-S XF45 PCGS. Variety 17C.** A honey-gold Choice XF example with attractive surfaces despite a horizontal line between the IC in AMERICA. In 2000, Robert Evans assigned varieties to the 1856-S double eagles recovered from the S.S. *Central America*. We don't know whether the present coin came from that famous shipwreck, but its die marriage corresponds to his Variety 17C, which has a bold left mintmark and a die dot on the obverse margin at 6 o'clock. NGC ID# 2692, PCGS# 8919
- 4094 1856-S AU55 NGC.** Before the advent of modern shipwreck finds, the 1856-S Liberty double eagle was a rare issue in high grade. This impressive Choice AU specimen is lightly worn and lightly abraded, with lustrous orange-gold surfaces on both sides.
From The Trifilio Family Collection. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, AU55
Ex: S.S. Central America**

- 4095 1856-S AU55 PCGS. CAC. Variety 17M.** Ex: S.S. *Central America*. SSA 5916. No serif on the U in UNITED, full crossbar on the A in STATES. More than 1,000 1856-S double eagles were originally recovered from the famous Ship of Gold, making the 1856-S one of the most collectible Type One issues in the series. This beautifully preserved, razor-sharp example enjoys profound reddish-gold color and just a few scattered marks. A hint of blending appears on the curls. Luster remains vibrant. Housed in the original gold foil holder with CAC approval. NGC ID# 2692, PCGS# 8919

**1857-S Double Eagle, AU58
Partly Lustrous**

- 4096 1857-S AU58 NGC.** Medium S. This 1857-S twenty dollar gold piece does not appear to have been one of the coins recovered from the S.S. *Central America*, and may very well have been among the finer available representatives of this date prior to the discovery of that hoard in the late 1980s. Orange-gold surfaces show traces of luster in the recesses and moderate marks scattered over each side. Well-struck.
From The Trifilio Family Collection. NGC ID# 2696, PCGS# 8922
- 4097 1858-S VF25 PCGS. CAC.** Despite the presence of considerable wear, this is an excellent representative with pleasing surfaces and traces of violet toning that outline the obverse design elements. NGC ID# 2699, PCGS# 8925

**1858-S Double Eagle, Choice AU
Strongly Defined, Orange-Gold Color**

- 4098 1858-S AU55 NGC.** Medium S. This Choice AU double eagle shows exceptionally strong detail for an S-mint No Motto twenty from this period, but that is one of the hallmarks of the well-produced and underrated 1858-S. Attractive orange-gold surfaces are original and minimally abraded. Luster is subdued, and only partial traces remain. Scarcely found finer despite the healthy mintage of 846,710 coins.
From The Trifilio Family Collection. NGC ID# 2699, PCGS# 8925

- 4099 1858-S AU55 NGC.** Despite a substantial mintage of 846,710 pieces, the 1858-S Liberty double eagle is an underrated issue in high grade. This attractive Choice AU specimen exhibits sharply detailed design elements and lightly abraded orange-gold surfaces that retain much of their original mint luster. NGC ID# 2699, PCGS# 8925

**1859-S Double Eagle, Choice AU
Substantial Remaining Luster**

- 4100 1859-S AU55 NGC.** NGC has certified 66 1859-S twenties with an S.S. *Republic* pedigree, but the present example was not from that shipwreck, since the circa-2000 holder predates its salvage. The yellow-gold surfaces display many light obverse marks, but none are noteworthy, and the reverse shows only minimal contact. NGC ID# 269C, PCGS# 8928

- 4101 1860 AU50 NGC.** An impressive AU representative of the Type One design, this coin exhibits just a touch of wear on the well-detailed design elements and the still-lustrous yellow-gold surfaces show the expected number of minor abrasions for the grade. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, Clean AU55

- 4102 1860 AU55 PCGS.** Doug Winter comments that the 1860 Type One double eagle can be found with strong definition on the curls and minimal abrasions. This is such a coin, featuring radiant remaining mint luster and light yellow-gold color. Liberty's cheek is relatively clean and shows just a hint of rub. Full radials and centers appear on the stars. NGC ID# 269D, PCGS# 8929

- 4103 1860-S XF45 NGC.** Medium S. Original orange and olive-gold surfaces yield traces of luster around the motifs, delivering good aesthetic appeal for this lightly circulated Choice XF San Francisco gold piece. Three or four abrasions on the obverse and another below the second T in STATES are the only ones that deserve mention. NGC ID# 269F, PCGS# 8931

- 4104 1860-S AU53 NGC.** Medium S. San Francisco Mint personnel accomplished a production of 544,950 double eagles in 1860. Most survivors are found in XF or lower grades. This orange-gold example shows light blending, but the star radials remain complete. An interesting die crack connects the hair bun to star 12. NGC ID# 269F, PCGS# 8931

**1860-S Double Eagle, AU55
Field Reflectivity Remains**

- 4105 1860-S AU55 PCGS.** This lovely Choice AU double eagle has myriad handling marks on its brilliant orange-gold surfaces. Close examination reveals reflective fields on each side of this nicely defined twenty. PCGS has certified only 98 finer examples of this important issue (7/18). NGC ID# 269F, PCGS# 8931

1860-S Double Eagle, AU58
Few Known in Mint State

- 4106 1860-S AU58 NGC.** Medium S. The 1860-S is one of the scarcer Type One S-mint twenties and is challenging in grades that approach Mint State. This piece retains almost complete mint luster with only slight evidence of rub over the high points. The surfaces are generally smooth, the sole exception being an ill-placed milling mark to the right of Liberty's upper lip. NGC has certified 24 finer examples, while Doug Winter suggests only 20 to 30 Uncirculated coins survive (7/18).
Ex: Central States Signature (Heritage, 5/2004), lot 9977; Dallas Signature (Heritage, 10/2008), lot 3031; Long Beach Signature (Heritage, 9/2013), lot 6859, where it realized \$5,581.25.
From The Trifilio Family Collection. NGC ID# 269F, PCGS# 8931

- 4107 1861 XF45 PCGS.** This Choice XF Liberty double eagle shows only light wear on the well-detailed design elements and the vivid orange-gold surfaces are lightly abraded. Traces of original mint luster are still evident in sheltered areas. Housed in a green label holder. NGC ID# 269G, PCGS# 8932
- 4108 1861-S XF45 NGC.** Medium S. This is a red-gold Choice XF No Motto double eagle from the historic first San Francisco Mint. The star radials are clear, while the curls and feather tips are softly struck and lightly worn. An alloy spot occurs in the field left of the forehead. Expectedly abraded. NGC ID# 269K, PCGS# 8935

1861-S Twenty Dollar, Choice AU

- 4109 1861-S AU55 NGC.** Although a number of 1861-S twenties were recovered from the *S.S. Republic* and *Brother Jonathan*, the issue is scarce at the Choice AU level. This green-gold representative displays ample remaining luster and relatively few abrasions, the most noticeable near the C in AMERICA. The surfaces exhibit a hint of granularity. Housed in a former generation holder. NGC ID# 269K, PCGS# 8935
- 4110 1862-S AU50 NGC.** This well-detailed No Motto San Francisco coin displays bright yellow-gold color and has minimal wear. Scattered abrasions accompany the grade, but tinges of luster remain in the protected areas. This date is rare in Uncirculated condition but is collectible in AU. Housed in a prior-generation holder. NGC ID# 269N, PCGS# 8938

1862-S Twenty Dollar, AU53
Frosted Obverse, Semiprooflike Reverse

- 4111 1862-S AU53 PCGS.** Medium S. Strike detail is slightly better than usual for the issue, with clear radial lines on most stars and good detail on the curls, allowing for light friction. The reverse fields are semiprooflike, while the obverse is more frosted, though luster has been subdued in the exposed areas. Yellow-gold surfaces show minimal marks, except for a singular abrasion left of Liberty's ear.
From The Trifilio Family Collection. NGC ID# 269N, PCGS# 8938

1862-S Double Eagle, AU53
Elements of Luster Remain

- 4112 1862-S AU53 NGC.** Hints of luster remain in the protected regions of this About Uncirculated coin, and the design elements show little wear. Just general friction on the surfaces appears to limit the grade, although it has the effect of producing an old-time patina that suggests the straw-gold coloration is original. Scattered light marks are apparent, but no severe distractions are noted. NGC ID# 269N, PCGS# 8938

1862-S Liberty Twenty, AU55
Recut 86 in the Date

- 4113 1862-S AU55 NGC.** Only light wear shows on the well-detailed design elements of this attractive Choice AU specimen and the numerals 86 in the date are recut. The lustrous yellow and rose-gold surfaces are lightly abraded and appealing. About half of the 127 coins recovered from the *S.S. Republic* had a recut date, raising the possibility that this relatively high-grade specimen might have originated there. NGC ID# 269N, PCGS# 8938

1863-S Double Eagle, AU55

- 4114** 1863-S AU55 NGC. Breen-7216. Large S. The supply of high-grade 1863-S double eagles has been augmented in recent years by several shipwreck finds. This impressive Choice AU specimen exhibits light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded, with significant amounts of original mint luster remaining. NGC ID# 269R, PCGS# 8940

- 4115** 1864-S XF45 PCGS. This is a partially lustrous, satiny 1864-S double eagle with little wear and minimal abrasions. Rich orange-gold color adorns each side and eye appeal excels for the grade. The 1864-S is a scarce issue in Mint State, although lightly circulated coins such as the present can usually be acquired. Housed in a green label holder. NGC ID# 269T, PCGS# 8942

- 4116** 1865 AU50 NGC. This issue is collectible as the final Type One double eagle from the Philadelphia Mint. Although heavily abraded, this red-gold survivor remains attractive for the grade. Detail is good, and pale glints of original luster shine around the design recesses. NGC ID# 269U, PCGS# 8943

1865 Twenty Dollar, AU58 Colorful, Lustrous Example

- 4117** 1865 AU58 NGC. The recovery of the S.S. *Republic* yielded 320 examples of the 1865 double eagle in relatively high grade, but the issue was virtually unknown in Mint State before that famous shipwreck find. Whether this attractive near-Mint specimen is an example from that hoard is unknown, but the strong possibility exists. This piece exhibits just a trace of wear on the high points of the design, and the vivid orange-gold surfaces are lightly abraded, with vibrant mint luster throughout. NGC ID# 269U, PCGS# 8943

- 4118** 1865-S AU50 NGC. Small S. The usual mintmark style for this late-date No Motto double eagle issue. The relief elements are generally well-defined, and partly lustrous yellow-gold surfaces show a predictable number of marks for the AU50 assessment. NGC ID# 269V, PCGS# 8944

1865-S Double Eagle, AU58 Final Collectible No Motto Issue

- 4119** 1865-S AU58 NGC. Small S. With a mintage of 1 million coins, this is the final collectible No Motto issue from the San Francisco Mint. The facility struck another 120,000 No Motto coins early in 1866, but those pieces elude most collectors. A trace of friction prevents a full Uncirculated assessment for this lustrous, yellow-gold double eagle. Strike detail is slightly uneven, and the surfaces display peppered abrasions.

From The Trifilio Family Collection. NGC ID# 269V, PCGS# 8944

- 4120** 1867-S AU53 NGC. Only a touch of wear shows on the well-detailed design elements of this attractive AU53 Liberty double eagle, with lightly abraded orange-gold surfaces that retain much original mint luster. The 1867-S is somewhat scarce in finer grades.

From The Trifilio Family Collection. NGC ID# 26A2, PCGS# 8952

- 4121** 1868-S AU53 NGC. A charming caramel-gold representative with unexpectedly few abrasions given its stint in West Coast commerce. Luster is absent from the open fields but is prevalent in the protected regions. This Type Two issue is rare in Mint State but readily collectible in XF to AU grades.

From The Trifilio Family Collection. NGC ID# 26A4, PCGS# 8954

1868-S Double Eagle, AU58 Lustrous Wheat-Gold Surfaces

- 4122** 1868-S AU58 PCGS. Small Squat S. Wheat-gold color and remaining mint luster brighten surfaces that show marks across each side but little evidence of actual friction over the high points. Strike detail is incomplete, as expected of a Type Two twenty struck at the San Francisco Mint. A total of 837,500 pieces were minted in 1868. Few coins, including 44 submissions at PCGS, are graded finer (7/18). NGC ID# 26A4, PCGS# 8954

- 4123** 1869-S AU55 NGC. Small Squat S. Collectors should not have too much difficulty locating an example of the 1869-S twenty in this grade or even AU58, but the issue becomes scarce in Mint State. Considerable luster is retained within the confines of the typically rendered design elements. Red-gold color and scattered abrasions characterize each side. NGC ID# 26A6, PCGS# 8956

- 4124** 1869-S AU55 NGC. Small Squat S. Most examples of the 1869-S circulated extensively, were exported, and/or melted, reducing the number of high-grade examples available today. This still-lustrous Choice AU survivor shows softness on the curls and stars but better detail on the reverse. Pale yellow-gold surfaces exhibit moderate abrasions. NGC ID# 26A6, PCGS# 8956

- 4125 1869-S AU55 NGC.** A moderately available Type Two twenty, but one that becomes increasingly difficult in better AU and finer grades. This bright example shows even reddish-golden patina over each side with a peppering of tiny abrasions, most noticeable on the obverse.
From The Trifilio Family Collection. NGC ID# 26A6, PCGS# 8956

**1870-S Double Eagle, AU58
High Rate of Attrition**

- 4126 1870-S AU58 NGC.** According to Jeff Garrett and Ron Guth, this issue was heavily circulated, exported, and destroyed. They describe the 1870-S double eagle as “very rare in Mint State.” This AU58 example is lustrous, well-struck, and high-end for the grade. Scattered small to moderate marks are consistent with a brief stint in circulation.
Ex: Donald E. Bently Collection / ANA National Money Show Signature (Heritage, 2-3/2014), lot 5526, where it brought \$4,406.25.
From The Trifilio Family Collection. NGC ID# 26A9, PCGS# 8959

**1871 Double Eagle, AU50
Better Philadelphia Issue**

- 4127 1871 AU50 NGC.** A low mintage of 80,120 pieces ensures the conditional scarcity of the 1871 twenty. The present apricot-gold example exhibits a generous amount of honey-gold luster for the AU50 level. The obverse is peppered with the expected quantity of minor to moderate marks, though the reverse is minimally abraded. Certified in a prior-generation holder. NGC ID# 26AA, PCGS# 8960
- 4128 1871-S AU58 NGC.** Like most Type Two Liberty double eagles, the 1871-S is an elusive issue in high grade. This attractive near-Mint specimen shows scattered, grade-consistent abrasions on both sides, and the well-detailed design elements exhibit just a trace of high-point wear.
From The Trifilio Family Collection. NGC ID# 26ND, PCGS# 8962
- 4129 1872 AU50 NGC.** Strike detail is about average for a Type Two twenty dollar, maybe marginally better. The reverse is certainly stronger than the other side. Luster emanates from the recessed areas, and marks, while plentiful, are relatively minor. Medium yellow-gold color. NGC ID# 26AD, PCGS# 8963

**1872 Double Eagle, MS60
Relatively Few Marks**

- 4130 1872 MS60 NGC.** The 1872 is much scarcer in Mint State than its high-mintage 1873 Open 3 successor. The present sharply struck Type Two twenty shows a horizontal line on the cheek and a tick on the obverse rim at 12 o'clock, but is otherwise pleasing for the designated grade. Blushes of orange-gold and sea-green toning enrich the borders. Encased in a former-generation holder. Census: 26 in 60 (1 in 60 ★), 57 finer (7/18). NGC ID# 26AD, PCGS# 8963
- 4131 1872-S AU58 NGC.** Micro S, the most available among three different mintmark size varieties reported for the 1872-S. A partially lustrous near-Mint example of this conditionally scarce Type Two issue. The butter-gold surfaces are nicely struck and display the expected number of small to moderate abrasions.
From The Trifilio Family Collection. NGC ID# 26AF, PCGS# 8965
- 4132 1873 Open 3 MS62+ PCGS Secure.** A Plus-graded MS62 example of the 1873 Liberty double eagle, with an Open 3 in the date, this coin exhibits well-detailed design elements and lustrous orange-gold surfaces, with vibrant mint luster and scattered minor contact marks on both sides. NGC ID# 26AL, PCGS# 8967

**1874 Twenty Dollar, MS61
Lustrous and Original**

- 4133 1874 MS61 PCGS. CAC.** Like most Type Two double eagles, the 1874 is seldom encountered in high grades. This impressive MS61 example is well-detailed and surprisingly lustrous with vivid orange-gold surfaces that show the expected number of grade-consistent contact marks. Rarely offered with CAC approval. CAC: 28 in 61, 7 finer (7/18). NGC ID# 26AN, PCGS# 8970

**1874-CC Double Eagle, Choice XF
Nevada Mint Type Coin**

- 4134 1874-CC XF45 PCGS. Variety 5-A.** The Nevada branch mint was responsible for the production of 115,085 double eagles in 1874. That plentiful output and the issue's relative survival rate make it an appropriate choice for type representation. The stars and legends are strong, while the centers display a combination of strike softness and friction from brief circulation. Luster remains throughout the abraded yellow-gold surfaces. NGC ID# 26AP, PCGS# 8971

**1875 Type Two Twenty, MS62+
Excellent Quality for the Grade**

- 4135 1875 MS62+ PCGS. CAC.** Collectors should have little trouble finding an 1875 double eagle in MS60 to MS62 condition. Finer coins become scarce. An overlay of thick mint frost covers luminous peach-gold surfaces. Scattered grazes and colorful alloy spots appear on each side. Strike detail is good with typical areas of softness for a Type Two twenty. NGC ID# 2547, PCGS# 8973

1876-CC Twenty Dollar, AU53

- 4136 1876-CC AU53 NGC. Variety 5-B.** A scarce die marriage with all of the second C in the mintmark over the left flag of the second T in TWENTY. A caramel-gold example without any distracting marks. Luster illuminates the peripheries. Double eagle mintages at Carson City peaked in our nation's Centennial year, and thus the issue is often selected by Old West type collectors. Nonetheless, San Francisco coined more than ten times as many twenties that year. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU53

- 4137 1876-CC AU53 NGC. Variety 2-C.** Bright sun-gold luster is particularly plentiful on the reverse. The cheek and shield display moderate marks, but the remainder of the coin shows only incidental contact. Many die marriages of 1876-CC double eagles are confirmed, among which Variety 3-A is the most available. The scarce Variety 2-C shows a lump in Liberty's hair near the R in LIBERTY, and a die line from the upper-left serif of the R in AMERICA. Housed in a prior-generation holder. NGC ID# 26AW, PCGS# 8977

- 4138 1876-S MS61 PCGS.** An impressive Mint State representative of this popular branch mint issue, with well-detailed design elements and lustrous orange-gold surfaces that show a number of minor contact marks on the devices and some chatter in the fields. NGC ID# 26AX, PCGS# 8978

**1877-CC Double Eagle, XF45
Only Lightly Abraded**

- 4139 1877-CC XF45 NGC. Variety 1-B.** A scarcer die marriage with a low, even mintmark placement. A honey-gold representative of this lower-mintage Carson City issue. The curls display wear consistent with the grade. Struck from clashed dies, but the surfaces show surprisingly few marks. A few specks of struck-in grease (as made) are in the field near the chin. NGC ID# 26AZ, PCGS# 8983

**1877-S Double Eagle, MS62
Slightly Reflective Fields**

- 4140 1877-S MS62 NGC. Small S.** Uncirculated 1877-S double eagles are usually available for a price, but rarely are they seen finer than the present MS62 coin. This piece displays sharp motifs with a hint of reflectivity in the fields. Original straw-gold surfaces exhibit expected abrasions, along with a pedigree-identifying russet spot near star 13. Housed in a circa-2000 holder. NGC ID# 254B, PCGS# 8984

- 4141 1878 MS62 PCGS.** The highest reasonably obtainable grade for the 1878 double eagle is MS62. The issue carries an average certified assessment just shy of MS60, but the population declines markedly in Select Uncirculated condition. Attractive peach-gold color and bright mint frost blend over lightly abraded surfaces. Every design point is strongly impressed. NGC ID# 26B3, PCGS# 8985

**1878-S Liberty Twenty, MS62
Pleasing Luster and Color**

- 4142 1878-S MS62 PCGS.** The 1878-S Liberty double eagle is an available issue in lower grades, and even MS62 examples can be located with a little patience, but finer coins are rare. This attractive MS62 specimen is well-detailed, with a touch of softness on the obverse stars. Lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. PCGS has graded 13 finer examples (8/18). NGC ID# 338K, PCGS# 8987
- 4143 1879-S MS60 NGC.** This sharp, glittering Mint State 1879-S double eagle displays original straw-gold, rose, and peach coloration. The interior reverse fields are mildly reflective. Grade-limiting abrasions appear on both sides, but this better-date Type Three double eagle is outstanding for the grade. NGC ID# 26B9, PCGS# 8991

**1879-S Twenty Dollar, MS61
Surprisingly Scarce Any Finer**

- 4144 1879-S MS61 PCGS.** This lustrous honey-gold Uncirculated twenty has its share of small abrasions but none merit singular description except for a thin line near the eagle's left (facing) wing. Two alloy spots appear at the mintmark and the C in AMERICA. Surprisingly scarce any finer considering the mintage of 1.2 million coins. Ex: *Dallas Signature* (Heritage, 3/2013), lot 4411; *Chicago Signature* (Heritage, 8/2013), lot 5233, where it brought \$3,818.25. From *The Trifilio Family Collection*. NGC ID# 26B9, PCGS# 8991
- 4145 1880 AU55 PCGS Secure. CAC.** This is the more difficult of the two double eagle issues for the year. Only 51,420 Philadelphia coins were struck, compared to 836,000 pieces at the San Francisco Mint. Attractive yellow-gold surfaces display luster around the recesses and minimal friction for the assigned grade. Strongly detailed and generally well-preserved. NGC ID# 26BA, PCGS# 8992

**1882-CC Double Eagle, XF45
Popular Old West Issue**

- 4146 1882-CC XF45 PCGS Secure. Variety 1-B.** Pumpkin-gold luster fills the legends, wings, and rays. The curls and wingtips show less wear than anticipated for the grade. Both sides display multiple sets of clash marks, but no abrasions are remotely relevant. The 1882-CC was the first Carson City issue since 1879, and has a low mintage of 39,140 pieces. Variety 1-B is the most available among the three confirmed die marriages. NGC ID# 26BF, PCGS# 8997
- 4147 1882-S MS62 NGC. Breen-7284.** Tall S. Sea-green borders surround sun-gold centers. A lustrous and crisply struck representative held back in grade only by a slender vertical field mark near the profile. The 1882-S trades for five figures in MS63, but MS62 examples are much more affordable. Certified in a circa-2000 holder. From *The Trifilio Family Collection*. NGC ID# 26BG, PCGS# 8998
- 4148 1884-CC — Cleaned — PCGS Genuine. AU Details. Variety 1-A.** A still-attractive specimen of this popular branch mint issue, with just a touch of wear on the well-detailed design elements and lightly abraded orange-gold surfaces that retain much satiny mint luster, despite the noted cleaning.

**1884-S Double Eagle, MS63
Original and Eye-Appealing**

- 4149 1884-S MS63 NGC.** Most Uncirculated 1884-S double eagles grade only MS61 or MS62. This Select example is scarce by comparison, and NGC has seen only nine finer coins (8/18). Sharp design elements and radiant cartwheel luster are hallmarks of this eye-appealing example. A few scattered abrasions are hardly bothersome. Wheat-gold coloration is original. NGC ID# 26BL, PCGS# 9002

1885-S Twenty Dollar, MS63
Rich Mint Frost

4150 1885-S MS63 NGC. This is a sharply impressed orange-gold example with fully defined features and rich, frosty mint luster. The number of abrasions is consistent with the assigned grade, but none of the distractions are severe or prominent. We do note a series of reeding marks under the right (facing) wing for accuracy. An above-average representative of this otherwise collectible S-mint production. Certified in a circa-2000 holder. NGC ID# 26BP, PCGS# 9005

4151 1887-S MS61 NGC. A handsome Type Three double eagle, with sharply detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade.
From The Trifilio Family Collection. NGC ID# 26BS, PCGS# 9007

4152 1888 MS62 PCGS. This is an important Philadelphia Mint double eagle that survives from a minimal mintage of 226,161 pieces. A hint of rose color accents frosty yellow-gold surfaces, which show only light, scattered abrasions. Eye appeal is excellent for the grade. PCGS has certified only 35 finer pieces (8/18). NGC ID# 26BT, PCGS# 9008

1888-S Liberty Double Eagle, MS63
Sharply Struck, Lustrous Example

4153 1888-S MS63 PCGS. From a mintage of 859,600 pieces, the 1888-S Liberty double eagle can be located in MS63 condition without too much searching, but finer coins are scarce. This impressive Select specimen offers sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26BU, PCGS# 9009

1888-S Double Eagle, MS63
Attractive Rose-Gold Color

4154 1888-S MS63 NGC. Tall S. This well-struck twenty dollar is lustrous and minimally marked with appealing rose-gold coloration. All of the design motifs are fully defined, and the number of small abrasions, most located on the obverse, is normal for the Select Mint State grade level. Few 1888-S double eagles are graded any finer than MS63.

Ex: Houston Signature (Heritage, 12/2014), lot 4808, where it brought \$3,818.75.

From The Trifilio Family Collection. NGC ID# 26BU, PCGS# 9009

1889-S Double Eagle, MS63
Rich Orange-Gold Color

4155 1889-S MS63 PCGS. The 1889-S is reasonably collectible in Mint State grades through the MS63 level, becoming progressively scarce in near-Gem or Gem conditions. This Select example is lustrous with lightly abraded, rich orange-gold surfaces and a needle-sharp strike. Small ticks and marks limit the grade, but they do little to diminish the eye appeal. NGC ID# 26BW, PCGS# 9012

1889-S Twenty Dollar, MS63
Clean Fields, Razor-Sharp Devices

4156 1889-S MS63 NGC. Strike definition is unequivocally full on this 1889-S double eagle. Lustrous lemon-gold surfaces show moderate semiprooflikeness in the fields, where surprisingly few abrasions are seen. This Select example displays a single noticeable point of contact on Liberty's cheek. A spot of struck-in grease appears on the lower right portion of the eagle's shield.

From The Trifilio Family Collection. NGC ID# 26BW, PCGS# 9012

**1890-S Twenty Dollar, MS63
Well-Struck and Frosty**

- 4157 1890-S MS63 PCGS.** This is by far the most collectible double eagle for the year. More than 800,000 pieces were struck, and survivors can be found through grades as high as this. Well-struck and frosty, each side exhibits warm peach-orange color and light marks. The only abrasion of note occurs left of star 11. NGC ID# 26BZ, PCGS# 9015

1890-S Double Eagle, Attractive MS63

- 4158 1890-S MS63 PCGS.** This attractive double eagle features strong definition and attractive apricot and orange-gold color. A patch of abrasions on Liberty's cheek includes one long, thin scrape and some smaller blunt marks that account for the grade, but the surfaces elsewhere are well-preserved, particularly the reverse, which may very well grade finer on its own.
Ex: Long Beach Signature (Heritage, 1-2/2015), lot 3341, where it realized \$3,760.
From The Trifilio Family Collection. NGC ID# 26BZ, PCGS# 9015

- 4159 1891-S MS63 NGC.** Despite a substantial mintage of 1.2 million pieces, the 1891-S double eagle becomes scarce in grades above the MS63 level. This sharply detailed Select example offers lightly marked peach-gold surfaces with vibrant mint luster throughout. NGC has graded 70 numerically finer examples (7/18).
From The Trifilio Family Collection. NGC ID# 26C4, PCGS# 9018

- 4160 1892-S MS63 PCGS.** The 1892-S double eagle is rare in Gem condition, but it is generally available in Select Mint State such as this coin. Few examples, however, can match the intense, rich gold luster with faint reddish-gold accents offered by this gleaming twenty. Only minor ticks interrupt the frosty surfaces, and Liberty's hair strands are razor-sharp. The eye appeal is more generous than the assigned grade.
Ex: Central States Signature (Heritage, 4/2015), lot 6475, which realized \$2,467.50.
From The Trifilio Family Collection. NGC ID# 26C7, PCGS# 9021

- 4161 1893-S MS63 NGC.** The 1893-S Liberty double eagle is surprisingly difficult to locate in high grade. This attractive Select specimen offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC has graded 23 numerically finer examples (7/18).
From The Trifilio Family Collection. NGC ID# 26CA, PCGS# 9024

**1894 Twenty Dollar, MS64
Fewer Than a Dozen Graded Finer**

- 4162 1894 MS64 PCGS.** In some ways, the 1894 Philadelphia twenty is the embodiment of several Type Three double eagles from the 1890s — moderately available through the near-Gem grade, and rare any finer. This medium yellow-gold example is lustrous and sharply struck with a few light abrasions in the obverse fields. PCGS reports just three finer examples (8/18). NGC ID# 26CB, PCGS# 9025

- 4163 1894-S MS63 NGC.** The 1894-S Liberty double eagle becomes somewhat scarce in grades above the MS63 level. This impressive Select specimen exhibits sharply detailed design elements and lightly marked greenish-gold surfaces with vibrant mint luster on both sides.
From The Trifilio Family Collection. NGC ID# 26CC, PCGS# 9026

1894-S Twenty Dollar, Semiprooflike MS64

- 4164 1894-S MS64 PCGS.** With a moderate mintage of 1 million coins, the 1894-S remains accessible in MS64. PCGS has only graded five finer submissions, however, making Gems significant rarities (7/18). This Choice Mint State piece features orange-gold surfaces and bold design elements, generating excellent eye appeal. The obverse is prooflike, while the reverse shows a mix of vibrant luster and semireflectivity in the fields. NGC ID# 26CC, PCGS# 9026

**1895 Double Eagle, MS64+
Significant Rarity in Higher Grades**

- 4165 1895 MS64+ PCGS.** While this issue is seldom thought of as conditionally rare, the 1895 double eagle is a sleeper in MS64+ and becomes a major rarity in Gem or finer grades. This high-end near-Gem displays a pinpoint-sharp strike and attractive orange-gold color. Frosted luster swirls over clean surfaces that show faint rose accents. PCGS has only seen six finer submissions (7/18). NGC ID# 26CD, PCGS# 9027

1895-S Twenty Dollar, MS64
Rare Just One Grade Finer

- 4166 1895-S MS64 NGC.** Limited marks and vibrant luster combine to make this Choice Uncirculated 1895-S a worthy target for double eagle specialists. Pleasing orange-gold color displays olive-green overtones, while the smooth surfaces show only minor distractions. The strike is sharp throughout. This example has the usual Medium S mintmark perched high and to the right. Both services combined report less than two dozen numerically finer coins (8/18). NGC ID# 26CE, PCGS# 9028

1895-S Liberty Twenty Dollar, MS64
Highest Collectible Grade Level

- 4167 1895-S MS64 NGC.** There is no shortage of 1895-S double eagles (1.1 million coins struck) in circulated condition through MS63. The issue only becomes scarce at this Choice Uncirculated grade level. That is also the highest grade for which examples are reasonably obtainable. Frosty mint luster graces well-struck peach-gold surfaces. The reverse is exceptionally clean, while the obverse exhibits a few tiny flecks. The NGC Census shows 11 finer submissions (7/18).
From The Trifilio Family Collection. NGC ID# 26CE, PCGS# 9028

1895-S Twenty, MS64
Impressively Preserved and Fully Struck

- 4168 1895-S MS64 PCGS.** With the widespread availability of most dates of S-mint twenties, it would actually be possible to assemble a date set of the last 30 years or so of this series. This is a remarkably well-preserved piece that is fully struck and minimally marked. The mint luster is thick and frosted with an even accent of reddish patina. NGC ID# 26CE, PCGS# 9028

1896 Double Eagle, MS64
Bright and Frosty, Few Graded Finer

- 4169 1896 MS64 PCGS. CAC.** Choice Uncirculated condition is an ideal collecting grade for the 1896 double eagle. The issue is scarce but obtainable at that level and rare any finer. Bright mint frost illuminates attractive, strongly defined surfaces. Grazes and shallow abrasions are minimal for the grade, and the original eye appeal is fantastic. PCGS reports eight higher grading events. CAC: 13 in 64, 2 finer (7/18). NGC ID# 26CF, PCGS# 9029

- 4170 1896-S MS63 NGC.** The availability of the 1896-S double eagle declines sharply beyond the MS63 grade level. This Select example shows vibrant honey-gold luster with only light, evenly scattered ticks that limit the grade. The strike is sharp and the eye appeal is pleasing. In a circa-2000 holder.
Ex: Central States Signature (Heritage, 4/2015), lot 6480, which realized \$1,762.50.
From The Trifilio Family Collection. NGC ID# 26CG, PCGS# 9030

- 4171 1897-S MS64 NGC.** An attractive Choice representative of the Type Three motif, with sharply detailed design elements and vibrant mint luster throughout. The colorful orange-gold surfaces are lightly marked and appealing. NGC has graded 25 numerically finer examples (7/18).
From The Trifilio Family Collection. NGC ID# 26CJ, PCGS# 9032

- 4172 1897-S MS64 NGC.** The 1897-S Liberty double eagle is an elusive issue in grades above the MS64 level. This attractive Choice example exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC has graded 25 numerically finer examples (7/18). NGC ID# 26CJ, PCGS# 9032

- 4173 1898-S MS64 NGC. CAC.** The 1898-S Liberty double eagle becomes scarce in grades above the MS64 level. This attractive Choice specimen is sharply detailed and lightly marked, with lustrous orange-gold surfaces and outstanding eye appeal. NGC ID# 26CL, PCGS# 9034

- 4174 1898-S MS64+ PCGS Secure. CAC.** This double eagle issue was struck to the extent of 2.5 million coins, tens of thousands of which survive in Mint State. However, the 1898-S becomes scarce any finer than this MS64+ offering. Both sides are smooth and frosty, showcasing crisp detail and warm honey-gold color. NGC ID# 26CL, PCGS# 9034

**1898-S Double Eagle, MS64+
Well-Made CAC-Approved Example**

- 4175 1898-S MS64+ PCGS. CAC.** The 1898-S is a well-made issue that generally comes with full or nearly full strike detail. Such is the case with this top-notch near-Gem. The hair strands are completely delineated, and the stars show full radials. Vibrant luster issues from each side. NGC ID# 26CL, PCGS# 9034

**1898-S Twenty Dollar, MS64+
Eye-Catching Type Candidate**

- 4176 1898-S MS64+ PCGS. CAC.** Rich peach-gold coloration and thickly frosted mint luster grace the surfaces of this eye-catching Liberty Head double eagle, an ideal type candidate with typical pinpoint definition. Minor chatter is all that prevents a full Gem assessment. Although the 1898-S is among the most accessible issues in the series, representatives are seldom found in higher grades. NGC ID# 26CL, PCGS# 9034
- 4177 1899 MS64+ PCGS. CAC.** The 1899 Liberty double eagle is a popular Type Three issue, with special appeal because of its end-of-the-century date. This Plus-graded Choice example offers well-detailed devices and shows a number of faint die cracks on both sides. The well-preserved orange-gold surfaces radiate vibrant mint luster. NGC ID# 26CM, PCGS# 9035
- 4178 1900 MS64+ PCGS. CAC.** A pleasing olive-gold near-Gem. Boldly struck and lustrous with surprisingly few marks. As nice as can be obtained without paying more than double bullion value. A trace of struck-in grease (as coined) is near the star east of WE, and on the first A in AMERICA. NGC ID# 26CP, PCGS# 9037
- 4179 1900 MS64+ PCGS. CAC.** A Plus-graded Choice example of this perennially popular Type Three issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 26CP, PCGS# 9037
- 4180 1900-S MS63 PCGS.** A popular turn-of-the-century double eagle, with sharply detailed design elements and lightly marked orange-gold surfaces. Vibrant mint luster radiates from both sides, adding to the considerable eye appeal.
From The Trifilio Family Collection. NGC ID# 26CR, PCGS# 9038

**1900-S Twenty Dollar, MS63
High-End Coin in a Green Label Holder**

- 4181 1900-S MS63 PCGS. CAC.** The 1900-S is plentiful in all grades up to MS63, while the population experiences a dramatic decline at the MS64 level. This high-end Select Uncirculated representative features lustrous orange-gold surfaces that display pinpoint definition on the motifs. The fields are beautifully preserved with only minor chatter. Housed in a green label holder. CAC: 23 in 63, 11 finer (7/18). NGC ID# 26CR, PCGS# 9038
- 4182 1901 MS64 NGC. CAC.** A boldly struck and lustrous lemon-gold Choice double eagle. Exemplary aside from a scuff above DOLLARS. The 1901 is a comparatively low-mintage issue. Fewer than 5% of NGC and PCGS MS64 twenties have been confirmed by CAC. Certified in a circa-2000 holder. NGC ID# 26CS, PCGS# 9039
- 4183 1902-S MS63 NGC.** A charming branch mint Type Three double eagle, with well-detailed design elements and lightly marked, lustrous surfaces. Pale orange-gold interiors cede to wheat-gold margins. The 1902-S is a scarce issue in grades above the MS63 level. NGC has graded 43 numerically finer examples (8/18). NGC ID# 26CV, PCGS# 9042
- 4184 1904 MS64+ PCGS Secure. CAC.** Trivial marks scattered across the obverse separates this brilliant double eagle from the Gem category. This sharply defined piece has highly lustrous yellow-gold surfaces. NGC ID# 26CY, PCGS# 9045
- 4185 1904 MS65+ PCGS Secure.** The quintessential Liberty head double eagle issue for type representation claims the largest mintage in the series (6.2 million coins). A tick left of star 12 and another below the 0 in the date are the only apparent flaws on this high-end orange-gold Gem. Fully defined and highly lustrous with specks of crimson on the reverse. Seldom seen finer. NGC ID# 26CY, PCGS# 9045

**1904-S Twenty Dollar, MS65
Only Two Coins Finer at NGC**

- 4186 1904-S MS65 NGC.** The 1904-S, like its P-mint cousin, enjoys one of the highest mintages in the series. However, while the 1904 exists by the thousands in MS65 and by the hundreds in MS66, the 1904-S is scarce in Gem condition and rare at the Premium Gem level. A thick layer of mint frost blankets minimally abraded, well-defined surfaces. Attractive light orange-gold coloration. Only two finer examples have been certified at NGC (8/18). NGC ID# 26CZ, PCGS# 9046

**1904-S Double Eagle, MS65
San Francisco Type Coin**

- 4187 1904-S MS65 PCGS.** The 1904-S double eagle is famously available in all grades up to MS65, but it becomes a major condition rarity at the Premium Gem level. Lively mint frost washes over radiant peach-gold surfaces. The devices are boldly impressed, and major marks are unseen. PCGS reports eight finer submissions (7/18). *From The Trifilio Family Collection.* NGC ID# 26CZ, PCGS# 9046

- 4188 1905-S MS63 PCGS.** A radiantly lustrous Select Mint State example of this 20th century San Francisco issue, showing sharp design elements and only a few scattered contact marks. Mostly orange-gold surfaces yield tinges of rose, peach, and mint throughout. Eye appeal is outstanding. NGC ID# 26D3, PCGS# 9048

**1905-S Double Eagle, MS64
Rarely Encountered Finer**

- 4189 1905-S MS64 NGC.** The San Francisco Mint was the chief producer of double eagles near the end of the Liberty Head series, but that does not always translate into high-grade availability for these dates. The 1905-S had a mintage in excess of 1.8 million coins, yet remarkably few examples are known in Gem or better condition, making attractive MS64 examples the finest obtainable by most collectors. This yellow-gold twenty is sharply struck with radiant mint luster. Light grazes on Liberty's cheek and a mark near star 13 define the grade. NGC reports nine finer pieces (7/18). *Ex: Long Beach Signature (Heritage, 6/2015), lot 4368, where it brought \$4,935.* *From The Trifilio Family Collection.* NGC ID# 26D3, PCGS# 9048

- 4190 1906-D MS63 PCGS.** Radiant prairie-gold luster engulfs remarkably well-preserved surfaces on this Select 1906-D double eagle, the first coinage of this denomination from the Denver Mint. Slight strike weakness is seen on the eagle's head, but eye appeal is nonetheless exceptional. NGC ID# 26D5, PCGS# 9050

- 4191 1906-S MS63 NGC.** This attractive double eagle has vibrant luster and semiprooflike fields, with a strong strike. The reddish-gold color is undisturbed by the minimal abrasions. Much finer than usually seen. *From The Trifilio Family Collection.* NGC ID# 26F6, PCGS# 9051

**1907-D Coronet Double Eagle, MS63
Final Year of the Liberty Head Design**

- 4192 1907-D MS63 PCGS.** Although the Liberty Head double eagle had been in production since 1850, 1907 was only the second year that such coins were struck at the Denver Mint, which opened the year prior. Yellow and lavender-gold hues blend over satiny, well-defined surfaces. Marks are trivial. NGC ID# 26D8, PCGS# 9053

- 4193 1907-S MS63 NGC.** Even reddish patina covers both sides of this softly frosted twenty dollar. This was a transitional year when the Liberty design was finally replaced by the new Saint-Gaudens design. Still, 2.16 million twenties were produced of the Liberty design. The base of the 7 is lightly repunched. Housed in a circa-2000 holder. *From The Trifilio Family Collection.* NGC ID# 26D9, PCGS# 9054

**1907-S Liberty Twenty, MS64
Final-Year Branch Mint Issue**

- 4194 1907-S MS64 PCGS.** A large production of more than 2.1 million double eagles was accomplished at the San Francisco Mint in 1907, the final year of the Liberty design. This attractive Choice example offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded 14 finer examples (8/18). NGC ID# 26D9, PCGS# 9054

**1907-S Double Eagle, MS64
Thickly Frosted and Sharp**

- 4195 1907-S MS64 PCGS.** This final-year double eagle ranks among the most accessible San Francisco issues in the series in mint condition, but PCGS still has only seen 14 finer submissions (7/18). The strike is strong on the stars, curls, and feathers, all of which show full definition. Thickly frosted with attractive light orange-gold color. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

4196 1908 No Motto MS66 PCGS. 30th Anniversary Green Label Holder. Long Rays Obverse. Many of the high-grade examples of this issue originated in the Wells Fargo Hoard. This Premium Gem is not pedigreed to that source, which chiefly consisted of Short Rays examples. The strike is bold, and the yellow-gold surfaces display characteristically satin luster.

Ex: Central States Signature (Heritage, 4/2016), lot 6169, which realized \$2,467.50. NGC ID# 26F6, PCGS# 9142

4197 1908 No Motto MS66 PCGS. *Ex:* Wells Fargo Nevada Gold. No Motto 1908 double eagles from the Wells Fargo Hoard are some of the most well-preserved No Motto Saints known to exist today. This Premium Gem example displays well-struck motifs and luminous, frosty orange-gold luster. Eye appeal is outstanding. Housed in a green label holder. NGC ID# 26F6, PCGS# 9142

4198 1908 No Motto, Wells Fargo Nevada, MS66 PCGS. *Ex:* Wells Fargo Nevada Gold. This Premium Gem derives from one of the most prolific hoards of double eagles ever discovered, one that accounts for the availability of the 1908 No Motto twenty through MS68 and even MS69. Lilac and lemon-gold hues blend over thickly frosted and beautifully preserved surfaces. The Capitol and torch fingers are full. Housed in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

4199 1908 No Motto, Wells Fargo Nevada, MS66 PCGS. *Ex:* Wells Fargo Nevada Gold. This MS66 twenty dollar gold piece combines a bold strike with outstanding preservation, eye-catching color, and vibrant mint luster. Yellow-gold surfaces show lavender accents and only three or four obvious field marks. A high-end No Motto type coin. Housed in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

4200 1908 No Motto, Wells Fargo Nevada, MS66 PCGS. *Ex:* Wells Fargo Nevada Gold. A spectacular Premium Gem representative of the short-lived No Motto design, from the famous Wells Fargo Hoard, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-D Double Eagle, MS64
With Motto Type

4201 1908-D Motto MS64 NGC. CAC. The motto IN GOD WE TRUST was added to the reverse of the double eagles in 1908 following complaints about its omission. This lovely Choice Mint State example has frosty yellow luster that creates strong eye appeal. The scattered, grade-consistent marks are inconsequential. NGC ID# 26F9, PCGS# 9148

4202 1908-S VF30 PCGS. The 1908-S Saint-Gaudens double eagle claims a low-mintage of just 22,000 pieces. This VF30 example was apparently released into circulation at the time of issue, and shows light, but noticeable, wear on the design elements and lightly abraded orange-gold surfaces that retain traces of original mint luster. Housed in a green label holder. NGC ID# 26FA, PCGS# 9149

4203 1909-S MS64 NGC. An attractive Choice representative of this early series issue, with sharply detailed design elements throughout and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is outstanding.
From The Trifilio Family Collection. NGC ID# 26FE, PCGS# 9153

1909-S/S FS-501 Twenty, MS64+
Popular Repunched Mintmark

4204 1909-S/S FS-501 MS64+ PCGS. Traces of an underlying mintmark, including the top and bottom serifs, are visible beneath the bold S mintmark on the obverse of this Choice Mint State double eagle. This sharply defined double eagle has frosty yellow-gold luster. Population for the variety: 34 in 64 (3 in 64+), 8 finer (7/18). NGC ID# 26FE, PCGS# 145741 Base PCGS# 9153

4205 1911-D MS65+ PCGS. A great early type coin in the series, the 1911-D was struck to the extent of 846,500 pieces. Many examples survive through MS65 and even MS66. This high-quality straw-gold Gem glows with frosty mint luster and features few marks for the technical grade. The torch hand and Capitol are well-detailed.
Ex: New York Signature (Heritage, 10-11/2016), lot 4754, which realized \$2,937.50. NGC ID# 26FK, PCGS# 9158

4206 1911-D/D FS-501 MS64 NGC. The mintmark is repunched to the east on this near-Gem 1911-D Saint-Gaudens double eagle. Both sides display vibrant cartwheel luster and bright yellow-gold color. The strike is sharp and abrasions are trivial. FS-501 is elusive in finer condition. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

1911-S Double Eagle, MS65
Rare in Better Condition

4207 1911-S MS65 NGC. An available date in lower grades, the 1911-S Saint-Gaudens double eagle is difficult to locate above the MS65 level. This impressive Gem is sharply detailed in most areas, with just a touch of softness on the lower stars and the Capitol building. Lustrous orange-gold surfaces reveal minor grade-consistent marks.
Ex: Long Beach Signature (Heritage, 9/2013), lot 5473, where it realized \$ 3,818.75. NGC ID# 26FL, PCGS# 9159

1913-S Double Eagle, MS63
Low Mintage of 34,000 Coins

- 4208 1913-S MS63 PCGS.** The 1913-S is accessible in the absolute sense in MS63 and even MS64, but its ultra-low mintage of 34,000 pieces heightens demand and puts pressure on the coins that are offered at those levels. This frosty Select example has luminous yellow-gold surfaces that show small scattered marks. Strike detail is good, though softness occurs on the Capitol and adjacent stars.
From The Trifilio Family Collection. NGC ID# 26FR, PCGS# 9163

1914 Twenty Dollar, MS64
Brightly Lustrous

- 4209 1914 MS64 PCGS.** The PCGS *Population Report* confirms the scarcity of the 1914 double eagle in high grades, showing merely 44 submissions in MS65 or above (8/18). This is a more affordable alternative with brightly lustrous surfaces and good detail on the relief elements. Varying shades of light yellow and orange-gold color are seen on each side. A gouge occurs above Liberty's head with silver-colored residue that has rubbed off on the surrounding areas. NGC ID# 26FS, PCGS# 9164

- 4210 1914-S MS65 NGC.** An impressive Gem Saint-Gaudens double eagle, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is outstanding.
From The Trifilio Family Collection. NGC ID# 82KA, PCGS# 9166

1914-S Saint-Gaudens Twenty, MS65+

- 4211 1914-S MS65+ PCGS Secure. CAC.** The 1914-S is a plentiful date in the Saint-Gaudens double eagle series. A general rule of thumb is that the mintmarked issues of the 1910s are common and the Philadelphia issues of the 1920s are common, although there are exceptions. This lovely Gem has frosty luster and bright yellow surfaces. NGC ID# 82KA, PCGS# 9166

- 4212 1915-S MS65 NGC.** A delightful Gem representative of this popular branch mint issue, with sharply detailed design elements throughout and well-preserved orange-gold surfaces that radiate vibrant mint luster. Overall visual appeal is terrific.
From The Trifilio Family Collection. NGC ID# 26FW, PCGS# 9168

1922-S Twenty Dollar, Colorful MS63

- 4213 1922-S MS63 PCGS.** The frosty surfaces of this Select example showcase a delicate blend of yellow-gold and mint-green hues. Liberty's visage is well-defined, as are the eagle's talons. A number of reddish-brown copper spots give the obverse character, though the eagle shows three significant abrasions on its feathers.
Ex: Central States Signature (Heritage, 4/2012), lot 6946, where it realized \$3,450.
From The Trifilio Family Collection. NGC ID# 26G4, PCGS# 9174

- 4214 1923-D MS65 NGC.** The 1923-D is a plentiful Saint-Gaudens double eagle, but it is also one that often comes with great eye appeal, making it popular as a type coin. This Gem showcases radiant, frosty luster and a bold strike. A small mark in the right obverse field and a few others on the high points of Liberty's figure are trivial distractions at worst. NGC ID# 26G6, PCGS# 9176

- 4215 1923-D MS65+ PCGS.** Type collectors need not break the bank to acquire this eye-catching 1923-D Saint. The strike is bold, and the frosty lilac and reddish-gold luster rolls over each side. There are a few small marks around the upper figure of Liberty that preclude a full MS66 designation. NGC ID# 26G6, PCGS# 9176

- 4216 1924 MS66 PCGS Secure.** *Ex: Coll. Champagne Lanson.* The go-to type-coin issue for many collectors, the 1924 Saint-Gaudens double eagle has a reputation as the most available date in the series in high grade. This Premium Gem displays frosted honey-gold luster and bold relief elements. A few trivial grazes are not out of line for the grade. Infrequently seen finer. NGC ID# 26G7, PCGS# 9177

- 4217 1925 MS66 PCGS.** Although the P-Mint twenties from this decade are considered common dates, they are elusive in top grades. This Premium Gem has brilliant orange gold luster and excellent eye appeal. PCGS has only certified seven examples numerically finer (7/18). NGC ID# 26GA, PCGS# 9180

**1926 Twenty Dollar Saint, MS66
Remarkably Clean Surfaces**

- 4218 1926 MS66 PCGS.** Like many of the P-mints from this decade, the 1926 is available in the better grades of Uncirculated, which is what makes these coins so appealing for type collections. Even for the grade, though, this is an astonishingly well-preserved coin. The surfaces are smooth with glowing mint luster and even reddish-gold color. NGC ID# 26GD, PCGS# 9183

**1926-S Double Eagle, MS62
Heavily Melted Issue**

- 4219 1926-S MS62 PCGS.** The San Francisco Mint struck more than 15 million double eagles during the 1920s, but only a tiny fraction of those coins ever escaped Treasury vaults. Most were melted and the rest sent overseas. The 1926-S is scarce in Mint State and a great rarity in circulated condition. This lustrous honey-gold representative is bright with yellow-gold centers and rich orange-gold peripheries. Slight softness of strike is noted around the margins, and bagmarks are minimal.
Ex: Denver Signature (Heritage, 8/2006), lot 2463; ANA Signature (Heritage, 8/2007), lot 3517; Dallas Signature (Heritage, 10/2012), lot 6430, where it brought \$4,112.50.
From The Trifilio Family Collection. NGC ID# 26GF, PCGS# 9185

- 4220 1927 MS65+ PCGS.** CAC. A well-struck apricot-gold and lime-green Gem of this popular Saint-Gaudens type issue. Marks are minimal and the eye appeal is substantial. The mintage of the 1927 Philadelphia twenty is less than its rare San Francisco counterpart, but more bags of the former were distributed prior to Roosevelt's gold recall. NGC ID# 26GG, PCGS# 9186

COMMEMORATIVE SILVER

- 4221 1921 Alabama 2x2 MS66 PCGS.** An impressive Premium Gem representative of the popular 2x2 variety that signified Alabama was the nation's 22nd state, this piece has frosty silver luster with gold and iridescent toning. PCGS has only certified eight finer examples (8/18). NGC ID# BYEZ, PCGS# 9225

- 4222 1935 Arkansas MS67 PCGS Secure.** CAC. This Superb Gem 1935 Arkansas Centennial half dollar is tied for the finest at PCGS and CAC, and it is conditionally rare as such. Frosty luster on each side exhibits wisps of champagne toning but is otherwise brilliant. The strike is sharp and no abrasions are seen. Population: 25 in 67 (3 in 67+), 0 finer. CAC: 13 in 67, 0 finer (7/18). NGC ID# BYF5, PCGS# 9233

- 4223 1937-S Boone MS67+ PCGS.** CAC. A Plus-graded Superb Gem, with sharply defined design elements and impeccably preserved surfaces that show a few hints of sea-green and magenta toning around the peripheries. Population: 49 in 67 (5 in 67+), 3 finer. CAC: 18 in 67, 0 finer (7/18). NGC ID# BYG5, PCGS# 9272

- 4224 1938-S Boone MS67 NGC.** The 1938-S Boone half dollar is scarce this fine and a genuine rarity in better grades. The eye appeal on this Superb Gem is outstanding. Pristine satin luster emerges from pearl-gray centers and cedes to vivid rainbow border toning around the margins. A magnificent example. Housed in a prior-generation holder. Census: 32 in 67 (1 in 67+, 1 in 67 ★), 2 finer (7/18). NGC ID# BYG8, PCGS# 9276

**1936-D Cincinnati Half Dollar, MS67+
Two Coins Finer at PCGS**

- 4225 1936-D Cincinnati MS67+ PCGS.** CAC. Frosty, mostly brilliant surfaces show blushes of lavender and gold patina with a ring of deeper orange-russet and green toning around much of the reverse border. As expected of a coin at this level, there are simply no marks to report, and the strike is fully defined. Population: 59 in 67 (13 in 67+), 2 finer. CAC: 29 in 67, 1 finer (7/18). NGC ID# BYCK, PCGS# 9284

- 4226 1936 Cleveland MS67 NGC.** Deep rose-red and green shades dominate this high-grade Cleveland commemorative half, though portions of the reverse retain a "porthole" of near-brilliance. Thorough evaluation beneath a lens fails to locate any indications of contact. NGC ID# BYGB, PCGS# 9288

- 4227 1928 Hawaiian AU55 PCGS.** CAC. Shades of lavender-gray and pale gold toning blanket the lightly abraded surfaces of this Choice AU specimen, with just a trace of wear on the well-detailed design elements. Satiny mint luster adds to the considerable visual appeal. NGC ID# BYGR, PCGS# 9309

- 4228 1928 Hawaiian MS63 PCGS.** An impressive Select specimen of this key silver commemorative, with well-detailed design elements and shades of lavender-gray and champagne-gold toning over both sides. Satiny mint luster shines through the patina. NGC ID# BYGR, PCGS# 9309

- 4229 1928 Hawaiian MS64 PCGS.** Subtle hints of lavender and golden-tan toning highlight the well-preserved, lustrous surfaces of this attractive Choice example, with well-detailed design elements and strong eye appeal. Housed in a green label holder. NGC ID# BYGR, PCGS# 9309

- 4230 1918 Lincoln MS67 PCGS.** CAC. A spectacular Superb Gem with sharply detailed design elements and virtually pristine surfaces that radiate vibrant mint luster throughout. Vivid shades of sea-green and magenta toning enhance the exceptional eye appeal. PCGS has graded four finer examples (8/18). NGC ID# BYGU, PCGS# 9320

- 4231 1921 Missouri MS65 NGC.** A delightful Gem representative, from a distribution of 15,428 pieces, this coin exhibits sharply detailed design elements and well-preserved brilliant surfaces, with vibrant mint luster on both sides. NGC has graded 42 numerically finer examples (7/18). NGC ID# BYH2, PCGS# 9330

4232 1921 Missouri 2x4 MS65 PCGS. An attractive Gem representative of the popular 2x4 variety, with well-detailed design elements and well-preserved surfaces that show highlights of lavender-gray and pale gold toning. Satiny mint luster adds to the outstanding eye appeal. PCGS has graded 45 numerically finer examples (7/18). NGC ID# 2FE9, PCGS# 9331

4233 1937-D Oregon MS68 NGC. A pristine example of the popular Oregon Trail type. Golden-brown and powder-blue hues accompany the date, but most of the coin is stone-gray. A good strike, despite minor blending on the C in AMERICA and the back of the covered wagon. Census: 82 in 68 (2 in 68+, 6 in 68 ★, 2 in 68+ ★), 1 finer (7/18). NGC ID# BYHG, PCGS# 9347

4234 1937-D Oregon MS68 NGC. CAC. A scarce high-end example of the 1937-D Oregon Trail commemorative half dollar, tied for the finest endorsed by CAC. Shimmering, luminous surfaces illuminate a hint of light golden toning overall, while the borders exhibit deeper amber and russet patina. No abrasions or significant strike softness are seen. Census: 82 in 68 (2 in 68+, 6 in 68 ★, 2 in 68+ ★), 1 finer. CAC: 36 in 68, 0 finer (7/18). NGC ID# BYHG, PCGS# 9347

4235 1936-D San Diego MS67+ PCGS. A typical strike for this issue shows weakness on certain reverse design elements including the observation tower. This Superb Gem has frosty silver luster within a frame of light gold toning. PCGS has certified only 18 examples in MS67+, and just one piece is finer (7/18). NGC ID# BYJ2, PCGS# 9372

1935 Texas Half Dollar, MS68 None Certified Finer

4236 1935 Texas MS68 NGC. NGC and PCGS have combined to grade just 23 of these Superb Gem Texas half dollars as MS68, and none have earned a finer numerical grade. This beauty has an above average strike and light silver-gray surfaces within a ring of delicate rose toning. Census: 14 in 68, 0 finer (7/18). NGC ID# BYJA, PCGS# 9382

4237 1936 Texas PDS Set MS67 to MS67+ NGC. CAC. Each coin in this well-matched set is housed in a consecutively numbered NGC holder, graded MS67 with a green CAC approval sticker. The 1936-D and 1936-S halves enjoy added Plus-designations. Near-pristine surfaces are largely brilliant with original golden accents. (Total: 3 coins)

COMMEMORATIVE GOLD

4238 1915-S Panama-Pacific Gold Dollar MS66 NGC. A sharply struck example with virtually pristine satin luster that glows beneath a light. Shades of orange-gold, peach, and brass-yellow encompass each side, offering outstanding eye appeal. NGC lists 68 finer submissions (8/18), although this piece is rivals many of those in terms of eye appeal. NGC ID# BYLH, PCGS# 7449

4239 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Part of the extensive commemorative series issued in conjunction with the 1915 Panama-Pacific Exposition that was held in San Francisco, this Premium Gem gold dollar has brilliant light yellow luster and frosty surfaces with excellent eye appeal. PCGS has certified only 77 finer examples (7/18). NGC ID# BYLH, PCGS# 7449

1915-S Panama-Pacific Quarter Eagle, MS63

4240 1915-S Panama-Pacific Quarter Eagle MS63 NGC. The 1915-S Panama-Pacific quarter eagle was issued as part of a five commemorative coin program in conjunction with the Panama-Pacific International Exposition. This impressive Select specimen exhibits well-detailed design elements and lightly marked orange-gold surfaces, with satiny mint luster and outstanding eye appeal. NGC ID# BYLP, PCGS# 7450

4241 1922 Grant Gold Dollar, No Star, MS64 PCGS. A nice strike characterizes this attractive Choice Mint State Grant gold dollar that lacks the star in the obverse field. This piece has frosty surfaces and brilliant yellow-gold luster. Faint hairlines prevent a higher grade. NGC ID# BYLN, PCGS# 7458

4242 1922 Grant Gold Dollar, With Star, MS65 NGC. CAC. The With Star and No Star variants claim equal distribution totals of 5,016 coins, but this variety is slightly more popular. Gleaming yellow-gold surfaces are beautifully preserved and strongly struck. Well-deserving of the green CAC approval sticker. NGC ID# BYPS, PCGS# 7459

TERRITORIAL GOLD

(1842-52) A. Bechtler Gold Dollar, MS63 K-24, 27G., 21C., Semiprooflike Reverse

4243 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS63 PCGS Secure. K-24, R.3. This is the most often seen variant of the Bechtler gold coinage, struck by August, son of Christopher Bechtler, some time during the 1840s. The obverse is bright yellow-gold and lustrous, while the reverse has a hint of semiprooflikeness in the fields. Definition is strong, and marks are undistracting. An excellent example of this popular territorial type, rarely found so well-preserved. Listed on page 394 of the 2019 *Guide Book*. Population: 6 in 63, 1 finer (7/18). NGC ID# 2B99, PCGS# 10040

CALIFORNIA FRACTIONAL GOLD

1880 Indian Octagonal Quarter, MS67
BG-799J, Single Finest at PCGS

- 4244** 1880 Indian Octagonal 25 Cents, BG-799J, R.3, MS67 PCGS **Secure**. As of (7/18), PCGS has certified 135 examples of BG-799J, but only the present lot has attained the lofty MS67 grade. The lemon-gold surfaces are mirrored and pristine. Tiny strike-throughs are noted on the central reverse, as made. A few star “ghosts” accompany the right reverse border. BG-799J is among the many varieties issued by San Francisco jeweler Christopher Ferdinand Mohrig. NGC ID# 2BRW, PCGS# 10636

1859 Round Liberty Quarter, BG-801
MS67, Tied for Finest Certified

- 4245** 1859 Liberty Round 25 Cents, BG-801, R.3, MS67 PCGS **Secure**. BG-801 is the sole 1859-dated round quarter variety, credited to Frontier, Deviercy & Co. It is crude even by the standards of the series, and features a homely Liberty and an awkwardly entered denomination. Nonetheless, the sun-gold fields exhibit a splendid mirrored finish, and the strike is intricate throughout. A pristine Superb Gem. Population: 2 in 67, 0 finer (7/18). NGC ID# 2BSN, PCGS# 10662

- 4246** 1852 Indian Octagonal 50 Cents, BG-963, R.6, MS65 Deep Prooflike NGC. BG-962A and BG-963 were struck from the same pair of dies, but BG-963 is the later lapped die state with CAL fragmented and the right leg of the R in DOLLAR attenuated. BG-962A is extremely rare and BG-963 is rare to very rare. The present lot is the sole example certified as Deep Prooflike (7/18). It is a brightly mirrored sun-gold Gem with an intricately struck obverse and minor incompleteness of impression on the central reverse. PCGS# 910821 Base PCGS# 10821

PATTERNS

1838 Half Dollar in Silver
Judd-73 Restrike, PR61

- 4247** 1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR61 PCGS. A draped bust of Liberty faces left on the obverse, with a flying eagle dominating the reverse. Kneass was once believed to designed this pattern, but visual evidence points to Christian Gobrecht, since the face of Liberty bears a strong resemblance to her counterpart on the Liberty eagle, also introduced in 1838. Struck in silver with a reeded edge. Medallion alignment. The reverse is cracked in the usual places. Probably 50 to 60 pieces are known. Originals are supposed to exist, and if found they should weigh 206 grains with limited reverse die cracks. Dusky dove-gray toning blankets the fields and motifs, while the borders exhibit peach-gold patina. The strike is bold, and no marks or hairlines detract. Housed within a green label holder. NGC ID# 296N, PCGS# 11288

1851 Perforated Cent in Billon
Judd-127 Original, PR64

- 4248** 1851 One Cent, Judd-127 Original, Pollock-149, Low R.6 PR64 PCGS. Struck on a perforated annular planchet. The obverse has CENT above and ONE TENTH SILVER below. The reverse shows a wreath of laurel around the second, larger ring with the legend UNITED STATES OF AMERICA outside. Struck in billon with a plain edge. Allegedly restrikes exist of this die pairing, but no diagnostics have been published regarding how to distinguish between original and restrikes. The original brightness in the fields is largely subdued with each side now showing deeper gray patina. No die cracks are seen on either side (if this is a diagnostic of restrikes). NGC ID# 298K, PCGS# 11545

**1854 Cent Pattern, PR63 Brown
Judd-159a, Copper Electrotpe**

- 4249** 1854 One Cent, Judd-159a, Pollock-186, High R.6, PR63 Brown NGC. An 1854 Seated dollar obverse was subjected to a crude reducing lathe, creating a smaller obverse die with blurry device details and circular lathe lines. The reducing lathe diminished many details including the crossbar of the 4, causing the date to resemble 1851. The pattern reverse features 1 CENT encircled by an oak and acorn wreath. Judd-159a is a copper electrotpe of the very rare Judd-159. The edge is plain with a “nice seam around the edge” per USPatterns.com. A satiny and unblemished deep walnut-brown specimen.

Ex: “Colonel” E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$15; Eric P. Newman Numismatic Education Society; Central States Signature (Heritage, 4/2013), lot 3917, which realized \$4,112.50. NGC ID# 2VPG, PCGS# 11654

**1855 Flying Eagle Cent in Bronze
Judd-168 Original, PR63 Red and Brown**

- 4250** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Red and Brown PCGS. Thirteen stars surround an eagle that is flying slightly upward, similar to that seen on the Gobrecht dollar reverse. The reverse is based upon the then-current large cent, but the wreath is diminished in scale. Struck in bronze with a plain edge. Orange-gold is prevalent, although deep blue-green fills the interior of the wreath.

Ex: FUN Signature (Heritage, 1/2008), lot 3545, which realized \$3,450. NGC ID# 29AG, PCGS# 11721

**1855 Flying Eagle Cent in German Silver
Judd-171a, PR55**

- 4251** 1855 Cent, Judd-171a, Pollock-196, Low R.7, PR55 NGC. 116.5 gm. The obverse depicts a large eagle flying left, along with 13 peripheral stars and the date below. The reverse design resembles the contemporary cent, except the wreath is smaller in scale. The diameter is slightly reduced from a large cent. Struck in German silver alloy with a plain edge. The specific alloy of this piece has been metallurgically tested and the results are: 65% copper, 17% zinc, and 18% nickel. Graded PR55 by NGC, though there is no indication of circulation wear. Instead, this is a softly struck specimen with unabraded surfaces. One small spot is near star 2. NGC ID# 29AN, PCGS# 11737

**1867 With Rays Five Cents in Copper
Judd-572, PR63 Brown**

- 4252** 1867 Shield Five Cents, Judd-572, Pollock-648, Low R.7, PR63 Brown NGC. The regular issue With Rays dies, struck in copper with a plain edge. The rays between the reverse stars were short-lived on the Shield nickel and disappeared during 1867, creating a second subtype for the design. This particular coin has received comment on USPatterns.com: “Over a half dozen are known struck from Dannreuther die #1. The example in Heritage 4/18 appears to have received only one strike from the dies and is a later state with some obverse die cracks.” As expected from that description, the strike details are weak on each side. Both sides are covered with deep brown patina. PCGS# 60782

1868 Cent Pattern in Nickel
Judd-605, PR65
Ex: Newman

- 4253** 1868 One Cent, Judd-605, Pollock-670, R.5, PR65 NGC. The obverse design is similar to the regular issue three cent nickel, in a reduced scale for this smaller diameter pattern. The reverse has a small scale version of the wreath that is familiar to collectors of Flying Eagle cents, Type Two and Type Three gold dollars, and three dollar gold pieces. The wreath encloses an unribbed Roman Numeral I as the sole indication of the denomination. Struck in nickel with a plain edge. This is an early die state of a pattern that is usually found with severe obverse die breaks. These pieces were issued in two-coin sets along with five cent patterns, either Judd-623, 633, or 634. This sharply defined light gray example has flashy fields with strongly mirrored surfaces beneath hazy champagne toning. A strike-through appears on Liberty's cheek, and a few toning flecks on the obverse confirm the originality of this diminutive pattern. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$12.50; Eric P. Newman Numismatic Education Society; Newman I (Heritage, 9/2013), lot 3960. NGC ID# 29UU, PCGS# 60817

1868 Aluminum Three Cent Nickel
Judd-621, PR62

- 4254** 1868 Three Cent Nickel, Judd-621, Pollock-690, Low R.7, PR62 PCGS. Regular dies trial issue for the three cent nickel. Struck in aluminum with a plain edge. Nicely reflective and cameoled on each side, a number of small contact marks and several spots of oxidation explain the grade of this piece. This passage from the USPatterns.com website reinforces the legitimacy of this particular metallurgical strike: "These were deliberately struck to show how easily aluminum coined ..." Ex: ANA Signature (Heritage, 8/2001), lot 8348. NGC ID# 29NC, PCGS# 60838

1868 Five Cents Pattern in Copper
Judd-627, PR64 Brown

- 4255** 1868 Five Cents, Judd-627, Pollock-696, Low R.7, PR64 Brown NGC. The obverse resembles the adopted three cent nickel design, while the reverse has a large 5 and small CENTS surrounded by an open wreath. Struck in copper with a plain edge. These wide-planchet patterns were struck in nickel, copper (regular size), copper (wide planchet, as seen here), and aluminum (regular and oversized planchets). Reeded edge variants were also produced. Only a half-dozen of these oversized planchet pieces in copper are believed known. The surfaces have evenly mellowed with just the slightest reflectivity still evident in the obverse fields. NGC ID# 29NH, PCGS# 60844

1869 Standard Silver Ten Cents in Aluminum
Judd-700, PR64

- 4256** 1869 Standard Silver Ten Cents, Judd-700, Pollock-779, Low R.7, PR64 NGC. On the obverse, a right-facing Liberty wears a Phrygian cap decorated with three stars. UNITED STATES OF AMERICA borders the upper periphery of the obverse, with IN GOD WE TRUST in a curved ribbon below. The reverse displays STANDARD SILVER around the upper edge, and 10 CENTS is inside an oak and laurel wreath. Struck in aluminum with a reeded edge. Examples are also known in silver and copper (reeded and plain edges), but the aluminum pieces are the scarcest, in this case only an estimated half-dozen examples are known. The fields were heavily striated and have imparted depth of reflectivity that is often seen on aluminum patterns. The grade is derived from a couple of spots of oxidation. A curious flan crack is seen on the obverse margin at 4 o'clock. A planchet lamination, often seen on aluminum patterns, is seen at the top of the reverse. NGC ID# 29RD, PCGS# 60925

1869 Standard Silver Quarter in Silver
Judd-728, PR63 Cameo

- 4257** 1869 Standard Silver Quarter, Judd-728, Pollock-809, High R.6, PR63 Cameo NGC. On the obverse a right-facing Liberty wears a starless tiara. A headband behind the tiara bears the legend LIBERTY in raised letters. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST on a curved ribbon below. On the reverse STANDARD SILVER borders the upper edge, with 25 / CENTS in an open oak and laurel wreath. Struck in silver with a plain edge. Significant field-device contrast produces a distinct Cameo effect in spite of pale, dusky gold patina that delicately complements each side. Light striations do not distract. PCGS# 512010 Base PCGS# 60955

1871 Five Cent Pattern in Nickel
Judd-1053, PR64 Cameo

- 4258** 1871 Five Cents, Judd-1053, Pollock-1188, High R.6, PR64 Cameo PCGS. CAC. The bust of Liberty is similar to that seen on the issued three cent nickel. The reverse has a simple laurel wreath with 5 CENTS inside. Struck in nickel with a plain edge. Also struck in copper and aluminum (the aluminum pieces are rare). This is an all-brilliant pattern with die cracking seen peripherally around the obverse through the lettering and date. PCGS# 528671

1896 Cent Pattern, PR64 Brown
Judd-1768, Eagle Eye Photo Seal

- 4259** 1896 One Cent, Judd-1768, Pollock-1983, R.5, PR64 Brown PCGS. Eagle Eye Photo Seal, card not included. A Charles Barber design that depicts a shield on the central obverse with LIBERTY incused. Crossed poles behind support a Liberty cap and eagle. E PLURIBUS UNUM is at the top rim, with stars seven left, six right. On the reverse a large 1 occupies the center, with CENT below, an olive sprig surrounds and UNITED STATES OF AMERICA encircles most of the rim. Struck in bronze with a plain edge. A lovely chocolate-brown and apple-green specimen with minimal carbon and a typical strike. Housed in an old green label holder. Population: 6 in 64 Brown, 1 finer (7/18). NGC ID# 2AM7, PCGS# 62222

(Total: 5 tokens)

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Twenty percent (20%) on Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction Lots;
 - Twenty-three percent (23%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
 - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments
(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a

consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery, Shipping, and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.xz for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. **NOTICE: Auctioneer is neither an insurance company nor a common carrier of any type.**
 - Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
 - Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, choice of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person.

Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDep@HA.com.

Notice as to an Auction in New York City

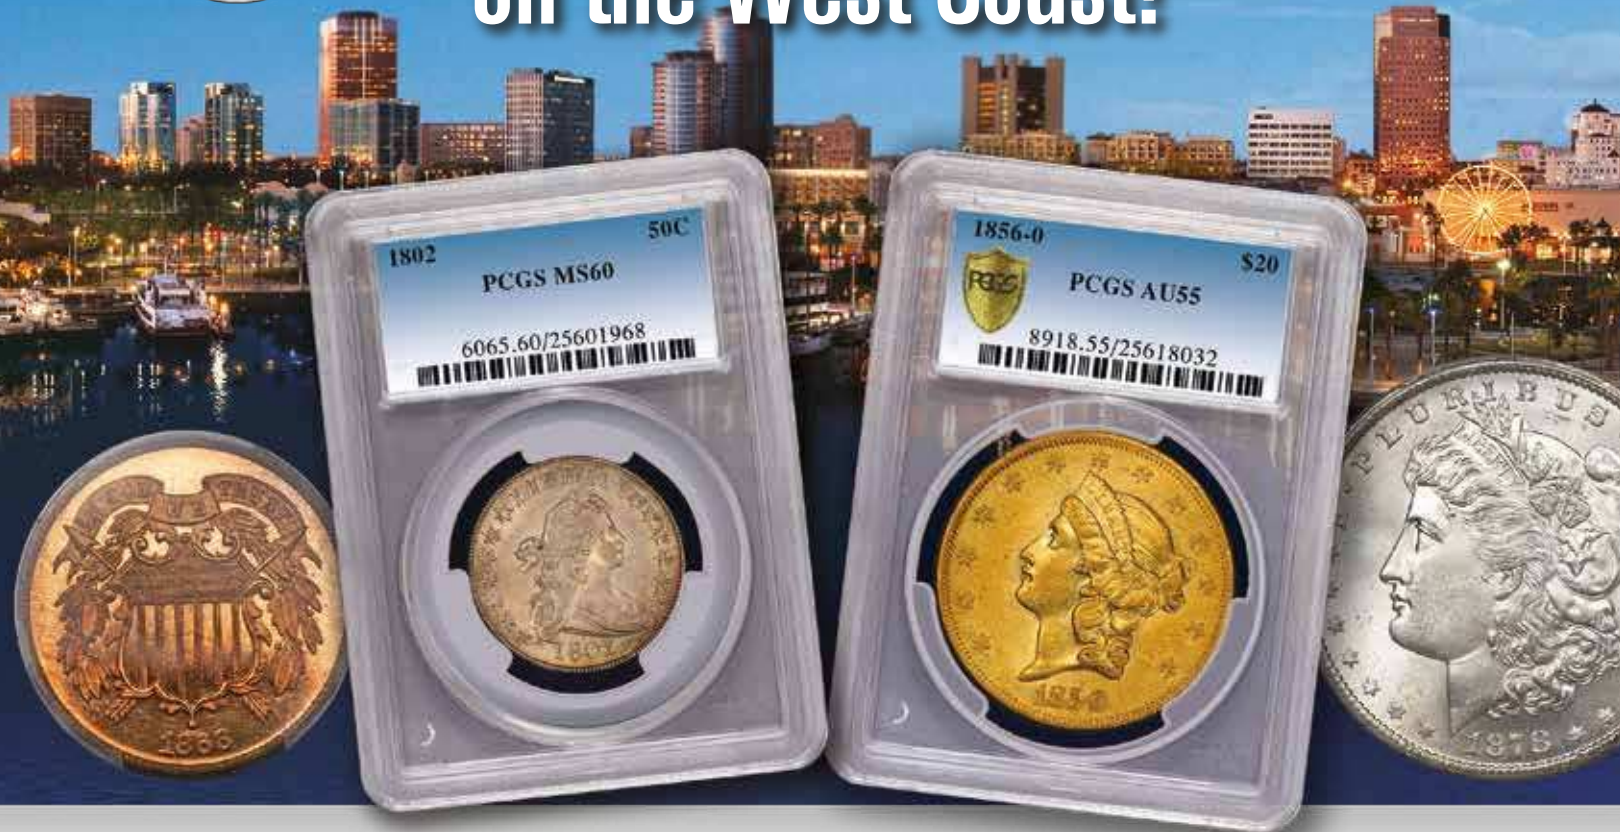

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

The Largest Coin Show on the West Coast!

Sept 6
Sept 7
Sept 8

The Long Beach Expo offers a complete collectibles experience including:

- Multi-million dollar auction by Heritage Auctions – the official auctioneer of the Long Beach Expo
